ANATOLIA'S COLLECTION OF *SINTERED STONE SLABS*: THE EPITOME OF ELEGANCE, DURABILITY, AND VERSATILITY /

Immerse yourself in a world where every surface becomes a canvas, a living tapestry of stories and endless inspirations. Experience the flawless combination of high-performance sintered stone and cutting-edge design, resulting in meticulously crafted surfaces built to endure and radiate an unmatched level of sophistication. Meticulously crafted with state-of-the-art technology, each piece is thoughtfully designed to faithfully capture the intricate characteristics found in natural stone. Brought to life through an extensive availability of natural stone slabs, captured with patented scanning technology, designed carefully with a unique true to nature vision. Expect nothing less than an unalterable beauty that will elevate any space to new heights of sophistication.

CHEMICALS AND STAINS

The natural features of stone are reproduced on sintered stone slabs. Thanks to cutting-edge digital print technology and state-of-the-art scanning, the intricate details and nuances of the design are skillfully captured, resulting in a design vision that exudes precision and a remarkable aesthetic appeal.

Anatolia's collection of sintered stone slabs offers a luxurious look and feel, and can instantly transform the look of any room. They are also very easy to care for and maintain, making them a great choice for busy households. If you're looking for a way to add a touch of luxury to your home, Anatolia's sintered stone slabs are the perfect choice.

THE VISIONARY FORCE BEHIND THE COMPANY'S
RISE IN THE REALM OF SINTERED STONE SLABS /

The company holds a prominent position in the global tile market. Continuous innovation, technological research, an international outlook, and social and environmental responsibility are the core values that Anatolia has consistently upheld in its ongoing pursuit of excellence. The construction of the new Anatolia factory, located in the majestic Gulf of Izmir, Turkiye, and intended for the production of sintered stone slabs, is currently ongoing, and production has commenced. The facility will also house the company's research and development department, showrooms, and offices—a major innovation powerhouse with a state-of-the-art manufacturing plant and logistics center.

