THE NEW MEMORY CRAFT 200E EMBROIDERY MACHINE. TOTALLY UNIQUE. JUST LIKE YOU.

Personalization is a snap.

Not only can you enjoy the freedom of personalizing just about everything you own, but you can do it easily thanks to the new Memory Craft 200E embroidery machine. Embroider everything from garments and accessories to home decorating items. Simply snap in the hoop, press a key and let the machine do the rest.

Leave perfection to a professional.

Not to boast, but Janome's stitch quality is legendary. And to help carry on this legacy is the 200E.

The built-in stitch mechanism guarantees precision stitching for flawless, professional looking projects. And the bed-mounted carriage system offers supreme stability. So your stitches fall precisely where you want them to fall. But the Memory Craft goes beyond great stitch quality. It's also yours at a terrific value. Talk about perfection.

Instructions

1. Start designing right out of the box. Or, bring in your own original design using a USB memory stick. You can even choose from one of the 73 built-in designs.

2. Place your item in the hoop. Embroider ready-made items or your own projects. You can choose from the Large Hoop (5.5" x 5.5") or the optional Small Hoop (2" x 2").

3. Press Start. The 200E does the rest! The machine stops automatically when it is time to change thread colors. It's that easy.

Add that special touch with a single touch.

On-board editing is easy thanks to the 200E's backlit LCD touchscreen. Rotate and resize designs, add monograms or combine images in Normal Sew. There's no end to the creative possibilities.

Some great ideas come automatically...

...ideas like a built-in needle threader. No need to struggle with threading the needle. The built-in needle threader saves you from eyestrain and frustration.

Easy-to-download digital designs.

The 200E comes equipped with a USB port, so you can transfer your designs quickly and easily. Download embroidery files from the internet, or use powerful Janome Customizer and Digitizer software to create and edit your personal designs. Then, simply transfer the designs from your PC to the machine.
