**STAY CONNECTED**
Reliable technology is essential in today's event world. With that in mind, we make sure our digital infrastructure is robust and secure; capable of supporting network services, ISDN and data hungry video.

Free Wi-Fi suitable for browsing and email runs throughout the Convention Centre. Faster bandwidths for online product demonstrations and streaming are also available on request. Our in-house engineers can also supply equipment and configure secure local area networks for you.

Hardware such as personal computers, monitors, large displays and printers can also be delivered to your on-site office or event space and installed by our engineers.

**READY TO ORDER?**
Complete the online IT order form below. Or for further IT and Wi-Fi support, talk to you event manager.
