Have you heard of art therapy?

Did you know that our hand can not be censored as much as our language and our mind? That what you capture on paper, in any way - you do not need to have artistic skills - is what is inside you.

1- *Drawing and Talking* is a safe and gentle therapeutic approach, which provides an effective way for both children (and adults) to process emotional pain or trauma they may be experiencing. People are impacted emotionally by many different events, struggles or traumas. Within the sessions, the individual will draw anything they choose and will be encouraged to talk about what they have drawn using storytelling language (like metaphors) to help them make sense of their internal world.

The technique is intended to allow the child to play, by drawing a picture, and process any emotions they are holding internally in a safe and non-confrontational way, working at their own pace.

2- *Sand Play* Although they will not be 'Drawing', Sand Play uses the same approach as Drawing and Talking and the individual will be allowed to play with the sand tray and accompanying toys. They will then work with the Drawing and Talking Practitioner to tell a story about the sand work that they have created, and we know this helps people to express and then process their inner world and feelings within.

The sessions remain confidential between the person accessing support and the practitioner. At the end of each session, your individual's picture will be put into their folder and kept safely away until the next session.

At the end of all the work (**12 sessions**), the folder is handed back to them to keep as they wish.
