

NOBLE

TACOPS

MEDICAL, FIRST AID, & ENVIRONMENTAL HEALTH KITS

NOBLE IS YOUR TRUSTED PARTNER IN READINESS

THE TACOPS® CONCEPT:

WHAT IS TACOPS®?

TACOPS® is the acronym for "Tactical Operations." TACOPS® encompasses on support for military Special Operations forces, and Law Enforcement tactical units, and was trademarked by NOBLE to use for our own brand of products. These products were designed and developed with input from military, law enforcement, and disaster response professionals. TACOPS® products are designed with the end user in mind and incorporate special features to enhance functionality. The unique TACOPS® logo includes cross hairs to denote that our products are on target to meet our customer's needs.

A TACOPS® ORIGINAL: M-9 MEDICAL BACKPACK

The TACOPS® M-9 Medical Backpack was specifically designed with the guidance of a Tier-1 Physician Assistant (PA), who also served as a Special Operations 18D medic, as the first medical pack with a very thin profile to carry the necessary emergency support items for operational medics working in confined spaces. Additionally, the M-9 was designed with numerous other operational features and advantages that continue to distinguish it from the host of imitations that arrived following its wide-spread acceptance and popularity.

IN THE FIELD

The M-9 became the standard issue medical pack for multiple Special Operations Forces units in every branch of the U.S. military, in many federal, state, and local law enforcement agencies, and was ultimately adopted by the U.S. Army for issue to their 68W "Combat Medics."

ADAPTABLE TO YOUR NEEDS

While the basic design of the M-9 has remained unchanged, operational end user input resulted in upgrades to internal pouches, shoulder straps, the modular instrument panel, and the system for attaching the M-9 directly to body armor or a plate carrier. The M-9 has also been modified in response to several customer-specific requests to provide additional colors, pouch configurations and capabilities (such as affixing the M-9 to a vehicle seat, increasing its internal capacity, or attaching a rescue axe to its exterior).

THE TACOPS CONCEPT: NEXT GENERATION

THE LEGACY

Over two decades ago, the TACOPS® M-9 Assault Medical Backpack was designed in conjunction with a U.S. Army Special Operation Command medic for his own unit's use. The Department of Defense TACOPS® M-9 Backpack end users soon expanded to include other Tier One military organizations, Naval Special Warfare (SEALs), Special Forces (Green Berets), Pararescuemen (PJs), Rangers, and "Combat" Medics/Corpsmen supporting a variety of differently sized and equipped military units.

EVOLUTION OF THE M-9

As the diversity of M-9 end users and operational missions expanded, so did the amount of medical equipment that was being placed inside of it. While still the operational medic bag of choice, its capacity was being pushed to the limit. Because of this, our staff began receiving end-user requests to increase the M-9's size while maintaining its slim design for use in confined spaces.

THE M-10 IS BORN

The answer to this common user experience is the TACOPS® M-10 Medical Backpack. Increasing the M-9's dimensions by only 1 inch in depth and 3 inches in length provides the M-10 with an additional 180 cubic inches of storage in the main compartment and doubles the volume of the bottom pouch to over 380 cubic inches of capacity. The M-10's design also includes significantly more PALS webbing on the outside of the main flap and along the sides to increase the surface area for affixing external components.

ADDITIONAL CUSTOMIZATION

The M-10 Medical Backpack can be ordered with a variety of pouch options for the internal layout as well as user-customized medical equipment load outs.

TACOPS® M-10 Medical Backpack Kit,
Custom Loadout and Tourniquet Pouches

DOUBLE THE CAPACITY

Adding 1" in depth and 3" in length provides over 380 cubic inches of extra internal storage capacity.

CUSTOM BOTTOM POUCH

The bottom pouch can be shortened using the compression straps to custom-configure the pack's profile to the load out.

M-9

M-10

SLIMLINE DESIGN

The M-10 provides enhanced internal capacity, additional external PALS webbing to attach accessory pouches, new internal pouch options, and additional operational capabilities while maintaining the slimline design of the highly acclaimed M-9.

INTERNAL POUCH CONFIGURATION

Options include any combination of four 7-inch x 6-inch pouches (with either a vinyl/mesh facing) or our standard horizontal mesh pouches.

CUSTOM LOAD OUT

M-10 can be ordered empty or with any user-defined equipment load out.

CASUALTY EVACUATION KITS

Casualty Evacuation (CASEVAC) includes the rescue, recovery and evacuation of casualties under any circumstances and in any environment. We designed our line of CASEVAC Kits to support the successful accomplishment of these missions by providing the most effective emergency medical and casualty evacuation equipment currently available, in user-friendly configurations that can be easily customized to meet the unique requirements of any organization.

- Multi-Casualty Mobility
- Casualty Recovery
- Extreme Terrain Rescue
- Confined Space Resc
- Portable Power
- Advanced Life Support
- Sustained Operations

SUSTAINED OPERATIONS KIT

The Sustained Operations Kit provides the ability to transport, store by functional capability, and easily access a diverse variety of medical supplies. It can be used to support long duration operations or situations requiring treatment of multiple casualties over multiple days when external re-supply is not immediately available.

This kit can be configured to provide any or all of the following capabilities:

- Control of life threatening bleeding
- Wound protection
- Pain management
- Prevention and treatment of shock
- Advanced airway and breathing management

One bag, multiple kit configurations:

ADVANCED LIFE SUPPORT KIT

The Advanced Life Support Kit provides advanced life support equipment during the treatment and movement of a casualty from remote locations and includes the following types of equipment:

- Vital signs monitor
- Mechanical ventilator
- Oxygen generator
- Active thermal warmer
- Electric external de-fibrillator
- Accelerated fluid resuscitation
- Intravenous fluids and blood warmer

CASUALTY RECOVERY KIT

The Casualty Recovery Kit provides the ability to:

- Treat traumatic and life threatening injuries
- Immobilize casualties having cervical, spinal, pelvic or extremity fractures
- Quickly transport casualties over rough terrain and water
- Vertically hoist or lower casualties (using additional assets)

EOD KITS

TCERS KIT

The Thermally Controlled Explosive Removal System (TCERS) Kit was developed in support of the Marine Corps System Command's Family of Explosive Ordnance Disposal Equipment Contract to provide a cleaner, less expensive and more portable means of removing explosives from hard cased munitions. The system was conceived and designed by active duty EOD technicians intending to improve upon the existing Explosive Washout System that uses pressurized steam to accomplish the same task.

