I don't see what I need. How can I confirm if NOBLE offers a specific product?

This catalog is just snapshot of NOBLE's capabilities and manufacturer network. Our supply chain contains over 15,000 suppliers and millions of products. We offer top brands and cutting-edge technologies to assist with your equipment's total life-cycle sustainment. For information on any specific product, please contact your NOBLE representative.

YOUR MISSION-TESTED PARTNER TO SHORTEN THE LOGISTICS PIPELINE.

NOBLE, a leader in global sustainment and operations support for the U.S. Military and civilian government, offers an unparalleled range of mission-critical products and services. Our supply chain contains over 15,000 suppliers and millions of products.

NOBLE offers top brands and cutting-edge technologies across six domains: aerospace, C5ISR, CBRNE, expeditionary, MRO, and tactical. With strategically located distribution and fulfillment centers and operations in the United States, Europe, Middle East, and Asia, we rapidly deploy routine and emergency orders, even to high-risk geographical areas.

NOBLE's fully integrated supply chain management system includes logistics, technical support, procurement, inventory, and distribution management. NOBLE is your mission-tested partner for shortening the logistics pipeline and streamlining the procurement process.

**NOBLE IS YOUR TRUSTED
PARTNER IN READINESS.**

CAPABILITIES

AEROSPACE

NOBLE offers expeditious mission-critical and aircraft readiness solutions. NOBLE partners with leading aerospace & defense manufacturers to provide a range of products, systems, and solutions across crewed and uncrewed platforms. Our Aerospace Team works with customers through the entire procurement process, assisting with developing requirements, product selection, and procurement vehicles.

C5ISR

Command, Control, Communications, Computers, Cyber, Intelligence, Surveillance, and Reconnaissance (C5ISR) are critical to modern military operations. NOBLE provides technologies and capabilities for ensuring effective command and control, real-time situational awareness, and the ability to respond rapidly to evolving threats.

CBRNE

The threats of terrorism, war, and climate change are growing global concerns, leading to increased spending on chemical, biological, radiological, and nuclear defense (CBRN), explosive ordnance disposal (EOD), and fire & emergency services (FES) equipment by government parties around the world. NOBLE offers the latest solutions to assess, counter, and neutralize CBRNE threats.

EXPEDITIONARY

NOBLE is a leader in rapid response and self-sustaining expeditionary capabilities, regardless of the mission or environment. We partner with the world's leading manufacturers

and directly manage numerous procurement options to fully support expeditionary operations in the field and abroad.

MRO

At NOBLE, we understand the critical importance of operating your facilities and processes at peak efficiency. That's why we offer a comprehensive range of Maintenance, Repair, and Operations (MRO) products and services to help you achieve your goals. NOBLE's MRO capabilities cover facilities, groundskeeping, vehicle maintenance, and more.

TACTICAL

NOBLE provides mission-focused tactical gear and equipment to military, law enforcement, and disaster response professionals worldwide. We offer operational equipment, product integration, and kitting and provide simplified procurement, global logistical services, and support.

TRAINING

NOBLE's training solutions are customized to match your specific response mission. Whether classroom, hands-on, integrated equipment, tactical, or full-scale response scenarios, our training is developed and delivered to keep you safe, effective, and efficient in the field.

TECHNICAL SERVICE

NOBLE offers a full range of equipment life-cycle sustainment management. Certified technicians repair chemical, biological, radiological, nuclear, and explosive (CBRNE) detection systems.

NOBLE STREAMLINES PROCUREMENT & REDUCES THE COST OF READINESS.

NOBLE PROVIDES A RANGE OF PRODUCTS & SERVICES THROUGH OUR CONTRACTS

NOBLE's contract vehicles allow us to provide global mission support services to the U.S. Government and its allies. NOBLE integrates over 150 government contracts with 15,000 suppliers to offer single-source procurement. Our process ensures compliance, saves time and money, and quickly gets products to end users to support their missions.

NOBLE provides a wide range of products, materials, equipment, and services to military, federal civilian, state and local customers, and

other authorized purchasers. Our program managers and subject matter experts assist customers with choosing the right contract vehicle to expedite each purchase and save resources. Additional services include requirement development, product selection, purchasing, installation, training, technical support, and equipment management.

NOBLE is a Prime Vendor of the U.S. Defense Logistics Agency and a Top 50 supplier to the U.S. General Services Administration.

NOBLE DLA TAILORED LOGISTICS SUPPORT CONTRACTS:

DLA SOE TLS PROGRAM

**SPECIAL OPERATIONAL
EQUIPMENT (SOE) TAILORED
LOGISTICS SUPPORT PROGRAM**

Global supply & logistics support for U.S. military and federal government operational equipment purchases. Equipment categories include Aerospace, C5ISR, CBRNE, Expeditionary, MRO, and Tactical.

DLA FESE TLS PROGRAM

**FIRE & EMERGENCY SERVICES
EQUIPMENT (FESE) TAILORED
LOGISTICS SUPPORT PROGRAM**

A global procurement solution for firefighters, emergency medical response, hazardous material response, homeland security, and domestic preparedness professionals.

DLA MRO TLS PROGRAM

**MAINTENANCE, REPAIR, &
OPERATIONS (MRO) TAILORED
LOGISTICS SUPPORT PROGRAM**

This Prime Vendor Program provides MRO products in five global regions (NE, SE, EUCOM, CENTCOM, INDOPACOM) plus related incidental services for U.S. military and federal government customers.

NOBLE CONTRACT VEHICLES

NOBLE GSA MULTIPLE AWARD SCHEDULES:

INDUSTRIAL PRODUCTS & SERVICES

**GSA MAS CATEGORY
332510C**

GSA's Industrial Products and Services category includes hardware, tools, and other MRO supplies and equipment. It also offers goods and services used in the production of a final product (e.g., Basic or raw materials, components, and instruments).

SECURITY AND PROTECTION

**GSA MAS CATEGORY
332999**

This tactical solutions contract offers gear and supplies needed by military, law enforcement, security, facilities management, and fire and rescue teams. It also offers cooperative purchasing for federal, state, and local entities.

OS4 OFFICE PRODUCTS AND SUPPLIES

**GSA MAS CATEGORY
3399400S4**

OS4 is GSA's best-in-class governmentwide solution for a wide range of office supplies and office technology products. It includes everything from supplies such as pens, paper, and binders to office equipment like shredders and printers.

NOBLE CONTRACTS COVER A RANGE OF SERVICES:

BASE STOREFRONT SERVICES

**ANNISTON ARMY DEPOT
LETTERKENNY ARMY DEPOT**

NOBLE Storefronts support your mission at base locations, reducing government-owned inventories and the cost of readiness. They provide onsite bench stock of MRO products and customer service to assist with spot buys, arrange deliveries, and perform kitting.

**MANAGED BY KD ANALYTICAL,
A NOBLE COMPANY**

COMSUPCEN provides CBRNE training services and a full range of equipment life-cycle sustainment management. Certified technicians provide repair for chemical, biological, radiological, nuclear, and explosive (CBRNE) detection systems, with 24/7 services.

GSA COMMERCIAL PLATFORM

**E-COMMERCE WITH YOUR
GOVERNMENT PURCHASE CARD**

NOBLE's GSA and AbilityOne® online store offers access to commercial off-the-shelf (COTS) items through the convenience of the Government Purchase Card (GPC) while prioritizing AbilityOne® products and ensuring 889 Compliance.

**NOBLE IS YOUR TRUSTED
PARTNER IN READINESS.**

NOBLE SUPPORTS MISSION READINESS WITH PRODUCTS AND SUPPORT SERVICES — NO MATTER WHERE YOU ARE.

NOBLE'S GLOBAL FOOTPRINT

NOBLE's global footprint of Operation Centers, Training Facilities, and Distribution/Fulfillment Centers ensures on-time equipment delivery and support services to even the most remote locations. Our strategically located facilities enable rapid deployment of routine and emergency orders. We rely on our proven regional logistics partners to negotiate country requirements and deliver on schedule.

With corporate headquarters in Boston, Massachusetts, operations and training centers in the U.S. and abroad, and satellite offices on military installations, NOBLE supports customers everywhere U.S. Military service members and Federal civilian employees work. We have established distribution centers, warehouses, regional offices, and consolidation points worldwide.

NOBLE TRAINING AND TECHNICAL SERVICES

MISSION-READY TRAINING. FIELD-TESTED SERVICE. GLOBAL IMPACT.

NOBLE's Training & Technical Services team provides expert-led training, technical services, and sustainment solutions supporting military, federal, state/local, and critical infrastructure missions.

We support those who protect us all by ensuring personnel, systems, and equipment are aligned for operational readiness—every time.

CORE CAPABILITIES

INTEGRATED TRAINING SOLUTIONS

- CBRNE, Tactical, HazMatIQ®, and Custom NET+ Programs
- SME-led instruction with real-world experience
- Over 185,000+ students trained globally
- In-person, virtual, and scenario-based options

TECHNICAL SERVICES & INSTRUMENT SUSTAINMENT

- 24/7/365 Support with OEM-Certified Repairs
- Tiered Support from Operator to Depot-Level
- Calibration, warranty, and lifecycle management
- REDItrak™ – Asset tracking & maintenance platform

SME SALES & VENDOR SUPPORT

- Hands-on demos & competitive tech evaluations
- Post-sale customer training & integration
- Product lifecycle services that enhance vendor offerings

CRITICAL INFRASTRUCTURE SUPPORT

- Protection, assessment & maintenance
- Specialized training and operational readiness services

INDUSTRIES SERVED

- Department of Defense
- Federal Agencies
- State & Local Responders
- Law Enforcement & Tactical Units
- Emergency Management Teams
- Airports, Transit, Event Venues
- OCONUS Operations

NOBLE IS YOUR TRUSTED PARTNER IN READINESS.

FROM CBRNE TO CSISR—WE TRAIN IT. WE SUPPORT IT. WE DELIVER IT.

ARE YOU MISSION-READY?

WE DON'T JUST SUPPORT THE MISSION - WE MAKE IT READY.

NOBLE is your trusted destination for all service, equipment, and training needs, delivering prompt turnaround for optimal efficiency and preparedness. Our goal is to provide a one stop shop for all of your needs. NOBLE Technical Services team consists of scientists who are certified in repairing over 100 different types of CBRNe equipment. Our team follows an ISO certified process to ensure that your team has everything to secure your readiness.

TOTAL PACKAGE FIELDING

- From initial delivery through ongoing sustainment

INTEGRATED NEW EQUIPMENT TRAINING (INET)

- Blends NET with operational application

SCIENTIFICALLY VALID TRAINING

- Peer-reviewed data, real samples

DEDICATED TEAM

- SME instructors, project managers, and certified techs

ROBUST LOGISTICS

- Mobile support teams, training props, sample kits, real-time asset tracking

FEATURED SOLUTIONS

THE HAZMATIQ® SYSTEM

- Patented 4-step HazMat response tool used globally
- Available for Awareness, Ops, Tech levels, and custom scenarios

READITRAK™ PLATFORM

- Cloud-based lifecycle and maintenance management system for CBRNE gear
- Tracks inventory, repairs, usage history, training & more

TACTICAL TRAINING PROGRAMS

- Law Enforcement Operations
- Tactical Medicine
- Campus/Facility Security
- Electronic IED Defeat & Narcotics Detection

TOTAL PACKAGE APPROACH

NOBLE offers expeditious mission-critical and aircraft readiness solutions. Focused on providing quick response to changing requirements, we provide global supply and logistics support to the U.S. Military and Allied Nations.

NOBLE's Total Package Approach presents the best value for the U.S. Government.

- Develop technology solutions upstream working with end-users.
- Support development of an acquisition strategy
- Work with Contracting Officer, Program Manager, and OEM to facilitate communications
- Execute case and provide regular reporting

Our aerospace team works with you through the entire procurement process. NOBLE partners with leading aerospace & defense manufacturers to provide operational equipment. Our Aerospace Team works with you through the entire procurement process, assisting with the development of your requirements, product selection, and procurement vehicle.

AEROSPACE CONTRACT VEHICLES

NOBLE is an awardee of multiple long-term contract vehicles, blanket purchase agreements, and Prime Vendor Contracts that facilitate the procurement of aerospace equipment, and ensure best pricing, quality, and compliance with all government requirements. (DLA C&E/DLA Aviation)

Simulation

CAE is a global leader in simulation and training for civil aviation, defense, and security. Founded in 1947 and based in Montreal, it delivers integrated live, virtual, and constructive solutions to enhance safety and mission readiness. With operations in 35+ countries and 13,000+ employees, CAE supports customers worldwide with advanced training and operational support.

ANALYTICS & SYSTEMS ENGINEERING

CAE applies advanced analytics, systems engineering, and the science of learning to enhance defense readiness. Leveraging AI, machine learning, and synthetic environments, CAE enables faster, data-driven decisions and continuous improvement. With over 2,500 engineers, the company delivers closed-loop, simulation-based training and experimentation solutions that drive operational efficiency and mission success across all domains.

