# Helping you collaborate and achieve more

A new generation of digital preservation software

Figure 23 – Identify the functions you have spent the most time on during your primary employment within the last 12 months. Please select up to five items.

Grow & enrich your archive  
more quickly

Easily engage & collaborate  
with new communities

Get more done by automating  
key tasks & activities

Create real, **sustainable**  
**value** for your institution

# The new generation of sustainable digital preservation software

Intuitive

Intuitive **user experience**

Brand new customisable **portal**

Automated

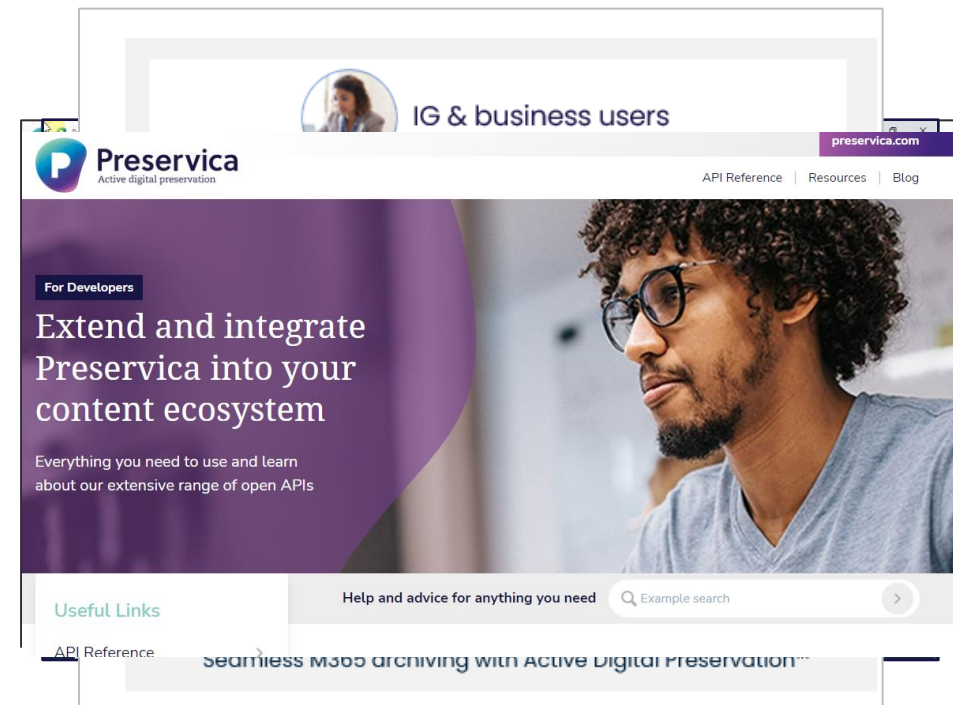

**Automated** active digital preservation

**Embedded** digital preservation for M365

Extensible

Open **APIs** & **call-outs**

Modern, scalable & elastic **platform**

...and

Sustainable

## Single trusted active digital preservation platform

### Starter

Starter

Starter  
Plus

#### Everything you need to get started

- Out-of-the box Preservation
- Zero configuration
- Out-of-the box sharing

Ideal for small scale archives and people new to preservation

### Professional

Professional

Professional  
Plus

#### Strong multiuser flexibility

- Full roles, permissions, Security tags
- Additional Users
- Additional Metadata
- Universal Access or Portal
- Auto Preservation post-ingest