The TCERS Kit consists of multiple sizes and designs of thermal tapes and wraps, a digital temperature control unit, a thermocouple, and infrared thermometer to provide EOD technicians the ability to safely melt and remove explosive compounds from projectiles without producing hazardous wastewater. The system has been successfully used on munitions ranging from 60mm mortar rounds up to and including 155 mm artillery projectiles.

EOD SEARCH KIT

The TACOPS® EOD Search Kit provides the EOD team with specialized tools and equipment to conduct interior and exterior search operations involving Improvised Explosive Devices (IEDs), Unexploded Ordnance (UXO) and Weapons of Mass Destruction. This kit includes such items as a video borescope, high intensity searchlight, thermal imagers, spotting scope, range finder, metal detector, laser pointer, binoculars and a digital camera.

NSN: 5850-01-559-2664

EOD TECHNICIAN KIT

The TACOPS® EOD Technician Kit provides the EOD Technician with the individual issue tools and protective equipment needed to fulfill their complex missions. This kit includes such items as a backpack with a hydration bladder, hi-intensity flashlight, M11 EOD knife with scabbard and accessory pouch, protective eye wear, a mine probe kit, a remote pull-line kit and reel, blasting cap box and crimper, headlamp and a multipurpose tool.

NSN: 1385-01-565-1626

LADDER BACKPACK SYSTEM

The Ladder Backpack System was created to use with Telesteps' tactical telescoping extension ladders.

Ladder sold separately.

HEAVY DUTY TOOL/ LADDER BACKPACK

The Heavy Duty Tool/Ladder Backpack was designed to help with the transportation of Ruhl Tech entry tools.

The backpack holds up to 3 tools at one time. The design makes the backpack slim and easy to use in tight environments. The tools are held in place with nylon straps and quick release buckles. Due to the unique design, the pack can also accommodate Ruhl Tech collapsible ladders. The backpack also consists of MOLLE that allows for compatible pouches to be added for extra storage.

Dimensions: 25"l x 14.5"w x 6"d

Weight: 1.4 lbs

Berry-Compliant versions available in ACU and MC.

TACOPS®

TACOPS®

M-10 MEDICAL BACKPACK

The TACOPS® M-10 Medical Backpack provides advanced internal capacity, additional external PALS webbing to attach accessory pouches, new internal pouch options, and additional operational capabilities while maintaining the same slim design of our highly acclaimed M-9 Assault Medical Backpack.

- The main compartment has an additional 180 cubic inches of storage.
- The bottom pouch more than doubled in volume to over 380 cubic inches of storage.
- The bottom pouch can be cinched up using the compression straps to minimize the pack's profile.
- Three types of pouches offered for inside the pack that can be included in any combination:
 - 7-inch x 6-inch pouches with either a vinyl or mesh facing
 - Standard horizontal mesh pouches found in the M-9 (each capable of holding 2000 mL of IV solutions)
 - Will hold 4 of any individual type of pouch or 2 of the 7-inch x 6-inch and 2 of the horizontal mesh pouches
 - All mesh pouches have loop fastener for identifiers

Colors Available:

Available bag-only or pouch configuration package:

- Alpha Configuration: M-10 bag with square mesh pouches
- Bravo Configuration: M-10 bag with square vinyl pouches
- Charlie Configuration: M-10 bag with rectangular mesh pouches
- Delta Configuration: M-10 bag with 2 square mesh or vinyl pouches and 2 rectangular mesh pouches
- Echo Configuration: M-10 bag with 2 square vinyl pouches and 2 square mesh pouches

Optional M-10 Accessories:

- ____ Square M-10 Mesh Pouch
- ____ Square M-10 Vinyl Pouch
- ____ Rectangular M-10 Mesh Pouch
- ____ Universal Tourniquet Pouch

Custom field ready loadouts available.

WE'RE HERE TO SUPPORT YOU

TACOPS® M-10 FOR USE WITH ALICE SUPPORT FRAMES

In response to numerous requests from SOF Medics, we now offer our M-10 in a version that is adaptable to ALICE-style frames.

This new configuration is even more comfortable to carry and the M-10 can be worn either with or without the frame, contingent upon the mission.

This design also enables the medic to transport either one or two additional external pouches without taking up any of the packs' external PALS webbing (depending upon the specific ALICE frame being used). One of these pouches is easily accessible without even removing the system from your back .

Our ALICE frame compatible M-10s can be ordered either as a complete system (including frame, padded belt - with either Cobra or Fastex buckle - and additional pouches), or as a basic pack and select accessories for retrofitting to your existing ALICE frame .

Optional M-10 ALICE Accessories:

M-10 ALICE Bag Only

M-10 ALICE Padded Belt with Cobra Buckle

M-10 ALICE Padded Belt with Fastex Buckle

M-10 ALICE External Pouch

M-10 ALICE External Pouch Platform

Shown: Rear view of the TACOPS® M-10 Medical Backpack with ALICE frame

TACOPS®

M-9 ASSAULT MEDICAL BACKPACK

The TACOPS® M-9 Assault Medical Backpack was the first medical pack with a very thin profile to carry emergency support items for operational medics working in confined spaces.

The M-9 Assault Medical Backpack was designed with the guidance of a Tier 1 Physician's Assistant (PA), who also served as a Special Operations 18D medic. The M-9 is equipped with a removable waist strap and has four carry options: padded and unpadded backpack straps; accessory connectors to attach the pack directly to body armor or a load bearing vest (LBV); and carry handles located on top of the pack body and flap.

Internal Features

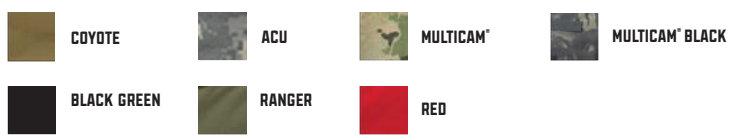

- 4 removable mesh pouches, 3 of which also incorporate elastic closures
- Modular instrument panel with replaceable elastic securing system
- Hidden flat pocket behind instrument panel
- 1 small zippered mesh pocket on pack flap
- Internal access to bottom pocket
- Internal zipper pulls are red para-cord for fast easy identification

Additional Features

- Large bottom pocket sized to hold 2000 mL of IV solutions
- PALS webbing on sides of pack body and front of pack flap
- Loose end of shoulder and waist straps have Velcro® securing tabs
- 3" x 2" Velcro® loop on front of pack flap for identifier patches
- 8" x 8" Velcro® loop on back of pack to secure pack to body armor with optional Velcro® hook panel that attaches via PALS webbing
- Large mesh pocket on back of pack (great for storing moldable SAM® splints)

Closed dimensions: 20"h x 13"w x 3"d

Color Options:

Field-Ready M-9 Assault Medical Backpack includes:

- Headlamp
- TACOPS® Tactical Rescue Knife
- Combat Gauze
- Tourniquets
- Chest Seal
- Assorted Bandages
- Compressed Gauze Packs
- Assorted Gauze Pads
- Burn Dressing
- Nasopharyngeal Airways
- Surgical Lubricant Foil Packs
- Oral Airways
- Pocket Bag Valve Mask
- Disposable Suction Device
- Splints
- Adhesive tape
- Trauma Shears
- Hemostats
- Fine Point Forceps
- Prep Pads
- Gloves
- Permanent felt-tip marker

Custom loadouts available.

