3M PELTOR & 3M SCOTT SAFETY

3M helps protect workers in a changing world. Across diverse industries and applications, our technology, knowledge and energy drive innovative solutions. Our goal is to help protect you from hazards in the work environment, so you can focus on the job at hand.

5.11 TACTICAL

We are innovators who make purpose-built gear for the most demanding missions. With a heritage of creating the authentic and original tactical pant, our vision is to define and lead the tactical gear industry by serving professionals worldwide. See more at www.511tactical.com.

908 DEVICES

908 Devices Inc. is revolutionizing chemical analysis with its simple handheld and desktop devices, addressing life-altering applications. The Company's devices are used at the point-of-need to interrogate unknown and invisible materials and provide quick, actionable answers to directly address some of the most critical problems in bioprocessing, pharma/biopharma, forensics, life sciences research and adjacent markets. The Company is headquartered in the heart of Boston, where it designs and manufactures innovative products that bring together the power of complementary analytical technologies, microfluidic sampling and separations, software automation, and machine learning. For more information, visit www.908devices.com.

ADVANCED DATA RISK MANAGEMENT (ADRM)

Founded in 2014, ADRM is a proud Service-Disabled Veteran-Owned Small Business that protects your organization's critical assets with data-driven risk management solutions.

AED PROFESSIONALS

AED Professionals, a General Medical Devices Inc. company, is a premier supplier of life-saving equipment, including AED units and Accessories, a wide variety of PPE, patient monitors, ECG machines, CPR chest compression devices, CPR training manikins and equipment and many other vital medical devices. Since our founding in 2003 as a family-owned business, we have grown into one of the largest family-owned medical suppliers globally. Our dedicated team is committed to your complete satisfaction and ensuring that we meet and exceed the needs of our clients through industry-leading service, product expertise, and trusted solutions. We are striving to make sure that everyone is equipped with the best tools needed in order to save lives. When Kay Lall founded General Medical Devices, she made it her mission to raise public awareness of life-saving equipment across the U.S. and around the world. At AED Professionals, we continue to uphold that mission every day because saving lives is our only business.

ALAKAI DEFENSE SYSTEMS, INC.

Alakai Defense Systems specializes in Deep UV RAMAN THREAT CHEMICAL DETECTION SYSTEMS

AMAROK

AMAROK™ is a nationwide commercial security company specializing in comprehensive perimeter security using electric fencing and surveillance tools like cameras, lights, and alarms. We are dedicated to deterring theft, protecting property, and ensuring the safety of both your site and employees, offering you peace of mind.

AMENTUM

We don't just offer products. We find solutions. Amentum Secure Network Solutions (SNS) is a premier global provider of customtailored systems and technological tools that address specific operational needs. As a Commercial Solution for Classified (CSFC) Trusted Integrator, Amentum SNS integrates cutting-edge technology to create secure, robust, and highly configurable solutions.

AMERICAN STANDARD EQUIPMENT

We design & manufacture human performance equipment. American Made, the way it should be.

ANACAPA MICRO PRODUCTS, INC.

VAR Integrator of Enterprise and AI Solutions

ARCH ANGEL DEVICES

Guardian Angel wearable safety lights are designed and engineered with a core belief that personal lighting technology will make the world a safer place. Our mission is, and always will be, to save lives by developing the most advanced personal lighting system available. Utilizing a patented magnet mounting system and 360 degree high output LED technology, Guardian Angel devices are versatile, durable, and highly effective in a myriad of applications. Thousands of agencies and organizations across the globe trust Guardian Angel to keep their workers visible and safe on the job.

ARIES SECURITY

We are Aries Security, creators of Capture The Packet: a world-class cyber training range and skill assessment suite. Our clients include governments, corporate entities, and all branches of the U.S. military, several members of the IC, and governments around the world. As a company, we have over a decade of experience creating custom content and we are known for creating the most sophisticated challenges in the world. In addition to providing cutting-edge cyber training solutions, we have leveraged our many years of experience running professional cyber competitions and events at conferences like DEF CON, Black Hat, Cyber Shield, Cyber Gauntlet, Code Blue Japan, and RSA.

ARX PERIMETERS

ARX Perimeters provides rapid deployment perimeter security solutions, including anti-climb fencing, mobile vehicle barriers, guard shacks, and crowd control solutions, ensuring robust protection for any site

AVON PROTECTION / TEAM WENDY

For military and first responders, Avon Protection offers mission-critical protection that delivers mission-critical confidence. With the most field-tested equipment in the industry, we have real-world insight to innovate and stay steps ahead of ever-evolving threats. Through ease of use and enduring performance, we assure our protectors so they can complete the mission and come home safely, every time.

Our portfolio of life-critical protection solutions includes full-face respirators, escape hoods, SCBA systems, modular PAPR units, CBRN protective wear, thermal imaging cameras and underwater equipment.

BASTILLE

Bastille is the leader in wireless threat intelligence through software-defined radio. Bastille enables enterprise security teams to assess and mitigate the risk associated with the growing number of Cellular, RF and Wireless threats. Bastille's patented software and security sensors bring visibility to devices emitting radio signals (Wi-Fi, Cellular, Bluetooth, BLE, Wireless dongles and other IoT communications) in your organization's airspace. Through its patented software-defined radio and machine learning technology, Bastille senses, identifies and localizes threats, providing security teams the ability to accurately quantify risk and mitigate airborne threats that could pose a danger to sensitive information and network infrastructure.

BEAVERFIT

BeaverFit is the leading supplier of human performance and tactical training solutions to support the success of the Human Weapon System. Veteran owned and operated, BeaverFit provides Americanmade solutions that meet the requirements and needs of military units in any environment. From the original container gym solution to full-scale human performance and tactical training facilities, BeaverFit is the trusted partner in creating solutions to support the growing needs and requirements of our military.

BENCHMADE KNIFE COMPANY

Yours, for life. In the line of duty, the field or forest, or for everyday carry—you buy a Benchmade knife because you know it'll perform without compromise, however you need it to, for as long as you need it to.

BERTIN ENVIRONICS INC.

Bertin Environics, nowadays part of Bertin Technology Group, is a Finnish company with over 35 years of experience from improving CBRN safety around the world with its in-house technologies and system solutions. We provide early

EXHIBITOR INFORMATION

warning chemical, biological and radiation detection & monitoring system for wide variety of application ranging from naval vessels to armored vehicles, building protection and personal safety. Foundation of our solutions lies in long experience and expertise and our COTS products complimented with new scalable system architecture.

BIG TOP MANUFACTURING

Big Top Manufacturing specializes in the custom design of fabric buildings and structures. Since 1979 we've been leaders in the fabric structure industry, providing the US Government & Military around the world with durable, reliable, low-maintenance shelter systems to protect our troops, aircraft, and equipment.

BIOMEME

Biomeme develops and produces cutting-edge biowarfare agent detection and identification solutions for military, federal, state & local CBRN, HAZMAT, and First Responders. Biomeme's Franklin ISP is the leading biothreat ID platform: a compact, state-of-the-art, portable qPCR device designed for rapid and accurate simultaneous identification of 14 different biowarfare agents in every clime and place.

BLAUER HOMETLAND DEFENDER

Blauer produces the most functional and comfortable line of CBRN/HAZMAT protective suits for demanding mission profiles. All Blauer suits are 3rd party certified to the NFPA 1990 standard and designed to provide durable protection against TICs and CWAs in liquid, gas, vapor, or particulate form. Made in the USA for SERIOUS PROTECTION.

BLUEHALO

Our mission is clear: to lead through innovation. We're solving our customers' toughest future challenges by crafting breakthrough solutions today, ensuring an operational advantage on an ever-evolving battlefield.

BOUNCE IMAGING

Bounce Imaging makes a suite of tactical, 360-degree camera systems that keep first responders, warfighters, and civilians safer during hostage, high-risk warrant, and active shooter situations, as well as any dangerous environments they find themselves in. Unlike drones and robots, Bounce Imaging's camera systems are lightweight, require little-to-no training, and can be deployed in seconds to provide an instant 360-degree view of threats within a confined space. Utilized by over 500 federal, state, and local law enforcement agencies and first responders, including the FBI, U.S. Marshals, and U.S. Customs & Border Protection, our cameras are also deployed by elite teams within the Department of Defense.

The cameras relay 360-degree panable video over WiFi, 4G/LTE, or mesh networks to any Android or iOS device. Bounce Imaging's technology, which has been named a Best Invention by TIME, CNN, Popular Science, and others allows for images to be stitched at a rate up to 200x faster than traditional methods while retaining an orientation regardless of how the system is thrown, mounted, or rotated.

BRYODYN TECHNOLOGIES

Bryodyn Technologies is a Washington, DC-based Veteran-Owned Small Business that specializes in the development and support of Information Technology systems across a full spectrum of disciplines. Bryodyn is your trusted partner for the design, development, implementation, and support of secure and reliable IT and tactical mobile systems. Bryodyn serves federal government clients both regionally and globally, responding to client needs quickly and efficiently.

BUILDING INTELLIGENCE / FORTIFYE

Building Intelligence provides innovative solutions for managing the access and identities of visitors, vehicles and vendors. Its award-winning solutions SV3 and Fortifye, create efficient and streamlined processes at all entry points.

CELINA

CELINA is a family-owned small business specializing in the manufacture and distribution of welded fabric products, including military shelters, ducting, tarps, commercial and humanitarian tents, and products for industrial use. With worldwide manufacturing and distribution centers, CELINA has established a global presence in the fabric shelters

EXHIBITOR INFORMATION

market. The CELINA team leverages strong supplier relationships and subject matter expertise to develop shelter solutions that consistently exceed customer requirements.

CLR PRO

CLR PRO® is the hardworking cleaning solution for professionals in Jan/San, Office and Industrial channels. For over 50 years, we have been offering products that are proven effective in solving real world problems and provide safer alternatives to harsh chemicals. CLR PRO is The Power You Expect. The Safety You Need. Now introducing CLR PRO MAX™, The Power You Expect. The Speed You Need.