### Enterprise

Enterprise

Enterprise  
Plus

#### The Ultimate Active Preservation system

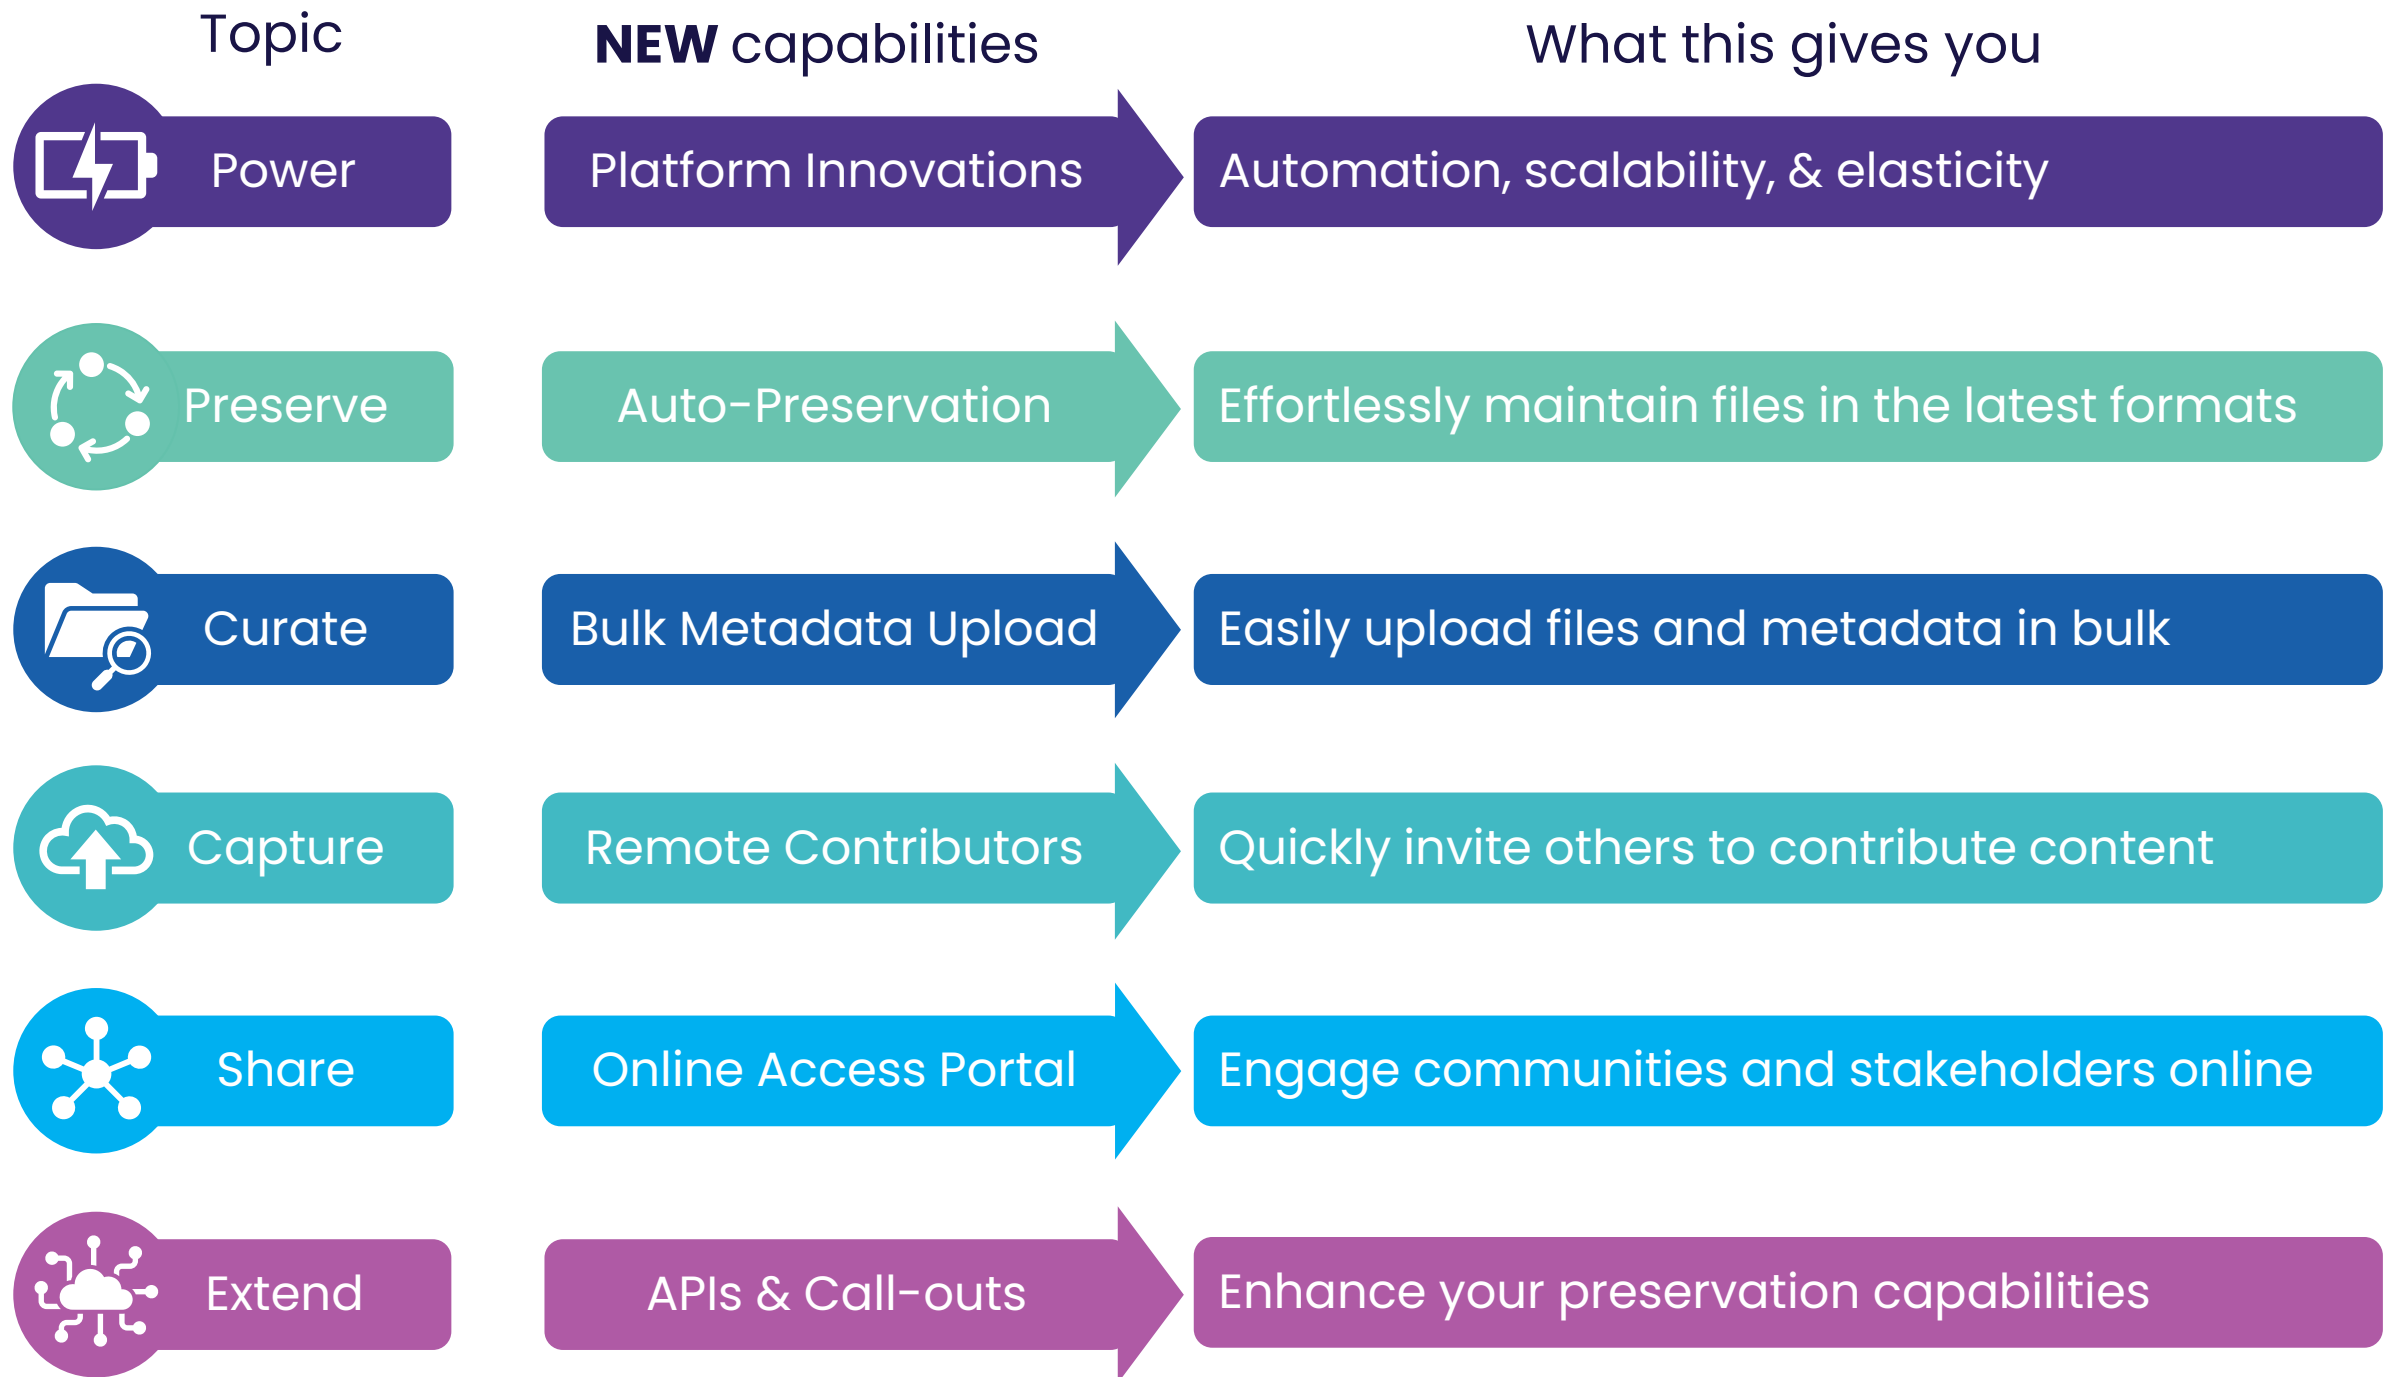

- Enterprise Class Preservation

# A new generation = no additional cost & no migration

- For ALL users
- Parity with current editions
- New user experience
- Phased rollout from September '22