MODULAR INSTRUMENT PANEL

COYOTE

FOLIAGE GREEN

MULTICAM®

The TACOPS® Modular Instrument Panel (with replaceable Elastic Cord Securing System) enables users to individually organize their panels to securely hold numerous items of various sizes and shapes in either horizontal or vertical configurations.

This 12" x 7" panel is included with every TACOPS® M-9 and M-10 for attachment inside the main pack flap or to any other Velcro loop surface. The replaceable elastic cords can be woven into the panel in a variety of configurations, enabling the end-user to stow items of any almost size or shape for immediate access.

Available in Coyote, Foliage Green, or MultiCam®.

M-5 MEDICAL BAG

The TACOPS® M-5 Medical Bag was produced at the request of the of the Counter Narcotics and Terrorism Operational Medical Support (CONTOMS) Tactical EMT program in the 1990s and is still the standard tactical medical bag used by many federal, state and local law enforcement agencies.

- PALS webbing located on the front and side of pack
- Includes a grab handle, padded backpack straps (with Velcro® holdowns), and a padded shoulder strap for easy transport
- Two large covered pockets on sides, tunneled for holding "D" sized oxygen cylinders
- Large flat zipper pocket on flap
- Three-sided, zippered flap for total access to interior compartment; zipper covered with rain flap
- Two large interior "open-top" pockets
- Three 16" x 7" vinyl removable pockets for quick equipment ID; glow tape tabs give quick paging
- 8" x 8" vinyl pocket attached to top flap
- Multiple elastic loops on flap to secure small items
- Large glow tape panel on top of bag for quick identification of bag in the dark (faces up when bag is carried as a backpack; attached with Velcro®)

Closed dimensions: 18"h x 12"w x 9"d

M-4 SPECIAL OPERATIONS MEDICAL BAG

The TACOPS® M-4 Special Operations Medical Bag was designed to fulfill the operational need for a comprehensive field portable medical bag.

The M-4 was the standard issue medical bag for Special Forces 18Ds until it was replaced by the M-9. In fact, the M-4 was designed by the same special operations medical professional who designed our M-9.

The M-4 has three main sections:

- The Front Compartment is built into the lid and has two sets of dual open pouches (with bungee closures) for bulky items such as compression bandages. Each pair is faced by a wide zippered mesh pouch for smaller components. Behind all four of these pouches is one very large flat pocket for holding thinner items such as chest seals or flat bandages.
- The Rear Compartment consists of two large mesh pouches, one zippered and one with bungee closure. These are large enough for multiple 500mL or 1000mL IV bags and starter kits or moldable splints.
- The removable Airway / Instrument Panel has elastic loops and two mesh pockets on one side while the reverse side has one large pocket faced with clear vinyl.

The M-4 can be carried as a patrol backpack, as a fanny pack or by its handles as a duffel bag. It can also be affixed directly to an ALICE pack or MOLLE rucksack.

Closed dimensions: 13"h x 13"w x 7.5"d

When ordering Field Bag, please specify bag color.

- Blue Sharpie Marker
- White Chemlights
- Emergency Blanket, Silver/Orange
- Contents Re-Order Card

BLEEDING CONTROL KIT SYSTEM

Originally designed to meet the requirements of a federal agency, the TACOPS® Bleeding Control Kit provides a simple and cost effective solution to meet the needs of everyday citizens and prepared organizations alike. By providing customers with the essential tools to stop massive bleeding through their actions as immediate responders, the Bleeding Control Kit is designed to save lives.

In addition to traditional bleeding control items, the kit also features an instruction card that incorporates both text and images to help those without formal training to act decisively in an emergency.

Customers may purchase a kit with or without a hemostatic bleeding control dressing based upon their preference. Packaged in vacuum sealed, heavy duty plastic, durability and water resistance are key features of this kit. Once opened, the kit also features a reusable zipper that will allow the user to close it to reduce the chance of losing contents. The small size of the kit allows users to place it wherever they deem it most necessary: a glove compartment, backpack, or existing first aid kit. Wherever you choose to add this kit, know that it will provide you peace of mind.

Bleeding Control Kit (BCK)

All items are contained in a resealable pouch.

- QuikClot Hemostatic Agent (Optional)
- Combat Application Tourniquet
- Compression Bandage
- Compressed Z-Fold Gauze
- Nitrile Gloves
- Mini Trauma Shears
- Permanent Marker
- Instruction Card

Hemostatic Agent also available, please inquire.

Bleeding Control Kit Bag

The Bleeding Control Kit Bag is designed to hold up to 8 Individual Bleeding Control Kits or a combination of Individual Bleeding Control Kits and poleless litters. The bag uses extremely durable 500D red Nylon fabric that is screen printed with the words 'BLEEDING CONTROL KIT' in white so that it can be easily identified in an emergency.

Closed dimensions: 15" x 10" x 4"

Bag Only
Bag with Bleeding Control Kits (with Hemostatic Agent)
Bag with Bleeding Control Kits (without Hemostatic Agent)

Bleeding Control Kit (BCK) Wall Mount Unit

The Bleeding Control Kit (BCK) Wall Mount Unit was designed to be used in conjunction with our TACOPS® Bleeding Control Kit Bag. It provides a wall mounted storage solution that allows a user to place the kits in a recognizable and easy to find location. The unit is manufactured of NEMA compliant plastics and features a gasketed seal with two entry latches. The unit includes high visibility labeling and standard wall mounting hardware.

Closed dimensions: 16" x 12" x 6.5"

Bleeding Control System

The TACOPS® Bleeding Control System includes the following:

- (8) Bleeding Control Kits, with or without hemostat
- Bleeding Control Kit Bag
- Bleeding Control Kit (BCK) Wall Mount Unit

Hemostatic Agent also available, please inquire.

TACTICAL EMERGENCY MEDICAL SERVICES (TEMS) BAG

The TACOPS® Tactical Emergency Medical Services (TEMS) Bag provides for individual emergency response to multi-casualty situations.

