Narcotics identification

# Save time while saving lives

## TruNarc handheld narcotics analyzer

Safely identify more than 530 of the highest priority illicit and abused drugs in a single drug test with the Thermo Scientific™ TruNarc™ Handheld Narcotics Analyzer.

- Rapid presumptive testing of narcotics based on lab-proven Raman spectroscopy
- Contactless testing, even through translucent packaging for most substances in the library
- Library regularly updated to include emerging drug threats

---

## 3M

With over 60,000 products in our portfolio, 3M brands deliver science-based performance and extraordinary outcomes across almost any industry you can imagine.

---

## 5.11

5.11 is the pioneer and world-leading maker of purpose-built gear. Grounded in the knowledge, experience, and insights of professionals and elite end users around the world, 5.11 makes technical products that really work. We design for life's most demanding missions, its toughest jobs, and its greatest ambitions. We build to the highest standards: battle-ready, field-tested, functional, comfortable, and lasting. We make gear engineered to work exceptionally and to empower and inspire those who tackle the toughest challenges head-on.

---

## 4K Solutions, LLC

4K Solutions, LLC is a US Service-Disabled Veteran Small Business (SDVOSB) CveE specializing in providing leading information technology and special communications solutions. 4K specializes in rapid commercial off the shelf (COTS) systems design and integration. 4K Solutions is keen at designing robust 5G, satellite and radio over IP (ROIP) PTT and tactical communications solutions for our customers globally.

---

## 908 Devices

908 Devices is revolutionizing chemical and biochemical analysis with its simple handheld and desktop devices, addressing critical-to-life applications. MX908 is a multi-mission handheld mass spectrometer utilized by elite responders conducting chemical, explosive, priority drug and HazMat operations around the world. MX908 detects compounds at trace levels with a high level of sensitivity and unparalleled selectivity, giving you actionable intelligence that other technologies can't. The power of high-pressure mass spectrometry (HPMS) accurately discriminates priority threats from the broad range of interferents that lead to false alarms with other technologies, making the MX908 an ideal device for corrections and law enforcement customers.

---

## AED Professionals

AED Professionals is a family-owned and operated medical devices company committed to supplying life-saving devices to facilities nationwide. Our team is dedicated to delivering the knowledge and resources needed to ensure your organization's safety with AEDs, choking rescue, diagnostic equipment, infection prevention, and much more.

---

## Agilent

Agilent supports scientists in 110 countries in cutting-edge life science research; patient diagnostics; and testing required to ensure the safety of water, food and pharmaceuticals. Our advanced instruments, software, consumables, and services enable our customers to produce the most accurate and reliable results as well as optimal scientific, economic, and operational outcomes. We play a role in advancing important research and testing, with our scientists creating some of the world's most leading-edge technology and our field engineers working side by side with customers to help them maximize productivity. We bring these solutions to a variety of markets, from pharma and diagnostics to applied materials and chemicals. Together with our customers, we're bringing great science to life.

---

## AirBoss Defense Group

We are a survivability solutions provider dedicated to delivering critical capability to personnel operating in high-risk environments around the world.

---

## ANDE

ANDE is dedicated to delivering Rapid DNA Identification in real time at forward-operating locations with level one users. The resulting DNA fingerprints will be searched against terrorist and criminal watch lists or uploaded for central database searching. The ANDE-generated DNA fingerprints will also be used to populate DNA databases.

---

Deploying ANDE will minimize personnel costs, logistics, and risk currently associated with traditionally available technology.

---

## Atlantic Signal, LLC.

North America's largest custom tactical communication's designer, manufacturer and supplier.

Atlantic Signal is North America's largest supplier of tactical ancillary communication products for tactical US Law Enforcement, US Military with an emphasis on US Special Operations. The company currently designs, manufactures and offers over 1,100 different products including headsets, push-to-talks, portable intercoms, ICS interfaces, single and dual band radio interface cables and more.

---

## ATRI USA

ATRI USA specializes in the ATRI TINDS DVE, a thermal driver vision enhancer designed to increase the survivability and maneuverability of military and defense vehicle operations during limited visibility.

---

## Avon Protection and Team Wendy

Avon Protection is an innovative capability provider specializing in the design, development, testing and manufacture of integrated protective systems. Our portfolio of life-critical protection solutions includes full face respirators, ballistic helmets, escape hoods, SCBA systems, modular PAPR units, thermal imaging cameras and underwater equipment

Team Wendy is an Avon Protection company dedicated to providing exceptional head protection systems for those who risk their lives every day. Thoughtfully designed from the inside out, Team Wendy helmet systems ensure an optimal combination of comfort and protection that allows the wearer to focus not on their helmet, but on the mission at hand. Team Wendy brings more choice, better technology and reliable customer service to military, law enforcement, and search and rescue operators worldwide.

---

## BeaverFit

BeaverFit is the leading supplier of human performance and tactical training solutions to support the success of the Human Weapon System. Veteran owned and operated, BeaverFit provides American-made solutions that meet the requirements and needs of military units in any environment. From the original container gym solution to full-scale human performance and tactical training facilities, BeaverFit is the trusted partner in creating solutions to support the growing needs and requirements of our military.

---

## Benchmade Knife Company

YOURS, FOR LIFE

In the line of duty, the field or forest, for everyday carry—you buy Benchmade because you know it'll perform without compromise, however you need it to, for as long as you need it to.

---

## Bertin Environments Inc.

Bertin Environments, nowadays part of Bertin Technology Group, is a Finnish company with over 35 years of experience from improving CBRN safety around the world with its in-house technologies and system solutions. We provide early warning chemical, biological and radiation detection & monitoring system for wide variety of application ranging from personal safety and building protection to naval vessels and armoured vehicles. Foundation of our solutions lies in long experience and expertise and it's built from COTS products with new scalable system architecture.

Bertin Environments' roots are deep in chemical detection and its most well-known product is, ChemProX, a handheld chemical detector for CWA and TIC detection and classification. ChemProX enables two-way communication and has versatile build-in training functionalities.

---

## Big Top Manufacturing

Big Top Manufacturing, a leader since 1979, specializes in tension fabric shelters. Our comprehensive services include design, fabrication, and installation for both fixed and mobile structures. With decades of experience, we excel in meeting diverse client needs, maintaining quality, and cost-effectiveness. Our hands-on approach ensures customer satisfaction from project inception to completion.

# EXHIBITOR INFORMATION

---

## Biomeme Inc

Launched in 2012 by a handful of innovators, Biomeme employs over 120 people and is headquartered in downtown Philadelphia. For more than a decade, Biomeme has been designing and building molecular detection solutions, particularly its handheld, flagship device – Franklin® three9 Thermocycler's -- with a focus on protecting the warfighter from bio-warfare agents and contaminants, the fight against anti-microbial resistance, and pandemic response against COVID-19. More broadly, Biomeme holds nine (9) global patents centered on the development and deployment of fast, accurate, and sensitive portable devices that utilize polymerase chain reaction (PCR) and isothermal assays to detect targets, including bacterial and viral microorganisms, that included diverse use cases from biowarfare agent panels to food safety, water quality, industrial quality control, vector surveillance, environmental DNA (eDNA), animal health, and most recently human diagnostics with our FDA EUA SARS-CoV-2 tests.

The Philadelphia HQ houses vertically integrated operations including assay and device R&D, software development, hardware & consumables manufacturing, PCR assay lyophilization, and even diagnostic testing services through our wholly-owned CLIA high-complexity lab network. Additionally, due to the COVID pandemic, Biomeme took the extra step to onshore the majority of its supply chain and, again, manufacture its products in Philadelphia. With a robust civilian market, Biomeme has also successfully partnered with the Department of Defense on several RDT&E opportunities to enhance the Franklin device, particularly with the U.S. Special Operations Command (SOCOM) and the Joint Program Executive Office for Chemical, Biological, Radiological, and Nuclear Defense (JPEO-CBRND), that have evolved into official programs of record for the Franklin device – 1) The Joint Handheld Bio-Agent Identifier (JHBI) and 2) The Joint Biological Tactical Detection System (JBTDs).

---

## Blauer Manufacturing

Blauer's Homeland Defender line of CBRN-protective suits is used by DoD, federal, and state and local response teams around the country that require the highest degree of functionality and comfort from their PPE. Our suits are 3rd-party certified to the NFPA 990 standard and available in Level A, Level B, Level C, and Level D configurations to meet most mission profiles.

---

## Block Engineering

For over 60 years, Block Engineering has been a leader in chemical detection and analysis technology. Block's line of laser-based standoff sensors will quickly and accurately detect and identify a wide range of chemical threats over varying contract-free distances. Block sensors are designed to protect transportation hubs, mass gathering areas, military bases, and other critical infrastructure sites from Chemical Warfare Agents (CWAs), Toxic Industrial Chemicals/Materials (TICs/TIMs), explosives, and other hazardous chemicals, in just seconds.

