The Trail Modeling and Assessment Platform (T-MAP)

To the Field: Collecting and Using Trail User Data in Practice

The Trail Modeling and Assessment Platform (T-MAP)

A Practitioner-Rooted Research Project

RTC 101

- Founded in 1986
- 150,000 Members and supporters
- HQ in DC with 4 Regional Offices
- 40+ Staff

rails-to-trails
conservancy

Our Mission

“To create a nationwide network of trails from former rail lines and connecting corridors...

...to build healthier places for healthier people.”

- Adopted Oct 2004

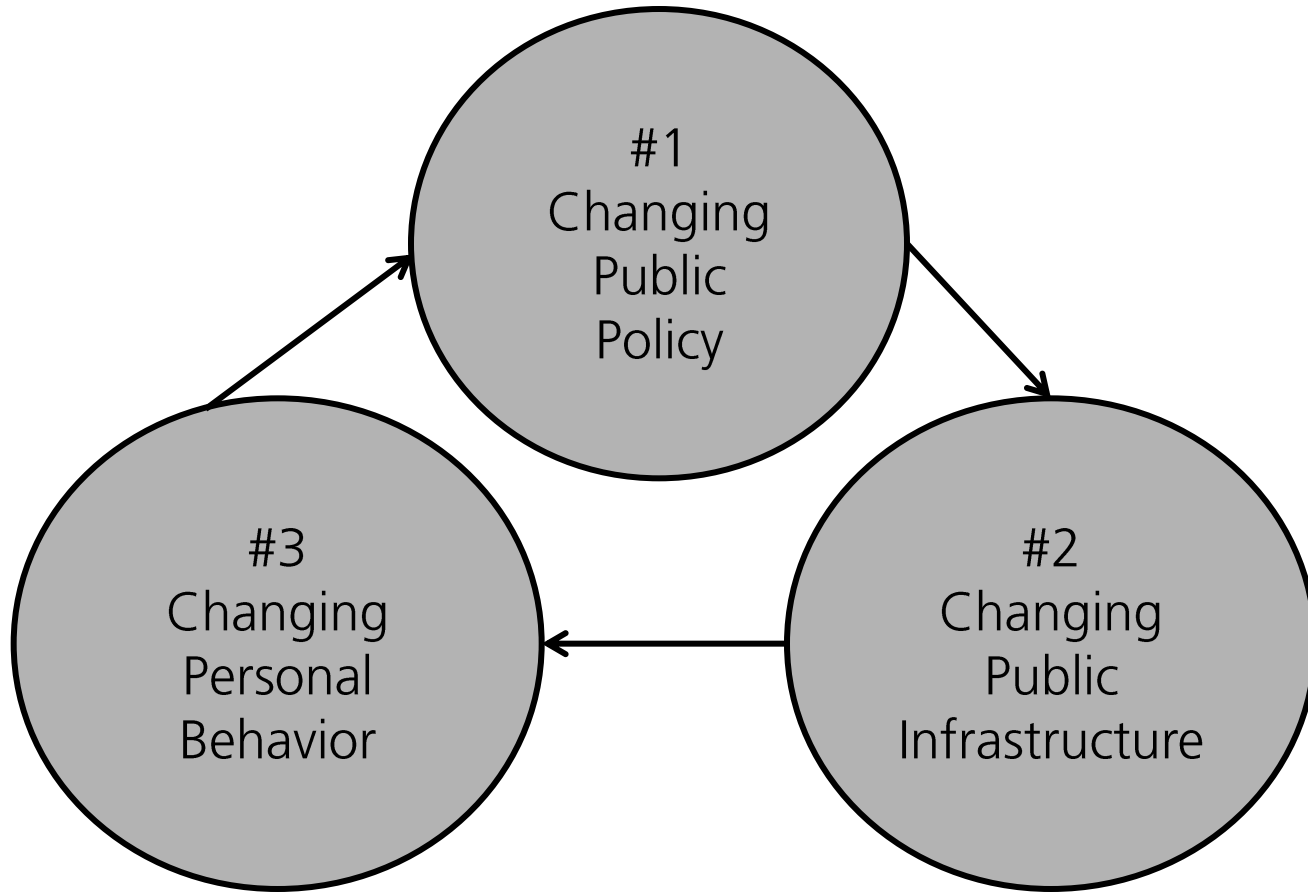

“Health” in Multiple Dimensions

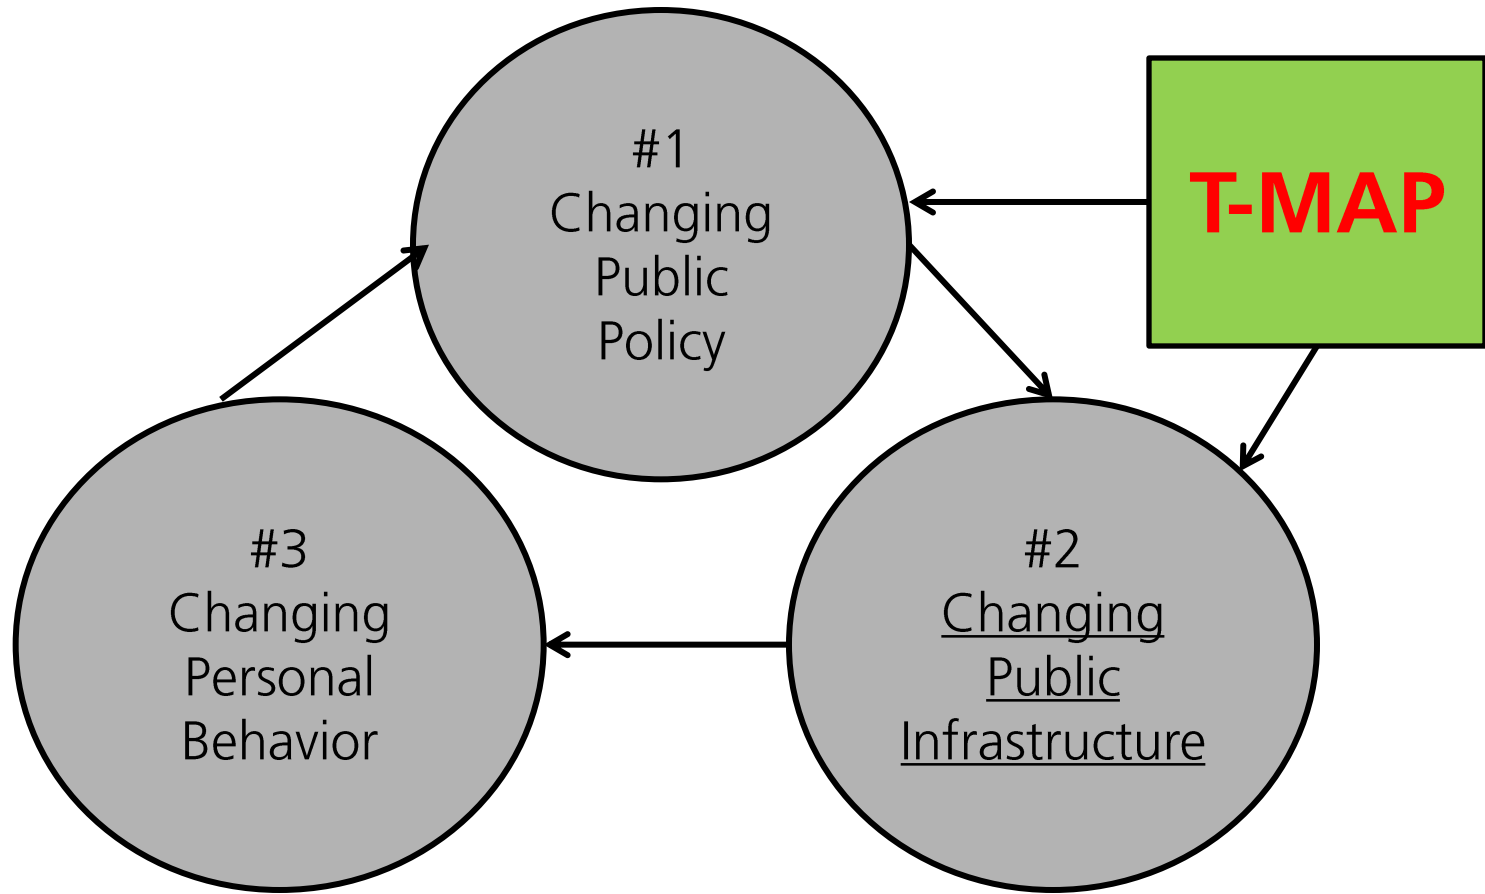

Improving the...

- ...***economic and environmental health*** of a place
 - ...***personal health*** of its people
 - ...***social health*** of a community
- 

Our Methods: Catalyzing Change in 3 Spheres

Our Methods: Catalyzing Change in 3 Spheres

Looking Back

Past success:

- 1986: 250 miles
- 2014: >21,000 miles

Looking Ahead: Our BHAG

Our Big, Hairy,
Audacious Goal:
By 2020, 90 percent
of Americans will live
within three miles of
a local trail system.

Measuring the BHAG: Creating Geospatial Data Base

- Since 2006 we have mapped 25,500 miles of multi-purpose trail in the US
- Overlay with Census data to measure proximity

National Progress on BHAG

- Dec. 2009: 25.5%
 - 14,700 miles of trail
- Dec. 2010: 32.5%
 - 17,500 miles of trail
- Dec. 2011: 39.8%
 - 21,700 miles of trail
- Dec. 2012: 42.2%
 - 23,500 miles of trail
- Dec. 2013: 44.0%
 - 25,200 miles of trail

