E: info@grsbp.co.uk
W: www.grspaving.com

SANDSTONE AND LIMESTONE PAVING

A more traditional, variable hand-cut product which is available in patio packs and suitable for indoor and outdoor use. Available in both 18 and 22mm.

CLEANERS/PROTECTORS/GROUTS

See pages 46-47 for a range of stone & porcelain cleaning agents and protectors plus new grout and slurry products.

Note - paving swatches shown here are in proportion to each other.

Porcelain

Porcelain has a number of great properties which make it an ideal material for paving. The main advantage being, the surface exhibits extremely low water absorption and therefore lends itself as an ideal substrate for modern exterior landscaping projects. Due to porcelain versatility it can be laid internally and externally giving a seamless contemporary finish.

PORCELAIN PAVING ENHANCER	5 ltr	Film forming protector for Porcelain Paving Leaves surfaces with a 'just washed' look.
PATIO & PAVING SEALER	5 ltr	Protects all types of natural stone with minimal change to original character.

General paving product information

Trust

We work to offer the best premium landscaping options and solutions in the market and we constantly invest in both our people and ranges to ensure you receive the highest quality products for your landscaping projects.

Here are 6 reasons why GRS Paving can be your trusted supplier:

- Large product range to support your project available when you need
- All products are ethically sourced
- We provide a sample service
- We offer direct to site delivery on our entire paving range
- Installer network support
- We support our merchant partners only supplying through them to help you with your project.

Upon receiving your paving

All products must be checked upon arrival and in the unlikely event of products reaching you in a less than satisfactory condition, please refer to your stockist immediately allowing time for the affected product to be replaced. Do not install any affected product as we will be unable to consider changing it or would we accept any installation costs. We recommend if you are going to be away from home whilst the product is laid by a contractor, please check the product in advance.

Dimensions

All sizes throughout our catalogue are stated and are estimates and will be subject to minor variation and tolerance. Tolerances may vary slightly from product to product and specific guidance should be sought from an installer or our expert support team.

Wastage

Allow for cuts and positioning during install allow for individual units and characteristics that may not be to the users liking and consider that due to the nature of some of our products and the journey they endure to get to your door some breakages maybe incurred. We would recommend working on a 10% additional allowance for the area and volume calculated.

Specifications

We reserve the right to change or discontinue a product without notice. We cannot accept liability for products used for purposes they were not intended for. We would always recommend taking expert advice on the suitability of a product for your specific needs.

Colours and Batch Matches

The images in the portfolio are only indicative of the shades and their portions that maybe represented In any given production batch particularly with natural stone ranges. The colours shown are as accurate as reprographic allows.

Sandstone colours

Crates and packs should be mixed during the installation to create a blend across your entire project and to avoid colour banding. This is particularly relevant in natural stone and we would suggest mixing even if the delivery has been batch matched.

Please remember that with natural products and those containing an aggregate as we work with our supply chain partners through a quarry shades will alter so batches previously purchased or installations shown in our imagery may vary from current supply.

Porcelain colours and batch matches

It is strongly recommended that you ensure your delivery is supplied from the same production run. This will be evident by a batch code printed on the label on the crate with a unique code. It is important this is checked before any installation takes place and in the unlikely event a multiple of batches, you contact your stockist immediately to rectify. We will be unable to consider changing it or would we accept any installation costs if an installation has already begun.

Weathering

Overtime environmental conditions and types of use of your completed project will impact on our paving from organic discoloration such as algae, bird droppings and fallen leaves through to general soiling and tyre marks. The appearance of the product maybe affected as a result. Regular cleaning of our products is recommended.

Due to the composition of natural stone and natural aggregates and its mineral content, oxidises colour variations may also occur.

GRS cannot accept any responsibility for potential weathering characteristics or the effects of potentially deleterious materials.

Example layouts

Traditional pattern for:
All sizes

Brick-bond pattern for:
600x600, 600x900, 600x1200, 400x800, 450x900

Staggered pattern for:
300x1200

Patio Pack layout:
(4 paver sizes)