---

## Blue Sky Network

Blue Sky Network is a pioneer in the development of satellite tracking and two-way voice and data communications for commercial, government, and privately held fleets working in remote areas around the world. Our state-of-the-art tracking and communication solutions leverage the power of the Iridium satellite constellation to seamlessly integrate with our industry leading command center – SkyRouter™. Development of our best-of-class solutions is driven by current and future industry requirements, and by years of valuable customer input. We utilize constantly evolving technologies to deliver innovative features such as variable-rate tracking reports (based on time and/or distance), GeoFences, and SMS/Email alerting. Best of all, our solutions can be tailor-made to fit your operational needs by our experienced in-house team. We've led the market with advanced solutions such as dual-mode (GSM-Iridium) devices, and Bluetooth-enabled hardware that in conjunction with SkyRouter™, exploit the power of smartphones and tablets to enable bi-directional free-form or preset messages and customized forms; sent from anywhere, to anywhere.

---

## Bosch Security Systems

Innovative security solutions that are scalable, reliable, and sustainable for government applications globally. At Bosch, we continually work to meet current and new government compliance requirements. We are actively engaged with testing and validation agencies to ensure our products perform at or above the quality standards defined by each government organization. We aim for continuous improvements to our products through collaboration with our government customers.

## Bounce Imaging

Bounce Imaging makes a suite of tactical, 360-degree camera systems that keep first responders, firefighters, and civilians safer during hostage, high-risk warrant, and active shooter situations, as well as any dangerous environments they find themselves in. Unlike drones and robots, Bounce Imaging's camera systems are lightweight, require no training, and can be deployed in seconds to provide an instant 360-degree view of threats within a confined space. Utilized by over 500 federal, state, and local law enforcement agencies and first responders, including the FBI, U.S. Marshals, and U.S. Customs & Border Protection, our cameras are also deployed by elite teams within the Department of Defense. The cameras relay 360-degree pannable video over WiFi, 4G/LTE, or mesh networks to any Android or iOS device. Bounce Imaging's technology, which has been named a Best Invention by TIME, CNN, Popular Science, and others allows for images to be stitched at a rate up to 200x faster than traditional methods while retaining an orientation regardless of how the system is thrown, mounted, or rotated.

## Broadfence

We are the leader in the temporary mesh fence market providing Safe, Simple and Secure fencing solutions for your boundary and security needs. We offer construction fencing and temporary fencing consumers the very best in easy-to-use welded wire mesh fencing panels. Broadfence is known for premium products and excellent service, and we have the temporary fencing solution for your next project in stock and ready to deliver to site – fast! With our own delivery methods and the simplest and quickest system to install, we have the solution for safely fencing off your next construction project, event site or vacant lot at a price that you can afford! Couple this with our inventory supply and commitment to customer service, and you have the best solution available for your job site security – just a phone call away! Call one of our highly-trained and experienced customer service representatives to help solve your fencing needs today, toll free 1-855-993-0499 for immediate assistance. Our fencing is perfect for all of your construction fencing and temporary fencing needs. Broadfence... Safe, Simple & Secure.

## Building Intelligence

Headquartered in New York, Building Intelligence provides innovative solutions for managing the access and identities of visitors, vehicles and vendors. Its award-winning, cloud-based software, SV30®, creates an efficient and streamlined process at all entry points. Enabling facilities to establish secure operations from the lobby to the loading dock.

## Celina Tent Inc

CELINA, an Ohio-based company, has recently updated its manufacturing facility, which includes its subsidiaries Celina Tent, Inc. and Celina Enterprises, LLC. The new 110,000 square foot space will help meet the growing Department of Defense demand for USA made, Berry Amendment Compliant, industrial textile fabric products like tents, shelters, bladders, and more. The newly expanded 300,000 sq. ft campus enables CELINA to expand metal fabrication and assembly capabilities to build engineered frames and structures to meet global environmental requirements for their mission critical shelter solutions. This modern state-of-the-art manufacturing facility allows CELINA's production teams to consolidate processes and provide improved efficiencies at one campus. Vertical integration positions CELINA to provide a total solution for their customers' textile and manufacturing requirements. This enables CELINA to customize each unique military specification utilizing their core products consisting of Large Area Maintenance Shelters (LAMS), Dome Structures, tarpaulins, and turnkey base camp solutions with Dynamic Medium or Small shelters.

## CQC Ltd.

Formed in 1948, CQC are a UK based manufacturer with a long standing history in the design, development & manufacture of high quality, textile based military personal equipment to the UK Ministry of Defence and many other Defence Forces around the globe. As well as manufacturing the highest quality load carriage, body armour and integrated wearable soldier systems, CQC are the only manufacturer of specialist CBRN PPE in the UK. Specialising in lightweight and breathable fabrics, our CBRN garment systems are the lightest & most wearable on the market. With our own in house design department, we pride ourselves in offering smaller batch production and faster turn-around than any of our competitors. CQC also design & manufacture their own innovative Fibrelight range of maritime safety products, again which are supplied to a range of customers around the globe have been delivered across the globe. With many decades of experience, CQC has applied its design capabilities and high quality manufacturing, to design and deliver products to Military, First Responders, Special Forces, Security Services and Maritime Rescue agencies

# EXHIBITOR INFORMATION

worldwide. As a result CQC is now leading the world in the design, development and innovation of new technologies and capabilities, delivering the very best Soldier Systems, CBRN, and Marine Safety products around the globe.

---

## Crown Point Systems

We are a leader in providing C5ISR (Command, Control, Computers, Communications, Cyber, Intelligence, Surveillance, and Reconnaissance) Solutions to federal agencies in the DoD and Intelligence Community spaces for more than 10 years. We are headquartered in the heart of historic Point Loma, San Diego, California.

---

## Danner Boots

For nearly a century, Danner has crafted boots with purpose and integrity - footwear to equip those who choose the unlikely path, those who cut fresh trails, those who pioneer. To this day, our commitment to superior craftsmanship remains unchanged. We continue to craft high quality boots, using the best possible materials we can find, to create a product built to last.

---

## DetectaChem, Inc.

DetectaChem, a Houston-based company, specializes in manufacturing cutting-edge, military-grade explosive and drug screening devices. We are dedicated to serving our law enforcement and military communities with a range of exceptional product lines.

---

## Dewey Electronics Corporation

Since 1955, Dewey Electronics has been the leading resource to the U.S. government for innovative power solutions for some of the toughest applications and environments. Our mission has always been to solve complicated power problems so our customers can operate more efficiently and safely. This is most often on the battlefield or other military theater, when users need a highly reliable power source with excellent system availability.

That reliability is backed by our expertise in engineering, system design, and full power integration, providing our customers with the exact solutions they need for power generation, power distribution, and energy management.

---

## DFND

DFND graduated compression was developed for the sole purpose of reducing Musculoskeletal injuries and speeding up recovery for the Men and Women serving in the United States of America Military.

---

## Disaster Management Systems, Inc.

DMS is the nation's leading provider of ICS / NIMS products for Fire Departments, EMS Agencies, hospitals, schools, and law enforcement. Our nationally adopted process for MCI management (EMT3 System) helps ensure proper patient Triage, Treatment, and Transport during an MCI. We offer a wide range of disaster preparedness solutions, from our All Risk® START and SALT triage tags to our Evac123 patient evacuation system and tabletop training kits. All of our disaster management product solutions are proven to help first responders and first receivers stay prepared and save lives.

---

## Domo Tactical Communications (DTC)

Domo Tactical Communications (DTC) is pleased to announce that we have formed a partnership with TrellisWare Technologies. The partnership will provide the U.S. Military, coalition partners, and commercial customers with unmatched flexibility through a multiple waveform radio that allows the user to select between DTC's MeshUltra or TrellisWare's TSM waveform based on their specific purpose and/or region. This collaborative product will enable users to have a common hardware platform for software defined radios which reduces the proprietary lock-in currently experienced by the commercial, U.S. Military, and coalition communications community. We believe this collaboration will expand our reach not only within the U.S. Military but across the coalition, and commercial market spaces as well.

---

## Draeger Safety

Draeger's moto is "Technology for Life", manufacturing technology to detect atmospheric threats, and systems to protect against those threats. A global, yet family-owned business, Draeger has been operation for 135 years, and

# EXHIBITOR INFORMATION

operating its USA based Draeger Safey, Inc for over 100 years. Dräger is a truly global leader in portable electronic gas detection, manual and automated colorimetric gas detection, SCBAs, CCBA rebreathers, APR/PAPR, PPE and law enforcement drug and alcohol testing.

## DroneShield

DroneShield offers versatile solutions, from comprehensive C-UAS (Counter-UAS) to maximizing the performance of currently deployed third-party sensors. We provide mission essential capabilities with our Artificial Intelligence-based sensor fusion and signal processing. Our sensors, effectors, and AI/ML (Artificial Intelligence/Machine Learning) can be integrated into our own Command-and-Control solution or fully interoperable with third-party platforms for both Government and commercial systems.

## DualDraw Mail Screening Solutions

DualDraw's market-leading Mail Screening Products & Services help protect facilities and personnel from dangerous mail and costly business disruptions. Since shortly after the deadly anthrax attacks in September 2001, their HEPA-filtered downdraft Mail Screening Systems have been used daily by organizations concerned about the safety of their incoming mail. The Mail Screening System comes with multiple CBRNE detection integration options including the MX908. All screening system designs use DualDraw's patent protected symmetrical airflow design. DualDraw also provides specialized outsourced mail screening services for high risk organizations. These are performed using best-practices as adopted from 41 CFR 102.192§70-80 and The Department of Homeland Security Best Practices for Mail Screening and Handling Processes. Product and service offerings are available through GSA Advantage for government customers. Contact us directly at 1-800-977-2125 or visit our website at [www.DualDraw.com](http://www.DualDraw.com).