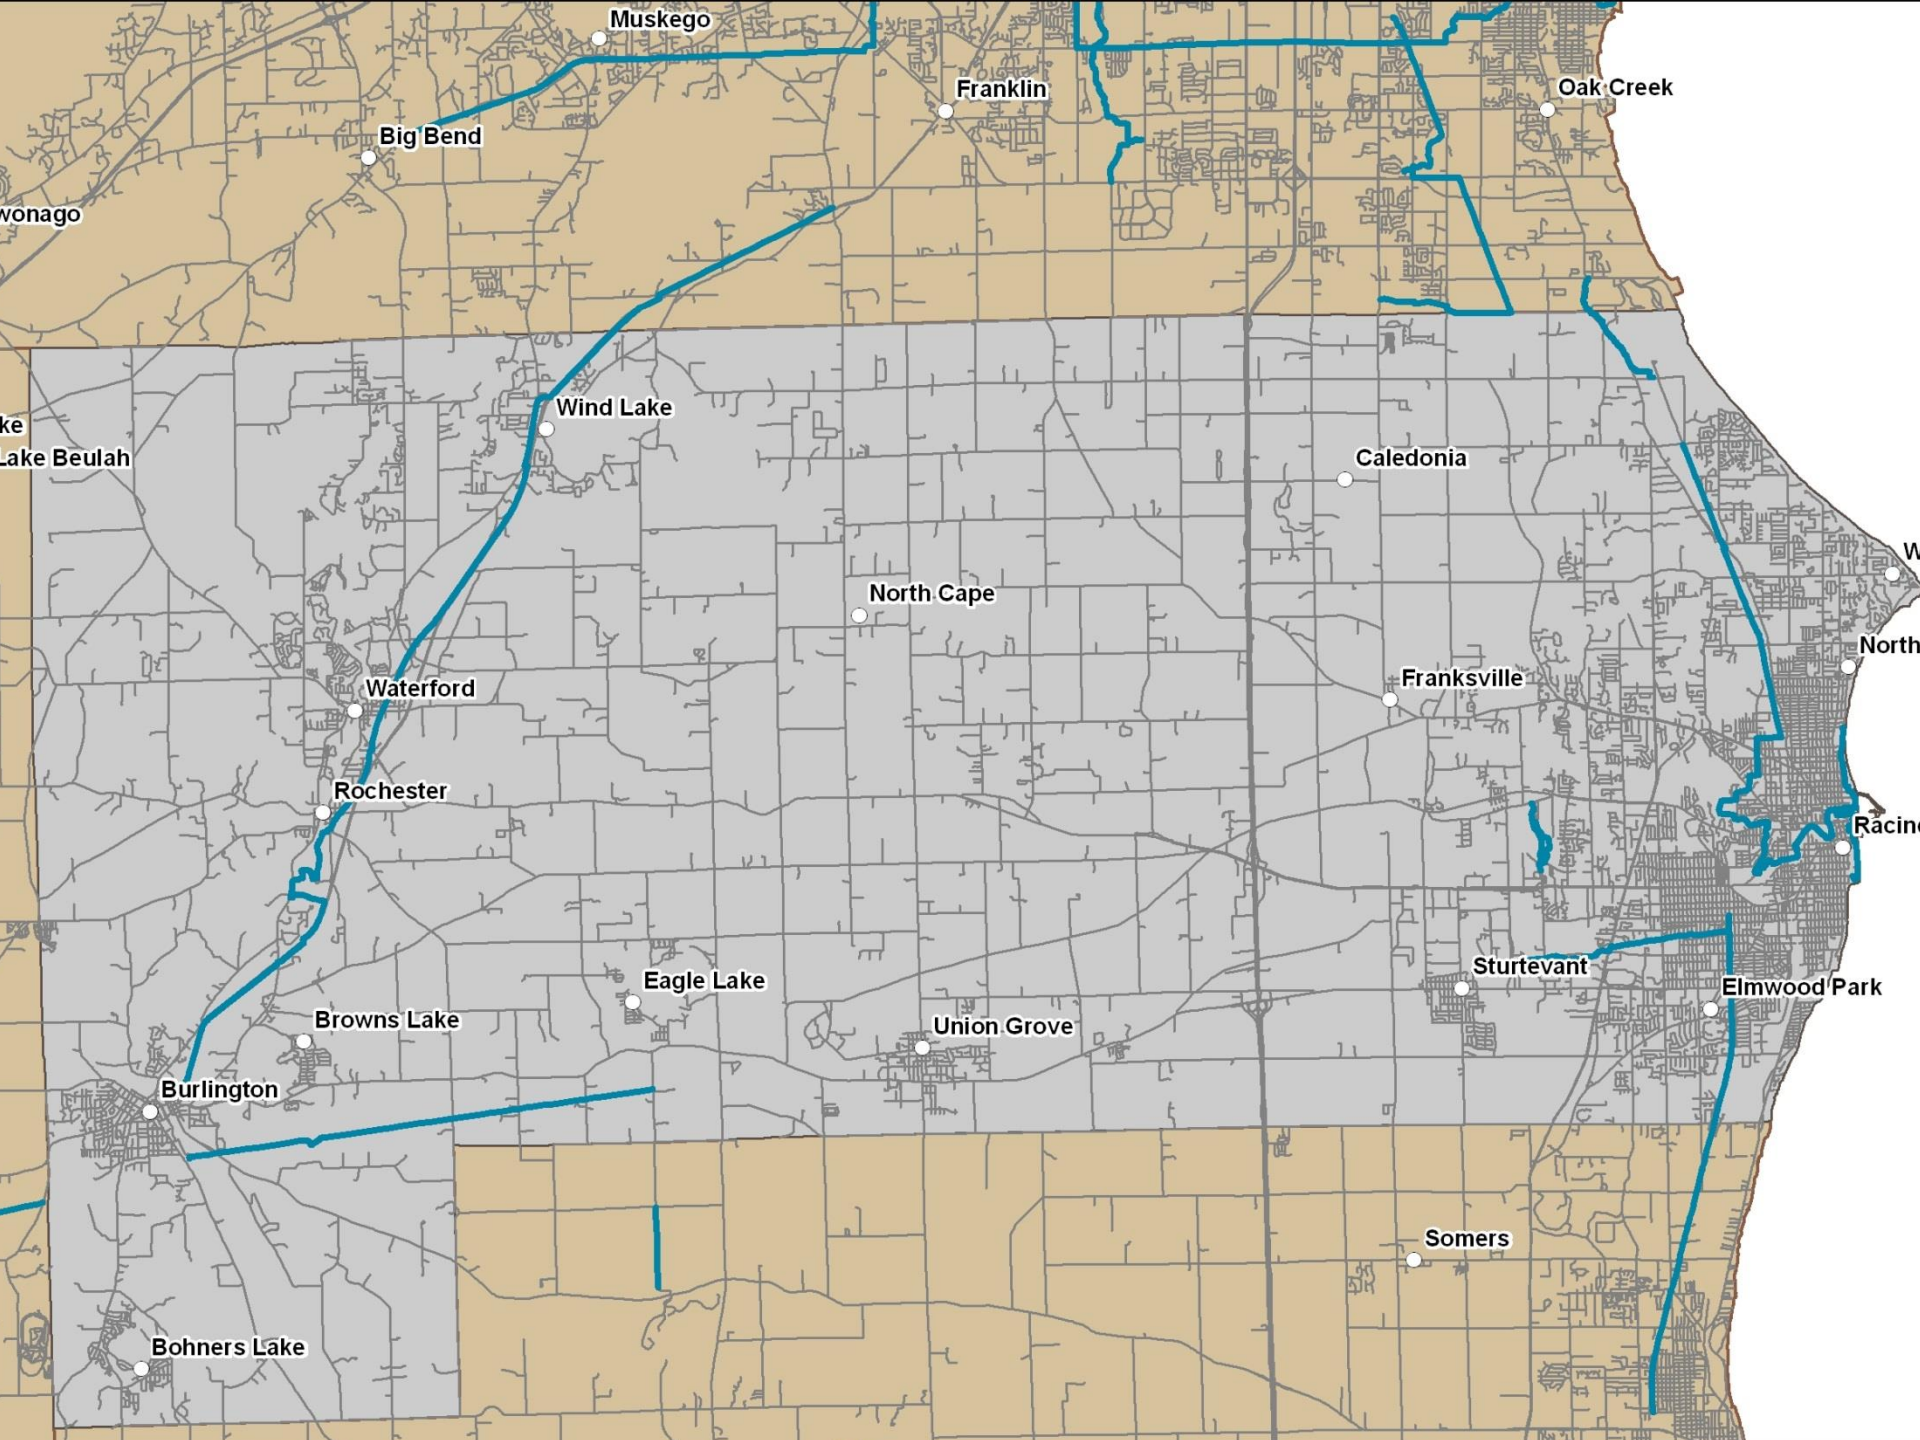

State-Level Analysis: 2013

1. District of Columbia (100%)
2. Rhode Island (75%)
3. Colorado (70%)
4. Washington (68%)
5. Illinois (66%)
6. California (62%)
7. New York (58%)
8. Nebraska (58%)
9. Oregon (58%)
10. Wisconsin (56%)

MSA-Level Analysis

1. Rockford, IL (93%)
 2. San Francisco-Oakland-Fremont, CA (92%)
 3. San Jose-Sunnyvale-Santa Clara, CA (92%)
 4. Boulder, CO (91%)
 5. Lincoln, NE (90%)
 - 6. Racine, WI (90%)**
 - 7. Milwaukee-Waukesha-West Allis, WI (90%)**
 8. Denver-Aurora-Broomfield, CO (88%)
 9. Des Moines-West Des Moines, IA (85%)
 10. Fort Collins-Loveland, CO (85%)

Bohners Lake

RTC's Early Warning System

- On January 28, 2014, the Soo Line filed a notice to abandon 10.6 miles of active line between Sturtevant and Kansasville, WI.
 - We notified all potentially interested parties in Wisconsin
 - Wisconsin state DNR intends to rail bank this segment
 - The map now looks like this...
-

Inescapable Conclusion

- Measuring proximity is useful, but limited
 - It does not address equity
 - It does not ensure usage
 - Accessibility and connectivity are crucial factors in determining if infrastructure change supports behavior change
 - **Key Question:** Does infrastructure effectively connect people and places?
- 

