### Production Environment:

Help Site: <https://api.agvance.net/help>

Swagger: <https://api.agvance.net/swagger/ui/index>

### Update Changes:

#### Accounting

03/21/2023	GET PUT POST	Vendor	The Vendor GET/PUT/POST end points now include the ability to see the existing value for a Vendor's ACH type as well as assign it to one of the 3 valid options. IF this is not provided during the PUT of a vendor, the existing value on the vendor will be maintained.
03/21/2023	POST	Purchase Invoice	The Post Purchase Invoice API endpoint now accepts a Prepaid flag on the detail information for that transaction to know if we are to use vendor prepay money or not.
03/21/2023	POST	Purchase Order	When a Direct Shipped PO is entered, validation now will occur to see that the federal permit or state permits provided will suffice for the restricted use product checking that occurs on the delivery ticket. This reads from the delivery ticket options for no checking, warn only, or stop sale as well as which permits will be allowed to cover which types of permit checking.
04/19/2023	POST	Product	Agrian ID and DOT config information and SSIGlobal IDs are now part of the API POST endpoint for products.

### Agronomy

03/07/2023	GET	Crop	The CropColor is included in the Get Crop endpoint.
05/02/2023	GET PUT POST	FieldPlan	The ApplicationZoneWKT is now exposed in the Plan GET, PUT, and POST methods. By default this is null and will not change the value saved in the database for an Edit. When editing to clear the WKT, send in an empty string. Validation exists that it is a valid WKT string.

### Hub

05/16/2023	GET	Vehicle	A new API method has been added to get the list of Agvance Vehicles.
------------	-----	---------	----------------------------------------------------------------------

### Grain

02/07/2023	GET	GSITicket	The scale interface split record uniqueid is now included in the API response.
02/07/2023	Get	SalesContract	A new public API endpoint has been created to GET a list of Grain Sales Contracts from the database. This endpoint has several filters but does not support pagination.
04/19/2023	POST	Purchase Contract	The POST of a Purchase Contract now has the ability to include the Agvance User ID to use as the Buyer's Signature along with the date to print and the date/time UTC stamp to be saved to the database. When this user's information is used, the contract that is uploaded to "Cloud Storage" will now include that signature from the beginning.