## Eastern Communications

Over the last six decades, Eastern Communications has evolved from a local spectrum manager to one of the largest mission critical communications technology providers in the United States. With our headquarters in New York City complemented by a national physical presence, our customer-centric operating model, highly specialized technical expertise, allows us to delivery critical communications solutions.

## Echodyne

Echodyne is a U.S. designer and manufacturer of advanced radar solutions for government and homeland security applications. The company's proprietary metamaterials electronically scanned array (MESA®) architecture is a rare breakthrough in advanced radar engineering, leveraging an innovative physics-design approach, Echodyne's MESA radars use standard materials and manufacturing processes to shatter unit cost barriers for high performance radar. The result is a solid-state, low-SWaP, exportable, commercial radar with advanced software capabilities that delivers superior performance, unparalleled data integrity, and exceptional situational awareness. With leading positions in counter-drone, border security, public safety, and VIP asset security, security companies and governmental agencies rely on Echodyne radar for extraordinary accuracy and consistent, reliable operation. For more information, please visit: [Echodyne.com](http://Echodyne.com).

## Field Forensics Inc & FFI Tactical

Essendant is a purpose-driven company that reaches beyond business goals to define its success. We support our associates, customers and communities – and our values shape all we do. We are committed to doing what's right in all situations for all stakeholders.

## First Line Technology

Field Forensics, Inc. (FFI), established in 2001, is a US manufacturer and distributor of chemical detection and identification kits as well as specialist tactical equipment for EOD, search and security. FFI manufactures chemical detection and identification kits for explosives, HME precursors, narcotics - including unique fentanyl identification, CWA and BWA. Product lines include ELITE™, IDEX™, ULTRA™, DABIT™, Fen-Her™, BioScreener™ and CHAMP™ and the new explosives detection disc, EZK™. FFI Tactical offers constant potential x-ray generators and systems, IED recoilless disruptors, rocket wrenches, detonator containers, firing systems and a medium velocity breaching grenade.

# EXHIBITOR INFORMATION

---

## First Line Technology

First Line Technology is a lead manufacturer of disaster response and emergency management equipment cultivated through lab to life-saving technologies. With solutions for multi-patient transport, personal cooling, decontamination, and first responder training, First Line Technology offers all tools necessary for a variety of response missions.

DeconTect, First Line Technology's suite of decontamination solutions, offers an array of kits, sprayers, and detectors that are used to achieve successful decon of a variety of known and emerging threats. Using tools like FiberTect and Dahlgren Decon, the responder can achieve what is known as Hybrid Decon - a term coined based off the BAR (Blot-Apply-Remove) Method that is faster and produces less waste than traditional decontamination tactics. The Enhanced Decontamination System (EDS) has the capability to replace full-scale shower and pool decontamination lines while packed in one, two, or three discreet duffle bags for easy logistics. For mass casualty incidents that require victim decontamination, the Modular Decon Kit (MDK) is available with directional Dry Decon pop-ups so that responders can focus on red and yellow patients while green may conduct self decon with minimal instruction.

First Line Technology's training division known as the First Line Utilization Academy (FLUA) offers a variety of training opportunities tailored specifically to your industry. Whether you're facing fentanyl, CWAs, or the unknown, FLUA instructors are ready to share best-practices and new methodologies with you and your team."

---

## Forcible Entry Inc

Providing the Most Realistic, Durable, Versatile Training Props and Infrastructure for Fire, Law Enforcement, Military, and Federal Agencies since 2010.

---

## FoxFury

FoxFury manufactures premium application-specific products, with a focus on premium, portable LED lighting. FoxFury products are designed to outperform in the most demanding environments (including temperature extremes, water submersion, pressure, shock, impact, etc.). Law enforcement, military, firefighters, rescue crews, forensic investigators, industrial and media professionals have come to rely on FoxFury products with a high level of expectation.

---

## Galvion

Galvion exists to empower military and tactical missions around the world. Our Armor, and Active Power and Data Systems divisions work independently as well as collaboratively to design, develop and deliver integrated, purpose-built solutions that enhance the agility and survivability of the modern warfighter and other demanding end-users.

---

## Gentex Corporation / Ops-Core

Part of Gentex Corporation's portfolio for defense, emergency response, and security forces, the focus and dedication of the company's Ops-Core brand remains the same - protecting elite forces. The modular, scalable, open-architecture design of Ops-Core products allows for seamless integration and true system level performance.

---

## Gerber Gear

Founded in 1939 and based in Portland, Oregon, USA, Gerber is an American brand whose products have global reach and relevance. Carried extensively by hunters, soldiers and tradesmen, Gerber's heritage runs deep. And we are now looking toward the future, where tomorrow's problems will be solved by the next generation of innovations.

All Gerber products are designed and engineered in Portland, OR where many are produced. We also tap our global supply chain to create a wide range of activity specific gear for wide variety of consumers. And no matter what, every product that bears the Gerber name is backed by our famous lifetime warranty.

Quality, reliability, innovation. For over 70 years this is what our customers have expected from us. And whether our products are used to save time, save the day, or save a life, Gerber always delivers."

## Getac

Getac Technology Corporation is a global leader in rugged mobile technology and intelligent video solutions, including laptops, tablets, software, body-worn cameras, in-car video, interview rooms, and evidence management software. Getac's solutions and services enable the vital work done by frontline workers operating in the world's most challenging environments.

## GH Armor

GH Armor is a leading provider of high-performance protective solutions to the military, federal and law enforcement communities. With more than 30 years of experience, GH offers a comprehensive portfolio of advanced armor solutions that includes concealable, tactical and correctional products designed for superior wearability and protection. All GH Armor products are precision engineered to meet the highest industry standards for quality, reliability and safety.

## Global Industrial

At Global Industrial, we operate with one singular mission: to help your facility run like a well-oiled machine. Over 70 years of industrial-strength know-how is built into each one of our million-plus products, helping us pave the way as an industry leader for schools, small business reseller partners, and government institutions — including tribal government — across North America. From material handling to janitorial and maintenance solutions, along with our line of Global Industrial Exclusive Brands, "We can supply that." is at the heart of everything we do. Every time your business does business with us. Need the right partner for the here and now? We can supply that.

## GNB Global Inc.

GNB Global manufactures a cost-effective selection of tension fabric buildings designed for a variety of military uses. Tension fabric buildings provide ample clear span space, natural ambient light, and a variety of foundation options. Our military grade galvanized steel frames and highly engineered membranes are guaranteed to provide years of service and are ideal for flight line shelters, aircraft hangars, large area maintenance shelters (LAMS), and aircraft protective equipment (APE's). With a competitive cost per square foot, quick delivery, and easy installation GNB is ready to help you get the perfect building to suit your needs.

## Gulf Coast Wolverine

DOD provider for the Multi-Purpose Expeditionary Platform (MPEP)

## Hallowell

Hallowell is a leading manufacturer and supplier of industrial storage solutions, offering a wide variety of lockers, cabinets, shelving, and workbenches. With nationwide distribution centers and thousands of stock products ready to ship, Hallowell is your one-stop shop for all your industrial storage needs.

## High Ground Gear

History is more than a culmination of battles decided by superior numbers. History is a biography of advantage - in weapons, in logistics, in technology, and even in terrain. For us, High Ground products and design methodology represents THE advantage.

Located in Philadelphia, the birthplace of our Nation, High Ground is the Tactical Systems Division of Ehmke Manufacturing which has been manufacturing quality products for the Aerospace, Defense, Industrial & Commercial Markets since 1929.

## Highcom Armor

We are in business to save lives. As a global provider of body armor and ballistic resistant products; we design, develop, test, manufacture, and distribute dozens of National Institute of Justice (NIJ) compliant hard and soft armor products as well as other high-quality ballistic protective gear. Thousands of customers from the United States Military and Law Enforcement communities to governments and agencies around the globe have come to depend on our advanced ballistic armor manufacturing processes.

---

## Holmatro, Inc

Holmatro equipment and system solutions are predominantly used in rescue and special tactics applications around the world. These types of applications demand reliable and safe tools under all circumstances. To make sure that our users can fulfill their specialized tasks, we strive to be the best-in-class industry market leader by using game changing technology. Founded in 1967, Holmatro is a leading privately owned global supplier of hydraulic equipment and services. The Holmatro Group consists of divisions located in the Netherlands, USA and China. Besides our three headquarters our brand is represented in more than 160 countries by our extensive global sales and service network, consisting of more than 400 active authorized business partners. This makes us the single biggest global supplier for innovative high-pressure hydraulic tools. Our full-fledged highly automated and state-of-the-art manufacturing facilities are located in the Netherlands and in the USA.

---

## Honeywell Sensing & Safety Technologies

Honeywell Safety and Productivity Solutions (SPS) provides products, software and connected solutions that improve productivity, workplace safety and asset performance for our customers across the globe. We deliver on this promise through industry-leading mobile devices, software, cloud technology and automation solutions, the broadest range of personal protective equipment and gas detection technology, and custom-engineered sensors, switches, and controls.

---

## INVISIO

INVISIO offers cutting-edge personal communication and hearing protection systems. The systems enable users to operate and communicate safely and clearly in all environments, even under extreme conditions. INVISIO systems consist of headsets and advanced control units that interface to a wide range of communication devices. The systems provide hearing protection while maintaining the natural level of situational awareness.