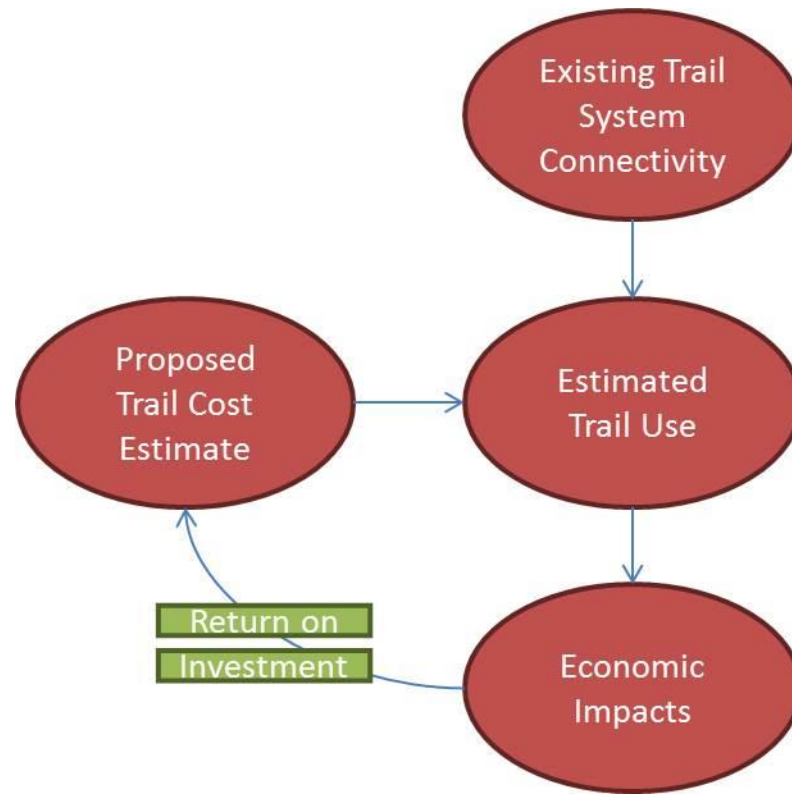

The Genesis of T-MAP

- Was NOT created to develop “evidence”
 - Emerged last summer from an internal staff dialogue about creating “TrailScore” to measure trail system connectivity
 - We want practical tools to change the world – and there are research professionals out there who feel the same way
- 

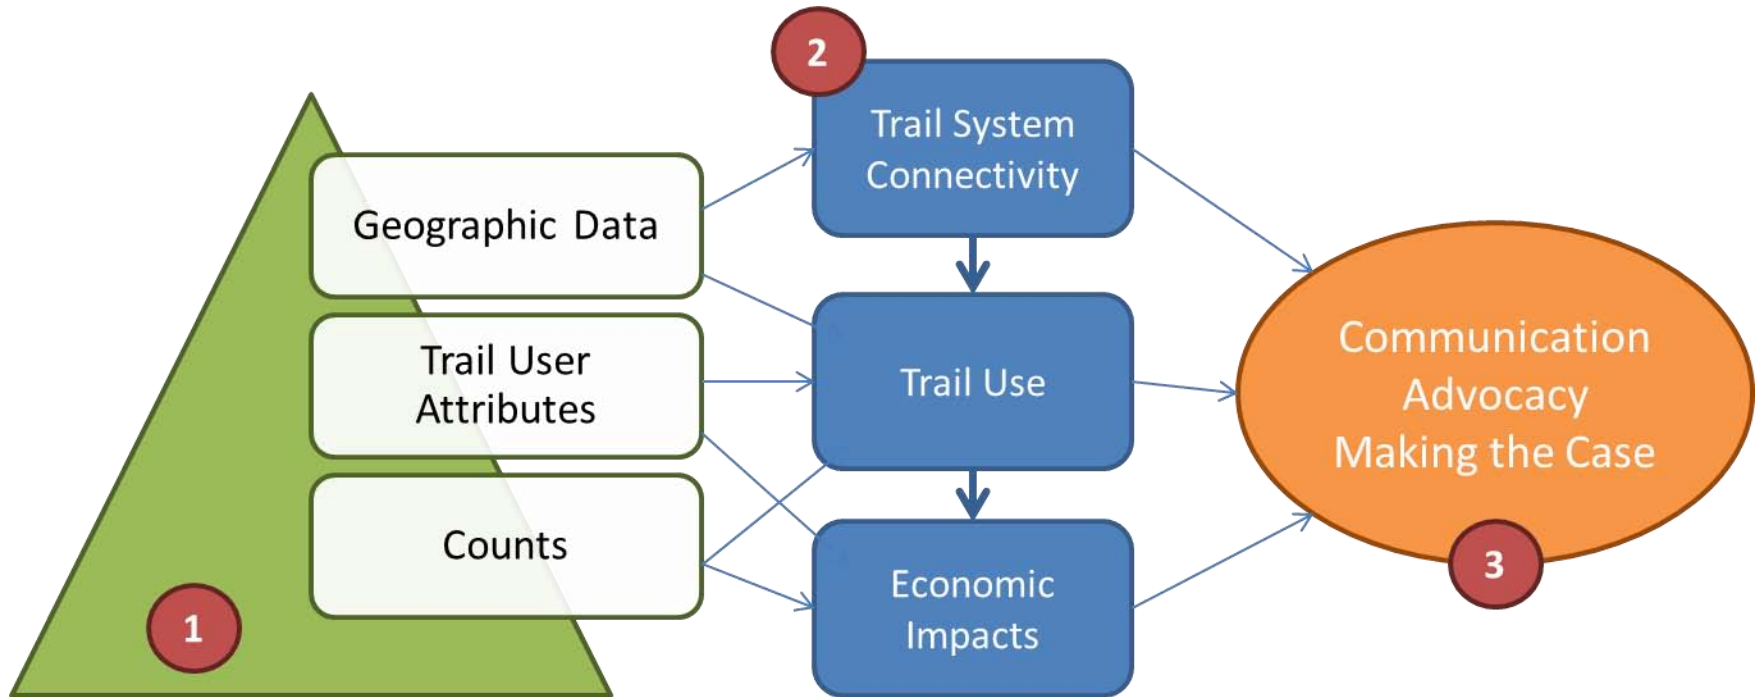

Conclusion: The Opportunity

- \$7 billion in federal investment since 1991 has built 25,000 miles of multi-purpose trails across the American landscape
 - Approaching a tipping point: relatively small investments to make connections to create networks will cause usage to soar
 - T-MAP will ensure and demonstrate that future investment delivers a high ROI
-

