Update Changes:

Accounting

6/27/2023	GET	PurchaseReceiptList/GetPurchaseReceipt	Include Processed property in API Response. PurchaseReceiptList/GetPurchaseReceipt now returns ProcessedYN as part of the list of data back regardless of the type of filter that was used.
6/27/2023	POST	Customer/PostCustomer	All valid document types are now listed in the help file. The 'Payment Receipt' and 'Agrarian Rec Delivery Ticket' are now both accepted as valid entries.
6/27/2023	POST	Customer/PostCustomer	Add a min and max value to the addrLat and addrLong POST. This will now validate the AddrLat and AddrLon are within the valid entries for the Latitude and Longitude respectively.
6/27/2023	PUT	Customer/PutCustomer	Add a min and max value to the addrLat and addrLong POST. This

			will now validate the AddrLat and AddrLon are within the valid entries for the Latitude and Longitude respectively.
07/25/2023	POST	Booking/PostBooking	The Seller Signature Agvance User ID and date/times have been added to the POST booking API method.
07/25/2023	POST	PurchaseInvoice/PostPurchaseInvoice	Motor Fuel information has been added to the POST Purchase Invoice endpoint on the line-item detail. Some of the required fields are available from the new Motor Fuel resource.
07/25/2023	POST	ManufactureInventory/PostManufactureInventory	In the detail object of a manufactured inventory entry, a new property commodityUnitCostOverride was added that will replace the product cost when the product is tied to a commodity. This will also cause records in grain for the GRDPRDetail, DPRCO, and LSales for the Day, Month, and Year to be updated. If the product is not linked to a commodity and this new property has a value, then it will be ignored and a warning included in the response. It will also be used in the calculation to update the finished good product Avg and Last costs.

Energy

07/10/2023	GET	MotorFuel/GetMotorFuelSetupInfo	A new API GET method for Motor Fuel setup info has been added.
------------	-----	---------------------------------	--

07/10/2023	PUT POST	LpTank/PostTank LpTank/PutTank	Validation was updated based on a KFactor being sent in with a Zero Tank Size, and the model example for the RentalBillingSplits has been corrected in the Help file.
------------	-------------	-----------------------------------	---

Grain

6/27/2023	POST	FuturesContract/PostFuturesContract	Comments can be added on the Futures Contract Post.
6/27/2023	POST	FuturesContract/PostFuturesContract	Added Strike Price to POSTFuturesContract endpoint.
08/22/2023	GET	CommodityCustomerBalance/GetCommodityGrainBalance	Separated open storage-reshrunk and open storage-hold from open storage.
07/10/2023	POST	PurchaseContract/PostPurchaseContract	The following properties were added to the POST purchase contract: <ul style="list-style-type: none"> • Spot T/F • Farm • Method of Transportation • Schedule List with the properties needed to identify the premium discount schedules • Miminum Price List and all of its properties

Agronomy

09/05/2023	PUT	Vehicle/PutVehicle	Added a new endpoint to edit all vehicle information minus the Vehicle ID.
09/05/2023	POST	Vehicle/PostVehicle	Added a new endpoint to add a vehicle through the API with all information available in the UI.