---

## Kagwerks

Käggerwerks is a veteran-owned company comprised of former operators, design engineers, and business leaders with decades of professional experience from the respective domains. We are united in our shared experiences on the battlefield, passion for technology and innovation, and a shared desire to empower those who now serve on the frontlines in defense of our nation - so that they would always have a tactical advantage.

---

## Kipper Tool Company

Kipper Tool Company (KTC) is a certified Woman Owned Small Business with a corporate office and warehouse facility in Gainesville, Georgia.

Established in 1994, KTC is an authorized distributor for over 2,300 tool and industrial supply manufacturers. KTC has been assisting the U.S. military transform and modernize to meet their critical requirements both domestically and overseas for over 25 years. As an industry leader in designing and fabricating tool system solutions, KTC provides custom tool solutions for aviation, construction, MRO, and power generation.

Today the core of KTC business, and the area in which we are most proud, is our support to the Soldiers, Sailors, Marines and Airmen of our United States Armed Forces.

---

## Kontek Industries

Kontek Industries is a global leader in tested security and defense solutions, offering a vast array of blast, ballistic, force protection, tactical, and training solutions. Kontek provides some of the most advanced security and defense solutions to protect personnel, equipment, and the world's critical infrastructure.

---

## Leatherman Tool Group, Inc.

From Tim's first prototype to our latest multi-tool innovation, we've been building our tools in Portland, Oregon. And when it's time to put our tools through their paces, we test them in the great Pacific Northwest. From hiking in the rugged Cascade Mountains, fishing off of the beautiful Oregon coast, or exploring the high desert in the east, we ensure our tools are reliable for any adventure or task, big or small. We invite you to try our tools for yourself, or read people's stories of saving the day with quick thinking, their own two hands, and a Leatherman.

---

## LEGEND® Compression Tactical

LEGEND® Compression Tactical is a NC company located in the heart of the textile mill industry. Our mission is to extend the life of your legs through graduated compression. Our socks are SKILCRAFT® Labeled and NTOA member tested and recommended. We are a proud supporter of Law Enforcement. We offer a complete line of LEGEND® Compression Merino Wool and Moisture Wicking Nylon Tactical Boot Socks for all temperatures and weather conditions. These socks utilize graduated compression to reduce foot fatigue & currently worn by all branches of the Military including Special Operations.

Designed for our American LEGENDs. We offer All-Weather, Cold-Weather and Warm-Weather Socks. Made in the USA. LEGEND Compression Tactical Socks are durable, odor resistant and use terry loop cushion for maximum comfort and performance. Our Wool Socks are USAF Certified No Melt No Drip/FR; Authorized Safe to Fly. Try our LEGEND® (Warm Weather) Compression Tactical Boot Socks: These tropical socks have cushioned through-out, use moisture wicking nylon and are extremely comfortable. You'll love the softness! New: Our popular LEGEND (All-Weather) Compression Merino Wool Tactical Boot Socks are now available in Over-the-Calf (OTC) providing extended support and comfort for our warfighters. Stop by and take a look.

## Leidos

Leidos is making travel and trade safer, healthier, and more efficient through fully integrated global security technologies. Our comprehensive security detection portfolio has more than 30,000 products deployed across 129 countries. We deliver security systems that are fast, frictionless, and fully integrated.

## LION

LION is big enough to deliver on the largest contracts but small enough to care that every emergency responder and firefighter that uses our equipment gets the features they need to be safe and successful on every call. LION is the largest provider of training equipment and facilities for first responders, having built the last three largest first responder training facilities in the world.

## MASSIF

Massif's passion is to design and create advanced technical apparel that protects the United States Military and those working in the world's most challenging environments.

## Master Lock Company

For over 100 years, Master Lock has been recognized around the world as the authentic, enduring name in padlocks and security products. Master Lock offers a broad range of innovative security and safety solutions for consumer, commercial, and industrial end-users.

## McQ Inc

Headquartered in Fredericksburg, Virginia, USA, McQ is a sensor solutions company. We develop and manufacture state of the art surveillance and communications equipment for mission critical applications in commercial security, law enforcement, and defense. McQ has delivered advanced intelligence, surveillance, and reconnaissance solutions to the Department of Defense for nearly forty years with products deployed worldwide and in every combatant command. McQ is a Non-Traditional Defense Contractor and is ISO 9001:2015 Registered. Please visit [www.mcqinc.com](http://www.mcqinc.com)

## Mirion Technologies

At Mirion Technologies, we partner with industry leaders to advance radiation safety and empower the next wave of critical innovation. From detection and measurement to monitoring and analysis, we empower innovators across industries — in leading-edge R&D labs, critical nuclear facilities, and on the front lines — with radiation safety technologies that operate with the highest levels of precision. We partner with our customers to build solutions that deliver complete confidence in safe operations and harness the transformative power of safe radiation to move our world forward. Learn more: [mirion.com](http://mirion.com).

---

## Momar, Inc

Momar, Incorporated is a manufacturer and provider of general maintenance, environmental, safety, and sanitation solutions. Founded in Atlanta, Georgia, in 1947, our family-owned and operated company has grown from a cleaning chemical manufacturer of just over 150 products to a dynamic industrial solutions provider with thousands of products, systems, and services. Through our nine divisions and affiliated companies, we provide our customers with virtually every product or service available in the areas of maintenance, lubrication, water and waste water treatment, food processing chemicals, mineral handling solutions, specialty hardware, industrial safety, and expert application services. Our total solutions approach helps our customers consolidate vendors, reduce costs, and ensure the highest quality products in all applications.

---

## Motorola Solutions

Motorola Solutions helps your teams keep pace with the rapid changes in your mission critical technology ecosystem. Our technology breaks down communication and operational technology barriers to ensure information is transmitted to the right person, at the right time, in the right place. With breakthrough communications, video and software solutions ideal for solving today's installation security and tactical operations challenges, we help you identify threats and securely share critical information faster, for better outcomes. We have manufactured over 50 mission critical technologies that are Federal Information Processing Standards (FIPS) certified. We have video and communications solutions on the Department of Defense Information Network (DoDIN) Approved Products List and keep you in compliance with the National Defense Authorization Act (NDAA). Our secure mobile solutions meet NSA's Commercial Solutions for Classified (CSfC) program standards and new Smart Radio, APX NEXT, is FedRAMP authorized for Impact Level 5 (IL5) and compatible with U.S. Federal's Android Team Awareness Kit (ATAK).

---

## MSA

Established in 1914, MSA Safety Incorporated is the global leader in the development, manufacture and supply of safety products that protect people and facility infrastructures. Many MSA products integrate a combination of electronics, mechanical systems and advanced materials to protect users against hazardous or life-threatening situations. The company's comprehensive product line is used by workers around the world in a broad range of markets, including the oil, gas and petrochemical industry, the fire service, the construction industry, mining and the military. MSA's core products include self-contained breathing apparatus, fixed gas and flame detection systems, portable gas detection instruments, industrial head protection products, fire and rescue helmets, and fall protection devices.

---

## N-Vision optics

N-Vision Optics specializes in the design, manufacturing, and distribution of night vision and thermal imaging products. Founded in 2003, with thousands of units currently in use around the globe, N-Vision Optics has established itself as a well-known global resource in the defense and hunting markets.

---

## New Pig

We have an odd name and create award-winning PIG® brand products that help workplaces around the world stay clean, safe, and productive. We offer the world's largest selection of contained absorbents: absorbent mats, socks, booms, pillows, and pans. We also carry well-known, proven products for material handling, personal protection, spill response, liquid filtration, maintenance, industrial wipers, and workplace safety.

---

## Night Vision Devices

Night Vision Devices, Inc. (NVD) is the source for the highest quality US manufactured night vision binoculars, monoculars, weapon sights, night vision parts and service in the industry. Incorporated in 2005, NVD is a U.S. Veteran Owned Small Business that prides itself on being a premier manufacturer and tactical integrator of night vision binoculars, monoculars and weapon sights which are built to full MIL SPEC qualifications. NVD is currently the third largest system manufacturer of Image Intensified (I2) night vision systems in the United States. Our highly skilled staff is made up of a team of individuals with more than 200+ years of industry experience, who can repair and service almost any US manufactured night vision system ever purchased by the US DOD.

---

## NOBLE

### NOBLE IS YOUR TRUSTED PARTNER IN READINESS

NOBLE provides global sustainment and operations support for the U.S. Military and civilian government agencies with an unparalleled range of mission-critical products and services. Our supply chain contains over 15,000 suppliers and millions of products. We offer top brands and cutting-edge technologies to assist with your equipment's total life-cycle sustainment. NOBLE's integrated 150 contract vehicles offer a single-source procurement solution for government. Our process ensures compliance, saves time and money, and quickly gets products to end users to support their mission.

## Orange Photonics

LightLab 3, by Orange Photonics, is the field-deployable cannabis testing solution trusted by state, local, and federal agencies across the United States. The ruggedized and easy-to-use, LightLab 3 provides real-time presumptive and quantitative analysis of cannabis plants and products including vape cartridges, gummies, and beverages. Each SOP-guided test generates an indelible certificate of analysis and chromatogram to inform warrant execution, accompanying evidence, and forensic laboratory comparison. LightLab 3 has established court precedent and is the go-to solution within the enforcement community. Basic and advanced user training is available.