The configuration of the TEMS bag enables a single emergency responder to carry numerous tourniquets, hemostatic agents, pressure bandages, chest seals / decompression needles, nasopharyngeal airways, Kerlix gauze and even (2) pole-less litters.

Wearing the bag diagonally across the chest keeps all components readily available while still giving the responder the ability to “swing the bag out of the way” in order to pick up and manually drag a casualty (unlike chest mounted or fanny pack designs) .

Includes a glove pocket on the lid, a large flat pocket on the back, a small flat pocket on the inside, and dual compression straps on the bottom.

TACOPS® Field Ready TEMS Bag includes:

- Tourniquets
- QuikClot® Combat Gauze LE
- Compression Bandages 4”
- Compression Bandages 6”
- Chest Seals
- Nasopharyngeals/Airways
- Compressed Kerlix Gauze 4.5” x 4 yds
- Tape Rolls 2” x 10 yds
- Disposable Stretchers
- Trauma Shears 7.25”
- Nitrile Gloves
- Blue Sharpie Marker

Custom loadouts available.

Colors Available:

OFFICER FIRST AID KIT

Intentionally designed to carry sufficient medical items to treat multiple casualties, the TACOPS® Officer FAK can be custom-loaded to suit your organization’s requirements.

The TACOPS® Officer First Aid Kit was designed at the request of a large southern California law enforcement agency to give their officers the ability to treat multiple casualties having life threatening injuries from a single kit . The removable belt attachment (with tourniquet pouch) is intended to remain affixed to a duty belt at all times . The main pouch (with leg strap) connects directly to the belt attachment in mere seconds and, depending upon the quantities desired, can be ordered with user-designed custom embroidery.

Colors Available:

TACOPS® OFAK Field Ready Contents:

- Tourniquets (2)
- QuikClot® Combat Gauze LE
- Compression Bandage 4”
- Compression Bandage 6”
- Compressed Kerlix Gauze 4.5” x 4yds (2)
- Chest Seals (2)
- Nasopharyngeal Airways with lube
- Trauma Shears 7 1/4”
- Nitrile Gloves
- Blue Sharpie Marker

Custom loadouts available.

INDIVIDUAL OFFICER TRAUMA KIT

The TACOPS® Individual Officer Trauma Kit (IOTK) was built to equip officers with the essential supplies to respond in emergency medical situations until the arrival of certified assistance.

The small size of the IOTK allows for convenient storage in a multitude of places including an officer vehicle, range/call out bag, or desk at the office. In addition, the kit is also a modular system using PALS style webbing that can be easily attached to any PALS compatible leg harness, vest, pack, or belt. Single hand opening allows for quick access during critical situations.

Quick treatment can mean the difference between life and death. The addition of the IOTK to an officer's patrol equipment ensures the necessary equipment is within reach in case of hemorrhage injuries. Contents of the IOTK have been tested, proven, and used in multiple environments around the world to treat trauma injuries.

Closed dimensions: 8"h x 6"w x 3.5"d

Colors Available:

Kit Contents Included:

- Compression Bandage, 6"
- Tourniquet
- QuikClot® Combat Gauze LE
- Chest Seal
- Trauma Sheers
- Nitrile Gloves

Custom loadouts available.

FIREARM INSTRUCTOR FIRST AID KIT

The TACOPS® Firearms Instructor First Aid Kit provides range staff with immediate access to routine and emergency medical items in an easily identifiable belt-mounted nylon carrier.

The Firearms Instructor First Aid Kit is designed to be carried by Range Instructors on the firing line. This pouch contains the basics to deal with minor injuries sustained by range shooters as well as critical items to employ in the event of a serious injury.

This first aid kit can be mounted on either a belt or MOLLE webbing. It is light, compact, and readily available at the point of injury.

Kit Contents Included:

- Compressed Kerlix Gauze
- Compression Bandage
- QuikClot® Combat Gauze
- Tourniquets
- Mini Trauma Sheers
- Adhesive Bandages
- Tape Roll, 1" x 10yd
- Gauze Pads 4" x 4"
- CPR MicroShield Clear Mouth Barrier
- Cleansing Towelettes
- Nitrile Gloves
- Chest Seals

Custom loadouts available.

MULTI-PLATFORM MEDICAL POUCH

The TACOPS® Multi-Platform Medical Pouch (MPMP) secures emergency medical equipment to your belt, to PALS webbing, or underneath the front or back of a vehicle seat.

The MPMP was developed at the request of a federal agency for issue to over 2,000 of its operational staff. We call it multi-platform because of the numerous ways it can be transported. It is designed to be carried both vertically (high or low) and horizontally on a regular or duty belt; attached to a vest or other item having PALS webbing; or even clipped to the magazine pocket behind the front seat in most vehicles. It can be quickly and easily removed from whatever it is fastened to because it is connected to these various attachment platforms via a combination of hook and loop fabric and snaps. BERRY Compliant. Closed dimensions: 6”h x 4”w x 2.5”d

The Multi-Platform Medical Pouch is available empty or with a customized loadout to meet your specific equipment preferences.

Kit Contents Included:

- Compression Bandage
- Chest Seal
- Tourniquet
- Compressed Kerlix
- 30 Fr Nasopharyngeal Airway
- Nitrile Gloves

EMERGENCY AID KIT

The TACOPS® Emergency Aid Kit (EAK) was designed to economically provide the proper medical components to treat a variety of moderate-to-life-threatening injuries.

Unlike most store-bought family first aid kits, the EAK is derived from items contained in many of TACOPS® military medical kits and can be used to properly treat injuries ranging from sprains and broken bones to burns and severe bleeding. The EAK weighs less than two pounds and is compact enough to easily store in the home, in any vehicle, or taken on outdoor excursions. The pouch itself can be worn on a belt and has webbing strips on the exterior to allow for affixing additional items such as a knife, flashlight, and almost anything else having an inherent clip or attached to a lanyard.

Kit Contents Included:

- QuickClot® Combat Gauze LE
- Sterile gauze pads, 4 x 4”
- Sterile burn dressing
- Compression bandage, 4”
- Nitrile black large gloves
- Tourniquet
- Tape, roll, 1” x 10yds
- Antiseptic towelettes
- SAM splint, 36”
- Elastic bandage 4” x 5yds
- EMT shears
- CPR MicroShield
- Emergency blanket
- Survival/first aid card
- Adhesive bandages, 7/8 x 3”
- Adhesive knuckle bandages
- Adhesive finger tip bandages
- General purpose black pouch

Custom loadouts available.

Custom loadouts available.

VEHICLE TRAUMA KIT

The TACOPS® Vehicle Trauma Kit (VTK) was designed and equipped to fulfill a U.S. federal agency contract providing over 800 kits containing specific medical items for use by its staff in remote areas.

