National Market Manager

Rhino Marking & Protection Systems

2008 National Trails Symposium- Putting the Public back into Public Safety

**911**

# 911 Emergency Address Location Identification on Trails

## Challenges:

**911** Awareness

**911** Visibility

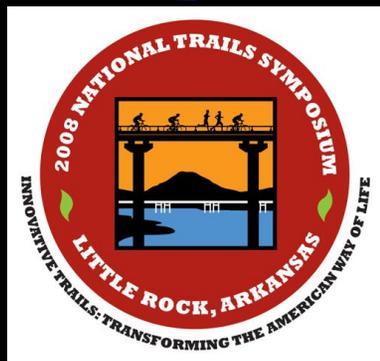

**911** Cooperation

**911** Integration

# *Awareness*

Ensure trail users understand  
911 address marking system  
and how to use it

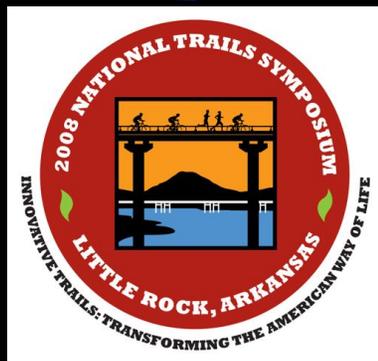

2008 National Trails Symposium- Putting the Public back into Public Safety

**911**

# *Visibility*

911 Address Marking should be easy  
to see and understand  
but **NOT** interfere or overwhelm  
natural ambience of  
trail environment

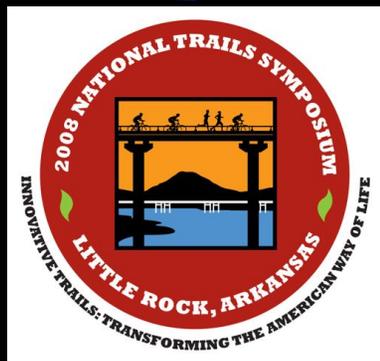

2008 National Trails Symposium- Putting the Public back into Public Safety

**911**

# Cooperation

Critical to have cooperation among:

- Trail System Management
- 911 Call Center
- Emergency Services

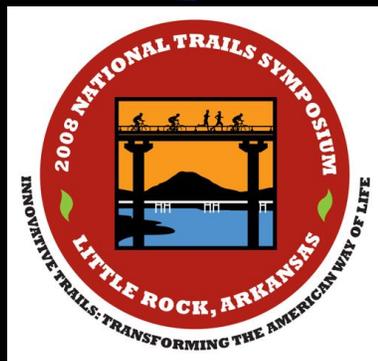

2008 National Trails Symposium- Putting the Public back into Public Safety

**911**

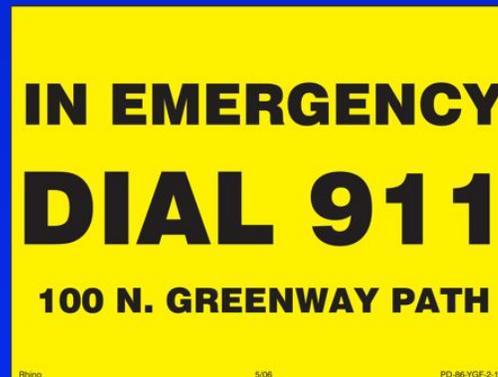

## *Integration*

911 Trail Addresses **MUST** be properly  
and promptly integrated into  
911 Emergency System – Addresses are  
useless if not incorporated into system  
in a timely manner