TRAINING & SIMULATION

CAE delivers the industry's most comprehensive military training systems—from digital courseware and desktop trainers to high-fidelity full-mission simulators. The company trains air, land, and maritime forces across aircraft, ship, and ground platforms, as well as public safety teams. Using integrated live-virtual-constructive environments, CAE provides immersive, realistic, and mission-ready training solutions worldwide.

MISSION & OPERATIONS SUPPORT

Defense forces are shifting from asymmetric warfare to near-peer threats, demanding faster, integrated C5ISR architectures. CAE leads this evolution with open, modular digital ecosystems that enhance multi-domain readiness across air, land, maritime, space, and cyber. Strengthened by its acquisition of L3Harris' Military Training business, CAE delivers advanced mission support—AI-driven tools, C5, ISR, logistics, and post-mission planning.

MULTI-DOMAIN OPERATIONS

Preparing for a great power competition means more digital immersion in a multi-domain synthetic environment. As the U.S. and its allies adapt defense strategies for near-peer conflicts, they recognize the need to operate seamlessly across air, land, maritime, space, and cyber domains. Training for such multi-domain operations is complex—mobilizing diverse personnel and assets in a secure, timely, and cost-effective manner is a major challenge. Digital technologies, cloud computing, AI, and synthetic environments now enable this capability, and no company is better positioned than CAE to deliver the integrated training and operational support it requires.

JF Taylor, Inc. is a U.S. defense contractor specializing in systems engineering, software development, avionics integration, and simulation training solutions. The company provides design, prototyping, and test support for military aircraft and shipboard systems, delivering innovative, cost-effective solutions to enhance mission readiness for the U.S. Navy and other defense customers.

ENGINEERING & FABRICATION

Combining engineering expertise with advanced fabrication, JF Taylor develops and integrates electrical, mechanical, and software components into cohesive military systems. Using tools such as AutoCAD, Creo, and programming languages like C++ and Python, they deliver high-fidelity simulations, embedded applications, and rapid prototypes that enhance mission-critical defense capabilities.

SIMULATION & TRAINING SYSTEMS

The Simulation Services Group supports Navy Research, Development, Test, and Evaluation labs through the operation, maintenance, and advancement of simulation systems. Trainer products span manned and unmanned aircraft and ground vehicles, offering scalable, integrated training solutions that enhance readiness across air and land domains while meeting rigorous military standards.

AVIONIC SYSTEMS & AIRCRAFT MODS

The Mission Systems Test and Evaluation Division provides engineering and technical expertise to support Navy aircraft development and mission system testing. The company also produces complete aircraft kits and modifications, offering rapid prototyping, full-rate production, and build-to-print manufacturing—all meeting military standards and advancing fleet modernization.

UNMANNED & MARITIME SYSTEMS

JF Taylor manufactures, delivers, and installs advanced C5ISR products that enhance unmanned and maritime mission capabilities. The company supports integrated ship and air warfare operations through innovative systems engineering and precision manufacturing. With ISO 9001:2015 and AS9100D:2016 certifications, JF Taylor ensures reliable, high-quality solutions that strengthen naval and defense readiness.

GROUND-BASED SYSTEMS

JF Taylor designs and delivers custom ground-based systems and deployable shelters that meet the evolving needs of U.S. military forces. The company provides advanced ground-vehicle training solutions for Soldiers and Marines, including the Armored Multi-Purpose Vehicle Part-Task Trainer, M1A2 Abrams Engine Diagnostic and Troubleshooting Trainer, and specialized USMC shelter systems supporting mission readiness.

NORTHROP GRUMMAN

Northrop Grumman is a leading American aerospace and defense technology company that designs, develops, and delivers advanced systems across air, space, land, sea, and cyber domains. Known for innovation in areas such as autonomous systems, space exploration, missile defense, and stealth technology, the company plays a central role in supporting U.S. national security and global defense.

ADVANCED WEAPONS

Northrop Grumman is a leading provider of advanced weapons designed to ensure overmatch across today's most challenging battlespaces. With deep expertise in propulsion, armaments, hypersonics, and missile defense, the company delivers smarter, faster, and more survivable systems through digital engineering and open architectures. Its integrated approach enables affordable, mission-tailored solutions for the future of defense.

AIRCRAFT

Delivering mission dominance in the air, Northrop Grumman designs and sustains advanced manned and unmanned aircraft for global defense. The company's capabilities span integrated avionics, radar systems, electronic warfare, and composite structures—empowering air, naval, and ISR operations with agility, precision, and enduring technological superiority.

MISSILE DEFENSE

Built on decades of defense innovation, Northrop Grumman develops integrated missile defense systems that detect, track, and neutralize emerging global threats. Its expertise spans propulsion, interceptors, C2 systems, and advanced sensors. Through digital engineering and layered architectures, the company delivers rapid, reliable protection against ballistic and hypersonic missiles.

MISSION SOLUTIONS

Northrop Grumman's Mission Solutions deliver secure, resilient, and precise capabilities across every domain. Powered by advanced U.S.-made microelectronics, these technologies drive innovation in sensing, connectivity, processing, electronic warfare, and navigation. Scalable and mission-ready, they ensure real-time awareness, electromagnetic dominance, and reliable performance—even in GPS-denied or contested environments.

SPACE CAPABILITIES

Pioneering innovation in every orbit, Northrop Grumman provides cutting-edge space technologies that safeguard the nation and expand human discovery. With deep expertise in satellite design, launch systems, propulsion, and space domain awareness, the company delivers resilient, mission-critical solutions that push the boundaries of what's possible.

Raytheon
An RTX Business

At Raytheon, the foundation of its work is rooted in core values and a higher calling --- helping the nation and its allies defend freedoms and deter aggression. With more than 100 years of experience and renowned engineering expertise, Raytheon meets the demands of today's missions while staying ahead of tomorrow's threats.

AIR CAPABILITIES

Raytheon delivers advanced air warfare solutions that enable U.S. and allied forces to achieve superiority across every domain. Its proven systems include air-to-air and air-to-surface missiles, precision-guided munitions, advanced radars, targeting pods, and next-generation electronic warfare technologies. Integrating sensor-to-shooter connectivity across manned, unmanned, and joint platforms, Raytheon ensures interoperability, precision, and mission success in the most demanding operational environments.

LAND CAPABILITIES

From shoulder-fired weapons to extended-range precision munitions, Raytheon delivers a decisive edge on the battlefields of today and tomorrow. Its proven portfolio includes the Javelin® and TOW® anti-armor systems, Excalibur® precision-guided projectile, and XM30 next-generation combat vehicle. Combined with advanced sensors such as Sentinel radar and TOW ITAS, Raytheon's land solutions provide superior accuracy, protection, and situational awareness across all missions.

SEA CAPABILITIES

Raytheon is a global leader in maritime defense, delivering precision weapons, advanced sensors, and integrated ship systems that give naval forces a decisive edge. Its portfolio includes the Tomahawk®, SM-series, and ESSM® missiles, SPY-6 radars, and Phalanx® close-in weapon systems. From long-range strike to ship self-defense, command and control, and electronic warfare, Raytheon ensures dominance across the maritime battlespace with reliable, mission-ready technologies.

SPACE CAPABILITIES

Raytheon provides end-to-end space solutions — from ground control systems to on-orbit sensors — keeping customers informed and ahead of the threat. Its technologies orchestrate satellite constellations, process mission data, and deliver actionable insights worldwide. With proven systems like GPS OCX, FORGE, AWIPS, and VIIRS, Raytheon enables weather forecasting, navigation, and Earth observation that strengthen global awareness and decision-making.

C5ISR

Command, Control, Communications, Computers, Cyber,
Intelligence, Surveillance & Reconnaissance

PROVIDING INNOVATIVE, UP-TO-THE-MINUTE SOLUTIONS

NOBLE provides world-class expertise, technical knowledge, and advanced equipment for critical communication and information-gathering programs. Hardware, software, equipment, and training are fully customized and tested to meet – and often exceed – standard communication and intelligence requirements. Systems are continually updated to address a changing technological landscape.

WHAT WE DO

- IT Networking Systems
- Satellite Communications
- Mobile Command Platforms
- Long Range Telecommunications
- Encryption/Decryption Systems
- Tactical Communications
- Full Motion Video (FMV) Encoders/Decoders
- Garrison & Tactical Operation Centers
- Audio/Visual Custom Solutions
- IT/IA & Cyber Training & Services

COUNT ON US TO DELIVER

Deploying the right equipment at the right time is crucial to your team's success, but we offer much more to sustain the life cycle of your mission. We assist you through every step of the equipment purchase process, from generating requirements, product selection, procurement and fielding, to training, asset management, technical services, and eventual decommissioning and modernization.

With thousands of trusted vendor relationships, NOBLE excels in locating and delivering the exact tools warfighters and first responders need to maintain situational awareness. Our Subject Matter Experts keep informed of the latest, most advanced C5ISR equipment available from top manufacturers. NOBLE's reputation as a cutting-edge problem-solver is unsurpassed. Let our C5ISR Team guide you in your quest for the best possible solution and every component to support it.

UAS/Counter UAS

Bounce Imaging develops rugged, 360° throwable cameras that deliver real-time video and audio to first responders, law enforcement, and military teams. Trusted by over 450 agencies, their systems enhance safety during tactical operations by providing instant situational awareness in confined or hazardous environments.

EXPLORER UNLEASHED EDITION THROWABLE TACTICAL CAMERA

The Bounce Imaging Unleashed Edition delivers full-situation awareness anywhere with its integrated 4G-LTE modem (Verizon service + cloud relay required). Stream real-time, panoramic video directly to your team from dangerous or hard-to-reach environments, providing critical intelligence before making entry. Built for rugged, demanding operations, it offers unmatched reliability and mission-ready performance when every second counts.

LAND SHARK DEDICATED K-9 CAMERA

The Land Shark system provides the only stabilized omnidirectional camera system in the world for K-9s, for the safest situational awareness for multiple team viewers and the K-9 handler. However it is lower profile and half the weight of the camera + mount system and has a wifi antenna that is better optimized for dog-mounting (giving the system better range). Custom 3-D printed in high-strength composites like carbon fiber, so fits ANY vest, ANY dog.

EXPLORER RECCE360 MINI THROWABLE TACTICAL CAMERA KIT

Defense specific version of our Explorer series cameras, but 2/3 of the weight. Enhanced for military end users (internal wifi booster, additional encryption, increased waterproofing). Kit includes pole mount, 100-lbs magnet, car charger, wall charger, and tether attachments.

DEFENSE & SPECIAL OPERATIONS USE CASES

The ultimate squad-level SA tool for elite professionals. Bounce Imaging Defense & Special Operations cameras give elite teams total 360° situational awareness in the toughest environments—dense urban terrain, confined spaces, and sub-T operations. Optimized for the last 10 meters, they go where drones and robots can't, revealing hidden threats while minimizing risk to civilians. Fully interoperable with ATAK, MANET, 4G, 802.11, and more, they integrate seamlessly into your existing comms and display systems. Rugged, reliable, and mission-proven, they give warfighters the unfair advantage when it matters most.

Crown Point Systems delivers secure C5ISR solutions for the U.S. Department of Defense and Intelligence Community. Based in San Diego, they design, build, and support mission-critical spaces such as command centers, training facilities, and AV systems, while meeting strict security standards. They partner with leading technology providers to deliver trusted, rapid deployments.

C5ISR SOLUTIONS

Crown Point Systems provides advanced Situational Awareness solutions in C5ISR (Command, Control, Computers, Communications, Cyber, Intelligence, Surveillance, and Reconnaissance) applications. Supporting the Department of Defense and Intelligence Community, the company designs and integrates complex visual data across multiple domains. Its proven DoD experience strengthens interoperability, joint communications, and data-driven decision-making for mission success.

COLLABORATION ENVIRONMENTS

Whether in a huddle room, auditorium, conference room, or training room within a tactical or garrison environment, Crown Point Systems designs and deploys scalable multi-classification collaboration solutions. Each system is tailored to specific mission requirements and meets NIAP, FIPS 140-2, DISA, and JITC compliance standards. Solutions can include video conferencing, Microsoft Teams (classified and unclassified), Zoom for Government, GVS, and DCS.

COMMAND AND CONTROL

Crown Point Systems designs and builds mission-specific command-and-control centers customized to each organization's operational needs. Cleared integration teams manage design, installation, testing, and support while ensuring seamless functionality. Solutions include sit/stand workstations, NIAP PP4 KVM, LED video walls, ergonomic layouts, multi-domain capability, and TEMPEST compliance.

SECURE WIRELESS

Wireless communication systems are deployed in both unclassified and secure environments using Cisco and Aruba products listed on the DISA Approved Products List (APL). With evolving regulations for commercial wireless in classified spaces, certified experts ensure proper design, implementation, and compliance in coordination with Information Assurance teams.

PROFESSIONAL SERVICES

Crown Point Systems offers consulting and advisory support both remotely and on-site, often requiring cleared personnel. Traditionally billed hourly or fixed-price, these services are now available through a subscription model for government clients. Core offerings include technology and procurement strategy, regulatory compliance, IT risk management, sourcing, cost optimization, data analytics, and IT managed services.

