

# Zoo-mazing Adventures!

Let's dive into the fascinating world of animal adaptations. We will explore their movement, coverings, defenses, habitats, and senses.

## Animal Coverings

Animals use their coverings for temperature control, camouflage, sending a warning, and more!

### Animal Masks

#### Directions:

Print the template below to design your own animal mask. Then glue materials to your mask or use drawing materials.

How does your animal use their covering? How does it help them survive?

#### Tips:

- To make a stiffer mask, glue the printed template to an empty cereal box, then cut it out.
- Use recycled and reused materials to decorate with for a more earth-friendly mask.
- Make small holes in the sides to attach elastic or add a craft stick to one side to have something to hold onto while holding it up to your face.
