

Ocean Disclosure Project 2015

Key

- Midwater trawl
- Hook and lines
- Long lines
- Seine nets
- Purse seine
- Gillnets
- Pots and traps
- Bottom trawls
- Dredge
- Bycatch
- Protected, endangered & threatened (PET) species
- Wider food web
- Benthic habitat
- General notes

Fishery name and location	Fishing gear used	Certification or FIP	Category	Environmental notes
<p>Antarctic krill Atlantic Southern Ocean Antarctica</p> 		<p>Certified</p>	<p>A</p>	<ul style="list-style-type: none"> No direct impact on PET species. This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored. No impact on the benthic habitat.
<p>Atlantic menhaden North-West Atlantic United States</p> 		<p>Certified</p>	<p>B</p>	<ul style="list-style-type: none"> No direct impact on PET species. This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored. No impact on the benthic habitat.
<p>European sprat North Sea European Union</p> 		<p>Certified</p>	<p>B</p>	<ul style="list-style-type: none"> No direct impact on PET species. This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored. No impact on the benthic habitat.

Fishery name and location	Fishing gear used	Certification or FIP	Category	Environmental notes
Gulf menhaden Gulf of Mexico United States 		Certified	B	 No direct impact on PET species.  This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.  No impact on the benthic habitat.
Araucanian herring Chilean Chile 		FIP rating is D, fishery is certified	B	 No direct impact on PET species.  This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.  No impact on the benthic habitat.
Lesser sand-eel Central Eastern North sea European Union 		Certified	B	 Bycatch is considered low in this fishery.  Sandeel is an important prey species for a variety of predators, including fish, marine mammals and seabirds. Fishing on sandeel has been found to affect some surface feeding bird species, especially kittiwake and sandwich tern  Bottom trawls impact the benthic habitat.
Anchoveta Chilean regions III and IV (2) Chile 		Certified	B	 No direct impact on PET species.  This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.  No impact on the benthic habitat.
Anchoveta Peruvian Northern Central stock Peru 		Certified	B	 No direct impact on PET species.  This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.  No impact on the benthic habitat.

 Bycatch
 Protected, endangered & threatened (PET) species
 Midwater trawl
 Gillnets
 Hook and lines
 Pots and traps
 Long lines
 Bottom trawls
 Seine nets
 Dredge
 Purse seine
