

Software Engineer

Synapse is looking for a Software Engineer to join our SimplySnap product team. SimplySnap is our wireless Networked Lighting Control system and when you combine that with SimplySnap Cloud, the customer gains consolidated management of locations across their enterprise. As a Software Engineer working on SimplySnap products, you can look forward to:

- Working with a small and talented vertically integrated team of software and hardware engineering, customer solutions, supply chain, manufacturing, and sales, collaborating to define requirements and delivering our end-to-end products to market
- Solving exciting problems and using your skills to tackle projects from requirements to completion for bringing the best solutions possible to our customers for controlling their SimplySnap systems in a variety of settings: Site and Area Lighting, Sports Lighting, Warehouses, Industrial, Retail, and Commercial
- Contributing to full stack cloud applications, On-Premise web applications, and tooling using Typescript for your main duties while also exercising and expanding your knowledge with a variety of languages and frameworks across the organization
- Deploying and maintaining our cloud services in AWS, relying on Terraform, Serverless, and GitHub Actions to get the job done

Required Skillset:

- Typescript
- Angular + NgRx + Material
- GraphQL
- Python
- Terraform / Serverless
- GitHub Actions
- Containerization / AWS ECS / Docker
- AWS Lambda
- OpenSearch
- Jira and familiarity with working in Agile workflows desired but not required
- BS in Computer Engineering, Software Engineering, or Computer Science desired but not required