DANNER BOOTS

Premium, quality boots since 1932. Military, Tactical, Hunt, Hike, Work, Casual.

DETECTACHEM

DetectaChem, a Houston-based company, specializes in manufacturing cutting-edge, military-grade explosive and drug screening devices. We are dedicated to serving our law enforcement and military communities with a range of exceptional product lines.

MobileDetect Field Drug Test Kits

Experience a safer and more precise solution with MobileDetect's advanced field drug test kits, available at the same price as older kits. Our comprehensive range covers tests for all types of drugs. Additionally, our free mobile app seamlessly captures test results, generating custom reports that encompass crucial case details such as date, time, test results, notes, pictures, officer badge number, and even GPS mapping of the test location.

Apex R7 Raman

Introducing the revolutionary Apex R7 device, now part of the DetectaChem suite. This pocket-sized Raman spectrometer empowers officers with effortless, point-and-shoot drug and narcotics identification. Say goodbye to calibration and downtime, as the Apex R7 delivers lightning-fast results in 20 seconds or less. Notably, it boasts an industry-leading price point, elevating field testing to unprecedented levels of efficiency.

SEEKER Pro

The SEEKER Pro is the ultimate explosive detector and the latest evolution of our renowned SEEKERe series. Powered by cutting-edge spectrum matrix analysis technology, this heavy-duty device excels in trace explosive and drug detection. With its rugged exterior and intuitive operation, the SEEKER Pro sets a new standard in the detection arena, leaving no room for compromise.

DEWEY ELECTRONICS & INI POWER SYSTEMS

Dewey Electronics, a pioneer in field-proven military generators, offers highly reliable solutions for critical power challenges. INI Power is renowned for its compact, quiet, and theater-proven military-grade generators, designed for deployment in challenging environments worldwide.

INI Power Systems addresses operational energy gaps with man-portable, ultra-quiet JP-8 multi-fuel generators (0.5kW to 5kW) and 1kW custom solutions for autonomous hybrid power storage and routing. We're thrilled to introduce the latest addition, the INI-2200 Series, to our lineup this year.

DRONESHIELD

DroneShield provides next generation counter-drone protection, focusing on Radio Frequency (RF) sensing, AI/ML, Sensor Fusion, Electronic Warfare, and MIL-SPEC manufacturing. DroneShield's capabilities are used to detect, track, identify, and defeat multi-domain unmanned systems to protect Military, Government, Law Enforcement, Critical Infrastructure, and Enterprises worldwide.

DUALDRAW MAIL SCREENING EQUIPMENT & SERVICES

DualDraw's market-leading Mail Screening Equipment & Services help protect facilities and personnel from dangerous mail and costly business disruptions. Since shortly after the deadly anthrax attacks in September of 2001, DualDraw's HEPA-filtered downdraft Mail Screening Equipment has been used daily by hundreds of organizations concerned about the safety of their incoming mail. DualDraw also provides state-of-the art digitization and outsourced mail screening

EXHIBITOR INFORMATION

services. These are performed using best-practices as adopted from 41 CFR 102.192§70-80 and the recently updated 5th edition of the federal Mail Center Security Guide. Contact us today to discuss mail screening at 1-800-977-2125 or visit our website at www.DualDraw.com.

ECHODYNE

Echodyne is a U.S. designer and manufacturer of advanced radar solutions for government and homeland security applications. The company's proprietary metamaterials electronically scanned array (MESA®) architecture is a rare breakthrough in advanced radar engineering, leveraging an innovative physics-design approach. Echodyne's MESA radars use standard materials and manufacturing processes to shatter unit cost barriers for high performance radar. The result is a solid-state, low-SWaP, exportable, commercial radar with advanced software capabilities that delivers superior performance, unparalleled data integrity, and exceptional situational awareness. With leading positions in counter-drone, border security, public safety, and VIP asset security, security companies and governmental agencies rely on Echodyne radar for extraordinary accuracy and consistent, reliable operation. For more information, please visit: Echodyne.com.

ECO WASTE SOLUTIONS

Since 1993, Eco Waste Solutions™ has been delivering thermal waste conversion solutions to companies, communities, governments and military organizations around the world. From world-leading products, to specialized engineering and technical services, we help thermal waste conversion projects thrive. Our environmental technologies have diverted millions of tons of garbage from landfills, while recovering valuable materials and generating energy, while protecting the personnel and the public from infectious disease, and other hazards. www.ecosolutions.com

EVIDENT

At Evident, we are guided by the scientific spirit—innovation and exploration are at the heart of what we do. Committed to making people's lives healthier, safer and more fulfilling, we support our customers with solutions that solve their challenges and advance their work; whether it's researching medical breakthroughs, inspecting infrastructure, or exposing hidden toxins in consumer products. Evident Life Science empowers scientists and researchers through collaboration and cutting-edge life science solutions. Dedicated to meeting the challenges and supporting the evolving needs of its customers, Evident Life Science advances a comprehensive range of clinical research, educational, and premium microscopes and microscope systems. For more information, visit EvidentScientific.com.

EXTREME LED LIGHT BARS

Extreme LED Light Bars designs and delivers high-performance LED lighting solutions for vehicles and powersports. With expertise in product design, electrical, and mechanical engineering, the company drives innovation through a diverse lineup of rigorously tested products, all backed by a lifetime warranty. Combining quality, reliability, and exceptional customer service, Extreme LED meets the needs of professionals and adventurers alike.

EZ STAK

Manufacturer of premium customized mobile workspaces (Trailers, Containers, Cabinetry)

FAST-ACT

FAST-ACT® is a dry decontamination solution that offers a proprietary, non-toxic formulation that effectively neutralizes a wide range of Toxic Industrial Chemicals (TICs) and CWAs. Our technology harnesses safe earth minerals that capture and neutralize chemical threats upon contact, ensuring safety and effectiveness. Choose FAST-ACT® to Decontaminate, Contain, and Neutralize with confidence.

FIRST LINE TECHNOLOGY

First Line Technology designs and manufactures disaster preparedness and emergency response equipment- taking ideas from the lab to life-saving products. We work with first responders and the military to develop innovative products that make their jobs easier and their lives – and the lives of the people they serve – safer. We focus on emergency response missions and pride ourselves on creating products that are comfortable, effective and safe for use in hazardous environments.

FONON TECHNOLOGIES

Fonon Technologies is a diversified industrial laser equipment provider serving government organizations, all branches of the U.S. military, and defense contractors. Headed by a team with extensive expertise in military and naval operations, the company tackles the challenges of defense maintenance, repair, overhaul and protection with cutting-edge laser solutions.

FOXFURY

FoxFury builds portable LED drone lights, headlamps, flashlights, shield lights, scene lights and area lights. Our application-specific LED lights are used in UAS, firefighting, police, military, industrial safety, hazardous area, filming, and photography. Our compact LED lighting tools are tough, waterproof and impact resistant. We also offer fire resistant and intrinsically safe / explosion proof lights. FoxFury products are designed in California and manufactured with the highest quality USA and foreign parts.

FREEDOM ATLANTIC

At Freedom Atlantic, our mission is to deliver superior, innovative, and cost-effective Command, Control, Communications, Computers, Combat Systems, Intelligence, Surveillance, and Reconnaissance (C5ISR) technology solutions that empower the warfighter to maintain situational awareness and dominance at the tactical edge. Leveraging the unparalleled expertise of our former Army Special Operations personnel and highly experienced engineers, we provide critical insights, comprehensive training, and hands-on support to ensure the effective use of advanced tactical equipment in real-world operational environments. We are committed to fostering excellence, integrity, and innovation in all our endeavors, continuously striving to enhance the effectiveness and safety of our nation's defenders.

GENTEX CORPORATION / OPS-CORE

The industry-leader in protection for over 130 years Gentex Corporation, and its brands Gentex and Ops-Core, builds total headborne system solutions for global air, defense, and rescue forces. The comprehensive line includes helmet systems, eye and respiratory protection, and situational awareness products.

GERBER GEAR

Founded in 1939 and based in Portland, Oregon, USA, Gerber is an American brand whose products have global reach and relevance. Carried extensively by hunters, soldiers and tradesmen, Gerber's heritage runs deep. And we are now looking toward the future, where tomorrow's problems will be solved by the next generation of innovations.

GO-KOT

GO-KOT® is a Woman-Owned, Veteran-Owned small business. For over 40 years, our cot has been the cot of choice for outdoor professionals, military, first responders, and adventure enthusiasts. Our products are handmade right here in the USA! They are high-quality; they work great and are a pleasure to use; and they are built to last a lifetime. By combining time-honored techniques with innovative technology, we create products that stand the test of time. This approach allows for handcrafted quality with precision and attention to detail. We source the best American raw materials available and our GO-KOT® Expeditionary Cot™ is Agile Combat Employment (ACE) ready. Our cot is engineered for swift deployment and effortless transport. Crafted from robust materials, it can endure extreme conditions, making it a reliable choice for ACE operations.

GOTENNA, INC.

Our Mission: We develop and deliver innovative communication technology and solutions for people who keep us safe.

In an increasingly connected world, goTenna enables operators to communicate when traditional networks are not available/accessible. As a trusted partner, we aim to transform how operators connect during critical missions with interoperability at the core of all we do. goTenna is the only mobile mesh networking company in the world that provides inexpensive, lightweight, off-grid connectivity with an easy-to-use interface for long-range communications tested at over 100 miles point-to-point in real-world scenarios.

goTenna's drive to create resilient connectivity began during Hurricane Sandy in 2012, when approximately a third of cell towers and power stations in affected areas failed. Since the company's inception, we have created innovative solutions for the world's evolving challenges - without cell, Wi-Fi, or satellite communications.

