

# Threat Profile Report

## What Is a Threat Profile Report?

Our Threat Profile Report will provide you with access to firsthand knowledge that Truesec has accumulated regarding the cyberthreats currently facing your organization and industry. This knowledge will enable you to make appropriate prioritizations for which security measures to implement – prioritizations based on real-world knowledge of cyberthreats.

The Threat Profile Report also includes relevant threat scenarios for your organization, and actionable recommendations on how to upgrade and maximize your cybersecurity posture.

It has become increasingly important at both the executive and technical levels to stay up to date with the evolving cyberthreat landscape. Existing cyberthreats and threat actors continue to evolve, and new threats and threat actors appear constantly. Our Threat Profile Report includes data and analysis based on Truesec's long experience responding to real-world cyberattacks, as well as scanning and DarkNet exploration. The report is provided in both a written format and as a presentation. During the presentation your organization will have the opportunity to discuss and ask questions to our experts, so you acquire the best possible information to take the right action, at the right time.

Predict

Prevent

Detect

Respond

Recover

### Our Threat Profile Report will provide you with the following:

- Generic Threat Landscape
- Industry-specific Threat Landscape
- Threat scenarios
- Attack surface
- DarkNet exposure
- Recommendations
- Written report and a presentation where you can discuss and ask questions

## About Us

As a global cybersecurity company, we're proud to be at the forefront of protecting organizations and our society against cyber threats. Our purpose has been clear since day one: Creating safety and sustainability in a digital world by preventing cyber breach and minimizing impact. We never cease to challenge and reinvent ourselves to help defend your most valuable data assets every day.

## What We Do

Truesec offers a Threat Profile Report tailored to your organization that provides in-depth knowledge of the cyberthreats that are most likely to affect your organization. This report will provide you with a solid baseline for discussions regarding your current cybersecurity posture and how it measures against the real-world threats that impact your specific industry.

Depending on the level of depth you require, the Truesec Threat Profile Report can contain any or all the following elements:

### Generic Threat Landscape

This section contains the latest trends in cybercrime and cyber espionage explained in easy-to-understand terms.

### Industry-specific Threat Landscape

This section contains more detailed data related to cyberthreat trends specific to your organization's particular industry.

### Threat Scenarios

Based on Truesec's long experience in cyberattack investigations, this section provides in-depth examples of cyberattacks that are relevant to your organization, including examples of TTPs (tactics, techniques, and procedures), used by real threat actors.

### Attack Surface

Based on interviews with your organization's IT-staff and Truesec's own passive and active scanning of your networks, this section will provide you with a general overview of your current exposure and vulnerabilities.

### DarkNet Exposure

Cybercriminals work in large networks. They trade secrets and sell access to organizations on DarkNet forums. Truesec's experts continuously monitor such criminal forums and blogs. This section provides information regarding any exposure Truesec has observed related to your organization in such places.

### Recommendations

Based on the overall threat against your organization and your current exposure, Truesec lists a set of actionable prioritized recommendations to upgrade your cybersecurity posture, to better meet the threats.

# The Partnership

We see our work with our customers as a partnership.

We work together to get the best results and prevent incidents.

What Is Included	Generic Threat Profile	Specific Threat Profile	Extensive Threat Profile
The Threat Profile Report as a PDF	✓	✓	✓
The Threat Profile Report presentation with Threat Intelligence experts in which your team can ask questions and delve into topics to obtain the complete picture	✓	✓	✓
Generic Threat Profile Report	✓	✓	✓
Industry-specific Threat Landscape	✓	✓	✓
Current threat actor profiles, trends, motivation, intent, as well as TTPs, including examples of recent attacks	✓	✓	✓
A specific threat profile and applicable threat scenarios for your organization		✓	✓
Analysis of attack surface based on passive data gathering and information provided by the client		✓	✓
Graded risks and specific recommendations to reduce the risk level		✓	✓
Enhanced analysis of attack surface based on active scanning and recon of external exposures			✓
A deep scan of the DarkNet to find potential leaks of company information			✓

