

We have a strong sustainability promise and commitment

Fully support the UK government's ambitious plans to reduce greenhouse gas emissions to net zero carbon ("net zero") by 2050 by ensuring we perform all reasonable procedures to be a **net zero organisation by 2030**.

Goals

- 1** Raising awareness via climate workshops, implementing an internal training certification, and creating climate transition plans with emissions targets covering scope 1, 2 and 3.
- 2** Committed to providing our people, clients, and suppliers with the support necessary to enable them to contribute meaningfully to achieving our **Sustainability Promise** we are equally committed to achieving that promise within a governance framework.
- 3** Working on driving the application of our talent within our use of technology and client focused digital expertise for the wider benefit of stakeholders.

UK GOVERNMENT PLANS

The UK government has issued ambitious plans to reduce its greenhouse gas emissions to become a **net zero economy by 2050**.

To support this ambition, the UK will become the first country in the world to make **Task Force on Climate-related Financial Disclosures (TCFD) aligned disclosures fully mandatory across the economy by 2025**, going beyond the 'comply or explain' approach.
