

Data services offer

Does your organisation have data-related admin tasks that eat up your time? Does this divert resources away from other, important, parts of your work? Could those tasks be quicker, more impactful, if they were automated?

Your data is important, but could it be leveraged more effectively? Could it be stored and processed more efficiently?

futureCoders is a Community Interest Company specialising in app development, data services and training. We can offer bespoke services, locally, including:

- Data collection
 - Report production
 - Dashboards and data storytelling
 - Impact analysis and reporting
 - Performance insights for Trustees
 - Using your data to evidence your work for funding/grant bids
 - Helping you to transfer your data onto cloud systems (OneDrive, Google, etc)
 - Financial insights (where is the money going, how is it being used?)
 - Data improvement plans (how to make better use of your data)
 - Streamlining the data collection and storage process
 - Determining and monitoring performance metrics
 - Automated interpretation of written documents
 - Data protection (GDPR) compliance advice
 - Analysis of survey data
-
- Data analysis training

We charge £75 per hour for routine tasks, with discounted rates for more substantial projects. Discuss the needs of your organisation with us, see if we can help.

Please email info@futurecoders.org.uk, or call 07791769048 to discuss your needs.