## Orbit Communication Systems Inc.

Orbit Communication Systems., a global leader in the field of airborne communications, satellite tracking, maritime services, ground-station technology, and cutting-edge solutions for the new space era, is revolutionizing the way we connect with the world. Our state-of-the-art systems are found on an extensive range of platforms, from mission aircraft and trainers to rotary-wing aircraft, transport vessels, tankers, and jet fighters. We also extend our reach to cruise ships, naval vessels, ground stations, and offshore platforms. The company's operations, including production, marketing, sales, and customer service, span the globe, encompassing the US, Europe, and the Far East.

## ORTEC - AMETEK

ORTEC will be showing the Detective X and RadEAGLET-R radioisotope identifiers. ORTEC Detective models are the standard devices used by Customs, Defense, Intelligence, state and local agencies in the US and around the world. ORTEC will show the GRACE Gamma Ray Analysis of Chemicals and Explosives system. This system is light, portable, easy to set up and deploy. GRACE analyzes and provides on-site identification of the chemical contents inside munitions or other unopened containers.

## P2 Mission Solutions

P2 Mission Solutions is a woman owned small business focused on world class tactical systems, hosting a multidisciplinary engineering team focused on creating solutions to our customer's toughest challenges – quickly moving from idea to full rate production to support your demanding mission

## Panasonic Connect

Panasonic Connect engineers mobile solutions for workers who face unforgiving environments where failure has real consequences. Thousands of organizations rely on TOUGHBOOK laptops, 2-in-1s, tablets and handhelds every day. Among them are first responders, military, enterprise, utilities and field service companies that need rugged devices that can stand up to rain, snow, dust, accidental drops and more. Panasonic's purpose-built solutions boast durability, long battery life, reliable connectivity, low failures rates, industry-leading service and support, and low total cost of ownership (TCO). As a result, Panasonic Connect keeps winning over the world's toughest customers.

## Peke Safety LLC

Peke Safety LLC is a privately-owned Limited Liability Company registered in the State of Florida with over 150 years combined experience in the health and safety industry. We distribute and develop respirators, personal protective equipment, decontamination systems, cooling equipment, and patient isolation equipment as well as provide disaster response planning and product training to both government and private clients domestically and internationally.

---

## PepperBall

PepperBall is a leading provider of non-lethal solutions for law enforcement, offering a versatile product range that ensures safety and effectiveness. From daily patrol to corrections, to crowd control and beyond, implementing the non-lethal PepperBall system can decrease fatal responses and shorten resolution time - freeing up much needed policing resources. With the most accurate projectile design and a variety of launchers, PepperBall leads the way in helping reduce operational risk and changing suspect or assailant behavior.

---

## Pixels On Target

Pixels on Target is passionate about delivering the most advanced family of thermal optic products. We design every system using the latest, most disruptive technologies to deliver unrivaled overmatch capabilities to those who defend our freedom.

---

## Portacool, LLC

Portacool™ portable evaporative coolers entered the marketplace in 1990 offering the first version of an evaporative cooler designed to provide economical, effective cooling where ever it was needed. Thirty years later, the company's consistent growth rate and continued expansion in product lines has positioned it as a global leader in the portable evaporative cooling business with distributors in 50 U.S. states and 56 countries. Portacool, LLC selected Center, Texas, for its location in the beginning and has never considered moving. Nestled in the beautiful piney woods of East Texas — 150 miles southeast of Dallas, 120 miles northeast of Houston and 17 miles west of the Louisiana border — this small town still maintains the look, feel and hospitality of the original community. However, the town has enjoyed modernization due in large part to the manufacturing and technological advances of companies like Portacool choosing Center as their location. Portacool portable evaporative coolers have proven highly effective in unlimited uses ranging from agricultural and horticultural applications, manufacturing, industrial, business, entertainment, sports, home, and hobby — anywhere cooling is needed and traditional air conditioning is impractical or cost prohibitive. With a strong network of distributors, Portacool, LLC continues to expand its worldwide market horizons and produce outstanding sales revenues, all from the beautiful setting of Center, Texas.

---

## PPG Industries

PPG Industries is the largest coatings company in the world and has provided our products to the U.S. government for decades.

---

## Princeton Tec

Manufacturers of the finest personal lighting and proudly made in the USA.

---

## ProKlean Services

A Manufacturing and Distribution Leader of Chemical Solutions and Air Quality Enhancement across collective channels. Our Mission is to provide high-performance products, solutions, and services to our customers while continuing to add value to their industries. Surface and Air Quality Experts Revolutionizing Klean one day at a time

---

## PyroCom Systems

Established in 1997, PyroCom Systems has more than 26 years experience in the Fire and Security market. Known as the "go to" company amongst the General Contractors and Electricals in the area, PyroCom has built a reputation as the strongest subcontractor in the Southwest Region when it comes to Fire and Security system installations. PyroCom has installed hundreds of systems across a wide range of industries to include: Manufacturing, Industrial, Commercial, Retail, Military, Federal, State and Local Government, and School Districts. We are a full systems integrator offering our customers not only system design, but installation, integration and consulting in addition to maintenance and monitoring services.

---

## Rapiscan

Rapiscan Systems is a leading supplier of screening solutions that help military organizations, governments, corporations, and law enforcement combat terrorism, drug and weapons smuggling, and illegal immigration with speed and confidence while maximizing operational efficiency. Our products utilize multiple inspection technologies

---

and advanced threat identification algorithms for cargo and vehicle inspection, radiation detection, explosive and narcotics trace detection, baggage and parcel inspection, and hold baggage and people screening. Our broad array of scanning systems leverages X-ray imaging technology to help find threats and contraband with ease and confidence. Advanced radiation detection technology accurately detects, identifies, and locates gamma and/or neutron sources and our optical inspection and recognition technologies assist with facial detection, recognition, license plate decoding, vehicle classification, and undercarriage foreign object detection.

---

## Redara Labs

Redara Labs is a leading robotics developer and systems integrator offering fast turnkey development of hardware and software solutions for the military and commercial sectors. For over a decade, we've been at the forefront of developing solutions that drive autonomy, tackling challenging robotic problems. Our systems allow for autonomous navigation in GPS denied environments, while our multi-spectral sensing capabilities assist in the precise identification and localization of assets, aiding operators in finding objects of interest in various environments. Our modular mission payloads are a testament to innovative engineering, enhancing inspection capabilities through advanced camera and processing systems. With a vertically integrated company structure, our in-house teams ensure a seamless transition from concept to functional solutions, showcasing our commitment to providing tailored, efficient robotic solutions to our clients.

---

## RedWave Technology

RedWave Technology is at the forefront of innovation in portable chemical threat identification for emergency and military use. Our sole focus is giving first responders across our nation and around the world the high-performing tools they need to fulfill their mission of keeping our communities safe from chemical threats. Our tools powered by FTIR provide next-level portable performance to suit the needs of your mission. From continuous, real-time monitoring of gases and vapors to the chemical identification of bulk solids and liquids, we have the right tool to keep you, your team, and your community safe.

---

## Revision Military

Revision is the proven supplier of military protective eyewear to NATO forces around the globe. Every product is built to solve a problem, resolve an issue, and enhance your performance. We have a state-of-the-art manufacturing clean room which houses North America's premier lens molding equipment & coating line, and our employees assemble 100% of all our eyewear. We strive daily to provide the best protection to those who serve and protect all of us here at home and abroad.

---

## RideNow Powersports

RideNow, a RumbleOn company, is one of the largest dealership groups in the country with more than 55 convenient stores across the United States. We are proud to have over 21,080 new and pre-owned motorcycles, ATVs, personal watercraft, and more, along with the largest selection of brand manufacturers. Since 1983, we have been leading the community to bring quality vehicles, expert service, and innovative ideas to adventurers everywhere. RideNow Powersports is your one-stop shop for all your powersports needs. We strive to give our customers a convenient, stress-free experience in sales, service, parts and merchandise. Visit us today and see what we can do for you!

---

## Rigaku Analytical Devices

Rigaku Analytical Devices is a pioneer in handheld 1064nm Raman technology for the identification of unknown chemicals and CBRNe threats. Approved by the U.S. DoD JPEO DR SKO Program, the Rigaku portfolio of analyzers overcome fluorescence issues, providing results in less than 1 minute, the ability to scan dirty or colored substances, and the capability to scan through packaging.

---

## Riveer

Corrosion Mitigation through wash and rinse system. Aircraft and vehicle wash and rinse systems specifically designed for critical issues of retrograde wash down, maintenance and corrosion mitigation.

---

## Ryvid, Inc.

Ryvid is a cutting-edge manufacturing corporation in the high-growth field of Electric Light Vehicles. Founded by enthusiasts, engineered by innovators, and designed by aerospace industry gearheads, Ryvid's mission is to create more sustainable and enjoyable personal mobility. The company name was derived by the merging of Rhythm and Avid; elements of motion and emotion that define the experience of using our products. With its first product – the Anthem – Ryvid produced a revolutionary, lightweight, affordable electric motorcycle with a significantly lower carbon footprint than its competitors. With the same innovation to be applied to upcoming models and variants, Ryvid is poised to revolutionize urban commuting. Ryvid products are designed and assembled in the United States. For further information, please visit [ryvid.com](http://ryvid.com)

---

## S.A.F.E. Structure Designs

Safe Structure Designs (S.A.F.E.) is a global leader in the design, engineering, and manufacturing of ergonomic safety equipment for a variety of industries, including aviation, marine, railroad, heavy equipment, and industrial. SAFE provides customized solutions for just about any project and we do on charge NRE for our custom design work.

