GLASS COOLIE WALL LIGHT, STRAIGHT ARM BRACKET

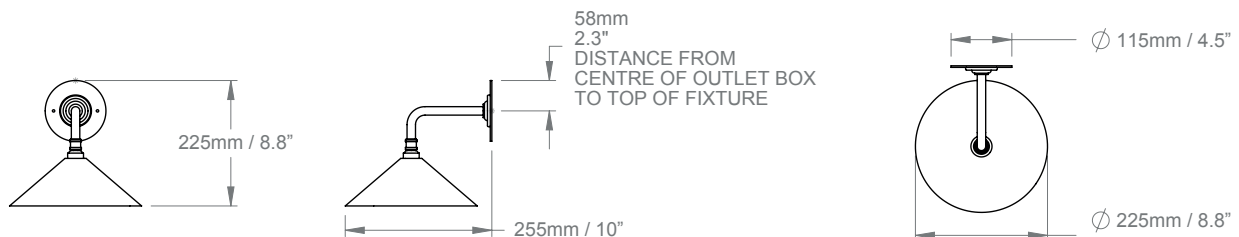

Inspired by Lutyens, the simple Glass Coolie Shade with straight arm bracket is a typical fitting used in kitchens, utility areas and cloakrooms of English country houses. Although understated, the shade is a classic design made of opal glass through which light can be seen. This differentiates it from its terracotta cousins, which are not transparent. The Glass Coolie Wall Light is made exclusively for Hector Finch Lighting.

PRODUCT CODE WL70

CATEGORY: WALL LIGHTS
