HOSPITALITY EXPERIENCE & DESIGN

## Vincent Sheppard David Collection

Belgian manufacturer Vincent Sheppard has unveiled the David Collection, a new range of outdoor furniture comprising a lounge chair, lounge sofa, side table, coffee table, dining chair and dining table. Reinterpreting the look and feel of classic teak pieces, the series features a muted grey wash that provides a light and contemporary aesthetic, which is enhanced by sleek and elegant legs. Woven backs and rope details in soft earthy tones further match the solid teak frame and add a sense of tactility. The collection's refined silhouette is balanced by outdoor cushions for added comfort. Made from quick-dry foam, they are available in a variety of high-quality fabrics. ## Hector Finch Clio Wall Lantern

The Clio Wall Lantern is the latest addition to the range of outdoor wall lanterns synonymous with the Hector Finch brand, joining popular models such as Hermes, Etna, Zeus, Olympic and Sir John Soane in the portfolio. Offered in small and large versions, Clio features a rounded top and is designed to be used in both traditional and contemporary schemes. It is available in zinc, antique brass and black finishes, and is IP44 rated as standard. [www.hectorfinch.com](http://www.hectorfinch.com)

## KE Outdoor Design KE Cool & Safe

KE Outdoor Design has launched an integrated misting system for two of the pergola models in its Gennius range. Available for the bioclimatic Kedry Prime and Isola 3 with low roof, KE Cool & Safe pressurises water by means of a high-pressure pumping system, creating an ultra-fine mist that allows for a drop in temperature in the selected area. The product can also sanitise rooms and surfaces – as well as the pergola itself if equipped with side closings – by using a mixture of water and hydrogen peroxide, while adding oils such as lemongrass will help keep mosquitoes away during the summer months.