This bag features two 6" x 12" vinyl pouches and one 12" by 12" vinyl pouch.

Kit Contents Included:

- Abdominal Pad
- Elasticized Pressure Bandage
- QuikClot Combat Gauze
- CAT Tourniquet
- Orange EMT Shears
- Nitrile Gloves
- Triangle Bandage
- Cloth Tape
- Face Masks with Eye Splash Shield
- Bio-Hazard Bag
- Gauze Pad
- CPR Mask
- Mylar Foil Blanket
- Black Ink Pen
- Hand Sanitizer
- Medical and Patient Incident Report

RANGE FIRST AID KIT

The TACOPS® Range First Aid Kit was specifically designed to treat routine and worst-case injuries that occur on today's modern firearms and training ranges.

Regardless of whether you are qualifying shooters on the firing line or are conducting explosive breaches followed by live fire room clearing by your tactical team, this kit will provide you with exactly what you need. Contained in a highly visible bright orange case are items to treat everything from minor cuts and sprains to broken bones, burns, and penetrating chest wounds. The waterproof case can be kept in the range instructional building, mounted in the vehicle, or in any well known and easily accessible location.

Kit Contents Included:

- Tourniquets
- Compression Bandage, 6"
- Compression Bandage, 4"
- QuikClot Combat Gauze LE
- Chest Seals
- Compressed Kerlix Gauze
- EMT Shears
- SAM Splint 18"
- Triangular Bandage (40"x40")
- CPR Mask
- Triple Antibiotic Ointment
- Cleansing Towelettes
- Adhesive Bandage, 7/8"x3"
- Adhesive Bandage, Fingertip
- Adhesive Bandage, Knuckle

EXECUTIVE PROTECTION MEDICAL KIT

The TACOPS® Executive Protection Medical Kit (EPMED Kit) secures emergency medical equipment underneath a vehicle seat for immediate access while in a moving vehicle.

The EPMED Kit is designed to attach underneath the forward or back of the front seat of any vehicle and provide the occupants immediate access to three removable mesh pouches labeled and equipped to provide emergency medical treatment for minor through traumatic injuries and in support of CPR.

The main compartment has 2 elastic loops located at the top and bottom of the kit for additional equipment such as EpiPens, chemlights or decompression needles. The kit is accessed via a large red pull handle attached to dual zippers for one-handed opening and easy visibility in low light.

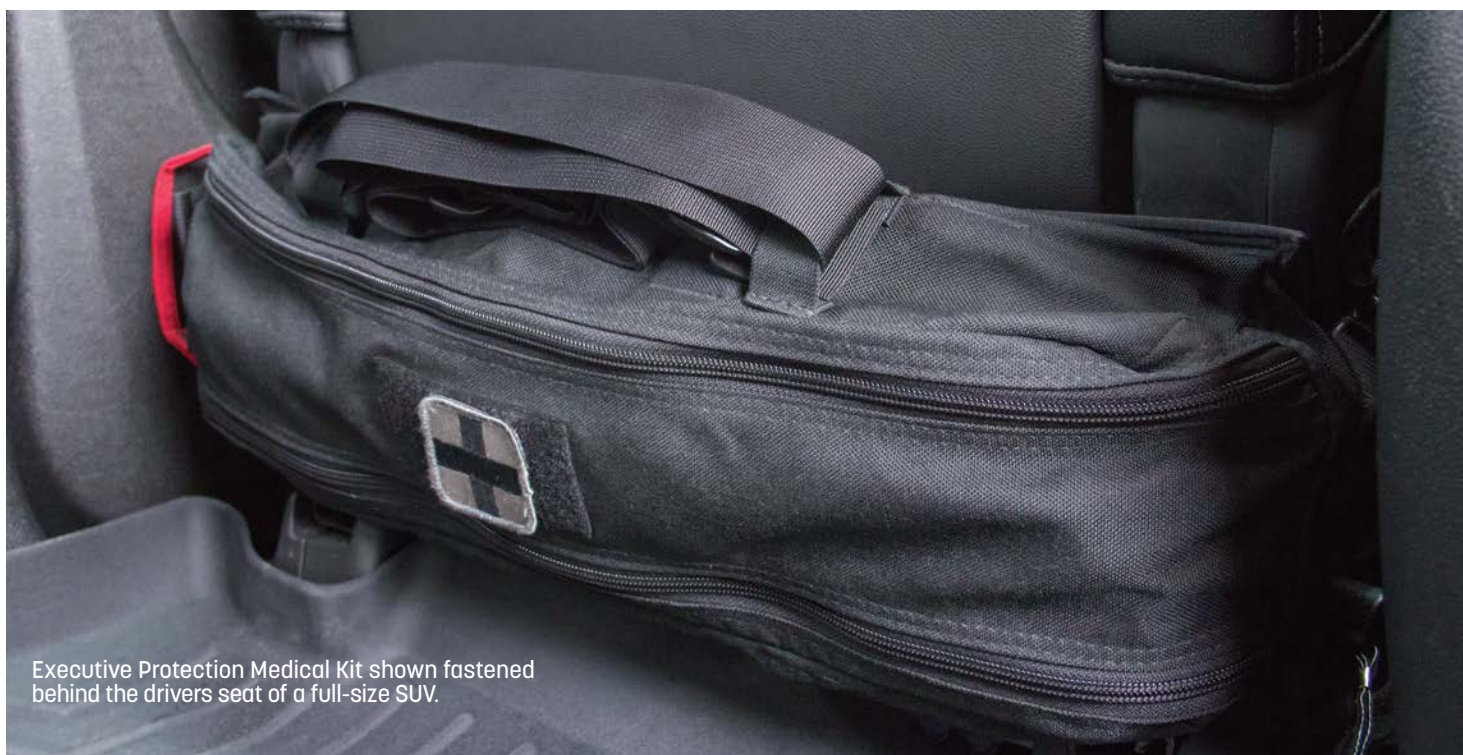

The EPMED Kit is secured underneath the seat using adjustable bands that double as a shoulder strap when transporting the kit outside of the vehicle. The kit has 3" x 2" Velcro® loop sewn on the front panel and comes with a supplied subdued Velcro® medic patch or used with other identifiers.

Kit Contents Included:

- Tourniquet
- Compression Bandages
- Chest Seals
- Compressed Kerlix Gauze
- Bag Valve Mask
- Nasopharyngeal Airway
- Cold Compress
- Triangular Bandage 40" x 40"
- Casualty Blanket
- CoFlex 3" x 5 yds
- Adhesive Bandages, Multiple Types
- Nitrile Gloves

Custom loadouts available.