*Watch for updates on the Community Hub*

# Preserve more content, more easily, & utilize 3rd party services

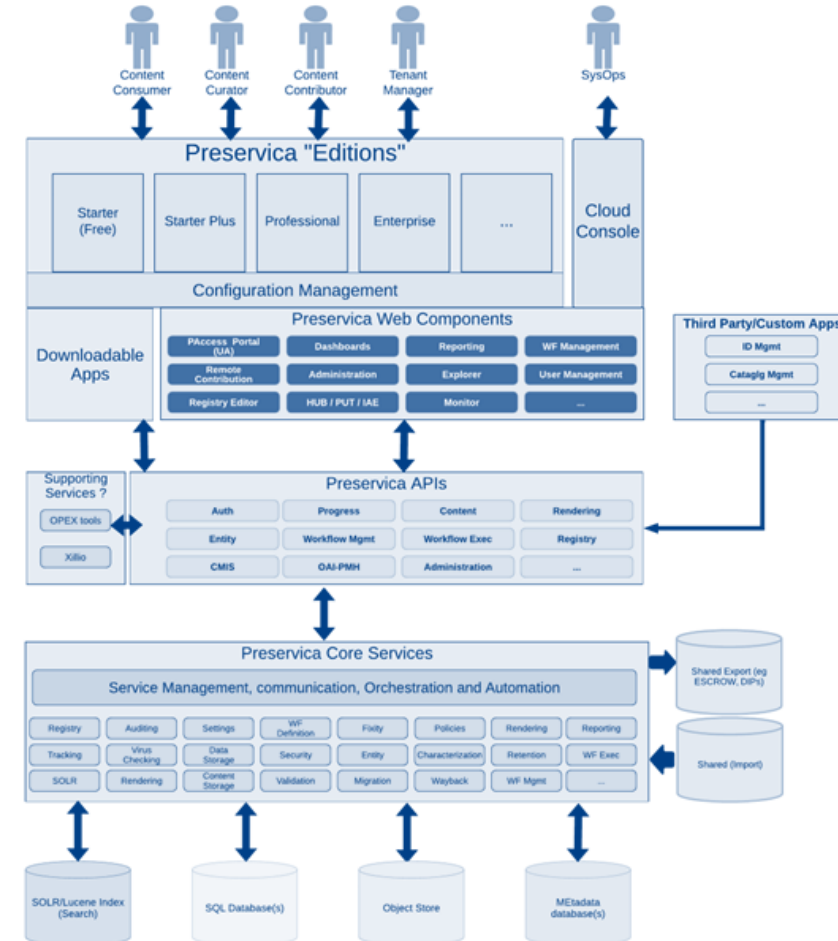

Supporting new powerful capabilities

Dynamic scaling of services

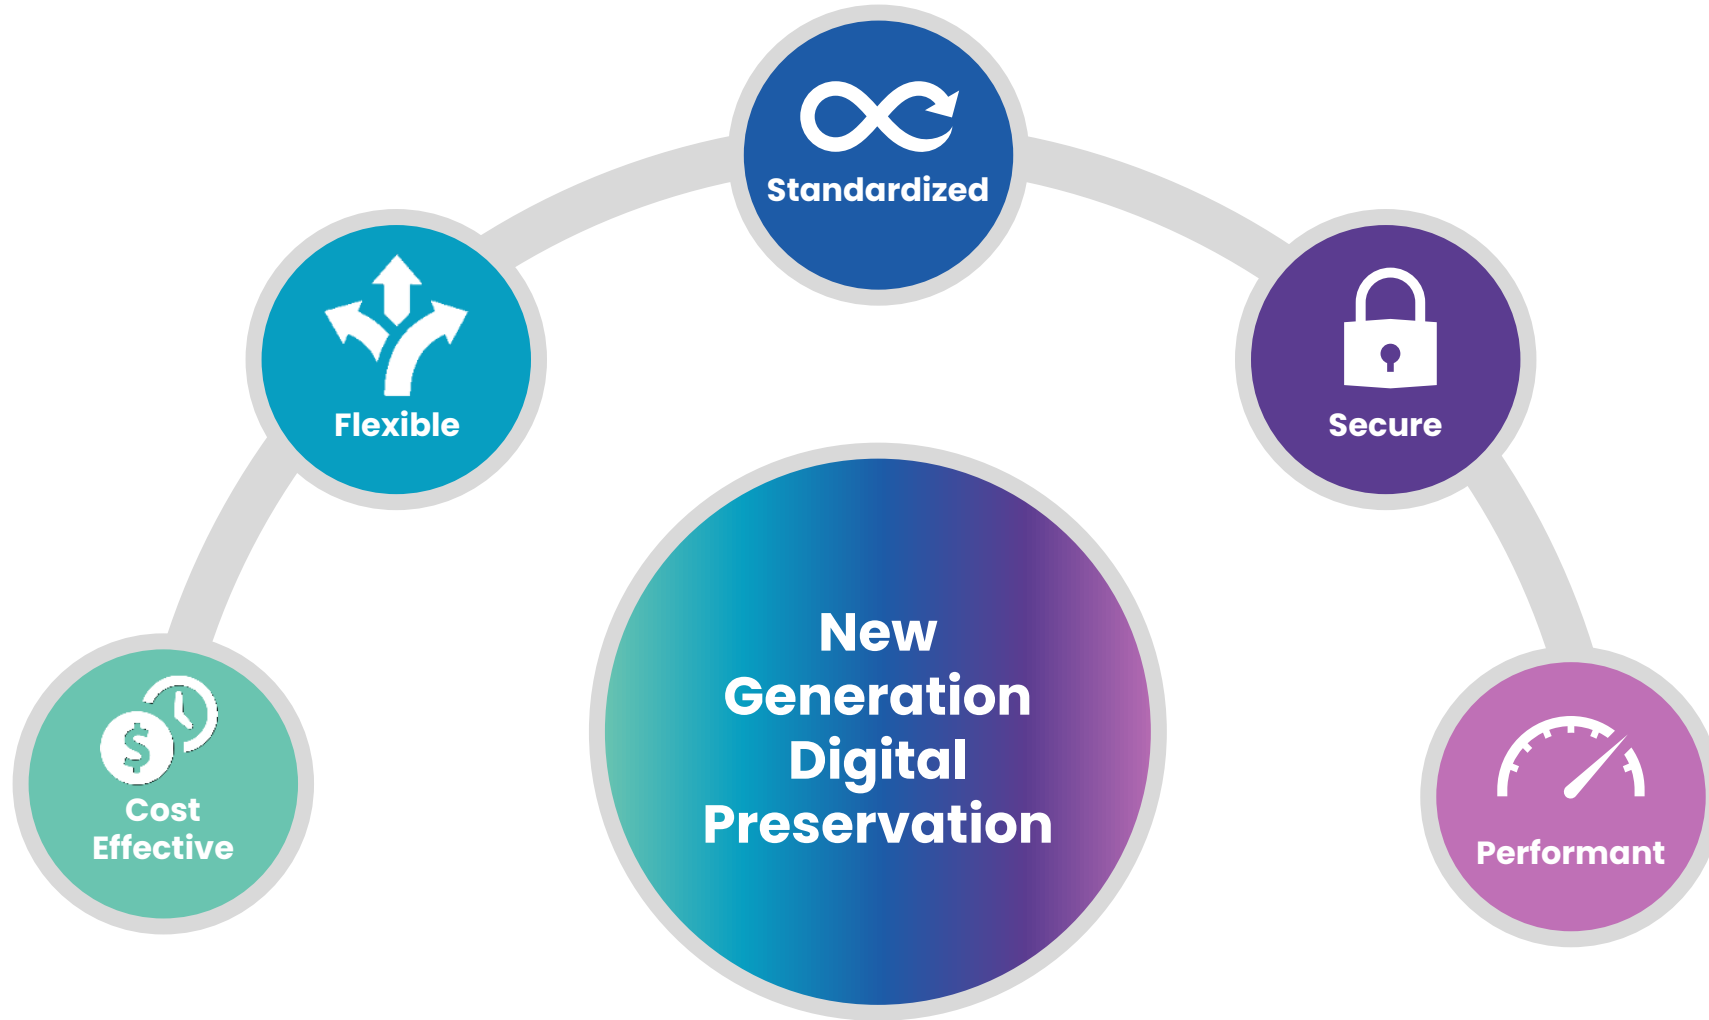

Enabling use of external capabilities

Same platform for all editions

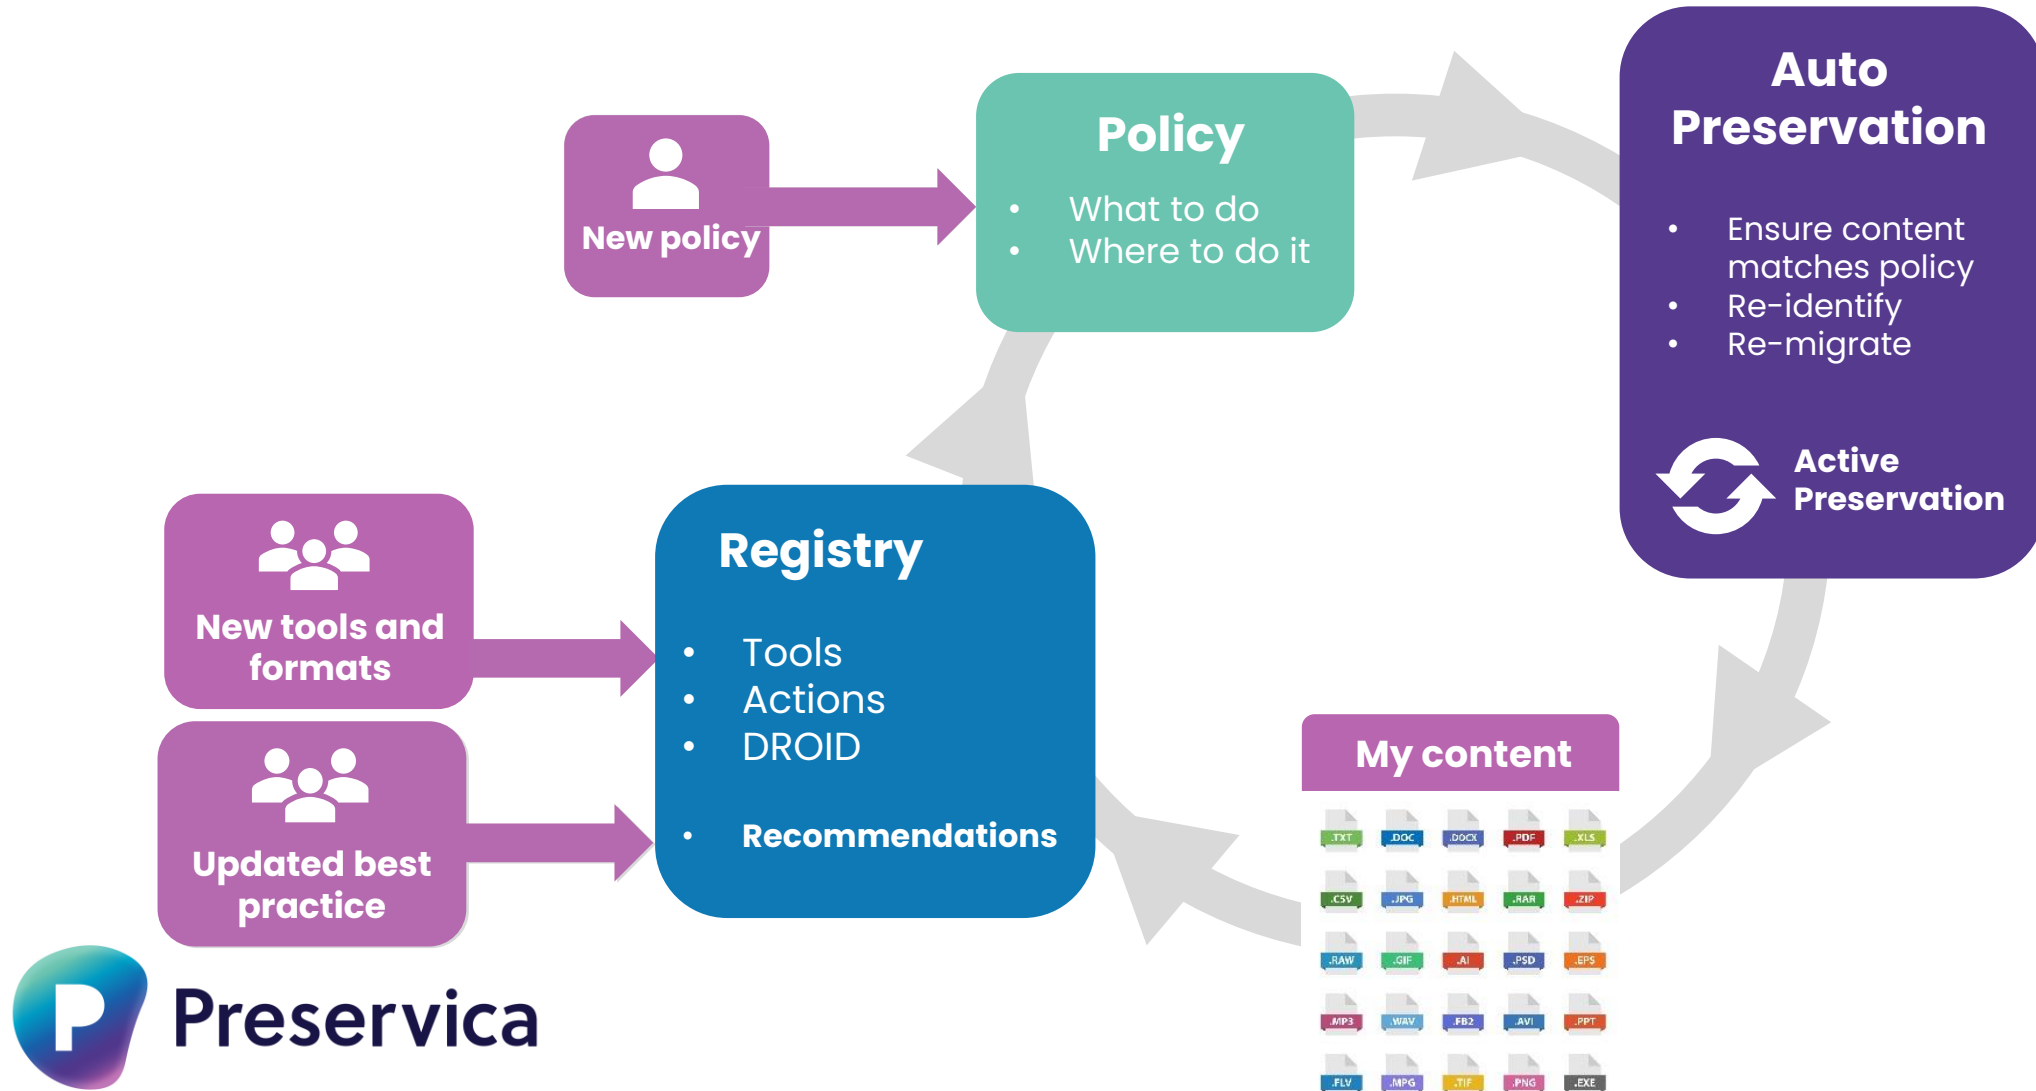

