PROGRAM DETAILS

The Certified Information Systems Security Professional (CISSP) certification training program aims to equip students with in-demand technical and administrative competence to design, architect, and manage an organization's security posture by applying internationally accepted information security standards. Having this certification demonstrates that the holder's been working in IT Security for over five years, has a broad range of knowledge in ten domains related to creating, supporting and maintaining a secure IT infrastructure and can implement things like risk management and risk identification. Earning a four-year college degree or regional equivalent or additional credential from the (ISC)² approved list will satisfy one year of required experience. MedCerts graduates that have previously earned CySA+, PenTest+, Security+, or CCNA certification qualify to have one year of experience waived. Education credit will only satisfy one year of experience.

This course provides in-depth coverage of the eight domains required to pass the CISSP exam: Security and Risk Management, Asset Security, Security Engineering, Communications and Network Security. Identity and Access Management, Security Assessment and Testing, Security Operations, and Software Development Security. By completing this program and earning the CISSP certification, graduates have the chance to prove they have the technical and managerial knowledge necessary to effectively design, engineer, and manage the overall security posture of an organization.

Upon completion, MedCerts will cover the cost of the Certified Information Systems Security Professional (CISSP) exam, sponsored by the International Information System Security Certification Consortium, or (ISC)².

CAREER SERVICES

For all MedCerts Students that are not affiliated with an employer partner, you also have the added benefit of Job Search Assistance including guidance with resume building, networking, interviewing, and job search tips.

ATTAINABLE CAREERS

- Security Manager
- Security Consultant and Analyst
- Security Director and IT Manager
- Security Systems Engineer
- Information Security Professional
- Network and Security Architect

Throughout the Information Systems Security Professional program, students will learn the skills to:

☑ Explore the eight domains of the CISSP Body of Knowledge (BOK)

☑ Discuss basic security, information security governance and risk management concepts

☑ Understand the importance of ethics in information security, compliance with legal and regulatory issues

☑ Assess best practices which serve to manage and reduce security risks associated with various frameworks, networks and technology structures of an enterprise

While MedCerts training and related target certifications may be accepted and/or approved by your state of residency, employers reserve the right to dictate pre-requisite education, experience, or certification/licensure requirements for their positions. These requirements may exclude a MedCerts graduate from eligibility. We strongly advise students to research target job posts from area employers and relevant state requirements, barriers or restrictions to ensure eligibility upon graduation.

TARGET CERTIFICATIONS

Certifications	Issuing Authority	Exam Details
Certified Information Systems Security Professional (CISSP)	International Information System Security Certification Consortium, or (ISC)²	Adaptive 125 to 175 multiple choice CAT questions, 4 hrs.

Course Code	Title	Hours	Weeks	Course Materials (Included)

EXPERIENTIAL/CLINICAL COMPONENT:

Experiential/Clinical Component Requirements (not a requirement for IT-6300: CISSP program) – Once students complete this program, they will be able to immediately start working with Career Services at MedCerts.

CRIMINAL BACKGROUND CHECKS AND DRUG SCREENING POLICY:

MedCerts does not perform criminal background checks, nor do we test students for illicit drug use. Please be advised that while MedCerts does not perform these checks, the student's drug, criminal, or immunization status may prevent clinical/externship placement and future employment as a healthcare or IT professionals. Externship sites, employers, and State Boards of Pharmacy or other regulatory boards have regulations about immunizations, drug use, and criminal backgrounds. Regulatory boards, externship sites, employers, and other organizations that may require these screenings for placement, and adverse results may prohibit you from moving forward in the program. Candidates with a felony conviction are not eligible to participate in ANY MedCerts program that includes the Pharmacy Technician certification as a primary or secondary certification

The student understands that MedCerts does not hold any control over the drug, immunization, criminal, or background screening processes or policies held by any organization outside of MedCerts.