Executive Protection Medical Kit shown fastened behind the drivers seat of a full-size SUV.

TACOPS®

MODULAR VEHICLE PLATFORM

The TACOPS® Modular Vehicle Platform (MVP) securely attaches to every style of vehicle seat to include those not having adjustable headrests.

The MVP consists of a large 21" x 15" PALS platform with 11 rows of webbing and a nylon protector panel for the front of the seat.

The PALS platform includes a full-length internal plastic stiffener and 11 adjustment straps to keep it held tight against the seat back and to prevent the entire panel from bouncing around while driving over rough terrain with it fully loaded out.

The MVP also includes plastic fastener tabs for attaching either the TACOPS® M-9 or M-10 Medical Backpacks directly to the MVP.

Colors Available:

The Modular Vehicle Platform can adapt to fit various styles of vehicle seats.

Shown with TACOPS® M-10 Medical Backpack attached

Back attachment points

Front attachment points

Shown with TACOPS® M-10 Medical Backpack attached

VEHICLE ATTACHMENT STRAPS

The TACOPS® Vehicle Attachment Straps provide an inexpensive platform for mounting the TACOPS M-9 and M-10 Medical Backpacks directly to the back of vehicle seats.

This system was designed due to customer requests for a way to position their TACOPS® M-9 or M-10 Medical Backpack in a fixed and easily accessible location inside of a vehicle for quick access.

We couldn't have made the solution any simpler. These Vehicle Attachment Straps securely tighten down on every style of vehicle seat to include those not having adjustable head rests.

Four movable plastic fasteners connect to the M-9's / M-10's PALS Attachment Straps (included with the medical bags), and the fasteners on each end of the bottom section of the shoulder straps, to keep the bags securely in place on the seat back even while driving over rough terrain.

Colors Available:

Just like the Modular Vehicle Platform, the Vehicle Attachment Straps can adapt to fit various styles of vehicle seats.

VEHICLE ASSAULT MEDICAL PLATFORM

The TACOPS® Vehicle Assault Medical Platform (VAMP) is designed to attach the M-9 Assault Medical Backpack to the seat of your vehicle. The platform is fully adjustable to fit most vehicle seats, forms to the seat and is padded for comfort.

The M-9 Assault Medical Backpack attaches to the platform using an integrated strap system with quick release capabilities allowing for operations away from the vehicle. The platform can also be used without the M-9 as a modular platform for attaching pouches via PALS webbing when medical support is not required.

The mesh zippered pouches within the M-9 Assault Medical Backpack are clearly labeled to identify the type of injury that can be treated. Each pouch is attached with hook and loop Velcro® as well as a pull tab for easy removal.

Pouches consist of the following:

- Airway (1 small pouch)
- Bleeding (2 small pouches)
- First Aid (1 large pouch)
- Admin Pouch (1 small pouch)

Colors Available:

Options:

- ____ Vehicle Assault Medical Platform
- ____ Vehicle Assault Medical Platform with Modular Vehicle Platform
- ____ Vehicle Assault Medical Platform with Vehicle Attachment Straps
- ____ Mini Mesh Pouch*
- ____ Large Mesh Pouch*
- ____ Embroidered Tape with Hook Attachment**

**Specify Admin, Basic First Aid, Bleeding or CPR.

* With Pull Tabs, Zippers, and Pile Attachment Tape, Black.

Field Ready Kit Contents:

Bleeding (Each)

- Tourniquet
- Compression Bandage 4"
- Compressed Kerlix Gauze 4.5" x 4yd
- Chest Seal
- Tape Roll 2" x 10 yds
- Nitrile Gloves

CPR

- Pocket Bag Valve Mask
- Nasopharyngeal Airway
- Lubricant Foilpack
- Nitrile Gloves

Basic First Aid

- Burn Dressing 8" x 8"
- Adhesive Bandage ¾" x 3"
- Adhesive Bandage 1" x 3"
- Adhesive Bandage 2" x 4 1/2"

- Adhesive Bandage, Finger Tip
- Adhesive Bandage, Knuckle
- Bacitracin Ointment
- Tape Roll 2" x 10 yds
- Cold Compress
- Oral Hydration Solution
- Triangular Bandages 40" x 40"
- Casualty Blanket
- CoFlex 3" x 5 yds

Admin

- Trauma Shears
- Casualty Card
- Biohazard Bag 24" x 23"
- Blue Sharpie Marker

Also included:

- SAM® Splints 36"
- Modular Carry Handle

Custom loadouts available.

TACOPS[®] MASS CASUALTY KITS

Our Mass Casualty Kits are single part number, fully equipped medical packs specifically designed to provide emergency medical support for environmental, accidental or intentional catastrophic events where numerous persons are inflicted with traumatic, life-threatening injuries.

We recommend these configurations as opposed to wall-mounted emergency first aid "stations" because:

- They can either be prepositioned in, or transported to, any location where needed.
- They are equipped to support a great variety of incident and injury types.
- Emergency responders know exactly where the equipment is and can immediately access it without having to either look for it or risk entering a "hot" zone to obtain it.

ROLLING MASS CASUALTY KIT

The TACOPS® Rolling Mass Casualty Kit (RMCK) provides significant enhancements in mobility, functionality, and versatility over every other available multi-casualty kit and provides first responders the ability to treat over 40 casualties, depending on the types of injuries encountered.

A large rolling duffel, complete with removable shoulder straps, enables the kit to be quickly and easily transported over long distances and in stairwells. Inside are ten removable Trauma Pouches, each individually capable of treating 3-4 casualties with traumatic injuries. These pouches include tourniquets, pressure bandages, hemostatic agents, chest seals, airways and other essential equipment. Two additional internal pouches contain abdominal bandages and hypothermia blankets.

Within the lid are multiple moldable splints and burn/blast dressings. Tucked away on either side of the inner compartment are six disposable pole-less litters.

The Rolling Mass Casualty Kit can be modified and custom-loaded to meet end users' desired capabilities and component list.

Closed dimensions: 30"h x 15"w x 14"d

Trauma Pouch Contents Include:

- Tourniquets
- Chest Seals
- QuickClot® Combat Gauze LE
- Compression Bandages 6"
- Compression Bandages 4"
- Blast Bandages, 20"x20"
- Abdominal Dressings
- Sterile Burn Dressings, 18"x18"
- Kerlix Gauze, 4.5" x 4yds
- SAM Splints, 36"
- SAM Splints, 18"
- COFLEX Tape, 2" x 5yds
- Tape Rolls, 2" x 10yds
- Trauma Shears
- Nasopharyngeal Airways
- Triangular Bandages
- Emergency Blankets
- Pole-less Litters
- Nitrile Gloves
- Hi-Intensity Chemical Lights
- Blue Sharpie Markers

Custom loadouts available.