| Edition | Starter       | Cloud | Enterprise |
|---------|---------------|-------|------------|
| When    | Now & ongoing |       |            |

# Massive investment – Evolving our core platform

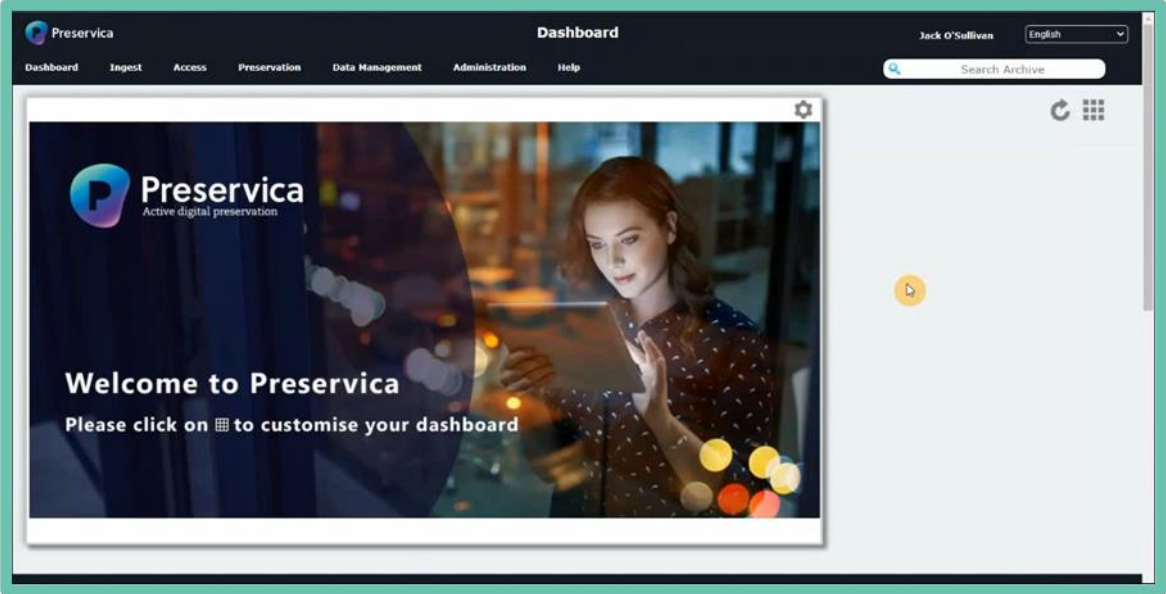

# Automatically maintain files in latest formats based on policy

# Effortlessly maintain files in the latest formats

- Stay ahead of at-risk file formats (*in test*)
- Future: View Policies applied to instance
- Future: Choose rule set, Edit, Save and import rule sets
- Future: Advanced enterprise users: swap preservation tools (*Concept*)

| Edition | Starter       | Cloud | Enterprise |
|---------|---------------|-------|------------|
| When    | Now & ongoing |       |            |

