

# MHA Dynamic ESG Lite

Delivering a sustainable tomorrow, today

We realise that organisations can be at different stages of their ESG journey – from taking the tentative first steps to reporting their Scope 1, Scope 2 and Scope 3 emissions. And, although not every organisation may currently be in scope for environmental impact and mitigation reporting, we expect all organisations will be within a short time.

For those organisations at an early stage of their journey, investigating how ESG might benefit their business, what it might achieve, what it involves, how it might provide a competitive advantage or, simply, what the return on investment is, we have created Dynamic ESG Lite.

Dynamic ESG Lite is typically used in two ways:

- 1 in some cases, Dynamic ESG Lite is used as a ‘proof-of-effectiveness’ for presentation to senior managers considering a full ESG programme
- 2 in other cases, it is deployed to deliver the ESG programme for organisations such as smaller SMEs and owner-operated businesses.

In the former case, we will offset the initial investment in Dynamic ESG Lite against the cost of a full Dynamic ESG programme.

Whilst the full Dynamic ESG programme is comprehensive, Dynamic ESG Lite is no less valuable. It simply focuses on core ESG elements, offering practical advice concerning next-step actions.

The same principles of ‘commercial good’ and sustainable finance apply – we use the term ‘Purpose with profit’. Dynamic ESG Lite also follows the same pragmatic approach with real-world deliverables and practical, intuitive actions.

Dynamic ESG Lite helps organisations crystallise the appropriate level of their Dynamic ESG commitment.

With Dynamic ESG Lite organisations can identify the value of any current ESG (or past CSR) actions, the gap between current and desired actions, guidance on the value of ESG to the organisation and the projected Return on Investment (ROI) it might represent, together with practical next steps.

Dynamic ESG Lite scopes organisations in terms of climate change, innovation, trust, workforce and supply chain, with valuable guidance on achieving your desired commitment level.

The outputs take the form of a comprehensive Dynamic ESG Lite presentation, together with an actionable report for senior members of the management team and those involved in delivering on ESG promises.

Both Dynamic ESG and Dynamic ESG Lite have been created to work as a blended service for organisations transitioning from Dynamic ESG Lite to a more comprehensive programme; or independently for organisations ranging from small SMEs to major corporates.