Year One Data Collection: Counts

Trail Use Research Questions

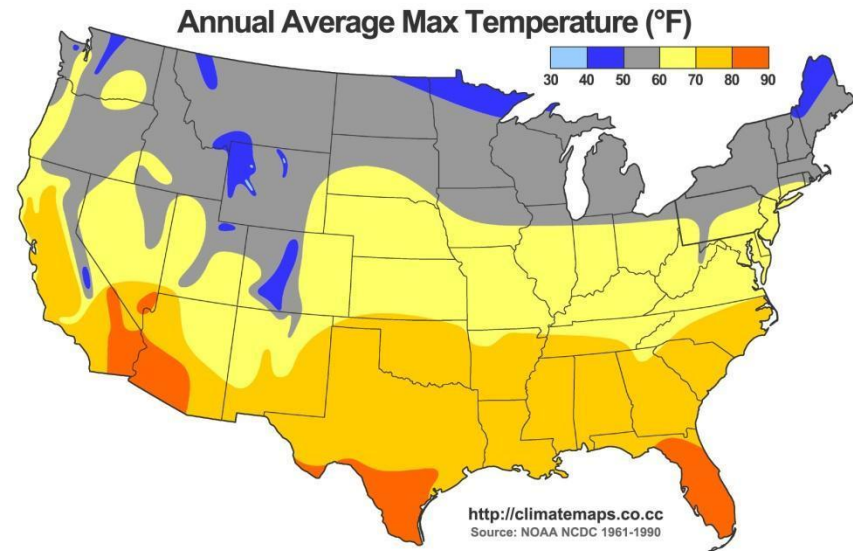

- How many visits does my trail get per year?
- What is the peak trail use on my facility?
- What is the modal distribution of my users?

Year One Deliverables: Factors

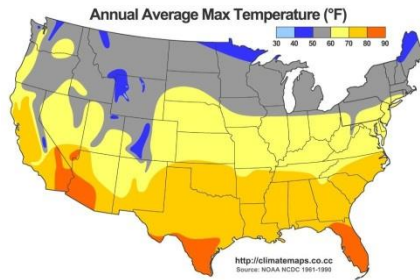

- Separate for bicyclists and pedestrians
- For all weather zones of the US
- Large sample

Year One Deliverables: Calculator

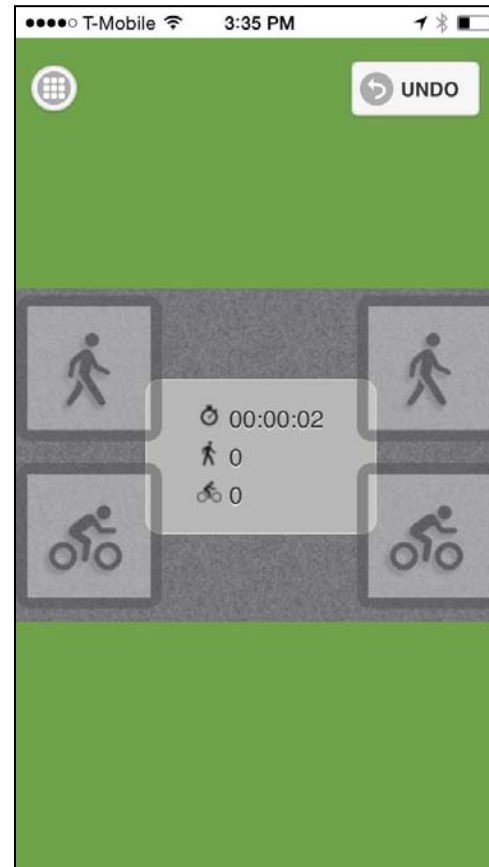

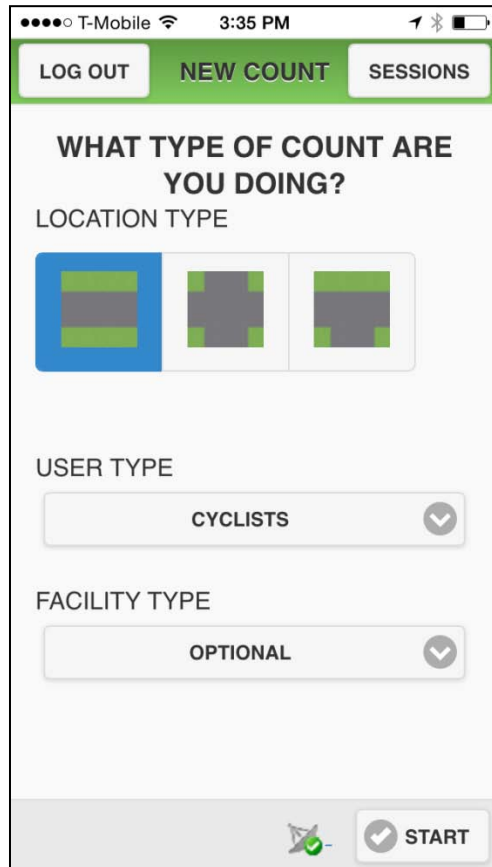

X

=

YOUR
ANNUAL
ESTIMATE!

Year One Deliverables: GO Counter!

More T-MAP to come...