MASS CASUALTY RESPONSE KIT

The TACOPS® Mass Casualty Response Kit is a single part number, fully equipped, medical bag specifically designed to provide medical support for combat mass casualty incidents where multiple servicemen are inflicted with traumatic, life-threatening injuries.

The Mass Casualty Response Kit consists of a large water-resistant bag, designed to be mounted either inside or outside of a vehicle, containing clearly labeled and removable modular pouches pre-stocked with supplies to control bleeding (tourniquets, pressure bandages, abdominal bandages, dressings, tape, etc.), establish and maintain airways, protect burned skin, immobilize appendages (splints), and transport casualties (hypothermia blankets and disposable litters). It also contains a small extraction tool.

Six of the internal pouches are pre-configured into easily-removable "Trauma Kits" that are individually capable of treating a variety of life threatening wounds to 2-4 servicemen. Each kit contains multiple tourniquets, pressure bandages, hemostatic agents, nasopharyngeal airways with lubricant, chest seals, compressed gauze, tape, shears and other items. In addition, a single removable pouch is equipped with multiple pressure bandages, large abdominal bandages, large hemostatic agent trauma pads, and additional tape.

An additional single large removable pouch is equipped with multiple quantities and sizes of moldable splints, burn dressings, and a 3' x 2.5' burn sheet that can be used for immediate extinguishment of burning clothing or skin.

Two large attached pouches each contain multiple disposable litters and hypothermia blankets. The extraction tool includes three usable surface areas – an axe head, a large pick head, and a heavy-duty claw head.

The MCRK also includes multiple reinforced external tie-down points for securing it to a vehicle, either internally or externally, or any other positioning point for ease of access.

Closed dimensions: 18"h x 20"w x 14"d
Weight: 49 lbs. (when loaded with Field-Ready contents)

NSN#: 6545-01-590-7480 Mass Casualty Response Kit
Refill Kit available, please inquire.

Kit Contents Included:

- Rescue Access Tool
- Tourniquets
- QuikClot® Combat Gauze
- Combat Gauze Trauma Pads
- Compression Bandages

MASS CASUALTY INCIDENT RESPONSE KIT

The TACOPS® Mass Casualty Incident Response Kit (MCIRK) was developed to provide federal and civilian first responders with emergency medical support items for use in response to catastrophic incidents resulting in large numbers of critically injured persons.

Patterned after our combat Mass Casualty Response Kit, this version also offers six pull-out trauma packs, each designed to treat multiple casualties having life threatening injuries. The two large removable pouches contain additional components to treat injuries beyond the capabilities of the trauma packs. Due to its easy transportability, there are several options for deploying this kit:

- Permanently Positioned – Shopping Malls, Schools, Transportation Hubs
- Pre-staged for Special Events – Stadiums, Arenas, Tent Events
- Transported by Vehicle – Carried on Emergency Response Vehicles

Components, items, and quantities provided in this kit were specifically selected based upon an evaluation of injuries incurred by civilians as a result of natural and man-made catastrophes over the past decade.

The Mass Casualty Incident Response Kit and its components can be modified and customized to meet the end user's desired capabilities.

Closed dimensions: 18"h x 20"w x 14"d

Kit Contents Included:

- Rescue Access Tool
- Tourniquets
- QuikClot® Combat Gauze LE

MASS CASUALTY INCIDENT RESPONSE KIT CABINET

The Mass Casualty Incident Response Kit (MCIRK) Cabinet is a custom designed receptacle for the Mass Casualty Incident Response Kit. The cabinet allows the kit to be mounted in a variety of venues where there is an elevated risk of mass casualty situations, such as in subway stations, stadiums, educational facilities and government buildings. Constructed of high strength powder-coated steel, the MCIRK Cabinet comes with stainless steel latches and a rubber weather sealed wide access door. It ships with long life "star of life" decals that are both reflective and glow in the dark, facilitating easy location by first responders.

Mass Casualty Incident Response Kit sold separately.

TACOPS®

ACTIVE RESPONSE BREACHERS KIT

The TACOPS® Active Response Breachers Kit (ARBK) is a portable breaching tool system with full size telescoping and folding handle sledge, houly and cutters to provide a full force solution to breaching requirements.

The ARBK is designed to enable emergency responders to gain access into and throughout structures where doors and windows may otherwise be impassible due to locks, chains and and/or cables.

The design of the bag enables the tools to be carried with their handles either collapsed or expanded and allows a single user to individually both carry and employ the tools.

The quick-disconnect shoulder strap is supplemented by a reinforced and ergonomic handle for one-handed transport.

Weighing less than 17 pounds, this is one of the lightest breaching kits currently available that has this range of capabilities.

The RAM-X (not included) shown below further expands on these capabilities.

Tools included (shown below):

Compact Houly

- 3.25 lbs.
- Collapsed: 15 in. L
- Extended: 23 in. L

3 lb. Sledge

- 5.02 lbs.
- Collapsed: 14.5 in. L
- Extended: 22 in. L

Folding Bolt Cutter

- 6 lbs.
- Collapsed: 15.25 in. L
- Extended: 25.5 in. L

Ruhl Tech Compact Tool Kit (Included)

Features:

- Forged Steel Head
- Aircraft Grade Aluminum Handle
- Black Anodized Handle
- Knurled Handle
- Aircraft Grade Titanium Shaft
- Aircraft Grade Aluminum
- Extend and Collapse with One Hand

RAM-X (Not Included)

- One-man Ram (9")
- Approx weight: 25lb
- Body Length: 9"
- Face Thickness: 2"
- Face Diameter: 5"
- Handle Grip Width: 5"
- Knurled Handle Grips
- Rotating Handle Grips
- Removable Rear Plug
- Hollow Fillable Body
- Structural Grade Steel Body

TACOPS®

ROPE RESCUE PACK

The TACOPS® Rope Rescue Pack was developed at the request of a large southern California law enforcement agency, we modified our Rhino backpack to carry a team's worth of rope rescue hardware in an organized manner.

Pack Features:

- Large main compartment measuring 25" x 15" x 7" with daisy chain loops on one side and a large open pocket on the other side
- Bottom access flap to the main compartment incorporates a zippered pouch to hold the included 56" x 56" ground cover.
- Secondary compartment measuring 18" x 10" x 3" with 4 internal zippered mesh pouches
- Hydration pouch and centered hose port
- (2) side zippered pockets measuring 8" x 8" x 4"
- (2) flat zippered pockets on front flap
- (2) compression straps on each side
- (2) bottom straps for external storage
- Daisy chain loops and PALS webbing on exterior.
- Padded shoulder and waist straps

Please specify color when ordering. *Rope and hardware not included. Non-stocked item available by special request only.