The RfPatrol Mk2 is a next-generation wearable solution providing true airspace awareness for military, law enforcement, and executive security personnel. Compact, intuitive, and highly effective, it ensures full situational awareness providing operators with a decisive advantage.

DroneGun Mk4 delivers advanced counter-drone capabilities in a lightweight, highly portable design. Built for rapid response, it neutralizes unauthorized drones with precision while ensuring minimal disruptions to surrounding environments.

The Immediate Response Kit (IRK) is a rapidly deployable counter-drone solution designed for mobility and ease of use. Combining DroneShield's RfPatrol Mk2 for advanced detection and DroneGun Mk4 for defeat capabilities, it enables real-time drone defense in dynamic operational environments.

DroneGun Tactical provides powerful, long-range counter-drone capability in a robust, easy-to-operate design. The DroneGun tactical neutralizes unauthorized drones with precision, ensuring mission success in complex environments.

DroneSentry-X Mk2 is a software-defined detection and adaptive disruption system, designed for mobile, field expedient pop-up, and fixed site protection. Engineered for seamless integration across land, sea, and air platforms, it provides real-time drone detection and mitigation in complex operational environments.

The Expeditionary Fixed Site (EFS) Kit transforms the DroneSentry-X Mk2 into a best-in-class integrated sensor and effector solution for wide area operations. Combining DroneShield's advanced detection and mitigation technologies, it delivers comprehensive, autonomous, and scalable, drone defense in static locations.

ECHODYNE

Echodyne delivers advanced ESA radar performance in the only commercially exportable, low-SWaP, solid-state format. Trusted by defense, government, and commercial users, Echodyne's compact radar solutions enhance situational awareness and safety for mission-critical operations across airspace management, border security, and autonomous systems.

ECHOSHIELD

EchoShield® is a next-generation, software-defined, medium-range, pulse-Doppler, cognitive 4D radar operating in the Ku-band (15.4-16.6 GHz) for radionavigation and radiolocation applications. Dense Tx/Rx cells create the industry's most accurate spatial data for sensor fusion, command & control (C2) interfaces, and other intelligent systems and platforms. Waveforms tailored for high-accuracy classification deliver a decluttered data stream rich with metadata about tracked objects.

ECHOGUARD

Electronically scanned array (ESA) radar, the gold standard, has been cost-prohibitive and operationally restrictive for all but Defense and National Security applications. Echodyne's patented MESA® technology combines with powerful software to create ESA performance in a compact solid-state format that detects, tracks, and classifies objects of interest on the ground or in the air, regardless of weather or lighting conditions.

ECHOGUARD CR

EchoGuard CR is specifically built for performance in semi-urban, urban, and other close-range environments. EchoGuard CR's low-power signature maintains high performance by managing energy output to reduce signal clutter and reflection. EchoGuard CR rapidly and accurately detects and assesses multiple ground and air targets within the 120° azimuth and 80° elevation field of view. High fidelity data for up to 20 simultaneous tracks include latitude, longitude, range, velocity, bearing closing time, and more.

ECHOFLIGHT

Unparalleled performance in an ultra-low size, weight, and power (SWaP) package, EchoFlight offers rich-data output choices to complement unique hooks for integration with other sensors such as ADS/B. EchoFlight is the preferred choice for Airborne Detect and Avoid (ABDAA) and is used by dozens of companies integrating sensors for unmanned aircraft missions. From advanced air mobility (AAM) vehicles and long-haul cargo drones to governmental research centers, customers prioritizing airspace safety choose EchoFlight.

CUSTOM RADAR PROJECTS

Echodyne builds radars based on a revolutionary breakthrough in ESA antenna design, employing metamaterials to unlock new design capabilities that deliver outsized performance in compact packages. If MESA (metamaterials electronically scanned array) design can revitalize your programs of record for long-term success, we welcome discrete inquiries.

PERSISTENT SYSTEMS

Persistent Systems develops advanced communications technology for defense and security. Its Wave Relay® MANET and Cloud Relay™ solutions provide resilient, real-time voice, video, and data networking across air, land, and sea. By linking warfighters, vehicles, UAVs, and sensors into a unified ecosystem, Persistent delivers secure, scalable connectivity for mission success.

PT5 - PERSONAL TRANSPORT 5

The PT5 (Personal Transport 5) is a wearable device delivering persistent, mission-ready connectivity. Designed to pair with the MPU5 and Cloud Relay™, it serves as a certified 5G modem and dual Wi-Fi 6e access point. Compact and power-efficient, it enables fast, automated, and seamless team communication anywhere.

MPU5 RADIO

The MPU5 is the world's first Smart Radio, combining voice, video, data, and computing in one rugged device. Using Wave Relay® MANET and 3x3 MIMO technology, it delivers secure, real-time connectivity in any environment. Designed for durability and efficiency, it enhances situational awareness and mission success.

RUGGED DISPLAY CONTROLLER

The Rugged Display & Controller (RDC) provides a direct interface to the networked battlefield, delivering full situational awareness in a compact, rugged design. Paired with the MPU5, it enables command and control of unmanned systems, TAK operations, and HD video streaming in a low-SWaP, mission-ready solution.

DUAL PTT

The Dual PTT enables you to communicate on two talk groups from a single radio. The two independent channel/volume knobs allow you to select your talk groups and control their volume independently. You can talk on both talk groups individually or simultaneously using the two PTT buttons. Carry Less. Communicate More.

MULTI-BAND TRACKING ANTENNA

The Multi-Band Tracking Antenna is a portable, ground-to-air system delivering long-range, high-throughput connectivity beyond 120 miles. Designed for rapid two-person setup, it features automatic alignment, GPS-denied tracking, and MIMO-optimized technology, ensuring precise, resilient, and reliable communication in any mission environment.

EMBEDDED MODULE

The Embedded Module is the world's most advanced, scalable, and efficient Mobile Ad Hoc Networking (MANET) system, optimized for size, weight, and power. Designed for seamless integration, it connects UAVs, UGVs, and sensors on a unified network. With an HD video encoder and onboard computer, it reduces equipment load while maximizing performance.

Viasat is a global communications company delivering high-speed satellite internet, secure networking, and connectivity solutions for businesses, governments, and militaries. Through advanced antenna, modem, and terminal technologies, Viasat helps close the digital divide—delivering cyber-resilient solutions even in the most remote regions.

G2X

Viasat G2X enhances government satellite communications with secure, resilient global connectivity across air, land, and sea. Built on the Global Xpress Ka-band network, it interoperates with MILSATCOM systems, providing reliable redundancy, mobility, and mission-ready performance for worldwide operations.

MIL-KA

Fully interoperable with MILSATCOM Ka-band networks, Viasat's HCP steerable beams enable authorized military users to access wideband capacity as part of their own independent, secure network.

AIR-IQ

The ultimate solution for crewed and uncrewed aircraft, Air-IQ delivers quick-thinking ISR with super-fast uplink speeds and flexible connectivity for every mission – all while meeting the highest security standards. Air-IQ meets the demands of the mission around the globe.

FLEETBROADBAND

FleetBroadband enables seamless, reliable, secure voice and data coverage throughout the oceans to suit any vessel. Viasat's satellite connectivity is relied upon by governments worldwide for operational communications and maritime safety services.

SWIFTBROADBAND

Designed for mobility, Viasat SwiftBroadband delivers trusted airborne satellite communication services that are highly reliable, secure and affordable, anytime and anywhere. SwiftBroadband allows simultaneous voice and IP data communications over low-profile antennas that are significantly smaller and lighter than any other systems on the market.

SATCOM SERVICES

Viasat delivers real-time, secure mobile SATCOM solutions connecting forces across air, land, and sea. Its resilient, high-capacity network enables faster decision-making, enhanced situational awareness, and mission flexibility. With advanced terminals, modems, and ISR data links, Viasat ensures reliable connectivity anywhere.

CBRNE

The threats of terrorism, war, and climate change are growing global concerns, leading to increased spending on chemical, biological, radiological, nuclear, and explosives (CBRNE) defense equipment by government parties globally.

CBRNE DEFENSE SYSTEMS

CBRNE defense requires the use of portable systems capable of detecting and identifying threats. CBRNE detectors are used in war, during terrorist threats, at border crossings to prevent the entrance of contraband into a jurisdiction, by hazmat response teams in the event of accidental or intentional exposures, and by law enforcement to detect illicit narcotics and drugs, including fentanyl, at the sample site. CBRNE detectors are also used to protect the public at venues such as sports and concert stadiums, courthouses, and office buildings.

Implementing detection systems into an organization's CONOPS can be challenging due to the wide range of potential threats, the complexity of CBRNE technology platforms, and the deployment and sustainment challenges required to successfully use these systems in the field. NOBLE provides a resource to meet these challenges.

NOBLE professionals work with strategic partners who develop state-of-the-art equipment, providing the solutions needed to get the job done safely -- protecting first responders, security personnel, warfighters, and the public.

NOBLE offers subject matter expertise in CBRNE products, training, and services. Our Subject Matter Experts (SMEs) understand our customers' operational challenges and requirements, offer the best solutions, and provide streamlined procurement contracting vehicles, installation, training, and service throughout their product's life cycle. NOBLE provides lifecycle support as you select, procure, deploy, maintain, and decommission your CBRNE technology and related equipment.

AVON PROTECTION

Avon Protection specializes in designing, developing, testing, and manufacturing integrated protective systems. As an innovative capability provider, Avon delivers mission-critical solutions, including full-face respirators, CBRN protective wear, escape hoods, SCBA systems, modular PAPR units, thermal imaging cameras, and underwater equipment.

C50 FIRST RESPONDER RESPIRATOR MASK

The Avon Protection C50 protective mask shares key technologies with the U.S. M50/JSGPM (Joint Services General Purpose Mask) to provide maximum operational flexibility. It is capable of countering multiple threat scenarios, including chemical, biological, nuclear and radiological (CBRN) agents, toxic industrial chemicals (TICs), and toxic industrial materials (TIMs).

FM50 CBRN FULL FACE MASK

The FM50 has been developed to meet the latest NATO requirements and counter the multiple CBRN threats encountered in modern warfare, anti-terrorist and peace-keeping operations. The twin filter conformal system sits close against the face, providing the wearer with high protection and very low breathing resistance. Twin filters also make it a much more comfortable mask to wear and also allows greater ease of weapon deployment.

FM53 MULTIPLE MISSION MASK

The FM53 is globally acclaimed as the most technically advanced mask and offers both positive pressure SCBA, PAPR and negative pressure APR capability. All of these capabilities are available from one mask platform without the need to change components. Available in right, left or twin port filter configurations.

MITR-M1 HALF MASK

Designed with precision in both the United States and the United Kingdom, the MITR™ System represents a new benchmark to our commitment for providing advanced, reliable protection solutions across global markets. The MITR™ System bridges the gap between single-use masks and full-face respirators, offering scalable protection for low to mid-level threat environments.

EXOSKIN-S1 CBRN PROTECTIVE SUIT

Avon Protection's new EXOSKIN-S1 CBRN suit is a low-burden, high performance suit that seamlessly integrates with our respiratory and head protection portfolio. EXOSKIN-S1 provides improved protection against chemical warfare agents enabling users to operate in a CBRN environment for up to 24 hours.

NH15 ESCAPE DEVICE

The NH15 hood has a five year shelf life and provides a high level of respiratory, eye and face protection for a minimum of fifteen minutes. Made of clear material, the NH15 not only protects against all airborne CBRN threats but also protects the face from liquid agent splashes.

COMBINATION SYSTEM POWERED AIR PURIFYING RESPIRATOR (CS-PAPR)

The capability to change levels of protection dependent on the threat, now provides the wearer with increased duration on target and safer operation. Using the Avon MP-PAPR and combo hose module, wearers can switch between APR, PAPR, and SCBA modes. A single-sided air hose keeps one side of the face clear for weapon sighting.

MCM100 MULTI-ROLE REBREATHER

The MCM100 is Avon Protection's advanced electronically controlled closed-circuit rebreather, built for military diving. Co-developed with the UK Dstl and Royal Norwegian Navy, it's optimized for EOD, MCM, and Special Operations in shallow and deep water diving applications; optimized for Explosive Ordnance Disposal (EOD), Mine Countermeasures (MCM) and Special Operations diving.

Blauer, founded in 1936, designs and manufactures high-performance uniforms and gear for public safety professionals. Known for innovation, quality, and durability, Blauer provides advanced protection and comfort for law enforcement, EMS, and fire personnel, helping them perform at their best in demanding conditions.

ARMORSKIN BALLISTIC COVER SYSTEM

Soft body armor is now standard in many law enforcement, tactical, and security roles—but it's often bulky, uncomfortable, and restrictive. Blauer's ArmorSkin® Ballistic Cover System solves that with a three-piece tactical uniform designed to make armor more comfortable, functional, and professional.