EXHIBITOR INFORMATION

HALEY STRATEGIC PARTNERS LLC

Haley Strategic's roots are boldly and unapologetically American. Every team member at Haley Strategic takes an internal oath to uphold and defend the constitution of the United States from all enemies foreign and domestic. We base our training and product design philosophy around concrete principles and hard work done smartly. While other companies deliver buzz words as a principle of design, our principles are forged around the warriors we serve. Compassion: Because the more you care about something the harder you will fight for it. Vulnerability: Because the courage to be imperfect focuses on self in order to become the best for the people we serve.

HALLOWELL MANUFACTURING

Hallowell is a leading manufacturer and supplier of industrial storage solutions, offering a wide variety of lockers, cabinets, shelving, and workbenches. With nationwide distribution centers and thousands of stock products ready to ship, Hallowell is your one-stop shop for all your industrial storage needs.

HONEYWELL RAE SYSTEMS

Honeywell Safety and Productivity Solutions (SPS) provides products, software and connected solutions that improve productivity, workplace safety and asset performance for our customers across the globe. We deliver on this promise through industry-leading mobile devices, software, cloud technology and automation solutions, the broadest range of personal protective equipment and gas detection technology, and custom-engineered sensors, switches, and controls.

HOSE TOOL USA

The Hose Tool gives a single operator the mechanical advantage to safely and efficiently repair industrial hoses where leaks and failures occur, in the field.

HOT & COLD SUPPLY

We are a Small-Business Manufacturer and Distributor in Virginia, serving commercial, industrial, and military end-users. Building custom parts, temporary facilities, cable & hose assemblies, manifolds, industrial equipment & products since 1983.

INTELLIAN

Intellian is driven by a passion for innovation and an agile responsiveness to customer needs. As the crucial link between satellite networks and millions of people on Earth, Intellian's leading technology and antennas empower global connectivity across oceans and continents, organizations and communities. Strategic thinking, an obsession with quality and a proven ability to deliver enables Intellian to invent for the future, creating mutual success for partners and customers as the world's connectivity needs evolve. For more information, follow @Intellian and visit intelliantech.com.

KAPPLER

For more than four decades Kappler has defined the protective clothing industry with patented fabrics, innovative seaming technology and unique garment designs that deliver exceptional protection. We are a family-owned business providing American-made quality for added assurance. From fabric development to packing the box, quality is an integral component to every Kappler garment. "Keeping bad stuff off people" is our mission and the motivation behind what we do. The Kappler brand on our protective suit means you always know what you're getting into.

KARCHER GROUP

Since 1988, Karcher Group has built a reputation as a leading AV integration firm, specializing in the design and implementation of AV technology for Department of Defense and Federal Government agencies. Our goal is to transform the way our customers communicate, collaborate, and accomplish their missions.

KONTEK INDUSTRIES

Kontek Industries is a global leader in tested security and defense solutions, offering a vast array of blast, ballistic, force protection, tactical, and training solutions. Kontek provides some of the most advanced security and defense solutions to protect personnel, equipment, and the world's critical infrastructure.

LEGEND COMPRESSION TACTICAL

LEGEND® Compression Tactical is a NC company located in the heart of the textile mill industry. Our mission is to extend the life of your legs through graduated compression. Our socks are SKILCRAFT® Labeled and NTOA member tested and recommended. We are a proud supporter of Law Enforcement. We offer a complete line of LEGEND® Compression Merino Wool and Moisture Wicking Nylon Tactical Boot Socks for all temperatures and weather conditions. These socks utilize graduated compression to reduce foot fatigue & currently worn by all branches of the Military including Special Operations.

Designed for our American LEGENDS. We offer All-Weather, Cold-Weather and Warm-Weather Socks. Made in the USA. LEGEND Compression Tactical Socks are durable, odor resistant and use terry loop cushion for maximum comfort and performance. Our Wool Socks are USAF Certified No Melt No Drip/FR; Authorized Safe to Fly.

Try our LEGEND® (Warm Weather) Compression Tactical Boot Socks: These tropical socks have cushioned through-out, use moisture wicking nylon and are extremely comfortable. You'll love the softness! New: Our popular LEGEND (All-Weather) Compression Merino Wool Tactical Wool Socks are now available in Over-the-Calf (OTC) providing extended support and comfort for our warfighters. Stop by and take a look."

LEIDOS

Leidos is a Fortune 500® innovation company rapidly addressing the world's most vexing challenges in national security and health. Leidos offers a comprehensive suite of fully integrated security solutions for aviation, ports, borders, and critical infrastructure customers around the world. This portfolio has more than 30,000 products deployed across nearly 130 countries.

LION

Founded in 1898 and headquartered in Dayton, Ohio, LION is a family-owned company with a legacy and ongoing vision of introducing new products and services designed to ensure the health, safety and performance of first responders worldwide. From game-changing personal protective equipment (PPE), LION Featuring Elbeco brand uniforms for all public safety professionals to TotalCare gear maintenance and repair programs to state-of-the-art fire safety training tools and facilities, it is LION's mission to make sure that you're READY FOR ACTION -- before, during and after. Many Solutions. ONELION.

LION ENERGY

Our mission is to provide portable products that are safe, silent and renewable so you can use them wherever and whenever you want. We make products that are good for people and good for our planet. Period. We are driven by this passion. Lion Energy products are designed for everyday use - around the house, at work, on the go or during emergencies. Our products are high-quality, lithium battery based solutions for everyday living. They range from small portable power banks and silent solar generators to RV batteries for auxiliary power and residential energy storage. We help you become energy independent with power to live life on your terms.

LUXOR WORKSPACES

Luxor Workspaces has a rich history spanning seven decades, marked by continuous adaptation and innovation. What started as a company solely focused on office products has now evolved to meet the dynamic needs of its customers. This adaptability is not just a business strategy; it is ingrained in our DNA. From our humble beginnings to today, we have grown into a leading provider of forward-looking workspace solutions. Our extensive product range includes standing desks, mobile carts, charging stations, attachable monitors, and more - all designed for the modern workplace. With functionality and durability at the forefront of our designs, we strive to create solutions that enhance the productivity and well-being of individuals in their workspaces.

MASSIF

Designing and creating advanced technical apparel that protects the U.S. Military and those working in the world's most challenging environments.

EXHIBITOR INFORMATION

MIDTRONICS

For 40 years Midtronics has been focused on helping our customers provide safe and exceptional battery service and diagnostics for all vehicle types. Midtronics is the worldwide leader of battery management solutions that meet the evolving needs of our customers.

MIRION TECHNOLOGIES, INC.

Mirion Technologies partners with industry leaders to advance radiation safety and empower critical innovation. Their precision radiation safety technologies enable detection, measurement, monitoring, and analysis in R&D labs, nuclear facilities, and beyond. With complete confidence in safe operations, Mirion harnesses the transformative power of radiation for a better world. Learn more at mirion.com.

MITCHELL DEFENSE LLC

Mitchell Defense, a veteran-owned and operated manufacturer based in Glenside, PA, is dedicated to crafting superior rifles across the AR-10, AR-15, and AR-9 platforms. Each of our rifles is meticulously designed to achieve unparalleled accuracy, reliability, and durability. Our commitment to innovation and quality ensures that there is nothing standard about our products. We enhance almost every part of our rifles to meet the highest standards of performance and longevity, making them ideal for defense, sport, and tactical applications.

In partnership with Ryker USA, a leading provider of high-quality slings and grips, we offer a comprehensive range of products that enhance the functionality and performance of our firearms. Ryker USA's slings and grips are designed to complement our rifles, ensuring that our customers have the best possible equipment for any condition.

Together, Mitchell Defense and Ryker USA are committed to providing superior firearms and accessories that meet the needs of professionals and enthusiasts alike.

MOTOROLA SOLUTIONS

Motorola Solutions helps your teams keep pace with the rapid changes in your mission critical technology ecosystem. Our technology breaks down communication and operational technology barriers to ensure information is transmitted to the right person, at the right time, in the right place. With breakthrough communications, video and software solutions ideal for solving today's installation security and tactical operations challenges, we help you identify threats and securely share critical information faster, for better outcomes. We have manufactured over 50 mission critical technologies that are Federal Information Processing Standards (FIPS) certified. We have video and communications solutions on the Department of Defense Information Network (DoDIN) Approved Products List and keep you in compliance with the National Defense Authorization Act (NDAA). Our secure mobile solutions meet NSA's Commercial Solutions for Classified (CSfC) program standards and new Smart Radio, APX NEXT, is FedRAMP authorized for Impact Level 5 (IL5) and compatible with U.S. Federal's Android Team Awareness Kit (ATAK). #SolvingforSafer

MOUNTAIN HORSE LLC/ GLOBAL ORDNANCE

Mountain Horse Solutions is a leading provider of innovative and high-quality operational equipment, supplies, technology, and training necessary to support the performance of mission-critical teams around the globe. Specializing in chemical, biological, radiological, nuclear, and explosive (CBRNE) hazards, Mountain Horse Solutions delivers customized solutions to meet the unique needs of military, first responders, and security personnel. With a commitment to excellence, the company ensures that its clients are equipped with the most advanced and reliable tools available, enabling them to execute their missions safely and effectively.

Mountain Horse Solutions prides itself on its "Mission First" mentality and veteran-operated ethos. The company serves a diverse range of clients, including the Department of Defense, federal agencies, state and local governments, and commercial organizations. Known for its legendary customer service and deep network of partners and vendors, Mountain Horse Solutions is dedicated to exceeding customer expectations and providing superior support for critical missions.

MSA

Established in 1914, MSA Safety Incorporated is the global leader in the development, manufacture and supply of safety products that protect people and facility infrastructures. Many MSA products integrate a combination of electronics,

EXHIBITOR INFORMATION

mechanical systems and advanced materials to protect users against hazardous or life-threatening situations. The company's comprehensive product line is used by workers around the world in a broad range of markets, including the oil, gas and petrochemical industry, the fire service, the construction industry, mining and the military. MSA's core products include self-contained breathing apparatus, fixed gas and flame detection systems, portable gas detection instruments, industrial head protection products, fire and rescue helmets, and fall protection devices.

