PRODUCT OVERVIEW

The Central Base Station site controller serves as the heart of your SimplySnap solution. This network edge appliance provides quick browser-based access and local control of smaller systems with hundreds of devices.

Each SimplySnap system includes a variety of Synapse-enabled devices that communicate with each other and the CBS to form a local mesh network. The CBS monitors, controls, and automates critical devices to save energy across different types of systems.

For managing larger sites or multiple locations, SimplySnap cloud applications¹ add advanced capabilities and consolidate multiple site controllers into a single user interface for integrated management across installations with thousands of devices.

KEY FEATURES:

- IP65 rated with built in surge protection
- Programmable push buttons for manual control