UNIFORM SHIRTS

Elevate your professional image with Blauer uniform shirts, the epitome of quality and style. Our first responder uniform shirts feature a wide range of options including uniform work shirts, first responder polo shirts, public safety polo shirts, responder polo shirts, public safety shirts and public safety uniform shirts, and more 5-star first responder shirts.

UNIFORM PANTS

Equip yourself with Blauer uniform pants, built for the demands of first responders. Our collection includes cargo, combat, and side pocket styles, available in durable fabrics like polyester, Nomex, and cotton. Browse by profession, size, or material to find comfortable, high-quality pants that perform in any situation.

UNIFORM BASE LAYERS

Blauer's Uniform Base Layers are engineered for all-day comfort and performance. Made from moisture-wicking, quick-dry fabrics with odor control, they keep you dry, fresh, and focused in any season. Streamlined for a smooth fit under uniforms or outerwear, these base layers provide the perfect balance of warmth, breathability, and unrestricted movement.

UNIFORM SAFETY VESTS

Blauer's Uniform Safety Vests deliver high-visibility protection without compromising comfort or mobility. Built with durable, breathable materials and reflective accents that meet ANSI/ISEA standards, they keep you seen and safe in any light or weather. Designed for a professional fit over duty gear, these vests ensure you're ready for the job—day or night.

COVERALLS & JUMPSUITS

Blauer Coveralls & Jumpsuits provide full-body protection with durable, weather-resistant fabrics and unrestricted mobility. Designed for comfort, function, and all-day wear, they feature smart details like zip-off sleeves and ample storage to keep you ready for any mission.

WOMEN'S UNIFORMS

At Blauer, you can find a huge selection of women's apparel for police officers, firefighters, EMS and other public safety officials. Hundreds of thousands of women throughout the country put their lives on the line to protect those around them, and our team is committed to providing the best uniforms and tactical gear for females.

OUTERWEAR

There will be harsh days in public safety — and not just from the work itself. In law enforcement and EMS, bad weather is an unavoidable part of the job. Blauer men's outerwear is designed for professionals who must spend long hours in cold, rain, or snow.

Honeywell

RAE
SYSTEMS

Honeywell delivers products, software, and connected solutions that enhance productivity, safety, and asset performance worldwide. With industry-leading mobile devices, cloud technology, automation, protective equipment, gas detection, and custom-engineered sensors and controls, Honeywell helps customers operate more efficiently and securely across industries.

MULTIRAE

MultiRAE is the most advanced portable chemical detector on the market. With the flexibility of up to six gas sensors and the convenience of wireless portability, this multi-gas monitor is versatile and customizable, while delivering real-time access to instrument readings and alarm status from any location. Choose from 25 sensor options including LEL, PID, NDIR, and exotics that can be easily changed in the field.

MULTIRAE PRO

This industry-leading wireless device monitors both chemical threats and gamma radiation and is the only multi-threat monitor with parts per billion precision. With the ability to wirelessly transmit threat and alarm data in real time to a central command station, the MultiRAE Pro offers improved visibility and awareness. It also gives you the flexibility to swap out 25 different sensors for a range of threats.

AREARAE PLUS

The AreaRAE Plus provides superior detection of toxic and combustible gases, VOCs and wind speed, direction and humidity—all in one easy-to-configure device. Plus, you'll have vital details about threats happening in real-time—arming you with the information you need to act quickly.

AREARAE PRO

For years, you've relied on AreaRAE as a first line of defense. As the threats have evolved, our technology has, too. Today's AreaRAE Pro wireless multi-gas, multi-threat detector is equipped with more sensors, more versatility, and more insight into threats happening in real-time—arming you with the information you need when seconds count.

ULTRAE 3000 +

The UltraRAE 3000 is the most advanced Compound-Specific Monitor on the market. Its Photoionization Detector's (PID) extended range of 0.01 to 10,000 ppm in VOC mode and 10 ppb to 200 ppm in benzene-specific mode makes it an ideal instrument for applications, from entry pre-screening during refinery and plant maintenance to hazardous material response, marine spill response and refinery monitoring.

MINIRAE LITE +

This affordable hand-held monitor for VOCs provides superior reliability for leak detection and environmental cleanup and remediation. With a photoionization detector that measures from 0-5,000 ppm, a built-in flashlight, and a rugged housing designed for harsh environments, it's perfect for a range of applications and approved for safe area use in North America.

Leidos delivers advanced technology, engineering, and science solutions to address complex challenges in national security, civil, and health markets. Its expertise spans mission software, AI, cybersecurity, IT modernization, and rapid prototyping, helping customers strengthen operations and achieve mission success.

CYBERSECURITY

Cyber authority meets unmatched agility. Adversaries seek undetected access to your systems and data, constantly looking for vulnerabilities that give them a way in. But when you're steps ahead of the adversary, there is no way in. Steeped in hacker techniques and cyber AI expertise, Leidos anticipates adversarial approaches and rapidly prevents, defends, deters and defeats cyberattacks.

DIGITAL MODERNIZATION

Secure technology, at scale and speed. Leidos delivers secure, mission-focused solutions at scale to accelerate our customer's digital transformation objectives. They do so by providing resilient enterprise IT solutions and managed services that leverage trusted AI and full-spectrum cyber to increase efficiencies, decrease burdens, and minimize vulnerabilities in complex IT operations.

INTEGRATED SYSTEMS

Built on the foundations of agility, modularity, extensibility, and open standards, Leidos delivers high-performing hardware and software systems that address complex challenges across domains such as sensors, virtual training, cargo inspection, baggage handling, autonomous systems, space, hypersonics, and strike technologies.

MISSION OPERATIONS

Innovative solutions advance mission readiness. Enabled by advanced technology and agile, scalable processes, Leidos leverages deep domain expertise and mission understanding to deliver secure, resilient, and efficient solutions that support critical missions. As a recognized leader in operations and logistics for complex programs, Leidos supports civil servants, warfighters, and military personnel worldwide.

MISSION SOFTWARE SYSTEMS

Developing secure software systems at scale. Leidos leverages scale, knowledge transfer, and adaptive reuse to rapidly deliver high-quality, secure, and advanced software that addresses critical operational needs. Through extensive research and development, the company integrates emerging technologies such as Trusted Mission AI and Zero Trust into both government and commercial solutions.

RAPID PROTOTYPING & MANUFACTURING

A successfully fielded product starts with comprehensive design, precise prototyping, and efficient manufacturing. Leidos applies rapid, iterative approaches to both hardware and software development, combining engineering expertise with advanced production methods to accelerate prototype delivery and ensure reliable, high-performance solutions.

ThermoFisher SCIENTIFIC

Thermo Fisher Scientific provides advanced threat detection solutions for first responders, law enforcement, military, and government agencies. Their technologies deliver reliable, real-time identification of radiation, explosives, toxic chemicals, and narcotics—helping personnel protect communities while enhancing safety, efficiency, and confidence in the field.

TRUNARC™ DELTA AND TAU HANDHELD NARCOTICS ANALYZERS

The TruNarc™ Delta and Tau Handheld Narcotics Analyzers deliver rapid, contactless, and reliable drug identification in the field. Using lab-proven Raman spectroscopy, they detect over 1,200 substances, including narcotics and precursors, with clear, real-time results for safer, faster presumptive testing.

GEMINI™ ANALYZER WITH LOWDOSEID

The Gemini™ Analyzer combines FTIR and Raman spectroscopy in one handheld device for rapid, accurate narcotic and chemical identification. Rugged and easy to use, it delivers lab-quality results in the field, even in harsh environments, with minimal training required.

FIRSTDEFENDER™ RMX HANDHELD CHEMICAL IDENTIFICATION

The FirstDefender™ RMX Handheld Chemical Identification Analyzer provides rapid, accurate identification of unknown solids and liquids, including explosives, CWAs, TICs, and narcotics. Rugged and field-ready, it operates handheld or robot-mounted, delivering safe, non-contact analysis through sealed containers for responder protection.

DEFENDER OMEGA HANDHELD RAMAN ANALYZER

The Defender™ Omega Handheld Raman Analyzer enables rapid, safe identification of explosives, CWAs, narcotics, and industrial chemicals. Designed for field use, it offers touchless scanning, advanced algorithms for accuracy, and expandable libraries for evolving threats in a rugged, IP68-rated design.

RADHALO™ RDP AND FM SPECTROSCOPIC AREA MONITORS

The RadHalo™ RDP and FM Spectroscopic Area Monitors provide rapid, precise detection of gamma and neutron radiation from close range or miles away. Designed for remote, real-time monitoring in hazardous environments, they offer Wi-Fi, satellite, and cellular reachback, 60-hour battery life, and rugged durability for reliable field operation.

PACKEYE RADIATION DETECTION BACKPACK

The PackEye Radiation Detection Backpack enables rapid, discreet detection of gamma-emitting radioactive sources across large areas. Using advanced Natural Background Rejection (NBR) and He-3-free neutron detection, it distinguishes natural from artificial radiation for precise results. Lightweight, durable, and ViewPoint™ compatible for real-time monitoring.

VIKEN

DETECTION

Viken Detection develops advanced detection technologies to support law enforcement and public safety operations. Their handheld and vehicle-based X-ray imaging systems help identify concealed threats such as narcotics, weapons, and explosives. Through innovation and integration of AI, Viken enhances security and threat detection capabilities.

RAVEN™ / NIGHTHAWK™ HANDHELD X-RAY IMAGER

RAVEN is the latest innovation in handheld X-ray imaging, designed to transform security and public safety. This sleek and compact device offers new features and functionality that prioritize efficiency and safety.

With laser-focused vision, the Nighthawk Handheld X-Ray Backscatter Imaging System sees what is invisible to the human eye, detecting concealed contraband, weapons, narcotics and explosives in luggage, barrels, vehicles, upholstery, and many other applications.

OSPREY™ / HARRIER™ VEHICLE X-RAY IMAGER

The vehicle X-ray portal provides inspectors with the ability to:

- see photorealistic images of the content
- get a complete field of view of multi-height vehicles, including the tires of passenger and commercial vehicles
- security screen at campuses, theme parks, seaports, land borders, airports, sports arenas, hotels, and conference centers

FOXHOUND™ CHEMICAL ANALYZER

Our handheld chemical analyzer is uniquely designed to detect narcotics. The Foxhound has been an important tool used by law enforcement to help protect the public from the opioid crisis. Last year, 107,375 people in the U.S. died of drug overdoses, with 67% of those deaths due to synthetic opioids.

PB200™ XRF LEAD PAINT ANALYZER

A quantum leap forward in XRF-sensing technology, the Pb200 is the lightest, easy-to-use analyzer that accurately detects lead in seconds. For the estimated 3.6 million households with children that have significant lead paint hazards, the Pb200 is a reliable way to remove the threat.

EXPEDITIONARY

Rapid Response Capabilities Whenever and Wherever
the Mission Dictates

WHAT WE OFFER

Harnessing Resilient Systems to Support Power Projection in Any Austere Environment

NOBLE is an industry leader in the enhancement of rapid response and self-sustaining expeditionary capabilities, regardless of the mission or environment. We partner with the world's leading manufacturers and directly manage numerous procurement options to fully support expeditionary operations in the field and abroad. Our purposeful, field-ready, and deployable equipment solutions and services are designed to support, sustain, and improve operational effectiveness and overall quality of life, regardless of the task. So whether your mission requires turnkey shelter systems, distributed energy solutions, fuel and water distribution, or mobility options to safely navigate land or the littorals, NOBLE has the experience, equipment, and procurement solutions to promote and provide the necessary sense of readiness, security, well-being, and support, to make your mission successful.

Emergency Preparedness, Contingency Response, & Recovery

NOBLE offers a crisis-response capability - providing the ability to respond quickly and effectively to a wide variety of potentially dangerous situations, such as expeditionary warfare or humanitarian responses to refugee crises, natural disasters, terrorism, or other life-threatening situations. We partner with a broad range of manufacturers to provide specialized equipment to shelter, sustain, and protect our warfighters, first responders, and civilians under the most austere conditions.

EXPED CONTRACT VEHICLES

NOBLE is an awardee of the Defense Logistics Agency's (DLA) Special Operational Equipment (SOE) and Fire & Emergency Services Equipment (FESE) Prime Vendor Program allowing us to provide expeditionary equipment globally through our contract with the U.S. Defense Logistics Agency. Additionally, we work under contract with the DoD, state and local authorities to supply the essentials needed for survival to storm-ravaged regions, and other areas under crisis, with end-to-end supply and logistical support. Big Top Fabric Structures provides durable, customizable industrial fabric buildings designed for permanent or temporary use. Featuring galvanized steel frames, flame-retardant PVC-vinyl, and modular designs, these structures offer a cost-effective, low-maintenance alternative to traditional construction, with options for harsh environments and easy relocation.

CONTAINER MOUNTED STRUCTURES

Big Top's shipping container hoop buildings offer a cost-effective, quick-deploy solution for industries needing secure, elevated shelter. Ideal for on-site workshops, equipment storage, and workforce housing, these modular structures maximize vertical space, cut site prep costs, and deliver relocatable protection in tough environments.

