Member of Note : Sarah Brown

The London-based interior designer has brought her eye for colour to this house in Chiswick with the help of DeVol. When designing a kitchen, Sarah often uses what she calls the 'three colour rule' to help her schemes feel bold but still cohesive. Here, she chose a deep aubergine to anchor the central island and a lively mustard yellow for the joinery and lower walls, and introduced an unexpected dash of lilac with the bar stools. She kept the rest of the scheme neutral: 'As the point where the white ceiling met the wall was uneven, we continued the white down onto the upper part of the wall to create a sharper line,' she explains. Her joiner then created shaped, wooden pelmets, also painted white, as an alternative to window treatments. The final flourish was the addition of artwork and some flea-market finds to bring another layer of personality to the room. *sarahbrowninteriors.com*