Custom loadouts available.

Products shown (R - L): OGURA HRS941DF Pump Unit, OGURA HRS936 Door-Opener/Mini-Ram, and TACOPS® Active Response Breachers Kit (ARBK)

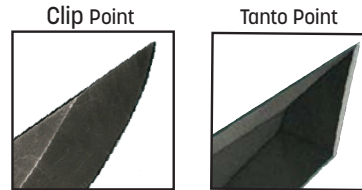

PERSONAL RESCUE TOOL

The TACOPS® Personal Rescue Tool (PRT) is a lightweight, versatile rescue knife that is affordable to individual operators.

The PRT is offered with either a black or olive green handle with the option of a standard clip point or tanto style blade. The blade is 440A stainless steel with edge holding and corrosion resistant properties. The blade is finished in a black BT2 style coating and features a large thumb stud for easy one-hand opening even while wearing gloves.

Features

- Replaceable Seatbelt, Flex Cuff or Shroud Line Cutter
- Window Punch
- Pocket Clip
- 440A Stainless Steel Blade
- Clip Point or Tanto Style
- 3.5" Blade Length
- 8" Overall Length

TACTICAL RESCUE KNIFE

The TACOPS® Tactical Rescue Knife is a lightweight, versatile rescue knife.

Introducing the TACOPS® Tactical Rescue Knife, featuring a sleek, black design. The TACOPS Tactical Rescue Knife features a seat belt cutter at the base of the handle that utilizes a stainless steel razor blade and a window punch for emergency extraction from vehicles. The pocket clip ensures against the inadvertent loss of this handy tool.

Features

- Partially Serrated Edge
- Tanto Style Blade
- Seat Belt Cutter
- Glass Breaker
- Assisted Spring Opening for Easy, One-Handed Use
- Pocket Clip

THERMAL IDENTIFICATION PANEL

The Thermal Identification Panel (TIP) provides a visual and thermal marking capability for either individuals and vehicles that is easily seen from both the ground or air.

The 2-foot x 2-foot Infrared (IR) Thermal Combat Identification Marker panel operates in the mid- and far IR wavelengths (3-5 Microns and 8-12 Microns). It is a PASSIVE MARKER, meaning that only those individuals operating IR Viewing Devices (thermal viewers, FLIR, etc.) will detect the cold-signature produced by the panel. Panels include a combination of grommets and Velcro® hook/loop fasteners at the corners for securing multiple panels together or affixing them to either objects or the ground.

- Use TAN side for Thermal Identification Marking (day or night) and ORANGE side for visual (daylight) signaling.
- Ranges for identification vary by the type of thermal viewer being used and are rarely affected by obscurants such as smoke and haze.
- For greatest range and best detection, ensure that panel is within line-of-sight and broadside to the viewer.
- Use more than one panel to extend the range of identification (air-to-ground detection of a four-panel group can exceed seven nautical miles) or in a pre-arranged pattern to convey messages.

TACOPS®

MCGRATH VIDEO LARYNGOSCOPE CASE

The TACOPS® McGrath Video Laryngoscope Case was developed for the flight medics of a nationwide air ambulance provider to enable them to carry and protect their devices.

This case effectively protects a laryngoscope in custom-cut, high-density foam that provides additional space for a spare battery. The case itself has a carry handle on one end, D-ring on the other end, reflective tape on 3 sides, and elastic loops for 3 disposable blades inside the lid. The lid exterior includes 4" x 2" Velcro® loop for an identifier patch and can also be embroidered with basic logos or other information.

Measures 9" x 4.5" x 4".

Available in yellow, blue and red.

PADDED EQUIPMENT CASE

We developed our TACOPS® Padded Equipment Case in support of a Marine Corps Systems Command contract.

Padded on all sides, this 9" x 7.5" X 6" case incorporates a single, movable, internal padded divider and closes with a zipper and/or two plastic buckles. It can be carried either by the removable, adjustable-length, padded shoulder strap or by a handle mounted on the top of the lid. Coyote Tan.

MULTI-TRANSPORT TETHER

The TACOPS® Multi-Transport Tether meets and exceeds USSOCOM requirements. Extended length designed not to exceed an arm's length, so the quick release lanyard is always within your grasp. Quick release shackle has a locking pin swaged on the end to prevent pin from releasing if retainer ring is broken. Eye diameter of quick release shackle fits all rotary wing aircraft tie down points including MH6 Little Bird exterior seat platform.

Shackle end also has a secondary hook/loop safety system to decrease the chances of accidental release. Pull tab is attached to split key ring for emergency release of lanyard.

Shackle can be released under load for emergency exiting of aircraft, vehicles, or watercraft. Snap hook is double acting to prevent accidental release, made from high strength forged aluminum.

 SILVER SHACKLE

 BLACK SHACKLE

TACOPS FIELD SANITATION KIT

The NSN version of the TACOPS® Field Sanitation Kit contains the minimum “organizational” equipment items required for deployment.

We also offer Custom Field Sanitation Kit “individual issue” items such as insect repellent lotions and sprays, waterproof sunscreen, bed nets, etc. that can be configured in accordance with any organization’s unique requirements and over-packed with the NSN Kit.

TACOPS®

FIELD SANITATION KIT

At the request of military medical organizations, we developed the TACOPS® Field Sanitation Kit (FSK). This kit is designed to specifically address sanitation concerns for operational military units on deployment, and organizations involved with natural disaster response. Kits are packed in MIL-SPEC foot locker cases.

The TACOPS® Field Sanitation Kit contains the U.S. Army-approved company level organizational field sanitation and preventive medicine equipment items to provide for:

- Control of Arthropods and Rodents
- Potable Water
- Food Service Sanitation
- Personal Protective Equipment
- Prevention of Heat Injuries

The Field Sanitation Kit is packed and shipped in accordance with U.S. Department of Transportation (DOT) Hazardous Materials (HAZMAT) Regulations.

All Items Have Been Approved by:

- U.S. Army Medical Material Development Activity (USAMMDA)
- U.S. Army Center for Health Promotion and Preventive Medicine (CHPPM)
- Armed Forces Pest Management Board (AFPMB)
- U.S. Army Medical Department Center and School

All Items Have Been Derived from:

- FM 4-25.10 Field Hygiene and Sanitation
- ATP 4-25.12 Unit Field Sanitation Team

NSN#: 4540-01-578-4352

Custom loadouts available.