CRANE LIFTABLE - MOBILE STRUCTURES

Portable structures are the way to go for companies who need extra space for their operations but don't want to be tied down by—or make a heavy investment in—a permanent building. At Big Top Fabric Structures, we design and build portable shelters that can be customized for nearly any application and can be equipped for mobility.

CUSTOM SHELTER APPLICATIONS

Since 1979, Big Top has led in designing and manufacturing custom fabric buildings for industries with specialized shelter needs. From warehousing and equipment maintenance to advanced uses like telescoping and crane-mounted structures, we deliver innovative, scalable solutions for your operations.

ECOLOGY BLOCK STRUCTURES

Big Top's fabric structures mounted on ecology blocks provide a stable, cost-effective solution for industries requiring secure, weather-resistant enclosures. By utilizing stacked concrete ecology blocks as sidewalls, companies achieve the height, durability, and protection of traditional buildings—at a fraction of the cost.

EQUIPMENT MAINTENANCE

Big Top's fabric maintenance bays and large-area maintenance shelters provide a faster, more cost-effective alternative to permanent structures, ensuring minimal downtime for equipment repairs, fleet servicing, and fabrication workspaces. Designed for efficiency and adaptability, these shelters install quickly, and evolve with operational demands.

AIRCRAFT HANGARS & SUNSHADES

Big Top's aviation hangar and sunshade solutions provide cost-effective, durable, and rapidly deployable shelters for airports, private jet hangars, military bases, and fixed-base operators (FBOs). Compared to traditional aircraft hangar buildings, our fabric structures reduce construction costs, install faster, and provide greater adaptability.

LUNCHROOMS & SAFETY MEETING FACILITIES

Big Top's lunch tents provide durable, weather-resistant shelters for lunchrooms and construction site safety meetings at industrial facilities, construction zones, and remote job sites. Featuring clear-span interiors with no support columns, they maximize space, ensuring a comfortable, safe environment for breaks, meetings, and workforce gatherings.

MEDICAL TENTS

When healthcare providers, municipalities, and emergency teams need immediate shelter solutions, Big Top's medical tents provide durable, cost-effective, and rapidly deployable facilities. Installed in less than a day and securely anchored to asphalt, concrete, or other surfaces, these fabric structures create safe, controlled environments for critical healthcare needs.

CELINA is a family-owned manufacturer and distributor of welded fabric products, including shelters, tarps, and ducting for military, commercial, humanitarian, and industrial use. With global manufacturing and distribution centers, CELINA delivers durable shelter solutions and leverages supplier partnerships to exceed customer requirements.

LARGE AREA MAINTENANCE SHELTERS

Created to be used anywhere, the CELINA LAMS is a fully mobile, pre-assembled shelter that is commonly used for storage or maintenance areas. With a wide array of shelter options to fine tune the shelter to your specific needs, the CELINA LAMS can be fully adapted to any situation.

DOMES SHELTERS

A modular shelter system built and designed to be completely relocatable. The rugged design adapts to changing climates and is constructed of an aluminum frame system. CELINA's Dome shelter is available in standard configurations that supports a Tri-Lid Door or "Big Mouth Door" to house various maintenance functions.

DYNAMIC MEDIUM SHELTERS

The CELINA Dynamic Medium Shelter features a frame design that reduces carry weight while maintaining overall shelter strength. The unique arch design offers additional stability and support, resulting in a reduced need for arches. The self-squaring frame pieces fit together seamlessly, allowing for compact packing.

DYNAMIC SMALL SHELTERS

The CELINA Small Shelter uses the same base frame system as the Medium Shelter, but it's made to cover smaller spaces. The design of each arch spreads stress evenly down to the base plates and stakes and is erected in minutes. The self-squaring frame pieces fit together seamlessly, allowing for compact packing and ease of transportation.

ADAPTIVE COLOR & ENVIRONMENT SHELTERS

The Adaptive Color and Environment (ACE) Shelter design is distinctive for its innovative keder tensioned, reversible fabric that enables a green or tan shelter to be erected in any environment. Enabling quicker deployment, less inventory overhead, and a significant cost savings in distribution and formation of base camps.

MULTI-PURPOSE AREA SHELTER SYSTEMS

Designed to provide increased environmental protection and energy efficiency to the warfighter. The shelter is a field-proven subsystem within the U.S. Air Force's BEAR Kitchen System, and has been deployed to numerous locations worldwide.

HUMANITARIAN SHELTERS

The Humanitarian General Purpose Tent System (HGPTS) is crafted to be put together quickly and easily to aid in response to natural disasters and emergencies. These shelters are equipped with roofs, walls, and flooring that are connected to form a securely enclosed structure.

COMMERCIAL TENTS

CELINA has a variety of commercial tents, shelters, flooring, tables, chairs, lighting and more available for purchase through NOBLE. Products are stocked and supplied to the industrial, rental, event and hospitality industries. The shelter inventory is commonly repurposed to suit the needs of emergency/contingency situations such as humanitarian aid, natural disasters and global conflicts.

Micropore, Inc. develops solid CO₂ absorbent cartridges that outperform traditional granular absorbents in life support and rebreathing systems. Using patented technology, Micropore packages fine powder chemistries into solid cartridges marketed under the ExtendAir® and SpiraLithCa® brands—trusted in fire, medical, dive, submarine, and military applications.

EXTENDAIR MINE SAFETY

ExtendAir® products help control CO₂ in mine safety shelters using Lithium Hydroxide for both passive and active systems. The ExtendAir® absorbent curtains operate without power by hanging in occupied spaces to absorb CO₂ efficiently. Certified by the Mine Safety and Health Administration (MSHA 07-LPA130005-0).

SCUBA SOLUTIONS

Micropore partners with diving professionals and rebreather OEMs worldwide to integrate ExtendAir® CO₂ absorbent technology into advanced rebreather systems. ExtendAir® offers exceptionally low work of breathing, consistent CO₂ scrubbing, and eliminates manual packing and dust. Its water-tolerant design reduces caustic risks, prevents channeling, improves duration consistency, and ensures safe, recoverable performance even after flooding.

SUBMARINE SOLUTIONS

Lithium hydroxide (LiOH) absorbent is used for both active (powered scrubbers) and passive (curtain) CO removal. ExtendAir® LiOH curtains deliver 55% more absorbent per volume than granular LiOH, extending life support without using extra space—critical in DISSUB conditions. Proven up to 4x more effective than calcium hydroxide absorbents, ExtendAir® curtains are approved by the U.S. Navy (RM-0601C) and UK Royal Navy (OM-0612K) and validated through international naval testing.

SPIRALITHCA CO₂ ABSORBENT

SpiraLithCa® is an advanced CO₂ absorbent using Micropore's Solid Absorbent Technology™ that outperforms traditional granular materials. With engineered flow channels, it eliminates channeling, minimizes dust, and enables safe low-flow operation without sacrificing duration. Its built-in color indicator windows show exhaustion status at a glance. Compatible with various anesthesia systems, SpiraLithCa offers superior longevity, environmental benefits, and reduced logistics burden.

S·A·F·E

— STRUCTURE DESIGNS —

JOHN 13:7

Safe Structure Designs (S.A.F.E.) is a global leader in ergonomic safety equipment for aviation, marine, rail, heavy equipment, and industrial sectors. An ISO 9001:2015-certified and GSA Contractor Holder, S.A.F.E. delivers precision-engineered, U.S.-manufactured solutions for military and civilian use. With seven U.S. facilities, S.A.F.E. offers custom safety platforms built for land, air, sea, and space.

CUSTOM DESIGN

Custom designs are developed through close collaboration to enhance safety, efficiency, and ergonomics for mission-critical operations. S.A.F.E. partners directly with customers to create solutions tailored to specific form, fit, and function needs—conducting on-site design visits at no cost and with zero N.R.E. charges.

ENGINEERING

Industrial maintenance platforms are engineered to keep technicians safe and supported, even in unexpected situations. Each platform is custom-built to deliver superior accessibility, protection, and durability. Designed collaboratively with clients and developed at no upfront cost, these solutions meet any application's unique demands.

MANUFACTURING

As a lean manufacturer serving both civilian and military sectors, S.A.F.E. specializes in designing and producing custom equipment that ensures safe access and fall protection for workers worldwide. The company is a global leader in custom access platforms, maintenance stands, hangar and ground support equipment, and portable field systems across aviation, marine, rail, and heavy industry applications.

ECONOMIC HANGAR EQUIPMENT FOR ARMY NATIONAL GUARD

Engineered specifically for the UH-72 Lakota / EC-145, this comprehensive maintenance support package includes custom-designed engine, transmission, and rotor stands, as well as cowlings and blade racks. Created to solve challenges related to limited hangar space and part organization, these systems improve safety, workflow, and efficiency during aircraft maintenance. The ergonomic design provides secure, stable access to avionics, hydraulics, engines, and tail systems. Contoured, extended platforms allow multiple technicians to work simultaneously on different areas of the aircraft, while dedicated racks protect sensitive components and rotor blades from damage and ensure each part stays with its assigned aircraft.

SOLAR STIK®
POWERING THE IMPOSSIBLE

Solar Stik provides rugged, modular hybrid power systems for military, humanitarian, and commercial applications. Designed for efficiency and resilience, their solutions integrate renewable energy with advanced power management to reduce fuel dependency, lower operational costs, and ensure reliable performance in harsh environments.

PORTABLE POWER SYSTEMS

A Solar Stik portable power system can be used in most applications where a traditional fuel-driven generator has been used. The configuration of every Solar Stik system includes energy storage, power generation, and power management components to meet power needs and application requirements.

FUEL-DRIVEN POWER GENERATION

Fuel-driven generators have been the standard for power generation in the industry since their inception. They can generate power with energy-dense fuel sources such as gasoline or diesel. Solar Stik offers ruggedized, field-proven generators and a Remote Start Enabling Kit (RsEK) to ensure optimized fuel efficiency in the field.

RIGID FOLDABLE SOLAR POWER GENERATION

Rigid, foldable solar panels are the best choice for expeditionary applications requiring significant power generation in combination with ease of storage or transport. Solar Stik offers monocrystalline, antireflective, antistatic, and low-visibility front surface rigid, foldable panels.

LITHIUM ENERGY STORAGE

LiFePO4 Energy Storage Modules (ESMs) can endure more charge/discharge cycles than other battery chemistries. Solar Stik uses the LiFePO4 chemistry in almost all its lithium-chemistry ESM products. LiFePO4 is slightly less powerful than other commercially available lithium chemistries, but it has the great advantage of using a nonflammable electrolyte, providing equivalent safety characteristics to lead-acid batteries.

LEAD-ACID ENERGY STORAGE

Lead-acid Energy Storage Modules (ESMs) are the most widely understood and used 12 V batteries. Solar Stik Lead-acid ESMs use absorbed glass mat (AGM) sealed lead-acid technology. Lead-acid ESMs are housed in rugged cases and will not leak if inverted, pierced, or otherwise compromised.

POWER MANAGEMENT

Power management modules provide a single point of power management, control, and distribution to a portable, battery based, electrical circuit. Solar Stik offerings include the Portable Remote Operation Inverter/Charger (PRO-Verter) and Hybrid Power Router (HyPR) families of products.

STORAGE WITH MANAGEMENT

Balance of Systems (BOS) units combine energy storage and power management into a single-case solution. BOS units use lithium-ion chemistry, which offers the greatest energy density, making them ideal for expeditionary applications. Both products are available in 12- or 24-volt options.

REMOTE MONITORING KIT

The RMK provides remote access to vital System operating data via the user interface on the Faceplate. The RMK also records and stores all of the System data and graphical reports of these data on a user friendly, web browser-based user interface.

Western Shelter manufactures durable, rapidly deployable shelter systems and field support equipment. Designed for emergency services, military, and disaster response, their solutions include expeditionary shelters, basecamps, field hospitals, water systems, and portable power. Western Shelter ensures safety and reliability in critical operations worldwide.

SHELTERS

Deployable shelter systems are essential infrastructure for rapid response to emergencies, effective military operations, and humanitarian aid missions. Our rapid deployment shelters provide versatile, durable, and swiftly deployable solutions for critical applications.

CONTAINERS

Deployable container systems are essential for rapid and efficient response in high-pressure environments. These modular structures provide durable and rapidly deployable solutions for critical operations. Our container systems withstand demanding conditions while offering comfort and functionality for you and your team.

TRAILERS

Western Shelter's Trailers offer unparalleled flexibility and rapid deployment capabilities. Our rugged, durable, and customizable solutions are engineered to withstand the harshest environments, making them ideal for various applications.

FIELD HOSPITALS

Rapid deployment for critical medical care. A field hospital is a mobile medical facility providing essential healthcare services in remote or disaster-stricken areas. Western Shelter's Field Hospitals offer a comprehensive solution for rapid deployment and effective medical care, ensuring timely assistance in critical situations.