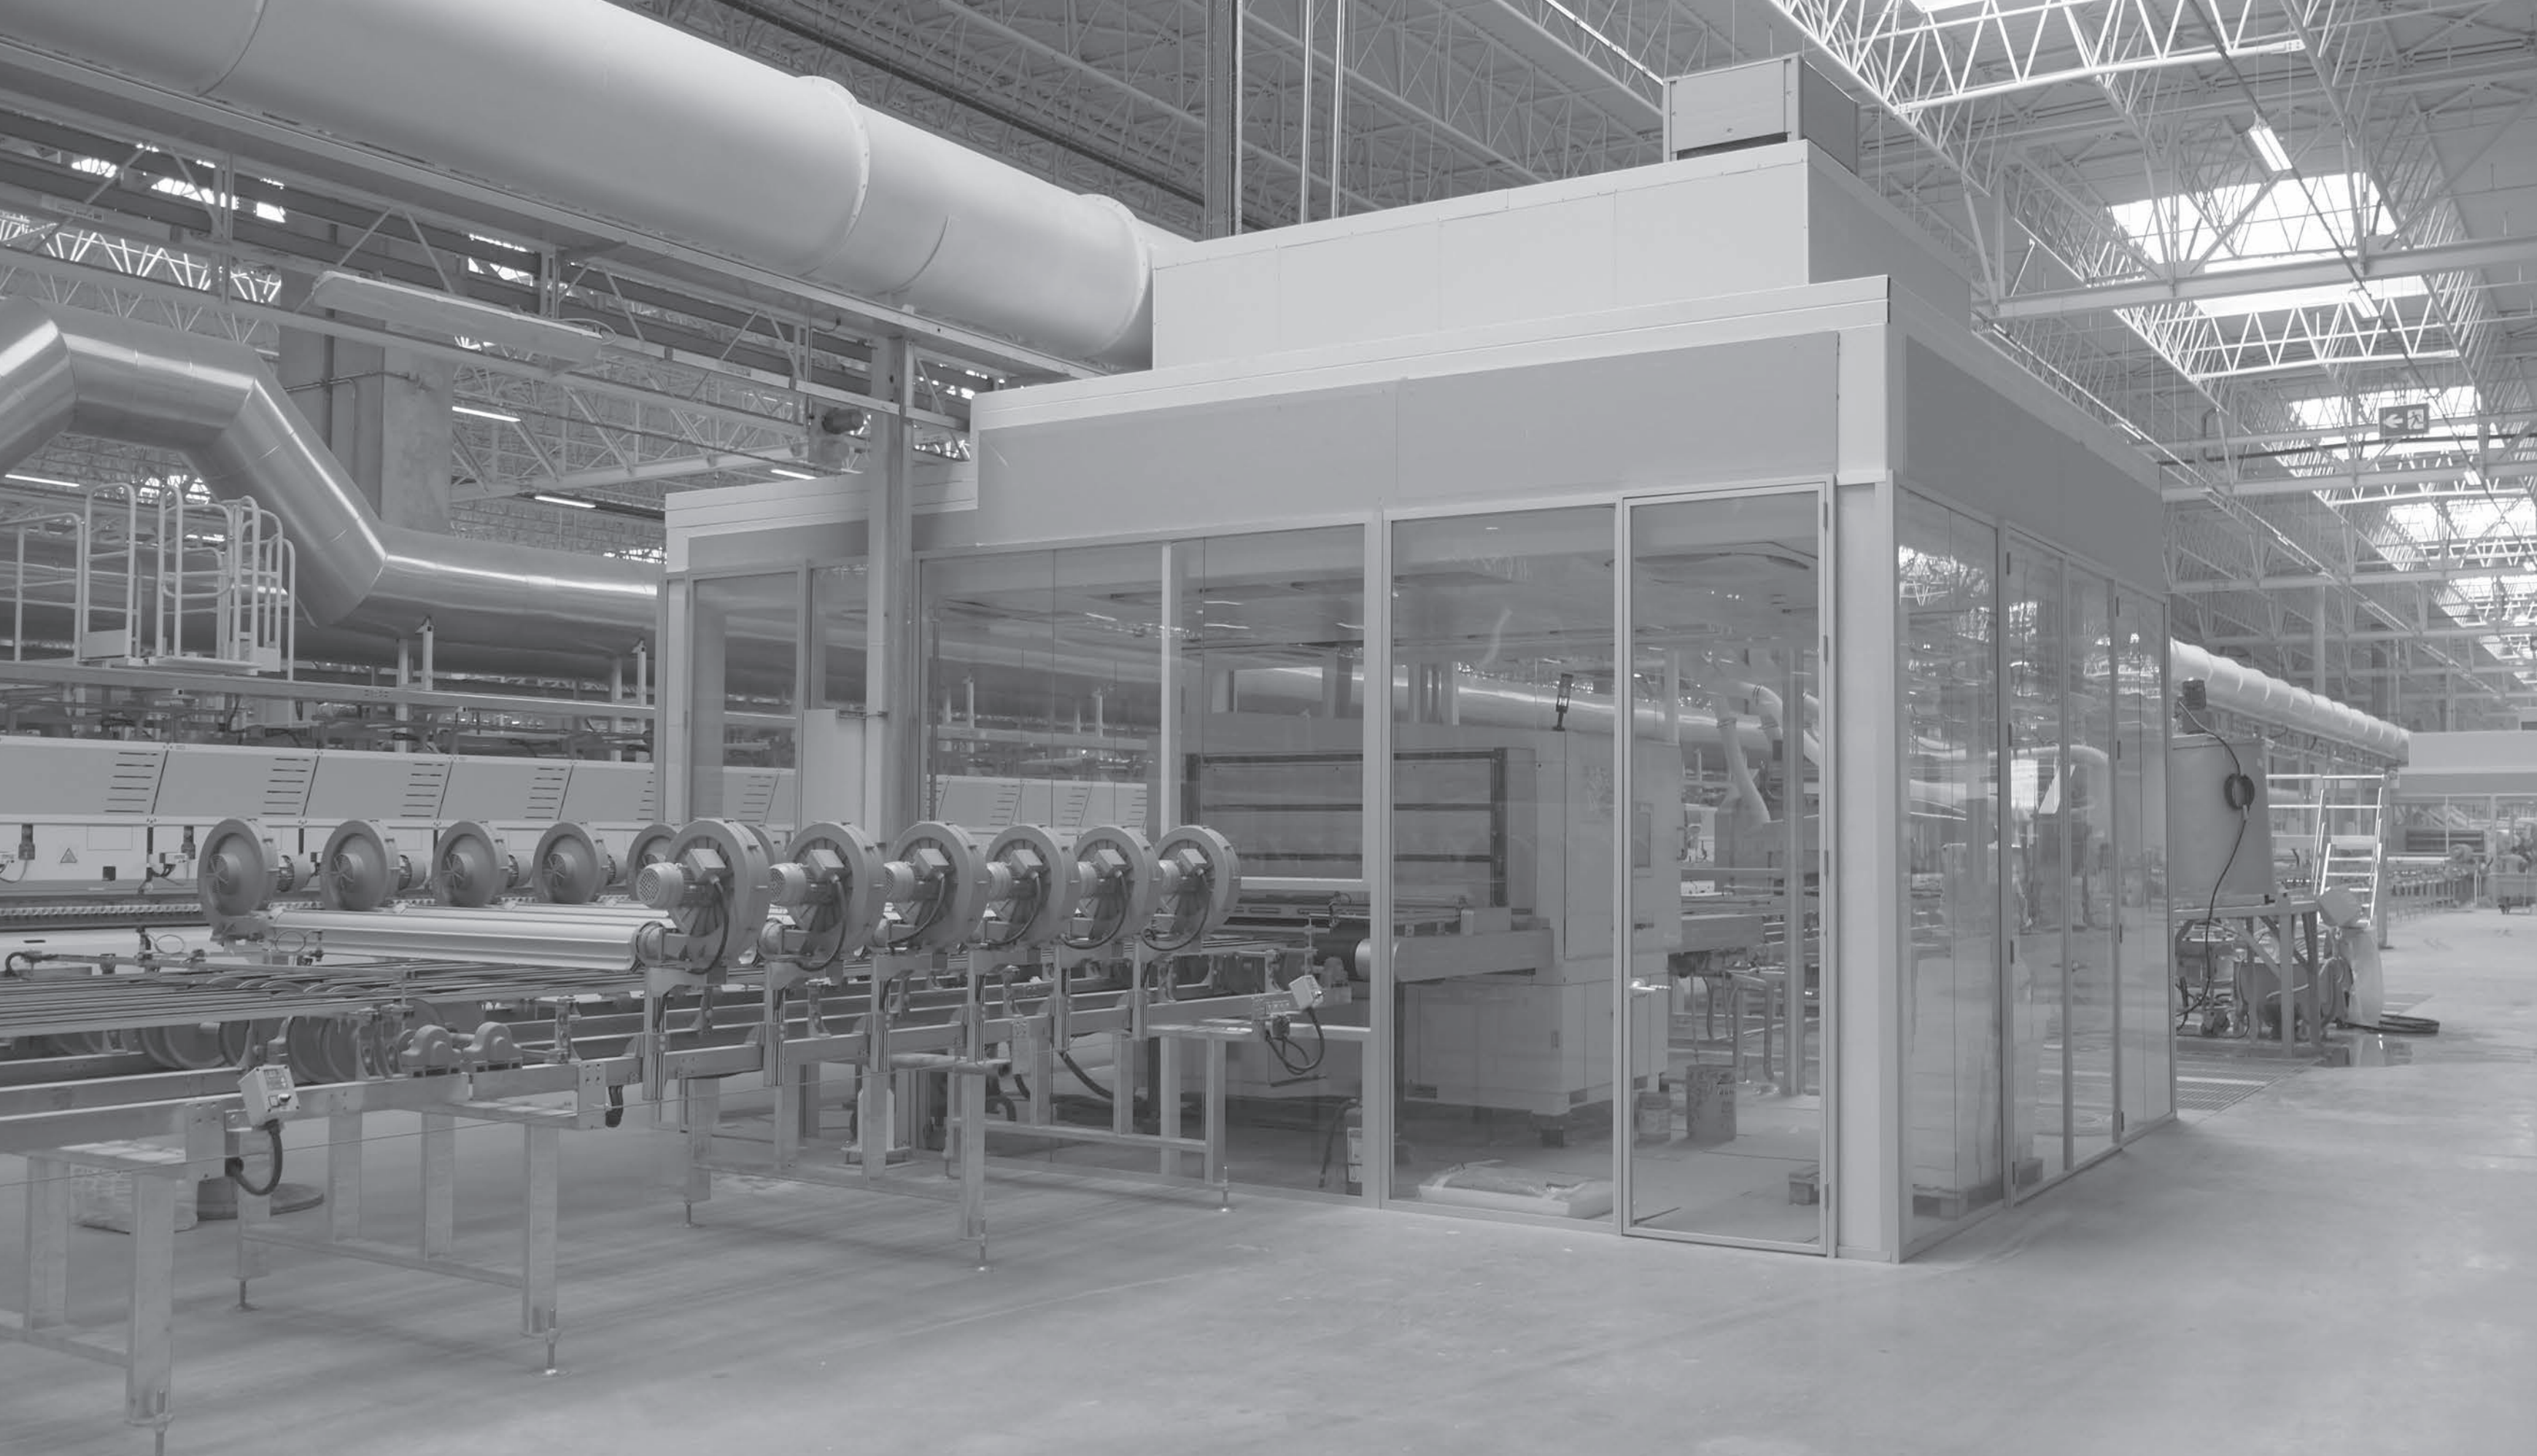

Designed in partnership with Canadian studio Micacchi Architecture and Iglo Architects of Turkiye, the facility emphasizes and is a testament to Anatolia's passion for design and penchant for innovation. It features three distinct structures that, together, form an integrated production and design unit. The first is the main administrative building, a grand and refined architectural masterpiece that houses office space, showrooms, and research and product development labs. Simply walking through the space takes one on a visual journey through Anatolia's aesthetic vision. The building adjoins a production plant with a planned total of ten lines equipped with advanced manufacturing equipment for producing tiles and slabs. The plant is conceived as a space for designers to experiment with materials and diverse methods to bring novel products to life. The intuitive and efficient building layout is accentuated by solid stone blocks and long, glass-clad voids, favoring focus and stability. Finally, an adjacent centralized storage space ensures the efficient and monitored gathering of both raw materials and finished products. With an impressive 2,267,450 ft² / 210,653 m², the facility is one of the largest and most technologically advanced in the world.

