Watch the video:

MANAGING INBOUND GRAIN

- Add and manage purchase offer contracts in the Inbound window of SKY Grain
- Refine SKY user access to purchase offer contracts in SKY Admin

ORGANIZING OUTBOUND GRAIN

- View, add, and manage sales contracts from the grid in the outbound window
- Refine SKY user access to sales contracts

FACILITATING FUTURES

- View, add, and manage futures and options contracts, and purchase and sales transactions directly from the futures grid
- Review, set, and update futures month and futures pricing information
- Manage SKY user access to futures month pricing, and purchase and sales transactions information

SKY GRAIN GRIDS

- Customize grids by pinning vital columns, rearranging columns to best suit workflow, and hiding columns unnecessary for the task at hand
- Export information from SKY Grain grids to Excel and CSV files

GRAIN VIEW - A SNAPSHOT INTO CUSTOMER INFORMATION

- View customer info in the intuitive grid layout
- Easily access your favorite customers and your eight most recently viewed
- Search and drill into customer information, details, and contracts from the search bar
- Quickly add new contracts, SKY Grain optimizes time by pre-populating customer information
- Drill into customer account balances, activity, purchase contracts, settlements, offer contracts, sales contracts, and obligations in organized tabs
- Customer balances are organized in SKY Grain by disposition, providing clearer inventory insights into basis fixed, futures fixed, and hedged-to-arrive inventories