BASECAMPS

Western Shelter specializes in creating complete, turnkey basecamp solutions tailored to meet the unique needs of various industries. With our extensive experience and innovative approach, we provide comprehensive solutions that combine shelter structures, support systems, and customization options to ensure optimal performance and functionality.

ENVIRONMENTAL CONTROL

HVAC and air distribution systems are the backbone of environmental control. They regulate temperature, humidity, and air quality, impacting occupant comfort, productivity, and overall well-being. Inefficient systems can lead to energy waste, discomfort, and health issues.

ELECTRICAL SYSTEMS

Reliable power is essential for the success of any operation. Generators, Cables, Lighting, and Power Distribution systems are the foundation of electrical infrastructure. In demanding environments, these components must deliver exceptional performance under pressure. Western Shelter offers robust and dependable electrical solutions tailored to meet the challenges of diverse operations.

WATER HANDLING

Western Shelter offers solutions for Water Handling needs. Our products are portable, durable, and efficient, ideal for remote or challenging environments. Whether you need a reliable water source for emergency response, a water heater for military operations, or a shower system for your personnel, Western Shelter has the solution to meet your needs.

NOBLE provides Maintenance, Repair, and Operations, (MRO) products and services that keep facilities and processes running smoothly, safely, and efficiently.

OUR CAPABILITIES

Our capabilities include supply chain management, procurement assistance, a single point to consolidate fulfillment of requirements, 24/7 support, and an infrastructure of operations centers and warehouses to maintain supply and facilitate delivery. Our contingency capabilities cover national emergencies, natural disasters, relief efforts, and troop deployments.

- Infrastructure repair and maintenance
- Equipment repair and maintenance
- Material handling equipment maintenance
- Tooling and consumables

NOBLE distributes over 1300 MRO manufacturer brands to government customers globally. In addition to an extensive catalog of MRO and industrial equipment and supplies, we offer NSN management, kitting, installation, construction services, and HAZMAT management and disposal.

MRO CONTRACT VEHICLES

NOBLE is an awardee of multiple long-term contract vehicles, blanket purchase agreements, and Prime Vendor Contracts that facilitate the procurement of MRO products and services, and ensure best pricing, quality, and compliance with all government requirements. (GSA/FEDMALL/Postal/DLA/SLED)

Warfighter Mission Support

3M Science. Applied to Life.™

3M helps protect workers in a changing world. Across diverse industries and applications, our technology, knowledge and energy drive innovative solutions. Our goal is to help protect you from hazards in the work environment, so you can focus on the job at hand.

PELTOR™ HEARING PROTECTION & PROTECTIVE COMMUNICATION

3M™ PELTOR™ Hearing Protection & Protective Communication is made for the mission. For over 75 years, 3M has equipped warfighters with solutions that help increase survivability and effectiveness in high-risk, high-noise environments. ComTac™ headsets combine level-dependent hearing protection with environmental listening to maintain auditory situational awareness and clear intra-team comms. Helmet-compatible designs, PTT/Bluetooth options, and multiple NRRs deliver mission-ready performance.

MANUFACTURING & GENERAL INDUSTRY

Built for manufacturing and general industry, 3M safety solutions help you identify hazards and match the right protection to each task—from welding, cutting, and grinding to foundry and fabrication. The portfolio spans respiratory protection (disposable, reusable, PAPRs, SAR), protective eyewear with anti-fog coatings, hearing protection, head and face protection, thermal imaging, and gas detection. With durable, comfortable PPE and expert support, 3M helps improve compliance, reduce exposure to weld fumes and silica, manage heat and noise, and elevate productivity across the line.

SCOTT™ SAFETY PERSONAL PROTECTIVE EQUIPMENT

3M™ Scott™ Fire & Safety helps firefighters and first responders stay prepared for today and protected for the future. Built on decades of innovation, the portfolio includes Air-Pak™ SCBA and Vision C5 facepieces, hands-free and handheld thermal imagers, integrated SCBA communications and accountability software, plus APR/PAPR/SAR options for off-fireground hazards. Cleanable, connected, and mission-ready, 3M Scott solutions enhance survivability and situational awareness.

ADHESIVES, SEALANTS & FILLERS

Make a lasting connection, without the screws. 3M adhesives, sealants, and fillers deliver built-to-last, non-metal attaching power that speeds assembly, improves appearance, and boosts performance. Replace welds and mechanical fasteners to reduce drilling, grinding, and cleanup while bonding metals, plastics, glass, and painted surfaces. From exterior panels, trims, and roof assemblies to interior walls, headliners, floors, insulation, and cable routing, 3M solutions seal, bond, and protect, efficiently and reliably.

Automatic Coating Limited (ACL) is a North American leader in advanced coating technologies, specializing in corrosion protection, powder coating, and liquid coating for military, defense, and industrial applications. Their facilities provide large-scale blasting, coating, and curing capabilities designed for high-performance and long-lasting protection.

TIDAL COAT

Automatic Coating Limited's patented Tidal Coat system delivers unmatched marine corrosion protection using a fusion-bonded multilayer coating process. Proven with the U.S. Navy, Tidal Coat extends component life 4x, prevents crevice corrosion, and has saved over \$80 million in maintenance costs on ships and naval assets.

INDUSTRIAL CORROSION PROTECTION

Automatic Coating Limited is a premier provider of industrial coating solutions, offering powder coating, liquid painting, blasting, and laboratory testing. With ISO and NACE certifications, ACL ensures unmatched quality and performance—delivering corrosion-resistant finishes built to military and industry standards.

POWDER COATING

ACL provides custom powder coating solutions in Virginia for architectural aluminum, corrosion resistance, and decorative applications. From small components to 10,000-lb pipes, coatings are engineered to endure harsh environments—subsea, mining, or industrial. Resistant to chemicals, abrasion, and weather, ACL finishes extend product life and reduce maintenance costs.

LIQUID COATING

From pipelines to wind turbines, Automatic Coating Limited offers advanced liquid coating solutions using high-solids and 100% epoxy systems. Approved by major energy providers, ACL's Toronto facility handles components up to 16' x 100', applying durable coatings that meet demanding industrial and environmental standards.

SHOP-APPLIED PIPE COATING

ACL's automated pipe coating technology combines precision equipment and innovative processes to deliver durable, repeatable corrosion protection. Proven on major projects like Keystone, this efficient system minimizes costs, enhances safety, and provides sustainable coating solutions for the oil and gas industry.

FIELD COATING

Automatic Coating Limited offers turnkey field coating and blasting services, including mobile coating, pipe restoration, and hazardous material removal. With state-of-the-art equipment and certified crews, ACL ensures superior surface protection and full compliance with environmental and safety standards.

Hallowell is a leading U.S. manufacturer of metal lockers, industrial shelving, cabinets, and workbenches designed for schools, warehouses, government, and commercial facilities. With one of the largest in-stock inventories and quick-ship availability, Hallowell delivers durable, high-performance storage systems backed by expert support for large-scale installations.

HIGH-CAPACITY SHELVING SYSTEMS

From single-level to multi-level and high-rise, Hallowell shelving meets any storage need. Our Hi-Tech and High Capacity H-Post systems offer endless configurations, maximum material efficiency, and unmatched strength. Rivetwell boltless units assemble fast while staying sturdy. Tailored solutions available—contact NOBLE and Hallowell to design your system.

SHELVING

Hallowell shelving units provide durable, adaptable storage for any environment. With adjustable shelves, sturdy steel construction, and a variety of sizes and finishes, they're perfect for organizing supplies, tools, or inventory—delivering long-lasting performance in commercial, industrial, or office spaces.

STEEL CABINETS

Hallowell Steel Cabinets deliver rugged, efficient storage for any workplace. Choose from Quickship 600, Slimline, and 400 & 800 Series in solid or safety-view designs, all built for durability and quick organization. Engineered for professionals, these American-made cabinets offer long-lasting performance and versatile installation options.

LOCKERS

Hallowell Lockers deliver high-end, customizable storage for any environment. Choose from steel, phenolic, hybrid, rust-resistant Galvanite™, or specialty styles—including parcel and open-front designs. Rugged, versatile, and tailored to your needs, these lockers combine durability with smart, stylish functionality.

WORKBENCHES

Hallowell Workbenches deliver unmatched durability, quality, and adaptability for any work environment. Choose from industrial-grade steel or elegant laminated hardwood tops with adjustable legs, steel shop tops, drawers, risers, and accessories. They're built to boost productivity and withstand years of heavy-duty use.

QUICK SHIP PRODUCTS

Our national QuickShip program is the largest of its kind in the material handling industry. Hallowell has nationwide distribution centers strategically located around the United States. All of our distribution centers are company-owned and operated, which ensures that your orders are properly prioritized and that all operations are conducted in accordance with our company philosophy.

ACCESSORIES

Hallowell locker accessories let you customize for style, function, and security. From bases and bench tops to built-in keyed or combination locks and padlock hasps, our accessories integrate seamlessly with all Hallowell lockers—adding durability, convenience, and dependable protection.

GUARDRAILS

Engineered for safety, Hallowell Guardrails combines robust steel construction with unique column-integrated fasteners to eliminate stripped joints. Finished in industry-approved safety yellow, each section arrives with all required hardware for easy installation and reliable defense against material handling impacts.

Industrial Vacuum designs and manufactures high-performance industrial vacuums, dust collectors, and trailer-mounted vacuum systems used across construction, environmental, and defense applications. Their durable equipment supports cleanup, material recovery, and hazardous dust control in demanding field conditions worldwide.

INDUSTRIAL VACUUMS

Industrial Vacuum manufactures the Hurricane™ line of high-performance industrial vacuum loaders and dust collectors for demanding applications such as abrasive blast recovery, roof rock removal, hazardous waste cleanup, and shipyards. Available in trailer- and skid-mounted models, each unit is designed, built, and field-tested in U.S. facilities to deliver unmatched power, quality, and reliability in any industrial environment.

INDUSTRIAL DUST COLLECTORS

Designed for durability and performance, Industrial Vacuum's Filt Aire™ Dust Collectors improve air quality and manufacturing efficiency. With models from 2,000–60,000 CFM, these stationary and portable systems—available in cartridge and baghouse configurations—offer dependable dust control for any application, from mobile job sites to large-scale industrial operations.

INDUSTRIAL BLOWERS

High-performance industrial air blowers available in sizes from 600 cfm to 40,000 cfm. Need to move some air? Industrial Vacuum's diesel and electric industrial blowers are among the most trusted in the industry. From their handheld 600-cfm EV600 for smaller jobs to their heavy-duty, trailer-mounted 20,000-cfm diesel option, they manufacture rugged blowers for longevity.

VACTAGON INDUSTRIAL SHOP VACUUMS, HEATERS, AND VACUUM SYSTEMS

Industrial Vacuum's Vactagon line of industrial shop vacuums, heaters, and vacuum systems is built for power, durability, and performance. For over 25 years, Vactagon has set the industry standard in dust collection and debris recovery, offering electric and hydro recovery vacuums, high-velocity portable systems, and duct heaters. Designed for applications from silica dust to lead remediation, these American-made vacuums deliver unmatched reliability, versatility, and efficiency across industrial, construction, and manufacturing environments.

Snap-on is a premier manufacturer of high-end tools, equipment, and diagnostic products. Serving defense, aviation, automotive, and industrial markets, Snap-on delivers precision-engineered solutions designed for durability, productivity, and mission-critical maintenance. Their tool control and kitting systems are widely adopted across MRO operations.

AVIATION TOOLS

Snap-on's Aviation Tools are engineered for precision, safety, and efficiency in aircraft maintenance and manufacturing. Built to support strict FOD control standards, this line includes tool sets, sheet metal, inspection, safety wiring, and specialty tools—all designed for unmatched reliability and performance in aviation environments.

HAND & SPECIALTY TOOLS

Snap-on's Hand & Specialty Tools deliver professional-grade performance, precision, and durability. From sockets and wrenches to pliers, hammers, and precision instruments, each tool is crafted for reliability and comfort. Designed for demanding environments, these tools help technicians work faster, safer, and with greater accuracy.

TOOL CONTROL & STORAGE

Snap-on's Tool Control & Storage solutions combine innovation, security, and efficiency to keep tools organized and accessible. From the advanced Level 5 Tool Control System® to durable modular, mobile, and portable units, each storage solution is built for reliability, precision, and productivity in demanding work environments.

TOOLS @ HEIGHT

Designed for professionals working at height, Snap-on's Tools@Height system combines performance with safety. Each tool is engineered with secure tethering points and drop prevention in mind, ensuring consistent control and reliability. From wrenches to pliers, every tool helps reduce risk while keeping productivity high.

POWER TOOLS

Engineered for power, precision, and reliability, Snap-on Power Tools deliver professional-grade performance in every application. From cordless and corded options to hydraulic and air tools, each system is designed for maximum torque, control, and durability across demanding industries.

FLEET MAINTENANCE

Optimize your fleet's performance with our extensive range of maintenance tools, including shop equipment, battery maintenance solutions, vehicle fluid management systems, diagnostics and more making sure your fleet stays productive and operational.