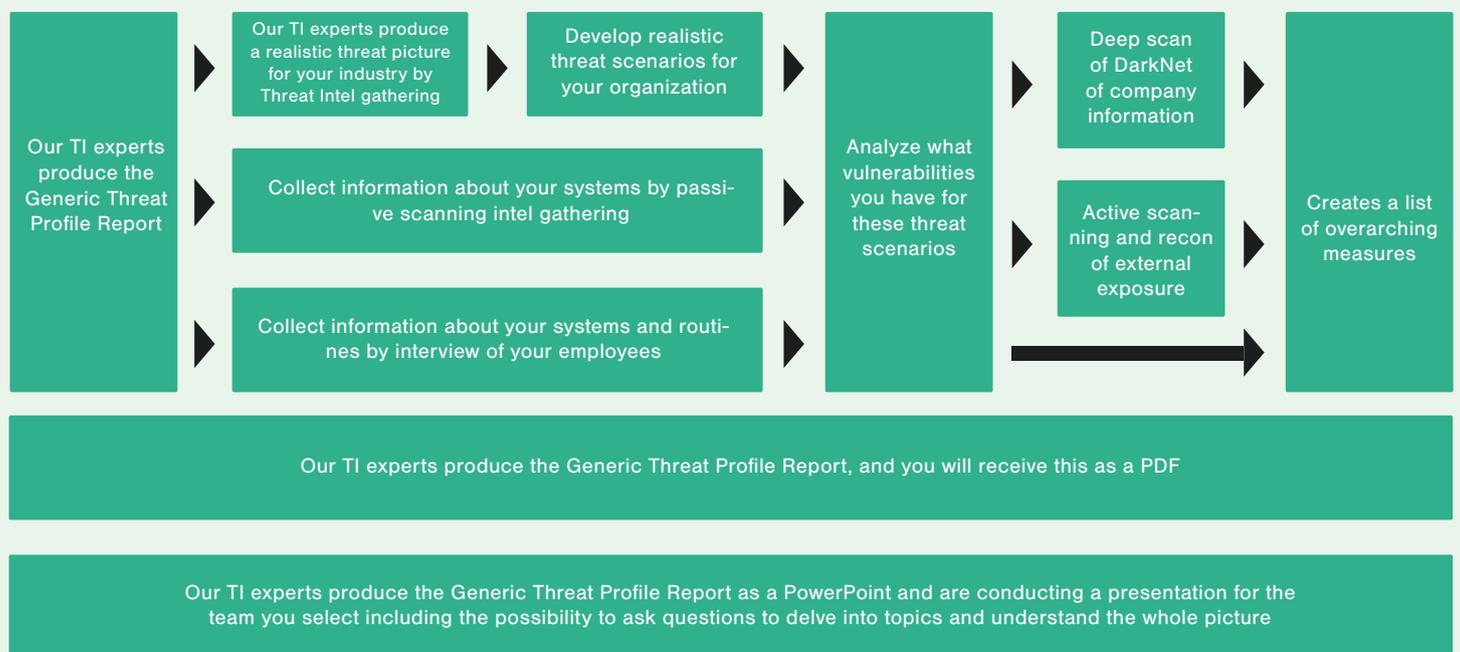

# The Threat Intelligence Team is Here to Help

Our team is dedicated and wants to help organizations become safer. Our Threat reports supports us in our cause.

## Methodology

Truesec Threat Intelligence experts will base the report on the deep insight in cybersecurity that we have at Truesec. This means we will use the knowledge from our Red Team exercises, our SOC (Security Operations Center), our Cybersecurity Incident Response

Team investigations, our forensic research, our information gathering from the DarkNet, and of course, our threat actor analysis to mention a few of the data sources.

## How To Obtain the Benefits of Truesec's Threat Profile Report

You start by talking to your Truesec customer contact, or any of our experts. Together, we will determine the scope of the assignment, your goals, and the key takeaways you require to obtain maximum value from the report. We then agree on a schedule as to when and where it should be executed, when to complete the report, and when we will conduct the debriefing meeting