---

## Safran Optics 1

Safran Optics 1 is a global leader in full-service design and production of electro-optic and navigation systems. Leveraging core competencies in defense technologies, Optics 1 provides unmatched, first-class mission solutions for military and law enforcement personnel. The company also offers solutions for commercial, aerospace, industrial, medical and research industries. Optics 1's product portfolio includes devices and modules for surveillance and reconnaissance missions for dismounted soldier, airborne, naval and land vehicle operations. Optics 1 designs, develops, and manufactures products at its headquarters in Bedford, New Hampshire. The company also has additional research and development and engineering capabilities in Simi Valley and Costa Mesa, California. As part of the Safran Group, Optics 1 is also proud to provide capabilities from Safran Vectronix and Safran Electronics and Defense.

---

## SEER Technology

SEER is focused on delivering products that will identify threats and help protect personnel from harm. Five basic attributes have guided the development of SEER products: (1) Low Cost (2) High Performance (3) Portability (4) Ease of use (5) Accuracy and reliability. These attributes will allow SEER products to be available and used by a broad customer base.

---

## Serstech

Serstech offers the Arx™ handheld Raman spectrometer for rapid chemical identification. The Arx™ system includes the SharpEye™ auto-focussing system as well as Serstech's unique Surface Enhanced Raman Spectroscopy (SERS) attachment.

---

## Shaw Concepts

Premium Tactical Nylon Gear

---

## SIG SAUER

SIG SAUER, Inc. is a leading provider and manufacturer of firearms, electro-optics, ammunition, airguns, suppressors, and training. For over 250 years SIG SAUER, Inc. has evolved, and thrived, by blending American ingenuity, German engineering, and Swiss precision. Today, SIG SAUER is synonymous with industry-leading quality and innovation which has made it the brand of choice amongst the U.S. Military, the global defense community, law enforcement, competitive shooters, hunters, and responsible citizens. Additionally, SIG SAUER is the premier provider of elite firearms instruction and tactical training at the SIG SAUER Academy.

---

## Sigma Defense Systems

Sigma Defense Systems is a leading technology company serving the Department of Defense (DoD), providing tactical communications systems and services for digital modernization since 2006. Our software-focused approach to tactical communications accelerates information collection and sharing for faster decision making and better mission outcomes. Customers turn to Sigma Defense for engineering, program management, and data

---

# EXHIBITOR INFORMATION

logistics services for technical solutions that encompass ground, air, and space-based systems and sensors and network and satellite communications. Sigma is headquartered in Perry, GA with satellite offices both CONUS and OCONUS.

## Silvus Technologies

As the world's leading developer of tactical MANET communication systems, Silvus is reshaping mesh network technology for mission-critical applications on the ground, in the air, and at sea. Silvus StreamCaster MANET radios provide assured voice, high-fidelity video, PLI & IP data comms with class-leading power, range and mobility. At the heart of every StreamCaster MANET radio is Silvus' proprietary MN-MIMO waveform that creates a self-forming, self-healing & adaptive mesh network – capable of linking hundreds of nodes with unmatched range, throughput, EW resiliency & scalability. Available for integration into the MN-MIMO waveform is Spectrum Dominance - an expansive suite of LPI/LPD and Anti-Jamming capabilities that provide secure and EW resilient mesh network communications in congested & contested environments. With a focus on innovating comms technology for the tactical edge, Silvus is delivering decision dominance to the warfighter, to achieve overmatch across the spectrum domain.

## SIMUNITION

Simunition is the world leader in providing military, law enforcement and approved commercial ranges with the most realistic, non-lethal and non-toxic ammunition and training.

## SKB Corporation

Established in 1977, SKB Corporation (aka SKB Cases) is a privately-owned, industry-leading manufacturer of plastic protective cases. Its offerings include more than 65 standalone sizes of injection molded cases, more than 45 sizes of roto-molded cases, and a comprehensive suite of in-house engineering, molding, foam, kitting, and customization capabilities to suit all types of special projects.

## Skyline Software Systems

Leaders in 3D Geospatial Visualization Since 1997 Skyline Software Systems, Inc. headquartered in the US in Herndon, Virginia. As a leading provider of 3D earth visualization software and services, Skyline offers a comprehensive platform of applications, tools, and services that enable the creation and dissemination of interactive, photo-realistic 3D environments. Skyline products are production proven in both the Defense and Commercial markets. A "best of breed" set of tools that remain focused on customer needs including flexibility, efficiency, and robustness.

## SmartRayVision

SmartRayVision is the leader in manufacturing and supporting portable X-Ray systems to assist with the ID and disarming of unknown threats. Our industry leading technology and software make the job easy for professional end users who demand the highest performing portable X-Ray equipment.

## Snap-on Industrial

For over a century, Snap-on has been trusted by professionals in critical industries around the world. From our beginnings in a garage, to the front lines of World War II, to new horizons in space, Snap-on has been a part of both critical jobs, and critical moments in history.

## Solar Stik

Solar Stik manufactures portable expeditionary power solutions for ISR, Force Protection, Force Sustainment, Mission Command, SATCOM, and other weapon systems. Products comprise rugged, scalable, and modular components that allow users to establish a tailored hybrid power system in austere locations using renewable energy to reduce fuel re-supply and generator maintenance, enable self-sufficiency and enhance operational effectiveness. Several configurations of Solar Stik's alternative energy systems have been deployed in support of contingency operations.

## South-Tek Systems

NITROGEN SOLUTIONS THAT ARE READY WHEN YOU ARE

Whether you need high-pressure nitrogen for filling and servicing vehicle tires and suspensions or low-pressure nitrogen for maintaining sights and electro-optic instruments, South-Tek offers self-sustaining military nitrogen

# EXHIBITOR INFORMATION

generators to meet your mission-critical needs. Stand ready with on-premise nitrogen production when it matters most. Since 2006, South-Tek has supplied the U.S. military with nitrogen solutions that withstand the rigors of the armed forces.

---

## Stanley Black and Decker

The world's largest tools and storage company and a world-leading provider of engineered fastening systems.

---

## Streamlight

Streamlight Inc. manufactures a variety of lighting products including rechargeable and standard battery, precision-engineered flashlights, tactical lights, weapon mounted lights, lanterns and accessories for use in military, police, fire & rescue and security applications. Streamlight products are the lights of choice for military and law enforcement markets

---

## Street Smarts VR

At Street Smarts VR, we strive to make the best training technology available to our law enforcement, military, and first responder professionals. Leveraging commercial-off-the-shelf technology, we engineer fully immersive virtual reality scenarios sourced straight from the real world in an expanding scenario library that stays abreast of our users' constantly changing training needs. Our solution is both hyper-realistic, hyper-portable, and capable of deployment at scale across an enterprise, at a fraction of the price of legacy training solutions.

---

## SureWerx

Co-headquartered in Chicago, Illinois and Vancouver, British Columbia, SureWerx is a leading manufacturer of innovative safety, tools and equipment products and solutions. SureWerx markets these products under the Jackson Safety®, Pioneer®, ADA Solutions, PeakWorks®, Sellstrom®, Due North®, K1 Series®, Ranpro®, JET®, Strongarm®, American Forge & Foundry®, ITC® and STARTECH® brands. SureWerx offers unparalleled access to its brands through its partner distributor network servicing most industries worldwide.

---

## Teal Drones

Teal Drones, a subsidiary of Red Cat Holdings, designs and manufactures the Teal 2 sUAS and Teal Air Control (TAC). Both are American-made and developed under strict guidelines that have earned the system a Blue UAS Certification by the U.S. Department of Defense. Equipped with Teledyne FLIR's Hadron 640R sensor, the Teal 2 provides warfighters with the highest resolution thermal imaging in a small (Group 1) form factor and is optimized for nighttime operations. The Teal 2 system's primary application is short-range reconnaissance missions.

To learn more visit: [www.tealdrones.com](http://www.tealdrones.com)

---

## Teledyne FLIR

Teledyne FLIR designs, develops, manufactures, markets, and distributes technologies that enhance perception and awareness. We bring innovative sensing solutions into daily life through our thermal imaging, visible-light imaging, video analytics, measurement and diagnostic, and advanced threat detection systems.

Teledyne FLIR offers a diversified portfolio that serves a number of applications in government & defense, industrial, and commercial markets. Our products help first responders and military personnel protect and save lives, promote efficiency within the trades, and innovate consumer-facing technologies. Teledyne FLIR strives to strengthen public safety and well-being, increase energy and time efficiency, and contribute to healthy and intelligent communities.

---

## Thales Defense & Security, Inc.

Thales delivers innovative solutions to defense, federal, and commercial markets globally ensuring the protection, safety, and security of people and nations on the ground, in the air, and on the seas. We specialize in providing the most capable, reliable, and trusted products and services, enabling our customers to meet their most critical challenges and execute their missions safely and successfully.

## The Skydyne Company

Skydyne is a veteran-owned small business founded in 1953, specializing in designing and manufacturing custom cases and expeditionary products. Using Aluminum, Steel, Carbon Fiber, Fiberglass, and composite materials, Skydyne is capable of manufacturing any case or container in any size or specification. With our understanding of packing and transportation learned over the past 71 years, The Skydyne Company has recently expanded into creating C2 equipment and field furniture that is designed to be used in the most extreme environments. We have developed a line of lightweight, easy-to-use, and highly durable products to make your field experience easier and more organized.

