Hand 2

Great site. I'm both a new subscriber and new poker player and want to start out at the lowest stakes. I found out that at my local, the lowest is 1 / 3 with a \$300 cap and wanted to know what I should buy in at. Digging around the site, it seems (<https://crushlivepoker.com/articles/constantly-max-out-your-buy-in-in-capped-games>) you would only recommend buying in at the max \$300 and constantly topping off if I fall below \$200, is that right? So, if I lose a big pot and am down to \$40, for example, I should immediately top off back to \$300, right? Don't play short-stacked?

Hand 3
