PROGRAM DETAILS

Cisco CCNA Network Associate certification provides validation and demonstrates that the student can properly execute networking protocols using the latest Cisco products and solutions.

The industry's most widely recognized and respected associate-level certification, CCNA focuses exclusively on technical skills related to Cisco products. This ensures that graduates are job-ready, with functional working knowledge of today's devices and technologies.

Integrated throughout this course is a series of Practice Labs, which allow students to test their IT skills and demonstrate proficiency in specific tasks and procedures related to configuring and managing Cisco networking equipment. Within the practice lab environment, students learn by doing by way of both guided and self-guided tasks within a hosted virtual live environment. Students will learn how to setup and configure switches and routers to ensure smooth functionality of the network. After completion, students will be able to plan and configure different IP ranges for a network and configure Cisco equipment accordingly. The tasks in the exercises are aligned to give students an in-depth knowledge of configuring and maintaining a network using Cisco networking equipment.

Upon completion, MedCerts will sponsor the cost of the CCNA exam.

Throughout the Cisco CCNA Network Associate program, students will learn the skill to:

- ✔ Identify the components of a computer network and describe their basic characteristics
- ✔ Understand the role and functions of different network components such as routers, switches, next-generation firewalls, /PS, controllers, and more.
- ✔ Describe the TCP/IP internet Layer, IPv4, its addressing scheme, and subnetting
- ✔ Describe network and device architectures and introduce visualization
- ✔ Differentiate traditional networking and controller-based networking

While MedCerts training and related target certifications may be accepted and/or approved by your state of residency, employers reserve the right to dictate pre-requisite education, experience, or certification/licensure requirements for their positions. These requirements may exclude a MedCerts graduate from eligibility. We strongly advise students to research target job posts from area employers and relevant state requirements, barriers or restrictions to ensure eligibility upon graduation.

CAREER SERVICES

As a MedCerts Student, you also have the added benefit of Job Search Assistance including guidance with resume building, networking, interviewing, and job search tips.

TARGET CERTIFICATIONS

ATTAINABLE CAREERS

- Network Architect
- IT Director
- Sr. Network Engineer
- Cyber Security Analyst
- Security Administrator
- Technical Support

Certifications	Issuing Authority	Exam Details
Cisco CCNA Network Associate	Cisco	75 multiple choice questions Time limit: 60 minutes

Course Code	Title	Hours	Weeks	Course Materials (Included)
IT-2014	Cisco CCNA Network Associate with Practice - Labs	96	6	None

EXPERIENTIAL/CLINICAL COMPONENT:

Experiential/Clinical Component Requirements (not a requirement for the Cisco Certified Network Associate program) - Once students complete this program, they will be able to immediately start working with Career Services at MedCerts.

CRIMINAL BACKGROUND CHECKS AND DRUG SCREENING POLICY:

MedCerts does not perform criminal background checks, nor do we test students for illicit drug use. Please be advised that while MedCerts does not perform these checks, the student's drug, criminal, or immunization status may prevent clinical/externship placement and future employment as a healthcare or IT professional. Externship sites, employers, and State Boards of Pharmacy or other regulatory boards have regulations about immunizations, drug use, and criminal backgrounds. Regulatory boards, externship sites, employers, and other organizations that may require these screenings for placement, and adverse results may prohibit you from moving forward in the program. Candidates with a felony conviction are not eligible to participate in ANY MedCerts program that includes the Pharmacy Technician certification as a primary or secondary certification

The student understands that MedCerts does not hold any control over the drug, immunization, criminal, or background screening processes or policies held by any organization outside of MedCerts.

Upon 100% completion of this program, students will receive a "MedCerts Certificate of Program Completion." This is proof of completion of training but isn't a nationally recognized certification. Students are expected to take and pass the national certification exam through the issuing authority for recognized certification in their field.