- Forecasted trail use
- Impact assessment
- Bicycle facility network connectivity score

TRAIL USER COUNTS BEYOND THE NUMBERS

Carl Knoch
Manager of Trail Development
Northeast Regional Office

rails·to·trails
conservancy

HOW RTC COUNTS

- Passive Infrared
 - Uses an infrared beam of light
 - There is no reflector unit
 - Beam detects and counts warm moving objects

Infrared Counters

- TrafX
 - Passive infrared
 - Counters
 - Docking Module
 - Software – DataNet
 - Starter package \$2,500
 - 3 counters, docking module and 3 year DataNet subscription
- You provide “protection” for counter
 - Standard off the shelf electrical box
 - DIY assembly
 - Don't use big locks that can be used as leverage to break into box

Challenges

- Placement
 - Car and truck engines throw off a big heat signature

Challenges

- Vandalism
 - Rural areas are just as susceptible as urban areas
 - Counter on Pine Creek Rail Trail stolen
 - Counter of Ghost Town Trail was vandalized
 - 3 Counters on Pittsburgh's Three Rivers Heritage Trail stolen

Challenges

- Accuracy

- Counters should be “calibrated” by comparing IR counter data with manual count.
- Under counting
 - 13.7% + or – on average (National Cooperative Highway Research Program Project 07-19)