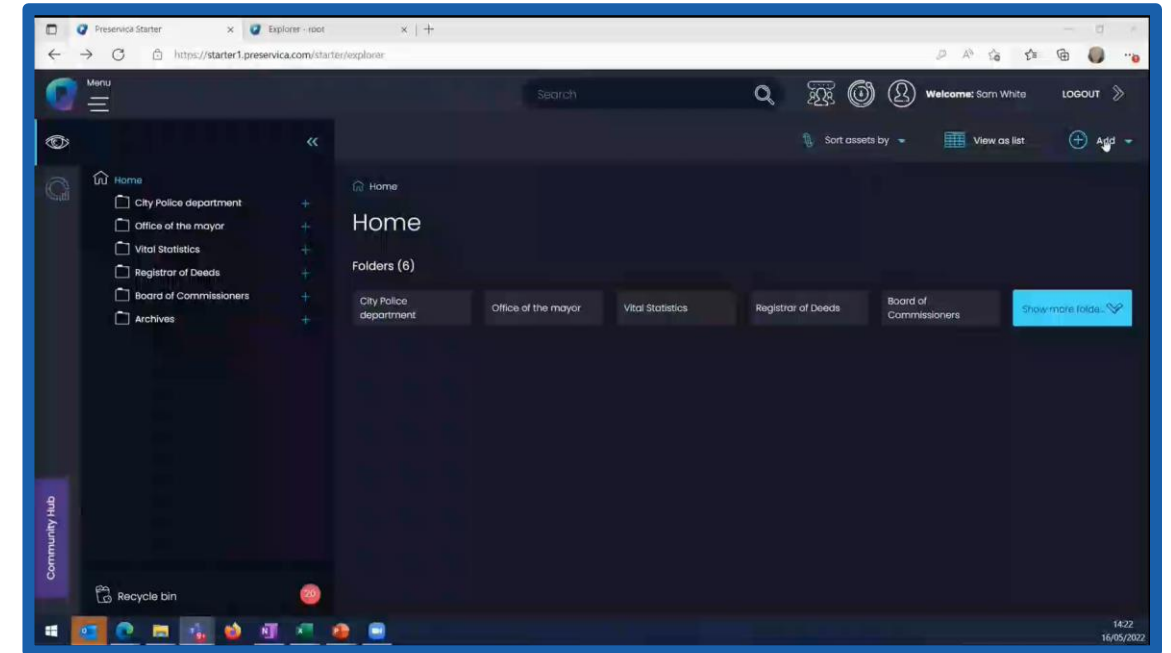

# Easily upload files and metadata in bulk

Upload multiple files with metadata in a few simple steps

Simple metadata management options to save you time

Enriched collections, added context & improved online discovery

| Edition | Starter | Cloud | Enterprise |
|---------|---------|-------|------------|
| When    | Now     | Q4    | Q4         |

# World beating metadata management

Future: download & Upload metadata

Future: Views of displayed metadata  
Simple management of metadata

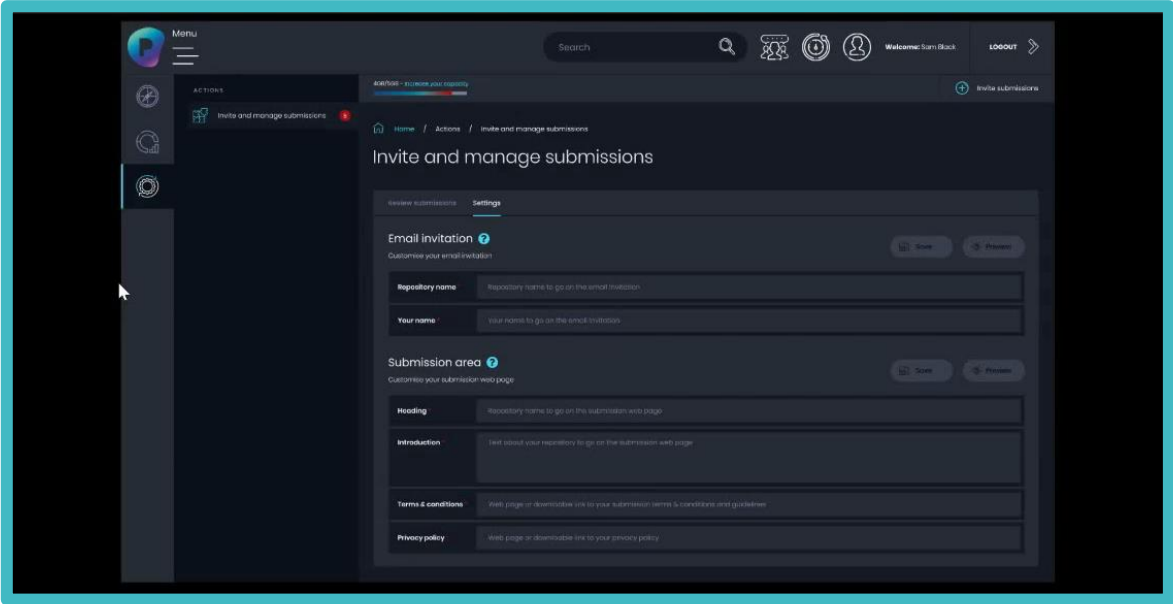

Future: Physical Assets

# Quickly invite others to contribute content

- Simple & secure
- Easily invite anyone to submit
- Review submissions & keep full control

| Edition | Starter | Cloud | Enterprise |
|---------|---------|-------|------------|
| When    | Q3      | Q4    | Q4         |