## Thermo Fisher Scientific

Thermo Fisher Scientific Inc. is the world leader in serving science. Our Mission is to enable our customers to make the world healthier, cleaner and safer. Whether our customers are accelerating life sciences research, solving complex analytical challenges, increasing productivity in their laboratories, improving patient health through diagnostics or the development and manufacture of life-changing therapies, we are here to support them.

Our global team delivers an unrivaled combination of innovative technologies, purchasing convenience and pharmaceutical services through our industry-leading brands, including Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific, Unity Lab Services, Patheon and PPD.

## Thin Air Gear

Thin Air Gear is a manufacturer of tactical packs and gear, both Berry Compliant and TAA. We also offer an extensive line of custom products, purpose built.

## Thruvision Inc.

Thruvision is the leading developer, manufacturer and supplier of walk-through security technology. Its technology is deployed in more than 20 countries around the world by government and commercial organisations in a wide range of security situations, where large numbers of people need to be screened quickly, safely and efficiently. Thruvision's patented technology is uniquely capable of detecting concealed objects in real time. The Group's offices are near Oxford and Washington DC.

## Timilon/FAST ACT

FAST-ACT is a revolutionary dry decontamination powder, backed by 25 US patents and 20 international patents, specifically designed for the effective neutralization of CWAs, TICs, TIMs, and Radiological hazards. One of its standout features is the CE approval for skin decontamination, underscoring its distinction in the market. Its adoption is rapidly expanding within the U.S. DoD including Air Force, Navy EOD, Joint Service EOD Schoolhouse, 1st Special Forces Group, 25th Chem (Tech Escort), JPEO (JSOC), ARMY JSEOD, the US Special Operations and Joint Special Operations Commands.

## TRAK Machine Tools

TRAK Machine Tools specializes in engineering, manufacturing, and distributing turning and milling equipment for prototype and production work. Our product lines include TRAK bed and knee mills, lathes, retrofit products and the Toolroom Machining Center - all of which feature the powerful but easy to learn and use ProtoTRAK CNC. This year at NOBLE TR/EX we will be showcasing our new TRAK VMCSi Machining Centers & TRAK TC820si Turning Centers powered by the Siemens SINUMERIK ONE, a powerful production CNC Control.

## Trijicon, Inc.

FOR THOSE WHO DEFEND FREEDOM. AND THOSE WHO ENJOY IT. Trijicon® has led the industry in the development of superior any-light aiming systems since the company's founding in 1981. We are proud to supply the Official Rifle Combat Optic (RCO) and official Squad Common Optic (SCO) of the U.S. Marine Corps (ACOG® and VCOG®), the official USSOCOM Miniature Aiming System Day Optic (RMR®), as well as partnering with government, state and local law enforcement agencies for decades (Night Sights). We are equally as excited, however, to create innovative aiming systems for shooting and hunting enthusiasts around the world. These systems include industry-leading riflescopes, red dot sights, electro optics and iron sights.

# EXHIBITOR INFORMATION

---

## Turtle Fire Systems

The Turtle Fire System was founded in response to the growing concern of electric vehicle fires and the need for a safe and effective water delivery system. Its unique design and operation allows for applications beyond EV fires, such as internal combustion engine fires, cooling fuel storage tanks, deep-seated fires, exposure protection, hazmat incidents and more. The Turtle Fire System is the first full spectrum EV nozzle capable of quickly adapting to the demands of the fireground. Its flow pattern is equipped to accommodate both low- and high-profile vehicles and the flow rate can be adjusted from 150 to 500+ GPM while deployed to address the varying stages of thermal runaway.

---

## Videray Technologies

At Videray, we have created the most powerful, user-friendly, and portable handheld backscatter X-Ray imager in the world. Our innovative technologies allow for quick scanning of surface layers and provide unparalleled high-quality images of potential threats.

---

## Vikela

Vikela is changing the traditional 2D manufacture and design of composites into a world of 3D thinking. We use our patent pending 3D printing technology to create composites with a philosophy based on human-centred design. The first application of our technology is a stab proof protection, which will address the current problems of heavy, uncomfortable armour. Our manufacturing process allows us to produce armour that is stronger, lighter, and more flexible than other products on the market. We can offer bespoke fit as well as replacement plates that will work with existing equipment used. We are also addressing the problem that female armour has been designed to withstand 40% less force than men's armour. We will use our innovative manufacturing process to create flexible armour that will contour to the body shape of female personnel, while providing improved protection which is currently lacking. Vikela's products are also fully recyclable in-house, with more than 97% less carbon emissions than traditional body armour manufacturing.

---

## Vitavox (a Division of Secomak Ltd)

Vitavox design, manufacture and supply loudspeakers, microphones, headsets and intercom systems for International Army and Naval platforms. The company is at the forefront of military and naval communications and has been supplying the defence industry since 1930.

---

## Western Global

Western Global is mission ready, with 60 years of experience innovating and perfecting superior transportable and stationary fuel storage for defense and disaster relief. Our fuel tanks comply with global approvals and safety standards. And all our tanks undergo rigorous testing to withstand extreme conditions. That's why our customers come to us when they need a reliable uninterrupted energy source that refuels and extends runtime on your equipment.

---

## Western Shelter

Western Shelter designs mission-specific solutions that perform day after day in the harshest environments. Western Shelter provides you with the toughest shelters and field support systems available. We design our products to protect you against the world's most demanding conditions while providing a comfortable working environment to ensure the mission gets done. Since 1988, we've provided a diverse series of rigid and inflatable framed shelters in multiple sizes and trim levels to meet the needs of any challenge that may come your way.

---

## Zurn Elkay

Zurn Elkay Water Solutions supplies the industry's widest range of clean water solutions for drinking water, hygiene and sustainable water management. Headquartered in Milwaukee, Wisconsin, Zurn Elkay works with customers around the globe to deliver products and systems that enhance and ensure water quality, safety, hygiene, flow control and conservation.

**GRACES QUARTERS ROAD  
MIDDLE RIVER, MD 21220**

**MORE INFORMATION:  
[NOBLE.COM/INNOVATIONDAY](https://NOBLE.COM/INNOVATIONDAY)**

## **ED ERICSON**

Ed Ericson's background and experience was learned and developed during his 25 years of experience with the Las Vegas Metropolitan Police Dept. During that time, he worked several specialized units which included the Problem Solving Unit, Gang Unit and the most current ARMOR Unit which is investigates and mitigates all crimes associated with CBRNE. During the 16 years assigned to the ARMOR Unit, Mr. Ericson has had the opportunity to be case agent and operator on several high profile, multi-day / multi-jurisdictional incidents. Most notable incidents were a 2008 and 2019 Ricin Incident along with several large explosive related cases.

## **MIKE CASHMAN**

Mike Cashman is a Senior Trainer for Noble, with a specialization in Counter-Drug Training. Previously Mike spent over 20 years with the Drug Enforcement Administration (DEA). Throughout his time with DEA, Mike served as a Clan Lab Coordinator, where he instructed State and Local, Federal and International Law Enforcement, Military, and other Agencies on the dangers of Clandestine Laboratories. As Special Agent, he investigated and dismantled methamphetamine organization, acted as Site Safety Officer in operational methamphetamine labs and assisted other federal, state, and local law enforcement agencies on investigates and laboratories. Mike finished out his career with DEA as Clan Lab Team Leader. Because of his experience and expertise in the field, Mike is a highly requested trainer and guest speaker, presenting for Narcotics, Law Enforcement and HazMat conferences / conventions world-wide over the past 20 years.

## **BRETT BIGGER**

Brett Bigger is a Senior Trainer/SME for Noble with a focus on CBRNE/HazMat Equipment and Response, and Li-ION Battery Response. In addition to training with Noble, Brett has spent the past 24 out of his 25 year career with Renton Fire Department as a HazMat Team leader. Brett serves on the Washington Task Force 1, a FEMA Urban Search and Rescue Team, and is a Plan Team Manager/HazMat Specialist. Brett joined the HazMatIQ (Noble) Training Team in 2014, where he is a lead instructor/SME in Above the Line/Below the Line, First Response Offensive, Air Monitoring, AdvancedIQ, and Custom Scenario Training. Brett is the founder/developer of our Air Monitoring of Flammable Liquids and Crude Oil and newest training program; BatteryIQ: Awareness and Operations Response to Li-ION Battery Emergencies and Crude Oil and newest training program; BatteryIQ: Awareness and Operations Response to Li-ION Battery Emergencies.

## **CRIS AGUIRRE**

Cris Aguirre, co-founder of HazMatIQ, brings 35 years of emergency response experience with Miami Dade Fire and Rescue. As a firefighter and later Lieutenant, he dedicated himself to Hazardous Materials training. Cris, a nationally respected instructor, served on Florida Task Force 1 and responded globally to disasters as a HazMat specialist. Fluent in Spanish, he aided communication with non-English speaking victims. Cris is part of the UN World Health Organization Chemical Safety Program, a member of Latin American Hazardous Materials Instructors, and contributed to the development of the Smart Strip Chemical ID badge. In 2020, he founded BioTechIQ, a risk-based response training program for Biological Agents.