TORQUE & TENSIONING

Precision defines Snap-on's Torque & Tensioning solutions. From manual wrenches to advanced connected torque tools, each instrument delivers accuracy, consistency, and control. Built for critical applications, these tools ensure proper tension, reliability, and peak performance in every fastening task.

CUSTOM SOLUTIONS

Ever wish you could design a tool to meet your exact needs and specifications? That's Snap-On's specialty. Their engineers and Solutioneers deliver an unprecedented level of customization, working closely with you to develop the ideal solution for every task your team performs.

PowerCharge™

PowerCharge™ Electric Vehicle Supply Equipment (EVSE) recognized as some of the most reliable and versatile in the industry. Customized services available like; firmware configuration, branding, warehousing, and order fulfillment. Some of the largest network providers and installers of EVSE in North America use PowerCharge™ brand charging equipment.

FLEXPPOWER

Designed for versatility and durability, the PowerCharge® FlexPower Level 1 and 2 Charging Station offers fast, dual-voltage EV charging anywhere. Its compact design, intelligent plug system, and UL certification ensure safe, reliable performance—whether mounted at home or packed for charging on the go.

ENERGY SERIES

The PowerCharge® Energy Series combines versatility, power, and value for both commercial and high-demand applications. The Commercial model offers an economical 16A–40A solution with open access, RFID, or OCPP networking, while the 80A model delivers up to 19.2 kW for maximum performance. Both feature durable, outdoor-rated designs, multiple mounting options, and compatibility with a range of network providers.

PRO LIGHTNING SERIES

Engineered for demanding commercial environments, the PowerCharge® Pro-Lightning Series combines strength, versatility, and intelligent performance. With adjustable output up to 40A, PowerShare technology, and compatibility with multiple network providers, it's ideal for workplaces, retail hubs, and municipal installations. Rugged aluminum housing ensures long-term durability indoors or out.

THUNDER SERIES

The PowerCharge® Thunder Series delivers ultra-fast, commercial-grade DC charging with up to 920V output and 400A capability. Built in an all-weather stainless steel enclosure, it features a bright LCD touchscreen, optional credit card reader, and seamless OCPP integration for network flexibility—ideal for fleets, retail, and public infrastructure.

THUNDER-LITE SERIES

Compact yet powerful, the PowerCharge® ThunderLite Series is a versatile Level 3 charging solution for commercial environments. With up to 920VDC output, retractable cable management, and remote OCPP connectivity, it supports multiple connectors and ISO 15118 auto-authentication—ideal for fleets, retail sites, and public charging locations.

PORTABLE EV CART

Designed for mobility and durability, the PowerCharge® Mobile EV Charging Cart provides safe, portable EV charging for industrial and fleet environments. Featuring aluminum construction, chemical-resistant powder coating, and integrated storage, it accommodates chargers up to 80A and keeps cables organized for efficient, hands-free operation.

TACTICAL

NOBLE provides mission-focused tactical gear and equipment to military, law enforcement, and disaster response professionals worldwide.

We offer operational equipment, product integration, and kitting to provide simplified procurement, global logistical services, and support. With over four decades of warfighter-approved performance and long-standing industry supplier partnerships, we provide on-time, mission-ready delivery of tactical gear and equipment through multiple procurement channels.

NOBLE'S TACTICAL TEAM IS READY TO SUPPORT YOUR REQUIREMENTS FOR:

- Medical (Supply, Storage, Deployment, Transportation, and Treatment)
- OCIE (Organizational Clothing and Individual Equipment)
- W&O (Weapons, Optics, and Simulation)
- Tactical Operations (Breaching, Civil Disturbance, K-9, and Rappelling/Climbing)
- Maritime (Flotation, SCUBA, Instruments, Wetsuits, and Accessories)
- Human Performance (Biometrics, Gyms, Fitness Equipment, and Nutrition)

VALUE-ADDED SERVICES

Global Supply Chain Management – Our procurement services are designed for the government.

Logistics – Our customized logistics services accommodate specialized labeling requirements and timely communication to units on the ground, assuring expeditious distribution of global supply chain services, even to high-risk geographical areas.

Mission Support – Our global footprint and experience to shorten readiness timelines and enhance effectiveness.

Technology – We combine technical expertise with mission knowledge to increase the efficiency of supply chain operations.

Life Cycle Management – We will assist our customers with your life cycle planning by incorporating acquisition, sustainment, disposal, and issuing.

Product Development – In addition to providing commercial-off-the-shelf (COTS) equipment, Noble works with our customers to develop new products as well as customize existing products to meet their specific mission requirements.

Conflict Kinetics

Conflict Kinetics develops human performance and tactical training systems that merge professional sports methodologies with combat marksmanship. Their immersive, data-driven platforms improve decision-making, situational awareness, and lethality under stress, providing warfighters with repeatable, measurable performance enhancements in high-stakes environments.

HUMAN PERFORMANCE OPTIMIZATION

Conflict Kinetics' Synthetic Marksmanship Training Systems™ (SMTS™) revolutionize Human Performance Optimization by targeting the four key human elements critical to operational readiness: eyes, mind, central nervous system (CNS), and body. Through proprietary, science-based drills, trainees learn to see, process, react, and align faster—improving speed, precision, and decision-making under pressure. The system enhances visual tracking, sharpens cognitive response, and conditions the CNS to operate effectively under stress. By optimizing these elements, SMTS™ strengthens performance, survivability, and situational awareness for military and law enforcement personnel.

SYNTHETIC MARKSMANSHIP TRAINING SYSTEMS

Conflict Kinetics' Synthetic Marksmanship Training Systems™ (SMTS™) combine patented methodologies, biometric data capture, and the Tactical Ocular Reaction Area™ (TORA™) to rapidly advance marksmanship and threat-recognition skills. Featuring over 2,500 dynamic, interactive targets and customizable Programs of Instruction, SMTS™ enables faster skill development and higher qualification rates. Built with input from professional operators, it measures and improves individual to unit-level lethality and survivability. By training the eyes, mind, body, and CNS, SMTS™ enhances precision, decision-making, and situational awareness under stress for individuals and teams across mission sets.

RESEARCH, DEVELOPMENT, TESTING & EVALUATION (RDT&E)

Conflict Kinetics' RDT&E program delivers a data-driven approach to improving combat readiness, cognition, and reaction speed. Powered by an enterprise-level database and integrated Gunfighter Gym™, the system captures over 70 data points per event—tracking accuracy, lethality, engagement time, and biometric data such as EEG and EKG. Adaptive Marksmanship and Intelligent Triggering™ use this data to tailor training, identify range readiness, and accelerate skill development. Automated reporting provides real-time performance and effectiveness metrics, enabling continuous improvement for individuals, teams, and entire training programs.

Danner Boots is a leading U.S. manufacturer of rugged tactical, military, and outdoor footwear. Known for their durability, comfort, and performance, Danner designs boots engineered for extreme conditions. Their product line supports military and law enforcement professionals with lightweight, waterproof, and Berry-compliant options built to exceed mission demands.

SONIC BOOT

The Sonic Danner Dry is prepared for the spectrum of conditions: When the temperatures rise and the intensity increases, the breathable PUTEK Perspair side panels and cowhide suede upper help keep you cool. The boot also keeps your feet dry with Danner® Dry waterproof protection. In addition, the Danner® Sonic outsole provides grippy traction in unpredictable terrain.

TACHYON BOOT

Danner didn't get its chops building athletic shoes—it makes boots. So when the company set out to create a lightweight trainer, it used over 80 years of experience to build a boot that acts like a shoe, not a shoe that acts like a boot. Women are advised to select 1.5 to 2 full sizes down for the correct fit.

FULLBORE BOOT

Hike inspired, field focused and ready for anything, the FullBore is dialed in to be the competitive advantage you're looking for. Start with an innovative, cushioning Vibram platform and match it with Megagrip technology for unparalleled traction on the outsole. Top it off with a lightweight upper, available in either waterproof or extra-breathable versions, and you have the tactical edge you need to succeed.

RESURGENT BOOT

Made for foot drills and fast-moving patrols, the Resurgent helps you stay cool in dry, arid climates. The leather upper features panels made of Perspair®, an extremely breathable material woven with PU-coated nylon thread. Opanka stitching adds an extra layer of durability. The lightweight Resurge midsole returns energy with every step to keep you feeling light on your feet.

SONIC SIDE-ZIP BOOT

Whether it's part of a required uniform or simply a boot rugged enough to keep up, this easy-to-wear essential works harder than most. Its lightweight, waterproof upper features abrasion-resistant Perspair® panels with PUTEK technology and full-grain leather, while its supportive padded collar and sneaker-like Resurge foam midsole keep you comfortable through any shift.

TANNICUS BOOT

Built with the same rough-out leather and rugged nylon expected from Danner, the Tannicus is the brand's lightest, theater-ready military boot. It features enhanced midsole cushioning, a dampening heel cup, and a long-lasting polyurethane footbed for enduring comfort. A moisture-wicking mesh liner keeps feet cool in hot climates, while the pentagonal lug outsole provides reliable stability on diverse terrain.

Massif specializes in advanced flame-resistant (FR) and high-performance apparel for military and tactical operators. Their gear is engineered to meet strict safety standards while delivering comfort, breathability, and mobility. With decades of field testing, Massif garments provide mission-ready protection in combat and training environments without compromising durability or fit.

LIGHT + MID + HEAVY BASE LAYERS

Built for harsh, high-output missions, Massif® base layers manage moisture, regulate temperature, and deliver next-to-skin comfort in light, mid, and heavy weights. Flame-resistant fabrics, flatlock seams, and stretch construction reduce bulk under armor while maintaining mobility and durability. Wear solo in heat, stack for cold, and stay dry, comfortable, and protected across changing conditions and tempos.

COMBAT SHIRTS + PANTS

Purpose-built for armor-integrated operations, Massif® combat shirts and pants combine FR protection with breathable, high-stretch panels, reinforced abrasion zones, and articulated patterning for unrestricted movement. Low-bulk designs fit clean under carriers; venting and quick-dry knits manage heat and sweat. Mission-ready pocketing, durable stitching, and professional, NIR-compliant fabrics support sustained field use.

FLIGHT SUITS + UNIFORMS

Massif flight suits and uniforms deliver cockpit-ready FR protection with exceptional comfort and mobility. Lightweight, breathable fabrics resist flash exposure while ergonomic patterning, gussets, and knit panels preserve range of motion in cramped spaces. Smart pocket layouts, durable closures, and clean, professional lines support long sorties and rapid egress—engineered for aviators and aircrew who can't compromise.

OUTERWEAR

From weatherproof shells to insulated layers, Massif outerwear pairs FR performance with wind, rain, and cold protection. Durable face fabrics, laminate or membrane technologies, and helmet-compatible hoods block the elements while pit zips and breathable liners dump heat on the move. Streamlined fits layer cleanly over kit, maintaining mobility, durability, and mission-ready reliability in any climate.

Night Vision Devices, Inc. (NVD) offers premium U.S.-made night vision binoculars, monoculars, weapon sights, and components. Established in 2005, this veteran-owned business specializes in MIL-SPEC-compliant systems for military and law enforcement. Ranked as the 3rd largest 12 night vision manufacturer in the U.S., NVD's team brings over 200 years of combined experience.

BNVD-SG NIGHT VISION BINOCULAR - SINGLE GAIN

The NVD-BNVD-SG is a lightweight dual-tube goggle with single-knob gain control, tactical monocular cutoff, and auto power-off when stowed. Submersible to 66 ft, it supports dual- or single-eye use, optional 3X magnifiers, and extended battery packs. MIL-STD compliant with a low electronic signature, it delivers unmatched flexibility, durability, and performance in any mission.

BNVD-SGC NIGHT VISION BINOCULAR - SINGLE GAIN CONTROL

The BNVD-SGC upgrades the proven BNVD-SG with a lighter rotary control, better diopter assembly, and enhanced IR Spot Flood. Tactical Monocular Cutoff, 66-ft submersion, and MIL-STD compliance ensure mission-ready performance. Compatible with 3X magnifiers and extended battery packs, it delivers low signature, durability, and elite night vision capability.

PVS-14 NIGHT VISION MONOCULAR

The PVS-14, used by U.S. and NATO forces, is the top multi-functional night vision monocular. Helmet- or weapon-mounted, it features gain control, IR LED, and auto power on/off. Works with ACOG, Aimpoint, and EOTech for mobility and short-range targeting. Rugged, MIL-STD compliant, and supported for 25+ years.

UL BNVD-SG ULTRA LIGHT NIGHT VISION BINOCULAR - SINGLE GAIN

Weighing just 465g, the UL BNVD-SG is a dual-tube goggle with optics optimized for white and green phosphor tubes. Features include Tactical Monocular Cutoff, auto power-off, -6 to +2 diopter range, 9.8" close focus, and submersion to 66 ft. MIL-STD compliant, EMI-safe, and compatible with 3X magnifiers and extended battery packs.