The construction of the buildings and of the innovative, streamlined system for stocking and feeding natural raw materials into production lines to reduce waste and energy consumption are nearing completion. The commencement of the subsequent phase in the construction of the production lines has been initiated.

The upcoming facility will have the capability to manufacture sintered stone slabs in expansive dimensions of 160 x 320 cm, and with varying thicknesses to cater to the specific requirements of the market. The proposed construction project will incorporate cutting-edge production technologies and prioritize sustainability within the industry.

The company's investment in the production of sintered stone slabs is groundbreaking, demonstrating its unwavering commitment to empowering valued customers in an ever-changing and highly competitive industry. Anatolia is poised to take the lead in meeting the surging demand for slabs with its exceptional offerings of sintered stone slabs. Join Anatolia on its extraordinary journey to redefine the essence of elegance and sophistication.

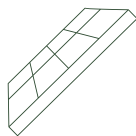

THE HEART OF OUR OPERATIONS /

LEED
SOLAR PANELS
FACILITY *WATER* TREATMENT
KILN AND PRESS
ENERGY SAVINGS
RAINWATER COLLECTION
SYSTEM

Anatolia's manufacturing facility, warehouse, and operational infrastructure have been carefully conceived to harmoniously integrate cutting-edge technology, thoughtfully harnessed to minimize our environmental footprint, enhance operational efficiency, and above all, produce industry leading products for the global design community.

LEED Certification – The production facility and administrative office building are designed and constructed with LEED certifications, which provides a framework for healthy, highly efficient, and cost-saving green buildings, which offer environmental, social and governance benefits.

SOLAR PANELS – Cutting-edge solar panels, encompassing the entire roof of the facilities at a total of 2,267,450 sq ft / 210,653 m², are being installed and poised to generate an impressive 21.5 MW of energy. This substantial output is anticipated to fulfill a significant portion of the energy needs of our production plant, while concurrently facilitating a substantial reduction of carbon emissions. This environmentally conscious initiative will effectively prevent the release of 19,000 tons of carbon into the atmosphere annually.