Challenges

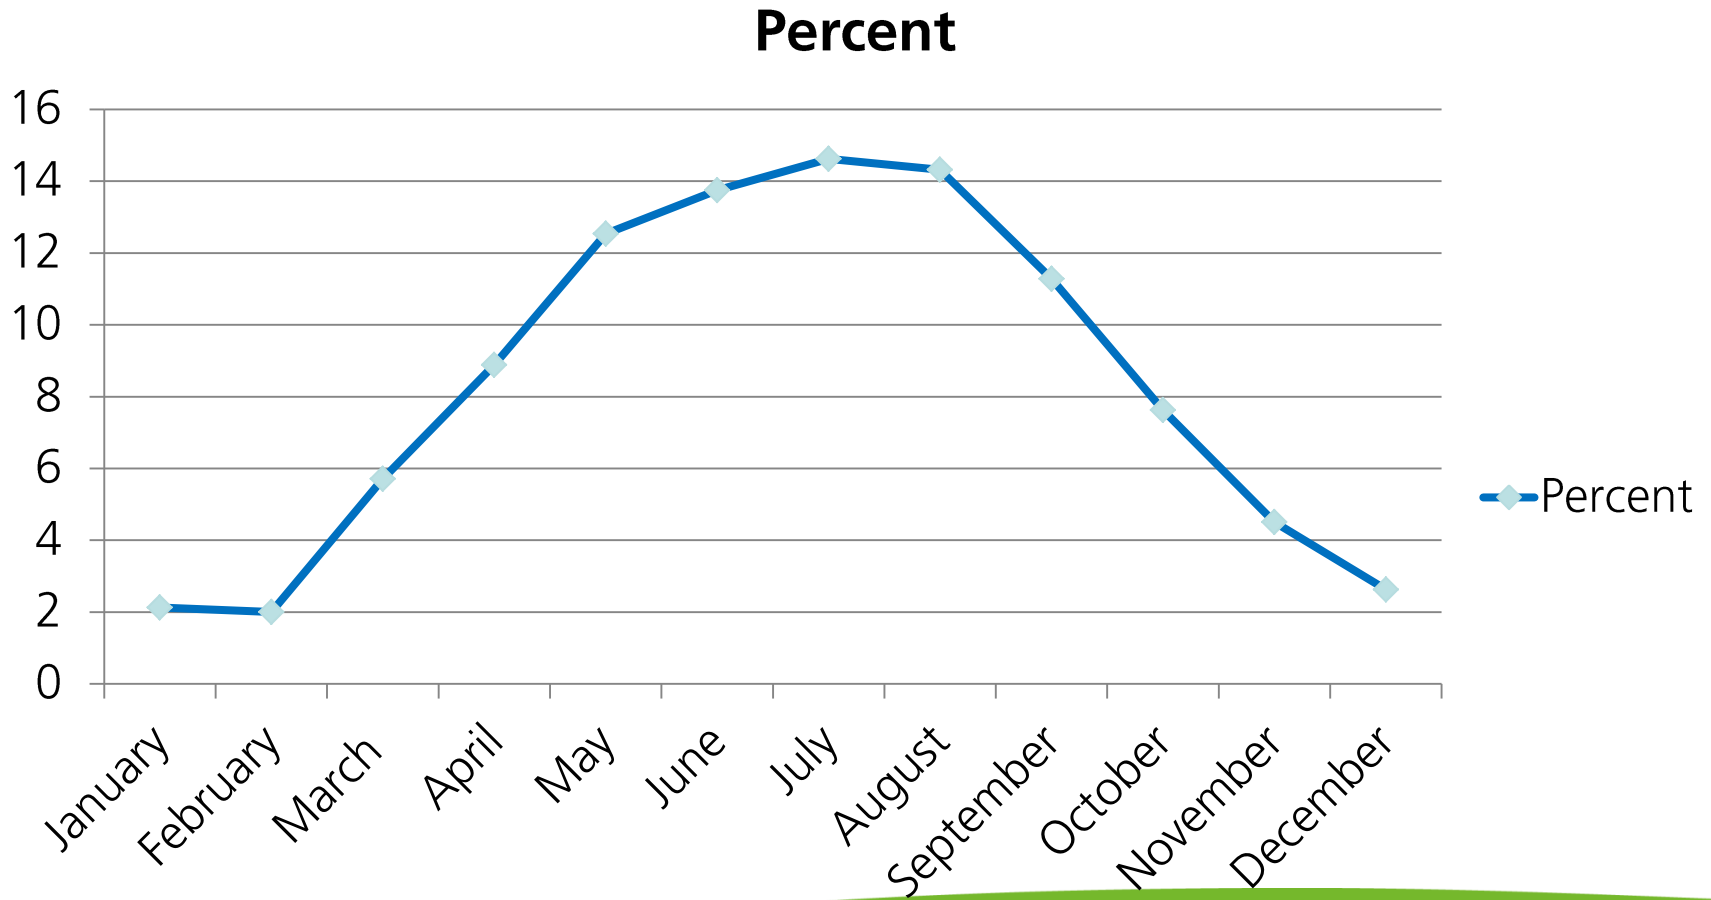

- Weather
 - Between Feb. 6 and Feb. 9, 2010 area received 42" of snow

Annual Distribution of Green County, OH Data Set

Annual Distribution of M-Path Data Set, Miami, FL

Annual Distribution of Trail User Visits

Based on 62 different counters and
5 million user visits across U.S.*

Developed by Rails-to-Trails Conservancy

RTC and Green County, OH

Trail User Surveys

- All counts are conducted during the course of a trail user survey
- Survey provides information on trail user characteristics
 - Trailheads used
 - Time on the trail
 - Type of activity
- Surveys provide data on trail user spending
 - Amount spent on durable goods
 - Amount spent on consumables
 - Amount spent on accommodations
- Survey data enables development on annual user estimate and trail related spending – Economic Impact

Survey Questions that Inform Counts

What is your primary activity on the trail

How much time do you spend on each trail visit

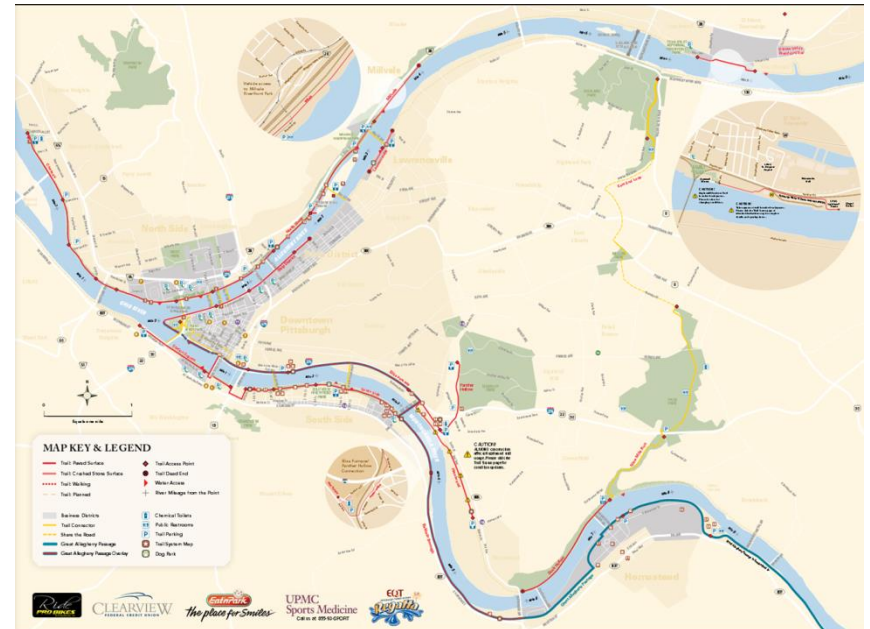

Survey Questions that Inform Counts

Did your trail experience today begin and end at the same location

Three Rivers Heritage Trail, Pittsburgh PA

Trail Counter Location	Actual Count	Estimated 12-Month Count*	Adjusted for Passing Multiple Counters	Adjusted for Missing Counts	Adjusted for Out and Back Trips
Keystone	13,545	122,600	122,600	139,396	78,480