NEW PIG CORPORATION

World's Best Stuff for Leaks, Drips and Spills®

PIG is the #1 trusted brand worldwide, and we vow to wow you with products that won't disappoint. We're always looking for a better way, and that starts with thoughtful engineering and an honest commitment to quality. Every item in our lineup is designed to help you get the job done right — exclusive multi-layer pads, socks that suck, mats that grip, and drum lids that open with one hand. We're the world's #1 absorbent brand; if something's not up to snuff, it doesn't make the cut!

NIGHT VISION DEVICES

Night Vision Devices is a U.S. manufacturer of high quality night vision systems and accessories. We provide innovative and cutting edge products and services to the military, law enforcement and consumer markets.

NOBLE

NOBLE IS YOUR TRUSTED PARTNER IN READINESS

NOBLE provides global sustainment and operations support for the U.S. Military and civilian government agencies with an unparalleled range of mission-critical products and services. Our supply chain contains over 15,000 suppliers and millions of products. We offer top brands and cutting-edge technologies to assist with your equipment's total life-cycle sustainment. NOBLE's integrated 150 contract vehicles offer a single-source procurement solution for government. Our process ensures compliance, saves time and money, and quickly gets products to end users to support their mission.

NOVO DR INC.

NOVO DR offers the highest image quality in the portable digital radiography industry. The ruggedness and reliability of our systems combined with amazing X-Ray Images make them the best in the market. Our intuitive and easy to use products have been designed and engineered by our incredibly professional and highly experienced team!

NUTEK ABRASIVES

DEVOUR brand Premium Diamond Blades

ONTIC

Ontic makes software that corporate and government security professionals use to proactively manage threats, mitigate risks, and make businesses stronger. Built by security and software professionals, the Ontic Platform connects and unifies critical data, business processes, and collaborators in one place, consolidating security intelligence and operations. We call this Connected Intelligence. Ontic serves corporate security teams across key functions, including intelligence, investigations, GSOC, and security operations.

ORTEC - AMETEK

ORTEC is a leading manufacturer of high-precision radiation detection instruments. ORTEC's Detective-X and RadEAGLE products are the standard RIID devices deployed by Defense and Intelligence agencies, Homeland Security, Customs, and by many state and local First Responders around the world. The ORTEC GRACE, Gamma Ray Analysis of Chemicals and Explosives, analyzes and provides on-site identification of the chemical contents inside munitions or other unopened containers.

OTTO ENGINEERING

OTTO Engineering designs & manufactures innovative spatial audio push-to-talk hubs, tactical ear-pro, battle tested navigation systems, speaker mics, covert surveillance kits, & wireless intercoms. Mission critical communication equipment for Military; SWAT; LEO; Executive Protection; Covert Operators; Fire & Rescue. For over 60 years OTTO's products have been recognized for excellence in the most demanding environments worldwide. www.otto-comm.com

EXHIBITOR INFORMATION

PANASONIC CONNECT

Your crucial need to plan, coordinate, and communicate anywhere around the world is supported with Panasonic TOUGHBOOK® hardware, software, and services. TOUGHBOOK is designed and engineered to meet the demanding challenges of today's warfighter. Regardless of the operating environment, TOUGHBOOK can handle it.

PELICAN

Pelican Products, Inc. is the global leader in the design and manufacture of high-performance protective cases, temperature-controlled packaging solutions, advanced portable lighting systems and rugged gear for professionals and outdoor enthusiasts. Their products are used by professionals in the most demanding markets including fire safety, law enforcement, defense / military, aerospace, life sciences, industrial, entertainment, and in numerous outdoor markets. Pelican™ products are designed and built to last a lifetime. The company operates in 27 countries, with 23 international sales offices and eleven manufacturing facilities around the globe. In Europe, the company does business under the name Peli Products, S.LU. and the division which manufactures temperature-controlled packaging for the healthcare industry, does business worldwide under the brand Peli BioThermal.

PERSISTENT SYSTEMS

Persistent Systems is a Network Communications company designed to provide a Layer-2 network for the warfighter to make tactical decision making at the edge.

PIXELS ON TARGET

Pixels on Target is passionate about delivering the most advanced family of thermal optic products. We design every system using the latest, most disruptive technologies to deliver unrivaled overmatch capabilities to those who defend our freedom. Our team will meet with you to determine the best possible solution for your mission requirements and custom develop from the ground up or modify current designs to produce the best results. Warranty and field support are always of major concern and Pixels on Target understands the importance of maintaining your equipment. Our pledge is simple, with a 30-day or less turn around for any units that require repair. Customizable warranty programs are available and we stand by our products craftsmanship, period.

PROMETHEUS SECURITY GROUP GLOBAL

Prometheus Security Group Global (PSG) is an industry leader in next-generation security technologies and the creator of the industry's first Zero Trust Engine. PSG's Zero Trust Architecture (ZTA) secures the entire environment—starting from the physical space “in the room” to edge sensors, including intrusion detection sensors, access readers, and cameras, extending to a cyber-secure data lake and ultimately to command and control (C2) systems.

PSG enables artificial intelligence, machine learning (AI/ML), and modeling simulations of continuously authenticated and verified data—enhancing response team safety and mission success across government agencies, critical infrastructure protection (CIP), operational technologies (OT), and process and industrial control solutions markets.

With \$120 million in intellectual property developed specifically for the federal and critical infrastructure markets, PSG's solutions seamlessly integrate with OEM platforms and third-party products, reinforcing its ability to cost-effectively and rapidly deploy advanced, innovative solutions. PSG and its team are recognized subject-matter experts with a history of industry firsts, multiple patents, and certifications, including PLIN, ATO, and RMF accreditations. PSG is GSA-approved, TAA-compliant, and adheres to NDAA, NIST-FIPS PKI, PACS, and FICAM standards. PSG is leading the way in Zero Trust, further solidifying its reputation as the trusted leader in securing critical assets and the nation's power grid.

PYROCOM SYSTEMS

Since 1997, PyroCom Systems has installed life safety, intrusion detection, surveillance/CCTV, access control systems and technology solutions in schools, hospitals, small and large businesses, federal and military buildings and installations, universities, industrial complexes, and residential homes. We operate at every level of Fed/Gov both classified and unclassified spaces. PyroCom is a full system integrator of security systems, meaning that we connect all aspects of your security to one another. As a company, we believe that the security of an individual or organization should be custom fit to their exact needs.

RAYSECUR, INC.

MailSecur is a mail security screening device that uses safe T-ray technology to detect threats in sealed packages, such as powders, liquids, electronics, weapons, and laced papers in sealed packages. It is certified by DHS, eco-friendly, and supported by EOD experts.

RECONROBOTICS

ReconRobotics® is the world leader in tactical micro-robot and personal sensor systems. Worldwide, nearly 7,000 ReconRobotics® robots have been deployed to the U.S. military and international friendly forces, federal, state and local law enforcement agencies, bomb squads and fire/rescue teams. Each day, they use the company's mobile Recon Scout® and Throwbot® devices to protect their personnel, minimize collateral damage, and gain immediate reconnaissance within dangerous and hostile environments

REDCAT | TEAL DRONES

Red Cat (Nasdaq: RCAT) is a drone technology company integrating robotic hardware and software for military, government, and commercial operations. Through two wholly owned subsidiaries, Teal Drones and FlightWave Aerospace, Red Cat has developed a leading-edge Family of Systems. This includes the flagship Black Widow™, a small unmanned ISR system that was awarded the U.S. Army's Short Range Reconnaissance (SRR) Program of Record contract. The Family of Systems also includes TRICHON™, a fixed wing VTOL for extended endurance and range, and FANG™, the industry's first line of NDAA compliant FPV drones optimized for military operations with precision strike capabilities. Learn more at www.redcat.red.

REFANA | NIRLAB NARCOTICS

NIRLAB Narcotics is a cutting-edge handheld screening device designed for rapid and precise substance identification in the field. Trusted by law enforcement agencies worldwide, it leverages advanced technology for swift data collection and seamless cloud integration. This enables real-time data analysis, centralized tracking, and automated report generation, providing law enforcement with comprehensive insights into illicit substances. NIRLAB Narcotics empowers organizations with a smarter, more efficient approach to narcotics identification.

REVISION MILITARY

Revision develops and delivers purpose-built eye protection for military and tactical use worldwide. Revision specializes in integration for the optimum and necessary balance of protection and performance. To that end, Revision brings together the most advanced expertise, state-of-the-art technology, and finest technical minds.

RIDENOW POWERSPORTS

RideNow, a RumbleOn company, is one of the largest dealership groups in the country with more than 56 convenient stores across the United States. We are proud to have over 18,221 new and pre-owned motorcycles, ATVs, personal watercraft, and more, along with the largest selection of brand manufacturers. Since 1983, we have been leading the community to bring quality vehicles, expert service, and innovative ideas to adventurers everywhere. RideNow Powersports is your one-stop shop for all your powersports needs. We strive to give our customers a convenient, stress-free experience in sales, service, parts and merchandise. Visit us today and see what we can do for you!

RIGAKU ANALYTICAL DEVICES

Rigaku's new portfolio of handheld 1064 nm Raman analyzers offer a specialized chemical analysis solution for every response and budget. Designed for use by police, customs, hazmat, EOD, and the military, each analyzer includes an on-board library with a configurable library management capability. Additional features include automatic mixture analysis, addition of pictorial evidence using the on-board camera, and automatic warning of precursor results. With the addition of QuickDetect, users have the ability to collect non-visible threats and scan on the same device. Accepted as part of the U.S. DoD JPEO DR SKO System Modernization Program.

