

## PROTECTING STUDENTS, STAFF, AND FACILITIES

**Why BatteryIQ?** Lithium-ion (Li-ION) batteries power many of the devices we rely on daily, including laptops, tablets, e-bikes, and smartphones. While these batteries are efficient and widely used, they can pose significant risks, including fire and chemical hazards. BatteryIQ is designed to equip school districts with the knowledge and tools needed to address these challenges effectively.

### What You Will Learn:

- **Li-ION Battery Basics:** Understanding how lithium-ion batteries work, their benefits, and common hazards.
- **Incident Awareness:** Recognizing warning signs of battery failure, including swelling, overheating, and smoke.
- **Response Protocols:** Step-by-step procedures for responding to Li-ION battery incidents, including fire suppression and evacuation.
- **Preventative Measures:** Best practices for safe storage, charging, and disposal of Li-ION batteries.
- **Hands-On Scenarios:** Real-world exercises to practice emergency responses and mitigation techniques.

### Key Features of the Training:

- Tailored for school districts, including administrators, staff, and safety personnel.
- Interactive sessions combining classroom instruction with real-world case studies.
- Delivered by experienced instructors with expertise in fire and safety training.

### Who Should Attend?

- School Administrators
- Facility Managers
- Safety Officers
- Teachers and Support Staff

Li-ION battery incidents can escalate quickly, posing serious risks to people and property. BatteryIQ helps schools, BatteryIQ will help mitigate risks associated with everyday battery use, build confidence in handling battery-related emergencies, fostering a safer learning environment for students and staff.
