The COVID-19 vaccines are safe and effective. They have been tested with thousands of people around the world, including Black, Indigenous, Latino/a and people of color. They're safe for our communities and will help us stop the spread of COVID-19. To learn more about the COVID-19 vaccines, visit SafeStrongOregon.org/vaccines

Like most vaccines, the COVID-19 vaccines are given as a shot to the upper arm. The vaccines will make your body stronger to fight COVID-19 and protect you from getting sick. For some kinds of the COVID-19 vaccine, you will need to get more than one shot. Your second shot will be 3 or 4 weeks after your first. If you get this type of vaccine, it is important for you to get both shots for the vaccine to work. To learn more about the COVID-19 vaccines, visit SafeStrongOregon.org/vaccines