RILEYCO.LLC

RileyCo is dedicated to providing superior, low-maintenance cooling equipment that excels in even the most austere conditions. Our flagship product, the Deployable Ice Production System (DIPS), exemplifies this commitment. Unlike competitor systems prone to breakdowns due to complex mechanisms, DIPS's innovative bagless design ensures uninterrupted ice production, a critical advantage in remote or hostile areas.

EXHIBITOR INFORMATION

RIVEER

Global manufacturer of corrosion mitigation systems.

ROBIN RADAR SYSTEMS

Here at Robin, we believe tackling the drone threat starts with unmatched detection, tracking, and classification. Our drone radars are made to detect small, elusive objects in an unpredictable world. Mission-proven worldwide, they empower defence and security teams with 360° coverage and the earliest possible alerts. With an interoperable interface, they combine powerful classification and tracking technologies for the earliest warnings, and our flagship 3D system, IRIS, delivers easy deployment and seamless integration. At a lightweight size of 29kg, IRIS doesn't compromise in any way. It's packed with innovations such as micro-doppler classification, deep neural networks (DNNs), and on-the-move (OTM) capability. IRIS detects, tracks and classifies at speeds of up to 100 km/h (60 mph) with our OTM add-on. The drone threat may be advancing, but so are we. With 30 patents and counting, our systems benefit from every advancement we make.

S.A.F.E. STRUCTURE DESIGNS

Safe Structure Designs (S.A.F.E.) is a global leader in the design, engineering, and manufacturing of ergonomic safety equipment for a variety of industries, including aviation, marine, railroad, heavy equipment, and industrial. SAFE provides customized solutions for just about any project and we do on charge NRE for our custom design work.

SAFRAN DEFENSE & SPACE, INC.

Safran Defense & Space Inc. (Safran DSI), a subsidiary of the global high-technology company Safran, addresses the evolving needs of US defense programs and space missions with a comprehensive range of industry-leading solutions. Headquartered in Arlington, VA, Safran DSI operates through specialized business units in Optronics, Space Solutions, Testing & Telemetry, and Assured PNT (through Safran Federal Systems, a proxy company). With over 500 employees nationwide, Safran DSI is a preferred partner for the armed forces, federal, state, and local governments, as well as commercial entities in the US defense and space sectors.

SARO GMBH GHOSTHOOD

German Top Tier producer of multispectral camouflage for Soldiers, vehicles, assets of all kind, and infrastructure. Ghosthood is battleproven in Ukraine, and supports Armed Forces, Law Enforcement, and Services all over Europe.

Our mission is to protect those, who protect us, "Ghosthood saves lives."

SEER TECHNOLOGY

AccuSense uses Dual-Hyphenated Gas Chromatography (DHGC) technology for the separation of chemicals and a proprietary thermal detection system to display concentration levels of multiple chemicals simultaneously. The chemicals and concentration levels are displayed via wireless links to a laptop computer. Identified chemicals and concentrations are automatically displayed values and displayed on the screen for decision analysis.

SELLMARK CORPORATION

Sellmark Corporation excels in building brands that foster memories and further traditions. Sellmark is committed to bringing the most innovative, highest-quality, cost-effective products to the ever-changing global marketplace. Sellmark's priority is to provide its customers with the best value in consumer outdoor products by integrating the latest technologies, designs, and operational excellence for a diverse range of outdoor, tactical, and firearm enthusiasts. Since 2000, Sellmark has launched and scaled multiple industry-leading and award-winning brands. These include Sightmark, Pulsar, Firefield, BulletSafe, Inforce, KJI (formerly Kopfjäger), and Dark30 brands. Our product range, designed to enhance the outdoor and tactical experience, spans several key categories, including advanced night vision, precision laser sights, accurate boresights, cutting-edge thermal and tactical scopes, top-tier red dot sights, personal protective equipment, and versatile outdoor gear.

SEMPERCOMM

The SemperComm Portable Command Center is the only system that provides emergency communications for any emergency situation you encounter.

SIG SAUER

SIG Sauer is the complete systems provider of firearms, ammunition and electro optics to Military, Federal, Law Enforcement and International end users.

SIGMA DEFENSE

Sigma Defense Systems is a leading technology company serving the Department of Defense (DoD), providing tactical communications systems and services for digital modernization since 2006. Our software-focused approach to tactical communications accelerates information collection and sharing for faster decision making and better mission outcomes. Customers turn to Sigma Defense for engineering, program management, and data logistics services for technical solutions that encompass ground, air, and space-based systems and sensors and network and satellite communications. Sigma is headquartered in Perry, GA with satellite offices both CONUS and OCONUS.

SILVUS TECHNOLOGIES

As the world's leading developer of advanced tactical MANET communication systems, Silvus Technologies is reshaping mesh network technology for mission-critical applications on the ground, in the air, and at sea. The Silvus family of StreamCaster MANET radios deliver high-fidelity video, voice and IP data communications with class-leading output power, range, and mobility. At the heart of every StreamCaster MANET radio is Silvus' proprietary MN-MIMO waveform that creates a self-forming and adaptive mesh network – capable of linking hundreds of nodes with unmatched data rate throughput, EW resiliency, and scalability. Available for integration into the MN-MIMO waveform is Spectrum Dominance - an expansive suite of LPI/LPD and Anti-Jamming capabilities that provide secure and EW resilient mesh network communications in congested & contested environments. With a focus on innovating comms technology for the tactical edge, Silvus is delivering decision dominance to the warfighter, to achieve overmatch across the spectrum domain. Learn more at <https://silvustechnologies.com>

SIMUNITION

Established in 1997, PyroCom Systems has more than 26 years experience in the Fire and Security market. Known as the "go to" company amongst the General Contractors and Electricals in the area, PyroCom has built a reputation as the strongest subcontractor in the Southwest Region when it comes to Fire and Security system installations. PyroCom has installed hundreds of systems across a wide range of industries to include: Manufacturing, Industrial, Commercial, Retail, Military, Federal, State and Local Government, and School Districts. We are a full systems integrator offering our customers not only system design, but installation, integration and consulting in addition to maintenance and monitoring services.

SKB CORPORATION

SKB Corporation was established in 1977 by two college students in a residential garage. Today, with three factories and distribution all over the globe, SKB is recognized as an industry leader in the design and manufacture of molded polymer transport cases. Vacuum, rotational or injection molded, these cases are engineered to provide the best protection for equipment in many diverse industries, including pro-audio products, outdoor and sporting gear, and military, industrial and medical applications. It's no wonder that the familiar SKB logo has symbolized uncompromising quality and unsurpassed durability for over four decades

SMARTRAYVISION

SmartRayVision is a leading innovator and manufacturer based in the USA, specializing in highly portable, reliable, and visually articulate X-Ray systems designed for EOD (Explosive Ordnance Disposal), First Responder, and Checkpoint security applications. Our legacy in this field spans 14 years, marked by continuous innovation and excellence.

Our journey began with the introduction of our first EOD system, which quickly garnered recognition and trust, leading to securing contracts with the world's largest EOD portable X-Ray system customer – the US Army, under its coveted EOD X-Ray program of record. Today, we proudly supply and support the US Army with our third-generation SmartRayVision kit, demonstrating our commitment to excellence and reliability.

At SmartRayVision, we excel in worldwide deployment and sustainment, leveraging finely tuned CONUS/OCONUS logistics and offering round-the-clock human support. Our philosophy revolves around continuous innovation aimed at making our systems easier, faster, stronger, and ultimately, perfect.

EXHIBITOR INFORMATION

Our SmartRayVision systems are deployed globally, serving diverse purposes such as EOD operations, investigations, bag checking, and general security needs. Our clientele includes esteemed organizations such as the US Army, ATF, Australian Federal Police, US State Department, US Secret Service, GIGN, NAVSCOLEOD/Advanced IEDD, FBI-HDS training facilities, and numerous other US Federal Agencies and Public Sector entities.

SNAP-ON INDUSTRIAL

Snap-on Industrial is an manufacturer, and marketer of high-end tools and equipment for professional use in the transportation industry including the automotive, heavy duty, equipment, marine, aviation, and Military industries. Headquartered in Kenosha, Wisconsin

SOLAR STIK, INC

Saving lives across the globe through innovative power solutions.

SOUNDGEAR

Starkey/SoundGear is a privately held, global hearing technology company headquartered in Eden Prairie, Minnesota. Founded by Bill Austin in 1967, Starkey is known for its innovative design, development, and distribution of comprehensive digital hearing systems. Led today by President and CEO Brandon Sawalich, Starkey is the only American-owned provider of hearing technologies. The company has more than 5,000 employees, operates 29 facilities and does business in more than 100 markets worldwide. Learn more at starkey.com and soundgear.com

SPIRITUS SYSTEMS

TO BE, RATHER THAN TO SEEM

We strive every day to design and manufacture equipment that exceeds the users' expectations and pushes past the industry status quo. All of our equipment is designed with an end state in mind. We spend time with users of various walks of life to form an educated and accurate picture of their needs. Our design philosophy calls on our own military service, user feedback and experience, as well as our advanced United States based manufacturing techniques to bring quality equipment to the marketplace.

STANLEY BLACK & DECKER

Stanley Black & Decker is The World's Largest Manufacturer of Hand Tools, Power Tools, Power Tool Accessories and Industrial Storage. We are US Owned and Operated and Offer 15,000+ TAA Compliant Solutions and 13,000+ COO US Compliant Solutions.

STREAMLIGHT, INC.

Streamlight, Inc. is the industry leader in portable illumination, handheld flashlights and weapon-mounted lighting products. Based in Eagleville, PA, Streamlight has over 52 years of manufacturing, design and engineering in the portable light market. Our products are standard issue for every U.S. military branch of service, deployed globally in direct combat settings, aviation missions, maritime / naval operations, law enforcement and first responder applications.

