MYMY catering

About MYMY catering

MYMY catering is a Catering Service platform, specialised in the collection of orders through a digital platform. We operate with more than 200 Catering Partners throughout all of Germany, Austria and the Netherlands – preparing orders based upon the menus, recipes and standards defined by MYMY.

Originally founded as MeinWunschcatering GmbH in 2017, MYMY has been trading for over three years, has catered to more than 20,000 occasions and has served more than 250,000 people. We are focused primarily on the needs of our hosts and their guests, simplifying ordering and communication through the use of technology. We are earmarked as one of the top ‘up-and-coming’ companies in catering in Europe, with recognition from Metro AG through participation in their M Xcel Program.

As a customer and technology centric business, we will continue to develop our products, services and overall customer experience continuously without additional cost or overhead for our customers.

COVID-19 Adaptations

Since March 2020, MYMY catering has take measures to ensure the future of our business and continuation of service. As such, we have introduced *Hygiene Guidelines* that are imposed upon both our Customers and Catering Partners alike. At all times MYMY catering takes measures to ensure compliance with all relevant national and local regulations.

We have also introduce *Virtual Catering* solutions to meet the new needs of businesses. These are designed to enable a similar event, workshop or meeting experience – with new recipes, ingredients, processes and delivery formats to match.

MYMY Delivery

MYMY catering collaborates with *Local Catering Partners* who prepare orders on-demand, based upon the recipes, ingredients and specifications of MYMY catering. Similarly, these *Local Catering Partners* are entrusted with the delivery of the relevant dishes, drinks and accessories – in addition to any services or staff.

We work closely with our *Local Catering Partners* to ensure that they meet our global quality standards. In doing so we enlist the support and supply of goods and services by strategic third-party suppliers.

Traditional Catering Delivery

Traditional Catering delivery is executed by our *Local Catering Partner*. As such it is typically to a single location. However, where required multiple orders may be delivered to differing locations should the order size meet the necessary requirements.

Virtual Catering Delivery

Virtual Catering delivery is executed by our *National Catering Partners* in partnership with one of a selection of reputable parcel services. These deliveries are typically addressed to individual participants of the event. Parcels are packaged to minimise risk of damage or distortion and may include cooling packs where required for perishable products. Parcel deliveries come with an extra cost due to the additional effort and materials.

Delivery is recommended for one to two days prior to the event, where the contents permit, to minimise the risk of late delivery. We support delivery to any valid address in Germany, and upon request also can arrange further deliveries within Europe.