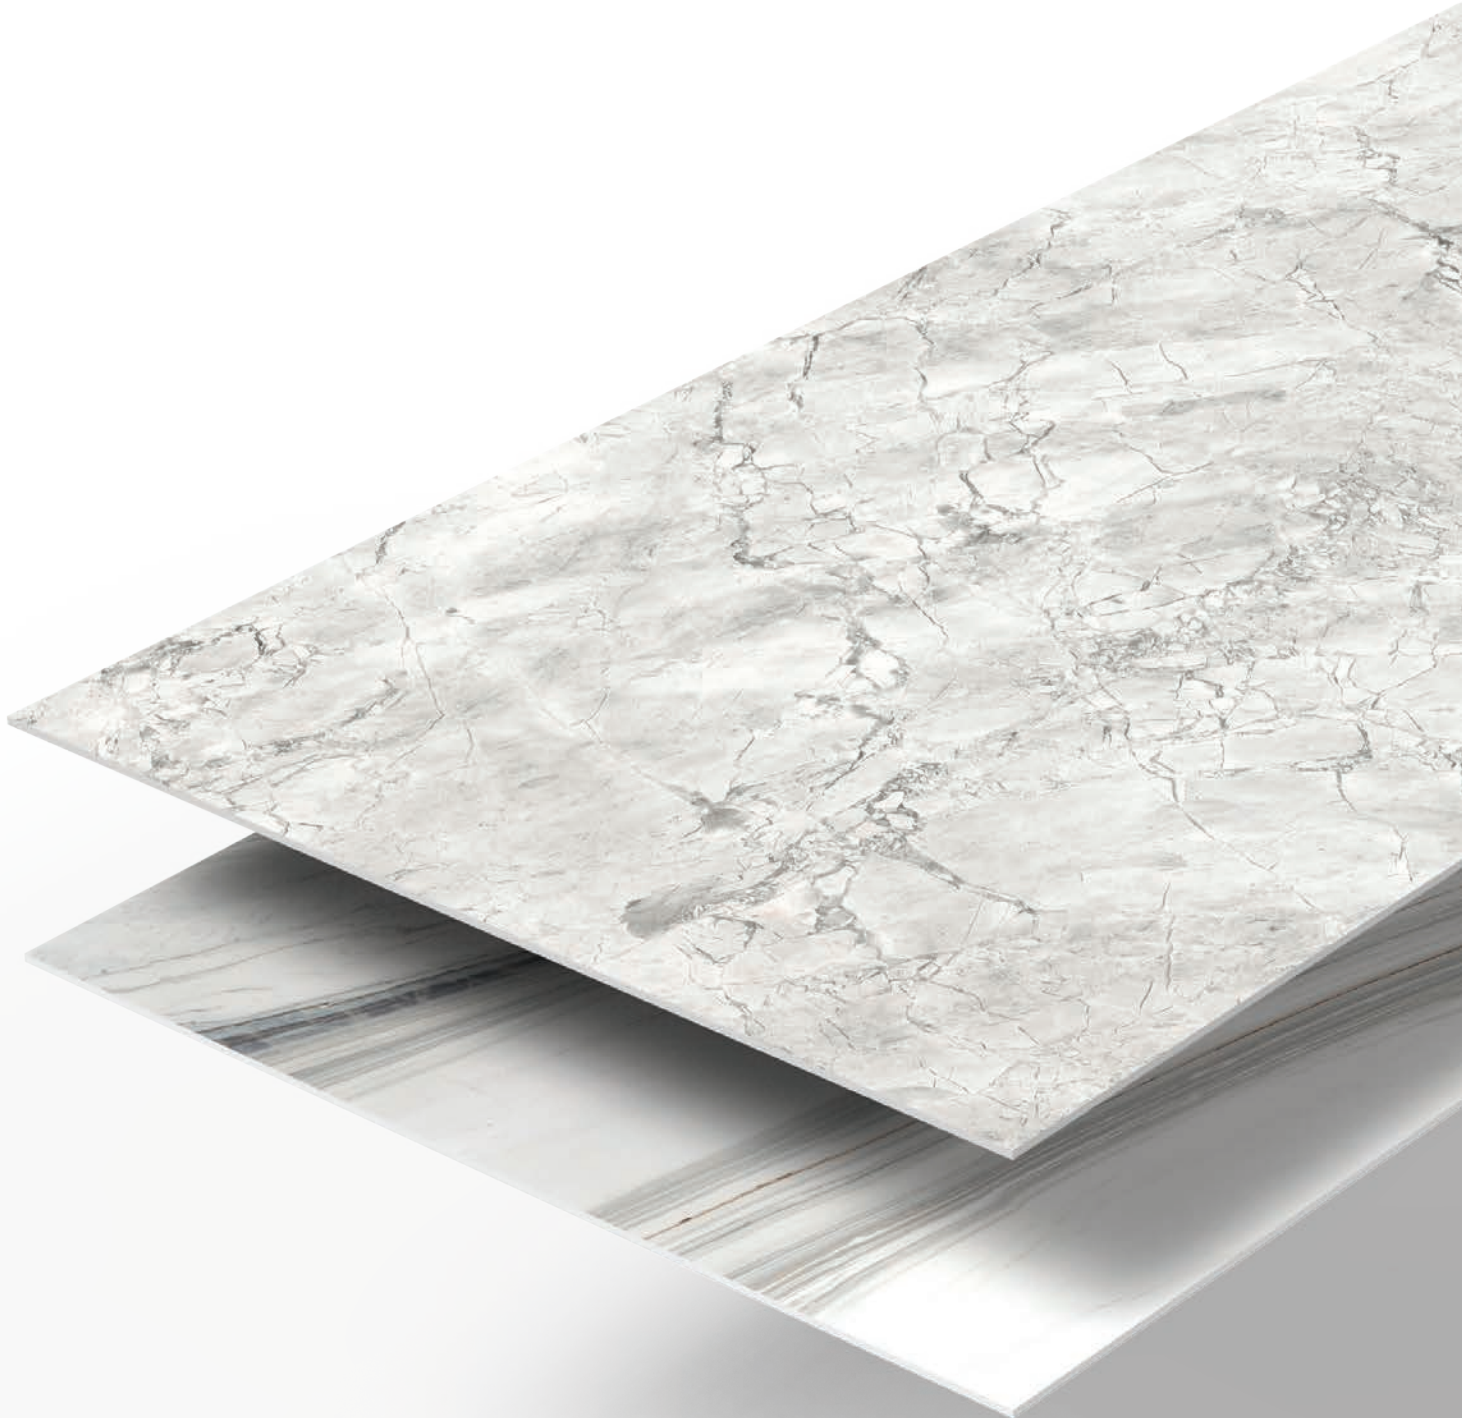

FACILITY WATER TREATMENT – Our operational water resources are in a 100% closed-loop recycling system, employing state-of-the-art recycling and treatment technologies at the height of industry standards. Housed indoors within our production facility, our treatment plant serves as a pivotal element in our commitment to environmental best practices. This strategic placement effectively curtails the risk of environmental water contamination, ensuring the utmost purity of our product offerings. Our indoor treatment significantly reduces evaporation, effectively mitigating water loss during the process and solidifying our position as one of the industry's preeminent examples of water efficiency.

RAINWATER COLLECTION SYSTEM – Sustaining a tranquil and aesthetically pleasing outdoor green oasis for employee relaxation necessitates a reliable water source to nurture thriving plant life. In our commitment to water conservation, we have implemented a system that harvests rainwater from a generous 31,815 m² roof top, storing it in a 2,100 ton cistern for efficient utilization in our irrigation process.

KILN AND PRESS ENERGY SAVINGS – Anatolia has strategically aligned with global machinery innovation leaders, including the renowned Sacmi, celebrated for their pioneering research and groundbreaking innovations. Sacmi's cutting-edge technology epitomizes world-class ingenuity, delivering considerable energy conservation and waste reduction advantages to our production facilities.

EXPLORE THE COLLECTION AND EXPERIENCE THE ULTIMATE EXPRESSION OF *SOPHISTICATION* /

Anatolia introduces its journey into high-performance sintered stone with a collection designed in the name of elegance and in tribute to nature. A collection with an elevated aesthetic profile and performance destined to clad the spaces of tomorrow with style and personality, paving the way for a new approach to conceiving of our spatial confines, enhanced by the refined continuity of the surfaces with the almost total absence of joints: a refined touch that allows for the most significant expression of colors and patterns within the realm of natural materials.