STREET SMARTS VR

At Street Smarts VR, we strive to make the best training technology available to our law enforcement, military, and first responder professionals. Leveraging commercial-off-the-shelf technology, we engineer fully immersive virtual reality scenarios sourced straight from the real world in an expanding scenario library that stays abreast of our users' constantly changing training needs. Our solution is both hyper-realistic, hyper-portable, and capable of deployment at scale across an enterprise, at a fraction of the price of legacy training solutions.

STUDIO NETWORK SOLUTIONS (SNS)

Studio Network Solutions (SNS) is a creative, award-winning, media technology company specializing in secure, centralized storage solutions for visual information. All SNS solutions are engineered, assembled, and tested in Saint Louis, Missouri, USA, including the scalable EVO shared storage solution and the man-packable MOD server. SNS solutions come with the award-winning EVO Suite, featuring built-in media asset management, data transfer automations, and advanced workflow tools that integrate with other leading creative technologies, including Adobe® Premiere® Pro. Trusted by military and government organizations around the world, SNS provides the tools to store and

EXHIBITOR INFORMATION

manage visual information, which enables streamlined workflows, faster decision-making, and ultimately, more efficient mission planning and execution. Learn more about SNS solutions at <https://www.studionetworksolutions.com/solutions/military/>.

SUREWERX

At SureWerx, our mission is to manufacture the most innovative and rigorously tested products for our customers' safety and productivity. Our end-to-end product portfolio includes 16 leading brands with a full offering of PPE, safety, and tool and equipment solutions.

SYMETRICA

Symetrica stands at the forefront as a global expert in operational security threat detection and identification. With offices and manufacturing sites in Southampton, UK and Westford (MA) in the US, we specialize in offering real-world security solutions for everyday challenges. Our diverse product range spans radiation detection handheld devices, backpacks, mobile units, static and modular portals, and our cutting-edge Discovery software; a device-agnostic solution seamlessly integrating with any security threat detection asset, providing users with a centralized view of events through a simple-to-use interface.

TD SYNEX | DELL

Partnering with TD SYNEX and Dell Technologies in the public sector offers a comprehensive suite of PC, Compute & Networking, Storage and APEX solutions tailored to meet the unique needs of government agencies at all levels. Dell Technologies offers comprehensive IT solutions to modernize and simplify government infrastructures. Our services ensure efficient and secure delivery to citizens through cutting-edge technologies like Edge, 5G, Data Management, AI/ML, Security and Cloud. TD SYNEX complements these solutions by offering specialized services and support to ensure seamless integration and implementation within the public sector.

TELEDYNE FLIR

Teledyne FLIR provides proven CBRNE sensing capabilities, helping people around the world save lives, protect the environment, and enhance productivity. Teledyne FLIR's vision is to safeguard people and property around the world and delivering superior situational understanding to expedite decision-making during defense, counterterrorism, homeland security, HAZMAT, law enforcement, public safety, health, environmental, and commercial missions.

THE SKYDYNE COMPANY

The Skydyne Company is a veteran-owned, small business that specializes in the design and manufacture of Expeditionary Support Equipment. Skydyne's TOC and C2 products are durable, lightweight, and cost-effective solutions for your customer's mission. Over 70 years of experience fabricating rugged cases for the military ensures that every product we make excels in extreme environments. Skydyne is a manufacturing company which is positioned to address your customers' needs.

THERMO FISHER SCIENTIFIC

Thermo Fisher Scientific equips first responders, law enforcement, military, and government agencies with advanced threat detection, identification, and mitigation solutions that help to keep them safe and make it easier to protect communities. Our technologies and solutions provide highly reliable, real-time detection and identification of radiation, explosive materials and precursors, toxic chemicals, and narcotics in the field. We enable safety and security personnel to be more effective and efficient in their work and to be more confident in their own safety as they perform this dangerous and invaluable service.

THIN AIR GEAR USA

Thin Air Gear was born out of necessity. As I traveled through airports, I watched our soldiers rucking two olive green duffels, each weighing 75-100 lbs, along with their other gear and weaponry. The vision became clear. Our company needed to develop a bag that was functional, wheeled, and ergonomic which could be used 365 days a year, not just on the trip overseas and back. We researched the market and other US manufacturing companies that were building "deployment bags" and found that none of them were developed for the needs of the soldier.

We began our development in the spring of 2007 with the assistance of CSM Capel of the 82nd Airborne, who took the

EXHIBITOR INFORMATION

time to T&E and give us feedback on our 1st generation bag. Since that time, we have continually upgraded our bag based upon our customers' feedback, and now feel we have the most functional, ergonomic, and operational bag in the market. We are so confident in its design and workmanship that all Thin Air Gear bags carry a Limited Lifetime Warranty.

We will never stop the process of improving, inventing, and most of all...listening to our customers. Our motto is "Gear for the Long Haul" for two reasons: first, we recognize the incredible sacrifice our soldiers make when deploying, and second, our gear is meant to last a lifetime.

THRUVISION INC.

Thruvision is a company that provides people security screening technology. Their patented Passive Terahertz Technology (PHT) can detect hidden metallic and non-metallic threats, such as weapons, explosives, and contraband

TIREJECT

TireJECT manufactures Durable, Long Lasting, Instant Tire Repair products for automotive and off-road tires. TireJECT is family owned and operated since 2008 and has repaired hundreds of thousands of tires. TireJECT has thousands of 5-star reviews online. We are located in Lindley, NY.

TRAK MACHINE TOOLS

TRAK Machine Tools designs, manufactures, and sells TRAK Machine Tools with SINUMERIK ONE Controls. Heavy duty machine construction with features needed for production complements the digital native benefits of the powerful SINUMERIK ONE Control. The end result are the finest Machining Centers and Turning Centers in the mid-range market.

TRIJICON, INC.

Trijicon has led the industry in the development of superior any-light aiming systems since the company's founding in 1981. World-renowned for its innovative applications of tritium and advanced fiber-optics, Trijicon manufactures the most advanced riflescopes and sights for tactical and sporting applications.

TULMAR SAFETY SYSTEMS INC.

Tulmar Safety Systems is dedicated to safeguarding those who protect us. With over 30 years of innovation and expertise, we design, manufacture, distribute, and service advanced safety solutions for land, air, and sea applications. Our comprehensive offerings are trusted by Defence, Aviation, and Civil Safety industries globally, ensuring unmatched protection and survivability. Headquartered in Hawkesbury, Ontario, our state-of-the-art 60,000 square foot facility is the hub of our operations, where we develop and refine integrated solutions. Guided by our core values of integrity, caring, and resilience, we are committed to advancing safety standards and delivering reliable, high-quality products that make a difference.

TURTLE PLASTICS

Turtle Plastics is an Ohio based, privately owned company that was established in 1980 by Tom Norton, a visionary in environmental sustainability. We design and manufacture life saving, environmental, health, and safety stabilization products made in the USA from 100% recycled plastic.

UNITY TACTICAL

UNITY Tactical designs components that integrate tactical systems and expand capability for peak performance. We challenge assumptions and identify overlooked problems that impact the human factor so we can develop innovative, quality products to fill those needs. Every detail gives you an edge through efficiency, comfort and safety so you can focus on the mission.

UTS SYSTEMS

UTS Systems is an expeditionary shelter small business that manufactures a complete line of rapidly deployable shelters. UTS shelters incorporate a patented state-of-the-art folding frame design that can be consistently erected in under 10 minutes—no tools required. These shelters are built for a variety of applications and tested for deployment in the most extreme environments. Our design is considered the latest advance in rapidly deployable shelter design because it does not compromise durability to achieve quick and repeatable set up and tear down. These state-of-the-art systems do not require power, special tools, an air compressor, or even a ladder to deploy shelters and create

complexes to support your mission.

VENTUS RESPIRATORY TECHNOLOGIES INC.

Ventus Respiratory Technologies is a pioneering company focused on developing advanced respiratory protection for military, law enforcement, and first responders. Our flagship product, the TR2 Tactical Respirator, offers a lightweight alternative to traditional gas masks, providing high-level particulate filtration while maintaining operational effectiveness.

Key features of Ventus Respiratory Technologies include:

- Innovative respiratory solutions designed for integration with existing protective equipment
- CE-certified TR2 Tactical Respirator, capable of filtering $\geq 99\%$ of solid airborne particulates down to 0.06um
- Strategic partnerships with leading defence equipment manufacturers like Galvion

VIASAT

Viasat provides end-to-end, holistic protection for critical data and communications Providing Type 1 end-to-end encryption and cyber defense to help safeguard proprietary and classified information. Our decades of experience building communications and encryption products — paired with expert analysis of data across our network — gives us groundbreaking insight into the ever-evolving global cyber threat landscape, helping us deliver expert-level security solutions.

VIDERAY TECHNOLOGIES

Videray Technologies develops cutting edge portable X-ray technology, designed for exceptional detection of organic and inorganic contraband in challenging environments. With 140 keV and 160 keV options and dual-imaging capabilities, our solutions (PX1, PX Ultra, PXT and MTP+) ensure safer, faster, and more accurate inspections.

VIKEN DETECTION

Boston-based Viken Detection designs and manufactures advanced vehicle screening solutions for the federal government, international border agencies, local law enforcement and private industry that help detect and thwart the trafficking of narcotics, weapons, explosives currency and even humans being transported illegally across borders.

VITEC

VITEC solutions deliver easy-to-use technology that ensures high-quality, low-latency HD video, capturing live and recorded events for seamless distribution in a multitude of formats anytime, anywhere, to any device.

WEATHERHAVEN RESOURCES, INC.

