

Services for Schools

The arts is not only a subject but rather a set of keys that unlocks, ignites and releases a learner from the walls that surround them.

About Tashkeel

Established in Dubai in 2008 by Sheikha Lateefa bint Maktoum, Tashkeel is an art and design organisation that seeks to provide a nurturing environment for the growth of contemporary art and design practice rooted in the UAE. Through multi-disciplinary studios, workspaces and galleries in Dubai, it enables creative experimentation and dialogue among practitioners and the community.

Operating on an open membership model, Tashkeel's annual programme of training, residencies, workshops, talks, exhibitions, international collaborations, and publications aims to further practitioner development, public engagement, lifelong learning and the creative and cultural industries.

Art Ignites Innovation

Just as our lives cannot be neatly filed in pre-destined categories, so too should the arts not be kept in a box. The arts is not only a subject but rather a set of keys that unlocks, ignites and releases a learner from the walls that surround them. Whether in science, technology, engineering, maths or the fellow humanities of history, geography and languages the arts is an application tool that fosters, nurtures and sharpens the universally required skills of problem solving, collaboration and communication. To have the confidence, the independence of mind and the emotional intelligence to question and to look beyond the boundaries of convention requires not only knowledge but discipline, patience and the cognitive ability to apply that knowledge in ways not conceived before.
