

The revolutionary breast pumping solution for workplace wellness rooms.

MilkMate provides all the equipment and supplies needed for a hassle-free pumping experience at work!

**The Solution Includes:**

- ✓ MilkMate's FDA-cleared, multi-user breast pump
- ✓ Recyclable breast shield kits that come preassembled & pre-sterilized, ready for immediate use.
- ✓ MilkMate user guide that explains how it works.
- ✓ An easy-to-use app for access to MilkMate's dedicated customer support team.

**It's as Easy as 1-2-3**

**Step 1**

Take a breast shield kit out of the provided storage. Locate and **scan the QR code each time** you use a new kit.

**Step 2**

Plug your breast shield kit tubing into MilkMate's FDA cleared, high-performance pump to begin your pumping session.

**Step 3**

Recycle your breast shield kit in the provided recycling bin located within the MilkMate station and be on your way!

# Frequently Asked Questions

## What if I run out of breast shield kits?

MilkMate is a service, meaning that the MilkMate team monitors and replenishes the single-use recyclable kits, ensuring the station remains fully stocked at all times.

**Help us help you!** As a MilkMate user, your role is to download the MilkMate app to log the breast shield kits you use during each session. This is how the MilkMate team keeps track of each use so they know when to replenish the station.

## What if the pump stops working?

While we anticipate smooth operation of all our pumps, MilkMate maintains an extra pump at each location as a precaution. For any troubleshooting or support-related questions, you can always contact the MilkMate team.

## What size breast shield kits does MilkMate supply?

MilkMate provides size 21mm, 24mm, 27mm, 30mm and 36mm breast shield kits, and size 15mm, 17mm, 19mm and 21mm inserts to be used in conjunction with our size 27mm breast shield kits. If you need another size, please reach out to the MilkMate team.