Weatherhaven is a world leader as a designer, manufacturer and installer of portable turnkey shelters, camps and field hospitals, as well as being an in-service support provider. Founded in 1981 in British Columbia, Canada by the owners of a world-renowned expedition company and an exclusive Vancouver-based construction company, Weatherhaven has grown into a global company focused on multinational projects. From our origins in serving the expedition and mining exploration markets, Weatherhaven's products and services are best showcased in installations that face challenging transportation logistics in remote and extreme environments, or require a high degree of mobility, performance and utility with a focus on sustainable environmental development. From the commercial market, Weatherhaven transitioned into supporting government and non-government agencies, as well as domestic and international militaries with peacekeeping missions around the world with its camp and medical capabilities. For the last several years, Weatherhaven has been listed as one of the top defence companies in Canada for our work and product innovation in the military sector. Since entering the commercial, military, and medical fields, we have focused on developing custom and leading-edge shelter solutions with turnkey options, energy efficiency, re-deployability, and integrated camps and shelter systems. Weatherhaven is proud to continue evolving our product line along with changing societal demands, and staying true to our roots as a dynamic, creative, and agile company. Weatherhaven is an ISO 9001:2015 registered company for the Design, Development, Manufacturing, Installation and Servicing of Redeployable Shelter Systems.

WESTERN GLOBAL

Secure Fuel Storage for Expeditionary Deployment in Austere Locations Western Global is a leading provider of transportable fuel storage tanks and dispensing equipment. Their products have proven to offer a secure, uninterrupted

EXHIBITOR INFORMATION

source of energy and environmental compliance in the most austere locations. Over almost 60 years, their expert engineering teams have worked alongside military veterans with expertise in petroleum to perfect flexible fuel storage services for military applications. With their factory and global on-site training alongside worldwide installation services and spares support, you can be confident with Western Global as your expeditionary partner. Get in touch with their dedicated defense team today.

WESTERN SHELTER

Western Shelter designs mission-specific solutions that perform day after day in the harshest environments. Western Shelter provides you with the toughest shelters and field support systems available. We design our products to protect you against the world's most demanding conditions while providing a comfortable working environment to ensure the mission gets done. Since 1988, we've provided an diverse series of rigid and inflatable framed shelters in multiple sizes and trim levels to meet the needs of any challenge that may come your way. Each shelter supports an advanced suite of accessories that cover climate control, power generation, and much more. To ensure you have access to the protection you need, we also provide customized trailer systems and container-based field hospitals designed to withstand even the most severe environments. FEMA US&R and DHHS teams use Western Shelter as their preferred choice for disaster and medical response applications. We've stood by their side exclusively in response to every major hurricane in the past 30 years. When lives are on the line, we settle for nothing less than to help you get the job done and to get home safely.

WG HENSCHEN AN ABOUND AEROSPACE COMPANY

Distributor of C-Class Aerospace Fastening Systems.

WORLD TRADE LIMITED DISTRIBUTION (WTL) / CASE KNIVES

High performance steel, ball bearing pivots and the highest quality handle materials define the knives that Case and World Trade Limited are proud to offer the brave men and women that bravely protect our country.

XFS GLOBAL

XFactor Solutions Global is recognized globally as the premier choice for semi-permanent, clear span, structures and as the original and sole manufacturer of the Shasta Shelter®, Shasta SportPlex®, and Fastrack® product lines. We are proud to offer products designed, engineered & manufactured in the USA! We sell and service clear span structures worldwide for military, commercial, recreational, and industrial use. We are an innovative, high-tension fabric structure manufacturer that takes pride in bringing the highest quality solutions to our customers. We are equally proud to bring these solutions to our customers cost-effectively, quickly, safely and with excellence in every step of the process.

XGO

XGO is a leading manufacturer of highly technical base layer apparel. XGO's phase system of next-to-skin garments is designed for performance, protection, comfort, and durability. The system is available in our performance, flame-retardant, and Power Skins collections. XGO base layers are 100% made in the USA and Berry-Compliant. These base layers are designed to maximize comfort and performance for any temperature or activity. Athlete Inspired. Military Tested. Visit www.proxgo.com. Call Houston Brady at (910) 673-5290 x44 (office) or (910) 690-3674 (mobile) to discuss our new products!

XONAR TECHNOLOGY INC.

Xonar® empowers security personnel with state-of-the-art screening technology that leverages machine learning and artificial intelligence to minimize human error and maximize throughput and accuracy. When security teams are more engaged and respected, and better equipped to ensure patrons can enjoy themselves without fear or reservations, True Security exists. True Security isn't just the result of the power of our technology, True Security exists because of the people our technology empowers.

ZISTOS CORPORATION

Manufacturer of portable video surveillance systems.

**PREDICT. PROTECT. DETECT. RESPOND:
THE HAZMATIQ ABOVE THE LINE/BELOW THE LINE SYSTEM**

Tuesday, February 18 | 9:00 AM - 10:30 AM | Baltimore 1

Developed by responders for responders, this program simplifies hazardous materials response with a patented, easy-to-understand system. Participants receive laminated Above the Line/Below[®] charts to quickly assess chemical hazards, identify required meters, and determine appropriate PPE in minutes.

**DRUGIQ: RISK-BASED RESPONSE & IDENTIFICATION OF
EMERGING DRUGS AROUND THE WORLD**

Tuesday, February 18 | 9:00 AM - 10:30 AM | Baltimore 2

DrugIQ: Risk-Based Response and Identification of Emerging Drugs is advanced training for law enforcement, first responders, and public safety professionals. The course explores technologies and strategies for detecting and responding to evolving synthetic substances. Participants gain hands-on experience with cutting-edge detection tools and learn about global trends in drug production, trafficking, and abuse. Through case studies and exercises, attendees will assess risks and master the best identification technologies for emerging drug threats.

UNDERSTANDING THE U.S. NATIONAL INFRASTRUCTURE PROTECTION PLAN (NIPP)

Tuesday, February 18 | 9:00 AM - 10:30 AM | Baltimore 3

Attendees from U.S. Government, State/Local, and Private Sectors will understand important elements of the NIPP leading towards building readiness and resiliency for critical assets and community safety.

CHEM, BIO, RAD, NARC, OR BOOM! IDENTIFYING THE UNKNOWN (IDENTIFICATION-IQ)

Tuesday, February 18 | Part 1: 10:45 AM - 12:15 PM | Part 2: 1:15 PM - 2:45 PM | Baltimore 1

IdentificationIQ equips responders with innovative tools and tactics for the rapid identification of chemical, biological, radiological, explosive, and narcotic threats. Designed for HazMat, military, law enforcement, and industry professionals, this course surpasses conventional response methods by delivering streamlined, efficient, and effective training. Participants will gain hands-on experience using advanced identification technologies and detection papers to analyze unknown solids, liquids, and gases. The program emphasizes hazard assessment, including flammability, corrosiveness, fluorine, and radiation risks, while exploring the capabilities and limitations of current technologies in real-world scenarios. IdentificationIQ empowers responders to act with confidence, ensuring safety and precision in high-stakes environments.

TACTICAL OPERATIONAL READINESS

Tuesday, February 18 | 10:45 AM - 12:15 PM | Baltimore 2

Operational Readiness emphasizes preparation, training, standards, and remediation for military and law enforcement tactical teams. It highlights the need for plans that account for both success and setbacks, clear expectations to guide decisions under pressure, and rigorous, safe training that prioritizes versatility. Standards must be consistently met, supported by leadership, and upheld through regular maintenance. When standards fall short, remediation provides a pathway back to excellence, ensuring continuous improvement. This session offers actionable insights into sustaining these principles, reinforcing that teams are only as good as their last performance.

PLANNING & THINKING THE UNTHINKABLE: COUNTERING WMDS

Tuesday, February 18 | 10:45 AM - 12:15 PM | Baltimore 3

Attendees from U.S. Government, State/Local, and Private Sectors will understand the threats of Weapons of Mass Destruction (WMDs), targeted locations, and planning and mitigation measures.

TODAY'S TERRORISM: CYBER INVESTIGATION, EXTREMISM, & SOCIAL MEDIA

Tuesday, February 18 | 1:15 PM - 2:45 PM | Baltimore 2

Explore the ideologies fueling today's ideological divide and the challenges law enforcement faces in maintaining peace. This class examines extremist groups like sovereign citizens, Patriot Front, Antifa, and Boogaloo Bois, alongside violent extremists (HGVE, RMVE, AAGAVE). Attendees will learn to identify subtle indicators of extremist activity, understand their tactics, and leverage tools like social media platforms for investigations.

DEFINING REQUIREMENTS: A RISK BASED PROTECTIVE PLANNING APPROACH

Tuesday, February 18 | 1:15 PM - 2:45 PM | Baltimore 3

Attendees from U.S. Government, State/Local, and Private Sectors will understand important elements associated with defining risks and incorporating mitigation measures towards reducing exposure.

ANSWERS OVER INFORMATION: LI-ION BATTERY RESPONSE

Tuesday, February 18 | 3:00 PM - 4:30 PM | Baltimore 1

Learn lithium-ion battery safety with BatteryIQ, a streamlined system to identify, respond to, and mitigate incidents involving devices from cellphones to electric vehicles. This course provides Battery Response Guides to categorize emergencies, assess hazards, select proper PPE, and apply effective tactics for managing battery-related incidents safely and efficiently.

TACTICAL TRAUMA TRAINING: QUICK CARE TO STAY IN THE FIGHT

Tuesday, February 18 | 3:00 PM - 4:30 PM | Baltimore 2

The Tactical Medical for First Responders program is designed to define a Medical Threat Assessment, to include a medical plan for a tactical operation. Students will learn how to apply techniques to control life threatening bleeding during Care Under Fire in a hot zone. Additionally, they will perform techniques to treat life threatening and non-life-threatening injuries during Tactical Field Care in a warm zone. During the program, students will demonstrate lifting, moving, and extricating victims from a tactical or hostile environment during Tactical Evacuation Care.

THREAT FROM ABOVE: UNDERSTANDING UAS THREAT & MITIGATION

Tuesday, February 18 | 3:00 PM - 4:30 PM | Baltimore 3

Attendees from U.S. Government, State/Local, and Private Sectors will understand the growing threats of Uncrewed Aerial Systems (UASs), planning and mitigation measures, and basic legal implications.