UL BNVD-SGC ULTRA LIGHT NIGHT VISION BINOCULAR - SINGLE GAIN CONTROL

The 440g UL BNVD-SGC offers lightweight durability with hybrid optics for green or white phosphor tubes, reducing glare and boosting contrast. Includes rotary control, improved diopter, Spot/Flood IR, Tactical Monocular Cutoff, and auto power-off. MIL-STD compliant, 66-ft submersible, and compatible with 3X magnifiers and battery packs.

UL PVS-14 ULTRA LIGHT NIGHT VISION MONOCULAR

The UL PVS-14 sets a new standard at 237g, the lightest fully functional night vision monocular available. It retains all AN/PVS-14 features—gain control, IR LED, diopter adjustment, auto on/off—while adding lightweight MIL SPEC optics optimized for white phosphor tubes. Made in the USA with a 10-year warranty.

PVS-7 NIGHT VISION GOGGLES

Used by U.S. and NATO forces, the AN/PVS-7D is water-resistant, quick to mount/dismount, and features IR LED with warnings, low battery alert, and high light cut-off. Runs 40+ hours on two AA batteries. Available in green or white phosphor, Gen 2 or Gen 3, and MIL-STD compliant for military, law enforcement, or outdoor applications.

RNVG NIGHT VISION BINOCULAR - NO GAIN

Built from 7075 aluminum, the RNVG is the most rugged night vision goggle in production. PVS-14-style controls, full optical adjustment, IR illuminator with safety pull, and adjustable interpupillary distance ensure ease of use. Available in Gen 2 or Gen 3, green or white phosphor, with mil-spec objectives and eyepieces.

Pixels on Target provides advanced thermal optics, meticulously designed with cutting-edge technologies to deliver unmatched capabilities. The team collaborates with clients to meet mission-specific needs, either custom-developing or modifying designs for optimal performance.

VOODOO-S THERMAL MONOCULAR

The VooDoo-S is the next generation of thermal imaging system. We've kept what you require, improved what you asked for, and added what you've always desired. Feature rich, yet easy to use all under 10 oz.

- Sharpest image on the market for observation and search & rescue operations
- Weapons mountable with QD/Flip-to-Side Wilcox Mount with Variable Height Options
- Helmet mounted using Wilcox Bridge Mount (Monocular or Binocular)

VOODOO-M THERMAL MONOCULAR

The VooDoo-M is the next generation of thermal imaging system. We've kept what you require, improved what you asked for, and added what you've always desired. Feature rich, yet easy to use all under 18 oz.

- Sharpest image on the market for observation and search & rescue operations
- Weapons mountable with QD/Flip-to-Side Wilcox Mount
- Handheld Long Range Thermal for Reconnaissance

VOODOO-B THERMAL MONOCULAR

The VooDoo-B is the next generation of thermal imaging system. We've kept what you require, improved what you asked for, and added what you've always desired. Feature rich, yet easy to use — all under 48 oz.

- Long-Range Observation and Target Location
- Small and Lightweight – Less than 3 lbs.
- Integrated Laser Range Finder, GPS and other Essential Systems
- Interchangeable Lenses – 75mm Standard FOV and Optional Hot Swapable 29mm Wide FOV
- Human Detection Range up to 2750 Meters with 75mm Standard FOV Lens

THE NEXT GENERATION OF THERMAL OPTICS

Pixels on Target is passionate about delivering the most advanced family of thermal optic products. We design every system using the latest, most disruptive technologies to deliver unrivaled overmatch capabilities to those who defend our freedom. Our team will meet with you to determine the best possible solution for your mission requirements and custom develop from the ground up or modify current designs to produce the best results. Warranty and field support are always of major concern and Pixels on Target understands the importance of maintaining your equipment. Our pledge is simple, with a 30-day or less turn around for any units that require repair. Customizable warranty programs are available and we stand by our products craftsmanship, period.

REVISION.

Revision Military specializes in ballistic and laser-protective eyewear. With expertise in design and development, and significant investment in high-volume manufacturing and vertical integration, Revision's mission is to deliver protective eyewear solutions that save lives.

STINGERHAWK EYEWEAR SYSTEM

Revision StingerHawk® delivers distinctive, low-profile ballistic protection in a lightweight, modernized design. With a tighter lens curvature for a more streamlined fit, it offers high-impact resistance, wide peripheral coverage, and a sleek look-combining advanced fragmentation protection with all-day comfort and style.

SHADOWSTRIKE TACTICAL BALLISTIC SUNGLASSES

Revision ShadowStrike™ Ballistic Sunglasses feature a sharp, angular wraparound design that delivers both standout style and maximum protection. Built for secure, all-day wear, they fit squarely and comfortably through any operation-offering high-impact resistance and wide peripheral coverage in a lightweight, mission-ready package.

SAWFLY EYEWEAR SYSTEM

Sawfly® is Revision's classic ballistic spectacle-trusted by forces around the world for its proven performance and mission-ready design. With a reputation built on reliability, customizability, and comfort, Sawfly delivers field-tested protection and optical clarity in a lightweight, adaptable platform that excels in both training and combat environments.

SLINGSHOT BALLISTIC SUNGLASSES

Redefine your eyewear experience with Slingshot® Ballistic Sunglasses-engineered for peak performance and adaptability. Featuring a browless design, off-the-charts anti-fog performance, customizable fit, and rapid lens swap capabilities, Slingshot exceeds stringent military ballistic impact requirements. Available with I-Vis™ lens technology, it also delivers enhanced contrast and clarity across a wide range of environments.

WOLFSPIDER GOGGLE SYSTEM

Revision Wolfspider® is a best-in-class ballistic goggle system engineered for performance and comfort in extended wear. Featuring a flexible, high-impact frame and a wide, unobstructed field of view, it delivers mission-critical protection without sacrificing fit, breathability, or optical clarity in demanding operational environments.

SNOWHAWK COLD WEATHER GOGGLE SYSTEM

Revision SnowHawk® is a fully integrated, full-coverage ballistic goggle and balaclava system-engineered for operations in the most unforgiving cold environments on the planet. It delivers best-in-class anti-fog performance, breathability, and ballistic protection, built to meet rigorous military standards for mission-critical clarity and comfort.

DESERT LOCUST GOGGLE SYSTEM

Desert Locust® is Revision's flagship ballistic goggle system-trusted for its proven performance in the world's toughest environments. It delivers full-seal protection, a wide field of view, and an optimized fit for helmets and facial structures, making it the ultimate goggle for extended missions and sustained wear.

CARRIER LOCUST GOGGLE SYSTEM

The Carrier Locust goggle system is purpose-built for flight deck operations, offering ballistic protection with specialized features for aviation environments. Constructed with flame-resistant materials and equipped with custom-designed outrigger clips, it integrates seamlessly with flight deck helmets for a secure, low-profile fit in high-risk, high-heat conditions.

Streamlight designs high-performance lighting solutions for tactical use. Known for innovation and durability, they offer flashlights, headlamps, and weapon-mounted lights built to endure tough environments. Engineered for superior brightness, runtime, and reliability, Streamlight is trusted by first responders, law enforcement, and military personnel.

WEAPON-MOUNTED LIGHTS

Streamlight's TLR series provides weapon-mounted lights tailored for military, law enforcement, and concealed carry. Options include Traditional, High Lumen (HL), and High Candela (HPL) beam patterns, offering versatility for situational awareness or long-range precision. Many feature integrated red or green lasers and multi-fuel rechargeable battery systems to keep users ready for any challenge.

HANDHELD FLASHLIGHTS

Since 1973, Streamlight has delivered professional-grade, high-performance lighting solutions. Our Stinger and Strion series are trusted by law enforcement, professional mechanics, and tradesmen worldwide for their efficiency, unmatched performance, unheard-of durability, and incredible value. These models feature the latest technology, multiple output modes, and diverse charging options for superior utility.

RIGHT ANGLE FLASHLIGHTS

The Survivor and Vantage series offer trusted right-angle lighting solutions for firefighters and industrial workers. Designed for hands-free use, they feature spring-loaded clips, D-rings for optimal light orientation, and 90-180° articulating heads. Many models are multi-fuel and meet NFPA requirements for heat resistance and durability.

HEADLAMPS

Streamlight headlamps provide hands-free lighting for demanding industrial tasks and critical first responder operations. They feature versatile spot and flood beams for varied illumination needs and include rechargeable USB or multi-fuel options. Models like the ProTac 2.0 Headlamp deliver 2,000 lumens and are engineered for comfort and durability in any challenging environment.

WORK LIGHTS

Streamlight work lights are engineered to deliver function, performance, and convenience in demanding industrial and emergency environments. They feature innovative charging systems and hands-free applications with magnets and hooks. Many models incorporate Color-Rite Technology (90 CRI) for accurate color differentiation, crucial for tasks like electrical work, paint matching, or forensic evidence analysis.

EMERGENCY SCENE LIGHTS

Streamlight's scene lights provide rapid deployment and intense illumination for emergency and industrial work sites. Models like the Portable Scene Light II deliver up to 10,000 lumens, with features such as 360° rotating heads, cordless operation to prevent trip hazards, and stackable designs for multi-level lighting. They are indispensable tools for first responders, construction crews, and utility workers.

SAFETY-RATED LIGHTS

Streamlight specializes in safety-rated lighting for hazardous locations where flammable gases, liquids, vapors, or dusts may exist. Our Dualie and ProPolymer series offer a full selection of intrinsically safe handheld lights, providing options like spot, flood, laser, or true color recognition with Color-Rite Technology. These lights are rigorously tested and certified for safe use in Division 1 areas.

INTERNATIONAL SAFETY-RATED LIGHTS

Streamlight offers safety-rated lights compliant with the European Union's ATEX Directive 2014/34/EU. These products are specifically designed and approved for use in potentially explosive atmospheres within EU member countries. This compliance ensures these lighting tools meet stringent international standards for safety in hazardous industrial and emergency work environments across Europe.

Team Wendy, an Avon Protection company, is dedicated to providing exceptional head protection systems for those who risk their lives daily. Founded in 1997 to honor Wendy Moore's legacy, the company develops cutting-edge products designed to prevent serious impact-related injuries.

RIFLETECH™ HELMET

The RIFLETECH™ helmet from Team Wendy delivers rifle-rated ballistic protection with a lightweight, mission-ready design built for all-day comfort. Its Air Fit liner system enhances impact protection and breathability, while Ceradyne's Seamless Shell Technology eliminates weak points. With a V50 rating up to 4430+ ft/s, RIFLETECH™ maximizes survivability in high-threat environments.

EXFIL® RAIL 3.0 BALLISTIC HELMET

The TEAM WENDY® EXFIL® Ballistic features a hybrid composite shell for increased strength and a unique geometry for optimal fit. It meets NIJ III-A standards with 9mm backface deformation of less than 25.4 mm, delivering proven ballistic protection in a lightweight, mission-ready design.

EXFIL® RAIL 3.0 BALLISTIC SL HELMET

The Team Wendy® EXFIL® Ballistic SL features a lightweight composite shell that reduces weight by 15% compared to the original EXFIL® Ballistic, while maintaining the same optimized geometry for superior fit. It meets NIJ III-A standards, with 9mm backface deformation under 25.4 mm and a 17gr V50 greater than 731 m/s.

EXFIL® RAIL 3.0 CARBON BUMP HELMET

The EXFIL® helmet delivers advanced protection with a lightweight carbon fiber shell and Zorbium® foam liner for impact absorption and comms integration. Exceeding ACH blunt impact and BS EN 1385:2012 standards, it features a Wilcox® NVG shroud, CAM FIT™ Retention with BOA® Fit System, and the lighter EXFIL® Rail 3.0 with included Magpul® rails and shock cord kit.

CAM FIT™ RETENTION SYSTEM HELMET

The CAM FIT™ Retention System delivers comfort and stability with quick one-handed Cam Lock sliders and the BOA® Fit System for even pressure distribution. A low-profile asymmetric buckle and padded chin cup ensure a secure, chafe-free fit in any climate, with a left eye dominant (LED) option available.

EPIC AIR® LINER SYSTEM

The Epic Air® Liner System utilizes Team Wendy's proven Zorbium® foam technology to deliver reliable impact protection without added weight. A 1/2" baseline liner with integrated air channels enhances airflow, while customizable comfort pads in 1/8" and 1/4" thicknesses provide a personalized fit. Designed to fit most ground combat helmets, it is fully compatible with all common communications headsets.

EPIC™ SPECIALIST BALLISTIC HELMET

The EPIC™ Specialist Ballistic helmet features exceptional performance and is substantially lighter than the ACH. It offers premium comfort and comes configured with the Team Wendy CAM-FIT™ Dial Retention, EPIC Air® Fit liner system, side accessory rails, Velcro®, shock cords and NVG shroud.

EPIC™ PROTECTOR BALLISTIC HELMET

The EPIC™ Protector Ballistic helmet features exceptional performance and is substantially lighter than the ACH. It offers premium comfort and comes configured with the Team Wendy CAM-FIT™ Dial Retention, EPIC Air® Fit liner system, side accessory rails and front cover plate.