South Side Riverfront Park	17,751	160,700	125,547	142,747	80,366
South 4th Street	18,054	167,400	130,843	148,768	83,757
Chateau	10,349	94,000	69,130	78,601	44,252
North Shore	41,510	376,000	277,280	315,267	177,496
Panther Hollow	6,473	59,000	43,239	49,162	27,678
Eliza Furnace	17,007	154,000	113,604	129,168	72,721

Total Estimated Annual User Visits					622,873**

Economic Impact Analysis

- Hard good purchases
 - Durable goods
- Soft goods purchases
 - Non-durable goods
 - Consumables
- Overnight Accommodations
 - Type
 - Number of nights
 - Average overnight rate

Economic Impact Analysis

	% Using	Average \$	Average Life	Average # of Trips	Average # Nights	Estimate of \$
Durable Goods	52.6%	\$444.77	6 years	17.1		\$1,842,288
Consumable Goods	57.5%	\$16.53				\$5,866,660
Accommodations	0.3%	\$114.38				\$ 577,078
Total \$ Impact						\$8,286,026

How Count Data is Used

- Supports grant requests
 - San Jose, CA - Trail Count 2008 data supported efforts to secure \$1,377,000 in grant funding.
- Fosters new business formations
 - Trail Town Initiative uses trail counts to attract new businesses to towns along the Great Allegheny Passage
- Encourages community investment
 - Portion of hotel tax revenue goes to trail organization
- Helps in developing strategies for trail facility development
 - Parking lots, benches, picnic facilities...