JIMMY ALLEN

Jimmy, a retired EB/MSG Combat Medic, served over 27 years in the US Army. His final role was as Lead Medical Instructor and Observer Coach/Trainer, working with USAR and Active Duty units. He taught Combat Medic recertification (NREMT), Tactical Combat Casualty Care (TCCC), and Combat Lifesaver Courses (CLS). Jimmy deployed to peacekeeping missions in Kosovo, Haiti, and Hurricane Katrina, as well as combat deployments to Iraq and Afghanistan with Field Hospitals, Forward Surgical Teams, and SOCOM assets. He served as JFCOM/NATO Medical Training NCOIC, Medical NCOIC on CERF-P Teams, and taught Medical DECON courses. In his civilian role, he managed DHA's secure messaging EMR system and developed COVID screening protocols used DoD-wide.

BILL EDWARDS

Bill brings over 35 years of experience in operational and technical security, counterterrorism, and leadership. His impressive background includes leading security consulting as a Principal at Thornton Tomasetti and serving as President at Building Intelligence, where he focused on trusted access management solutions. At Phoenix 6 Consulting, Bill leads the security services division, emphasizing the transformative impact of advanced technologies on venue security. His responsibilities include developing comprehensive security strategies, conducting threat and risk assessments, sUAS (drone) evaluations, emergency response planning, counter uncrewed systems/law, left-of-launch planning, and integrating advanced aerial system technologies into security programs.

MICHAEL GEMELLI

With over 33 years of experience in environmental monitoring and emergency response, Mr. Gemelli serves as Director of CBRN/WMD Detection and Mitigation at the MTA. Before joining the MTA 17 years ago, he was part of the EPA's emergency response team, contributing to major national incidents, including the 9/11 World Trade Center response, Amerithrax cleanup, and the Columbia Space Shuttle crash. At the MTA, he oversees the protection of customers and employees from Chemical, Biological, Radiological, and Nuclear threats. Recently, he has applied CBRN expertise to strengthen the MTA's pandemic response and resilience.

JEFF GONZALES

Jeff L. Gonzales, founder of Trident Concepts, LLC, is a U.S. Navy SEAL and modern warfare expert with a distinguished naval career, including numerous combat operations worldwide. As a former BUD/S instructor, he now trains, evaluates, and consults with military and law enforcement on special operations and homeland security. Jeff brings a combat-proven mindset, high-intensity training, and operational readiness to counter emerging threats. His expertise has earned recognition as an industry leader by government, state, and local organizations, making him a sought-after authority in special operations training.

MATTY GUTWILL

Matty Gutwill, a Law Enforcement Training Manager at NOBLE, has over 34 years of experience in county, city, and federal agencies. Holding a B.S. in Criminal Justice, he brings expertise in public safety, officer training, and program development. Matty began his career with the Framingham Police Department, serving as a Police Officer and Narcotics Detective, where he established the Opioid Program and created safety protocols. From 2004 to 2017, he was a DEA Task Force Officer, dismantling drug trafficking networks and collaborating with federal agencies like the DEA, FBI, and ATF. As a certified instructor, Matty specializes in narcotics, money laundering, surveillance, and hazardous materials, developing impactful training programs nationwide.

KEVIN HENDRICKS

Keven Hendricks is a law enforcement veteran with almost two decades of experience, previously serving as a task force officer for two separate federal agencies. He is a published author with the FBI Law Enforcement Bulletin and American Police Beat and currently works as an instructor for various police training agencies, teaching a class for law enforcement on dark web and cybercrime investigations. He is a certified cybercrime examiner and certified cybercrime investigator by the National White Collar Crime Center, a certified cryptocurrency investigator through the Blockchain Intelligence Group, and a certified digital asset professional through the Global Digital Asset & Cryptocurrency Alliance. He is the founder of the Ubivis Project – StopDarkwebDrugs.com.

INSTRUCTOR BIOS

CHRIS HIGH

Christopher High, DoD Training Manager at NOBLE, brings over 22 years of law enforcement experience, including roles with the Connecticut State Police and Stonington Police Department. As a Field Office Supervisor for the Statewide Narcotics Task Force (HIDTA Program), he managed complex investigations and served on the New England Clandestine Laboratory Team, earning site safety certification. Christopher is a Tactical Medical Care Instructor and has a 22-year military career, including service as a Military Police Officer, UH-60 Black Hawk Pilot, and MEDEVAC Flight Company Commander, with deployments to Iraq, Afghanistan, and beyond. A Commercial/Instrument Rotorcraft Pilot with 2,000 flight hours, he holds a Criminology degree from The Ohio State University and has earned numerous awards, including U.S. Attorney awards, lifesaving honors, air medals, and senior aviator wings.

EDWARD LEVY

Edward M. Levy is the Director of Critical Infrastructure for NOBLE Supply & Logistics, overseeing the provision of essential equipment, technology, and training aligned with the US National Infrastructure Protection Plan. He has held senior security executive roles at Lone Star Funds, MetLife, Thomson Reuters, Pfizer, CIT Group, and the Empire State Building. A retired U.S. Army Lieutenant Colonel with over 21 years of service as a Military Police officer, Ed served in key command and staff positions in the U.S. and Europe. He holds a BS from Western Carolina University, an MPA from the University of Oklahoma, and is a graduate of the FBI National Academy and Army Command & General Staff College. Ed also served as an Assistant Professor at West Point.

DAN O'NEILL

Dan is the President and CEO of Advanced Data Risk Management (ADRM). He has over 25 years of security consulting experience and has led security engagements for clients throughout the world. ADRM currently has 30 full time employees and offers risk assessments, emergency response planning, system design and managed security services. Current clients include Dell, Fidelity, JLL, Harvard, MIT, UPenn, and Amazon Web Services. ADRM is currently operating in 27 countries throughout the world. Prior to the security industry, Dan was a Captain in the U.S. Army where he was the Honor Graduate of Army Ranger School and was also a recipient of the Douglas MacArthur Leadership Award. Dan has a Bachelor of Science Degree in Business from Northeastern University and a Masters of Business Administration from Harvard Business School.

BOB SUAREZ

Bob Suarez, a HazMat and WMD specialist with over 20 years in fire and emergency response, is a Captain in the Special Operations Section of the Des Moines Fire Department. He oversees HazMat, Technical Rescue, and Swift Water/Ice teams, coordinating specialty responses and serving as Incident Commander during critical assignments. As HazMatIQ Program Manager for NOBLE, Bob enhances hazardous materials response training. He's an IAFF Master HazMat/WMD Instructor and a member of the NFPA 400 Committee, co-authoring training for the Hazardous Materials Fusion Center. With a Master's in Homeland Security Studies from the Naval Postgraduate School, Bob trains first responders nationwide, including FDNY and Chicago Fire, solidifying his role as a leader in HazMat and WMD response.

SNOW
JOINT

CLOSING RECEPTION

LOWER ATRIUM

WEDNESDAY, FEBRUARY 19

5:00 PM - 7:00 PM

INSTRUCTOR BIOS

JORDAN HARRISON

Detective Jordan Harrison (Ret.) is a Senior Trainer at NOBLE with over 22 years of law enforcement experience, including 18 years in the LVMPD Narcotics Unit. He specialized in undercover operations, working with federal agencies like the DEA and FBI, and is certified in clandestine labs and hazardous materials. Since retiring, he has trained law enforcement nationwide in narcotics analysis and hazardous material identification. At NOBLE, he teaches advanced detection technologies such as Raman and FTIR spectroscopy, sharing his expertise with agencies like the FBI, DEA, and CBP.

FRANK HIDALGO

Frank Hidalgo is a former Texas law officer and Special Agent with the US Drug Enforcement Administration, retiring in 2018. His experience as a Texas officer includes several years as a homicide detective, narcotics officer, SWAT officer, and instructor in death and crime scene investigations. As a DEA Agent, he specialized in clandestine lab investigations and tactical operations in addition to duties as a DEA Firearms Tactical Instructor and Tactical EMT. He is a graduate of Sam Houston State University with a BS in Law Enforcement and Police Science, and a Master of Arts in Criminal Justice and Criminology.

ROD HUNT

Rod Hunt, a Senior Tactical Trainer for NOBLE, brings 26 years of distinguished law enforcement experience. A retired Sergeant from the Las Vegas Metropolitan Police Department, Rod held assignments in patrol, gangs, robbery, and homicide. As a SWAT Team Leader for eight years, he led critical operations, including over 1,139 search warrant services and 350 high-risk callouts for barricades, hostage rescues, and other emergencies. Rod now manages Emergency Response Teams at MGM Resorts International. His expertise in tactical operations, crisis management, and emergency response makes him a vital contributor to NOBLE's training programs.

DON OSTROWSKI

Don Ostrowski, Senior Training Manager at NOBLE, brings over 28 years of experience in law enforcement and private security. He has led specialized teams such as the Oakland County Hazardous Materials Team, Michigan Regional Terrorism Response Team, and Troy Special Response Unit. Don has overseen divisions including Threat Assessment, Special Investigations, Training, Prisoner Lockup, and Communications. He co-chaired the Detroit Southeast Michigan UASI IT Committee and contributed to the InterAgency Board for Equipment Standardization and Interoperability. His national security work includes roles with DHS's Domestic Nuclear Detection Office and AOAC Stakeholders Panel. Don's leadership and expertise drive NOBLE's critical training programs.

ROD SCHAEFER

Rod Schaeffer is a tactical trainer with over 30 years in law enforcement and public safety. As a Senior Tactical Trainer at NOBLE, he specializes in incident command, crisis management, and tactical operations. A Captain at the Lee's Summit Police Department, he oversees Patrol and Special Operations, with expertise in SWAT, EOD, and emergency response. Schaeffer is also an instructor with the National Tactical Officers Association and consults through LizMed LLC. He has developed programs like ICART and AVIR and holds certifications in crisis intervention, firearms, and defensive tactics.
