You can follow and tag @OpenSupplyHub on LinkedIn and Twitter:

- [Twitter](#)
- [LinkedIn](#)

### Twitter:

- Here is a Click to Tweet, to make sharing easy: <https://ctt.ac/3DYIk>
- Sample text: A groundbreaking new platform that uses #opendata to collaboratively map production facilities in global supply chains is now live. Check out @OpenSupplyHub! It's free to use: opensupplyhub.org

### LinkedIn:

- Sample text: A free and groundbreaking new tool is now available for those working with global supply chain data. @Open Supply Hub is an accessible, collaborative, supply chain mapping platform, used and populated by stakeholders across sectors and supply chains. Their goal: opening up supply chain data for the benefit of all. Learn more at: [www.opensupplyhub.org](http://www.opensupplyhub.org)
-

## Newsletter Blurbs:

### Blurb 1:

#### **Open Supply Hub: A new, free supply chain mapping platform**

[Open Supply Hub](#) is making global supply chain data accessible for all. This open data platform is populated and used by companies, civil society organizations, factory groups and other supply chain stakeholders around the world and across multiple sectors.

By opening up global supply chain data for the first time at this scale, Open Supply Hub allows companies to showcase their commitment to supply chain transparency and find other organizations connected to the same facilities. Not only does this improve insights about facilities globally, but it also encourages sector-wide collaboration, allowing everyone to more efficiently tackle the biggest social and environmental challenges of our time. Learn more and get involved:

[www.opensupplyhub.org](http://www.opensupplyhub.org)

### Blurb 2:

#### **Introducing Open Supply Hub**

We need accessible, quality supply chain data to address the biggest issues of our time. Modern slavery, GHG emissions, climate change impacts and deforestation cannot be efficiently tackled until we have open and reliable data to work with.

That is exactly what [Open Supply Hub](#) is looking to create. Now live, Open Supply Hub is an accessible, collaborative, supply chain mapping platform, used and populated by stakeholders across sectors and supply chains. Try uploading, searching or downloading supply chain data for free at [www.opensupplyhub.org](http://www.opensupplyhub.org).