## TOMMY MATHISEN

Tommy is a Senior Trainer with NOBLE, with a specialization in CBRNE Response. In addition to training with NOBLE, Tommy served in the U.S. Army for 20 years, deploying to Afghanistan and Kosovo, before his retirement in 2013. During his time in the Army, Tommy was a trained Master Instructor, with thousands of hours of Advanced CBRNE instruction, both CONUS and OCONUS. As a member of the White House CBRNE Team, Contingency Support Detachment for the Bush Administration, Tommy responded to a variety of challenging missions, including initial sampling, limited decontamination, packaging, escorting, detection, munitions assessment, and explosive threat mitigation. His certifications include; Hazardous Materials (HAZMAT) Technician Certification; ICS 100, 200, 300, 400, 700, 800; HAZWOPER Certification; & Incident Commander (ICS) Certification.

## TROY ARTHUR

Troy has amassed an impressive 31-year career with the Phoenix Fire Department, dedicating a significant 22 years to leading their Hazardous Materials Team and concurrently serving as a Hazardous Materials Technician for 20 years on FEMA's Arizona Task Force 1. In his role as an adjunct professor at Phoenix College, he shared his knowledge through courses on Hazardous Materials, Hydraulics, and Apparatus. Since joining the HMIQ/NOBLE Training Team in 2015, Troy has played a pivotal role as a lead instructor and subject matter expert, specializing in various areas such as First Response Offensive, Air Monitoring, and Natural GasIQ. His certification as an OEM Trainer for RAE Technicians highlights his commitment to excellence in Hazardous Materials Response, making him an invaluable asset to the field.

## JOHN FANSLER

John is a Trainer with NOBLE specializing in communication. He currently holds the position of Communication Systems Manager at the Nevada Division of Emergency Management. With a distinguished military career spanning over twenty years, John brings extensive experience from his service in both the Air Force and the Army. John retired in August 2022 at the rank of First Sergeant and continues to contribute his expertise to the State of Nevada. John earned a Bachelor of Science in Information Cyber Security from the American Military University. His academic achievements are complemented by a suite of cyber certifications, HAZMAT/CBRN qualifications, leadership courses, and military awards, which collectively underscore his diverse expertise.

## NOBLE BOOTH: 123

**THURSDAY, FEBRUARY 22**

**3:00 PM - 5:00 PM**

---

### **RAE Technician Certification Training**

**Wednesday, February 21 | 9:00 AM - 4:45 PM | Riverview 4**

This course offers intensive, hands-on, service technician training to end-users of Area Rae and Multi-Rae family Instruments. Attendees learn to set up, configure and test RAE Systems by Honeywell equipment, run diagnostics, calibrate and repair or replace pumps, sensors, lamps and other components. Students will be taught: Sensor Theory » Basic Operation Training » Advanced Operation Training » Battery Replacement » Pump rebuild/Replacement » Calibration Techniques » ProRae Studio II -Firmware upgrades, data download, and calibration reports » RMA documentation » Diagnostics » Instrument troubleshooting » PID cleaning and lamp replacement » Sensor replacement. Students who complete an exit exam with 80% will receive a Rae Systems by Honeywell Portable Instrument Technician 1 Certificate, valid for 2 years.

---

### **HazMatIQ: Above the Line/Below the Line**

**Wednesday, February 21 | 9:00 AM - 10:30 AM | Riverview 1**

Developed by responders, for responders, this is the foundational, patented system that started it all – This one-day class, taught in a straight forward easy to understand methodology, takes the typically complex world of Hazardous materials and simplifies it for street level responder. Each participant receives a set of laminated Above the Line/Below® charts which allows them to efficiently size-up any chemical in minutes, determining the hazards, meters and PPE required.

---

### **BatteryIQ: Awareness & Operational Response to Lithium-ION Battery Incidents**

**Wednesday, February 21 | 9:00 AM - 10:30 AM | Riverview 2**

BatteryIQ provides students with a simplified system to understand, identify, respond, and mitigate to lithium-ion battery incidents, covering everything from cellphones and electric scooters/bikes to electric vehicle fires and energy storage system failures. Students will be provided with Battery Response Guides that allow them to quickly, effectively, and efficiently categorize battery-related emergencies based on battery type and failure stage. These categories then guide students to determine the potential hazards, PPE, recommended equipment, and correct emergency operation tactics when arriving on-scene of a Li-ION Battery Emergency.

---

### **The Importance of Communications in Response**

**Wednesday, February 21 | 9:00 AM - 10:30 AM | Riverview 3**

Effective communication is crucial in emergency response situations. It is the key to successful crisis management. This course has been designed to equip participants with the necessary skills to communicate with precision and efficacy in high-stress situations. The course emphasizes the pivotal role of communication in emergency response, highlighting its impact on coordination, decision-making, and overall success in navigating crises.

---

### **BioTechIQ: Response, Detection, & Identification of Biologicals, White Powders, & Unknowns**

**Wednesday, February 21 | 10:45 AM - 12:15 PM | Riverview 1**

BioTechIQ is a sole source training program that trains responders to implement risk-based response tactics to safely, effectively, and efficiently respond to any potential biological agent, white powder, or unknown. Developed by the creator of HazMatIQ, BioTechIQ follows the same responder-centric approach to training responders on Biological Response. The backbone of BioTechIQ is the proprietary Biological Response Guide (BRG); which serves as the Emergency Response Guide for Biologicals.

---

### **Counterdrug Threat Update**

**Wednesday, February 21 | 10:45 AM - 12:15 PM | Riverview 2**

Learn the latest advancements in counterdrug operations.

---

## **Radiological Dispersal Device TTX**

**Wednesday, February 21 | 10:45 AM - 12:15 PM | Riverview 3**

The primary objective of this tabletop exercise is to simulate and evaluate the response capabilities of relevant authorities and agencies in handling a radiological incident. Participants will engage in decision-making processes, coordination efforts, and communication strategies to effectively respond to a scenario involving the theft and potential dispersal of radioactive materials.

---

## **Air Monitoring & Detection**

**Wednesday, February 21 | 1:30 PM - 3:00 PM | Riverview 1**

This session will cover the detection and monitoring equipment required for All-Hazards Response. The foundation of this training is focused on the equipment needed to keep responders safe from all-hazards: Radiations, F/PH/KI paper, Temperature Gun, CGI, O2, PID, FID, Draeger Tubes/Chips, and Dust Meters. Students will gain an understanding of the uses and limitations of each tool in their toolbox, as well as experience operating each instrument in a simulated response tabletop, collecting and running real-life samples.

---

## **BatteryIQ: Patrol Response to Lithium-ION Battery Incident**

**Wednesday, February 21 | 1:30 PM - 3:00 PM | Riverview 2**

BatteryIQ provides students with a simplified system to understand, identify, and safely respond to battery-related incidents as small as a cellphone, tablets, or electric scooter to large battery failures such as electric vehicles. Students will be provided with Quick Reference Guides allowing officers to quickly, effectively, and efficiently respond to battery-related emergencies based on battery type and incident severity. Emphasis will be placed on the actions Law Enforcement and Corrections Officers can take to protect themselves and the public at these incidents. The course will also cover the unique situations faced by Law Enforcement or Corrections officers including managing the challenges of laminated safety glass, taking battery devices as evidence, and mitigating an incident without evacuation.

---

## **Think Simple: What's The White Powder? TTX**

**Wednesday, February 21 | 1:30 PM - 3:00 PM | Riverview 3**

This tabletop exercise is specifically designed to immerse participants in a simulated scenario involving the discovery of an unknown white powder, emphasizing the importance of a swift and coordinated response to mitigate potential risks. Participants will engage in realistic discussions, decision-making processes, and hands-on exercises to enhance their understanding of hazardous substance incidents and improve their ability to respond effectively to such situations.

---

## **Identification-IQ: C.B.R.N.or E?**

**Wednesday, February 21 | 3:15 PM - 4:45 PM | Riverview 1**

Learn the latest tactics to identify CBRNE threats.

---

## **Advanced Decon**

**Wednesday, February 21 | 3:15 PM - 4:45 PM | Riverview 2**

Almost all incidents involve some aspect of decontamination. Decon IQ is a system which utilizes science in the form of chemical and physical properties along with empirical data gleaned from numerous military, academic and government agencies to allow the trained decontamination technician to formulate a decontamination plan of action in as little as 1-2 minutes. At the core of the Decon IQ system is a series of charts which enable user to rapidly identify appropriate PPE, applicable decon strategies, effective decon agents, and selection of meters to allow for validation and confirmation of decon efforts. Chart 1, the decon configurator, guides the user to complete a rapid, organized, complete decon action plan regardless of whether the contaminant has been identified or not.

# TRAINING DESCRIPTIONS

---

## Active Shooter TTX

Wednesday, February 21 | 3:15 PM - 4:45 PM | Riverview 3

This comprehensive tabletop exercise is designed to immerse participants in a simulated active shooter scenario, providing a dynamic and interactive learning experience for individuals and teams responsible for emergency response planning. Participants will engage in realistic scenarios, discussions, and decision-making processes to enhance their understanding of active shooter incidents and improve their ability to respond effectively.

---

## MSA: The Safety Company

Thursday, February 22 | 10:00 AM - 10:30 AM | Riverview 3

Learn about the latest advancements from MSA.
