The Rotating Tile Floor Display provides a dynamic and engaging way to showcase Anatolia's porcelain surfaces in large-format sizes. Designed for practicality and impact, this system accommodates a range of tile formats and thicknesses, offering flexibility to showcase multiple product sizes within a single cohesive display.

Each panel smoothly slides out and rotates upward, positioning the surface horizontally for closer inspection. This interactive mechanism allows customers and designers to experience the details, finishes, and craftsmanship of each tile with ease. Every rotating section is double-sided, featuring two different tile colors per panel, maximizing the variety displayed within a compact footprint.

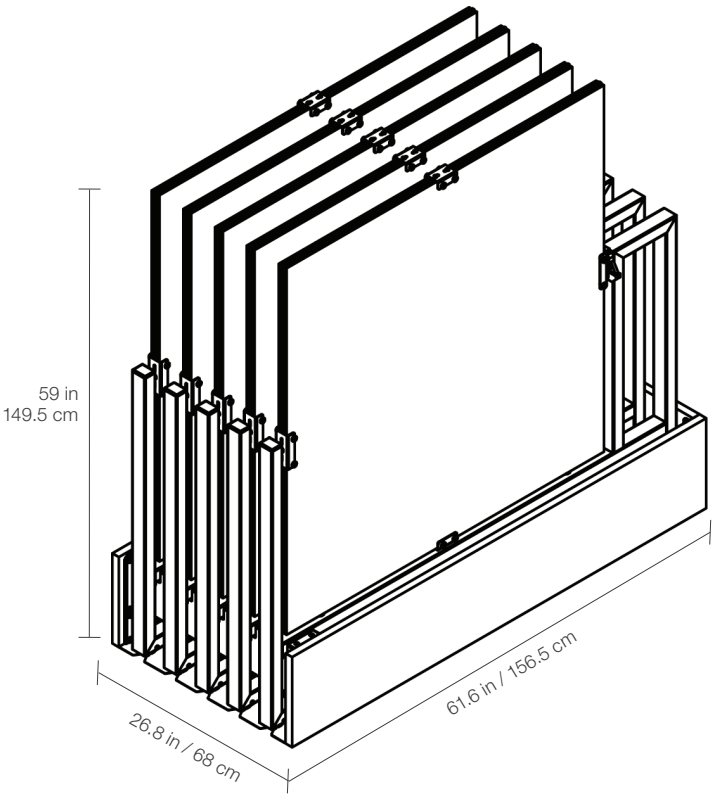

With its functional design and efficient use of space, the Rotating Tile Floor Display delivers an elegant showroom solution for presenting large-format tiles in an accessible and impactful way.