# Data sources and OPEX

Future: Contribution forms direct to metadata

Future: Twitter archiving enhancements

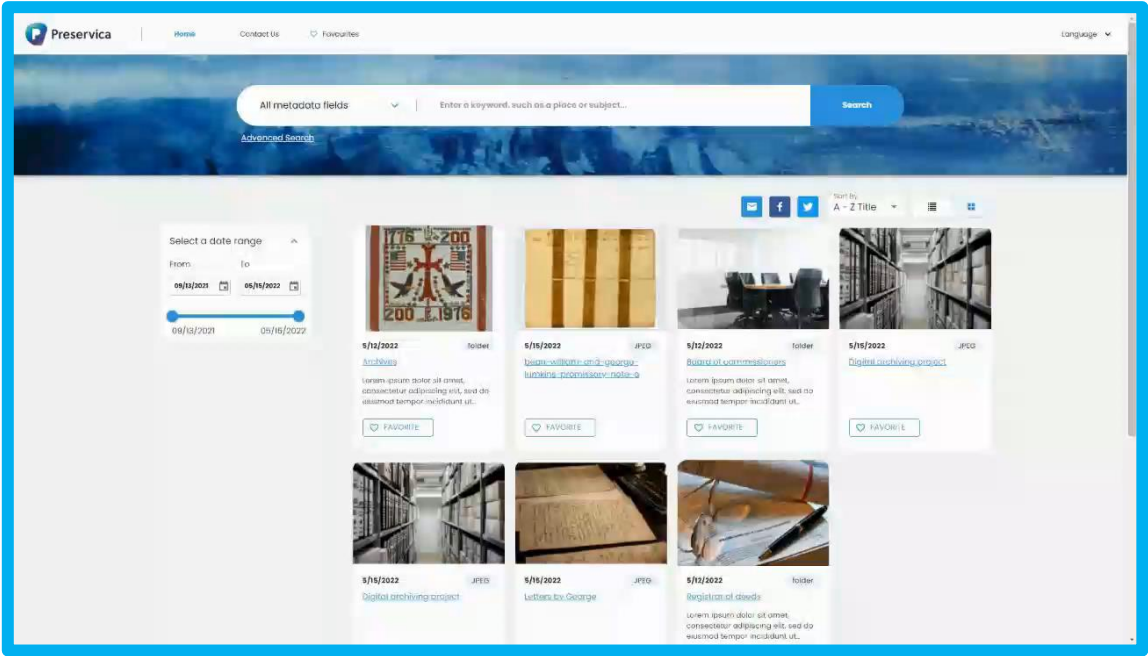

Ongoing: Standard ingest layout (OPEX) throughout

# Engage communities and stakeholders online

- Fresh, modern end user experience
- Filter content by date or by collection
- New advanced search
- Simpler to customize & brand

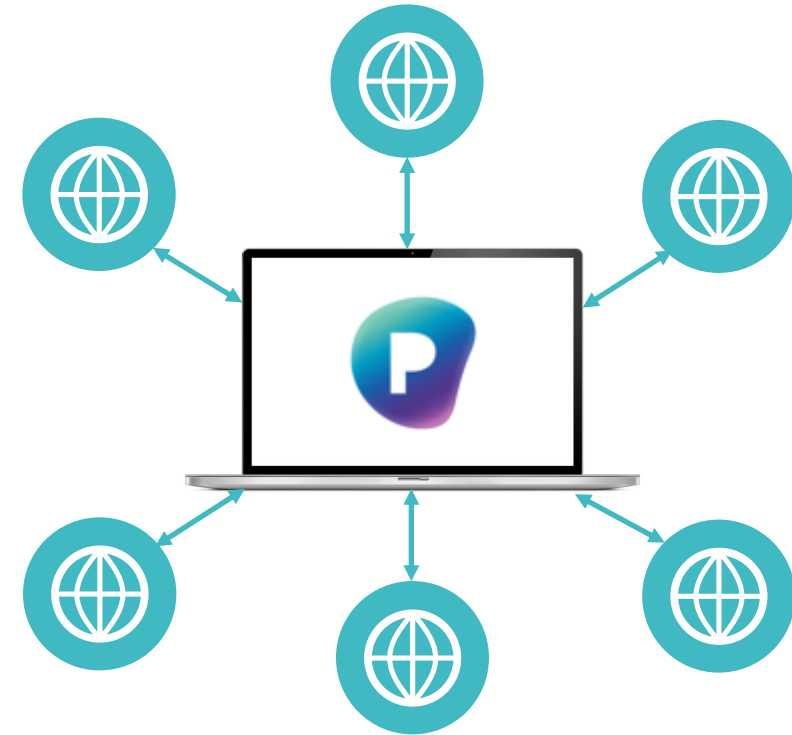

| Edition | Starter | Cloud | Enterprise |
|---------|---------|-------|------------|
| When    | Q3      | Q4    | Q4         |

# Extend your capabilities & call-out to purpose-built third-party services

- Automatically trigger external services
- Enables integration to PII redaction, translation, transcription, and many others
- Extend the functionality of your Enterprise Edition

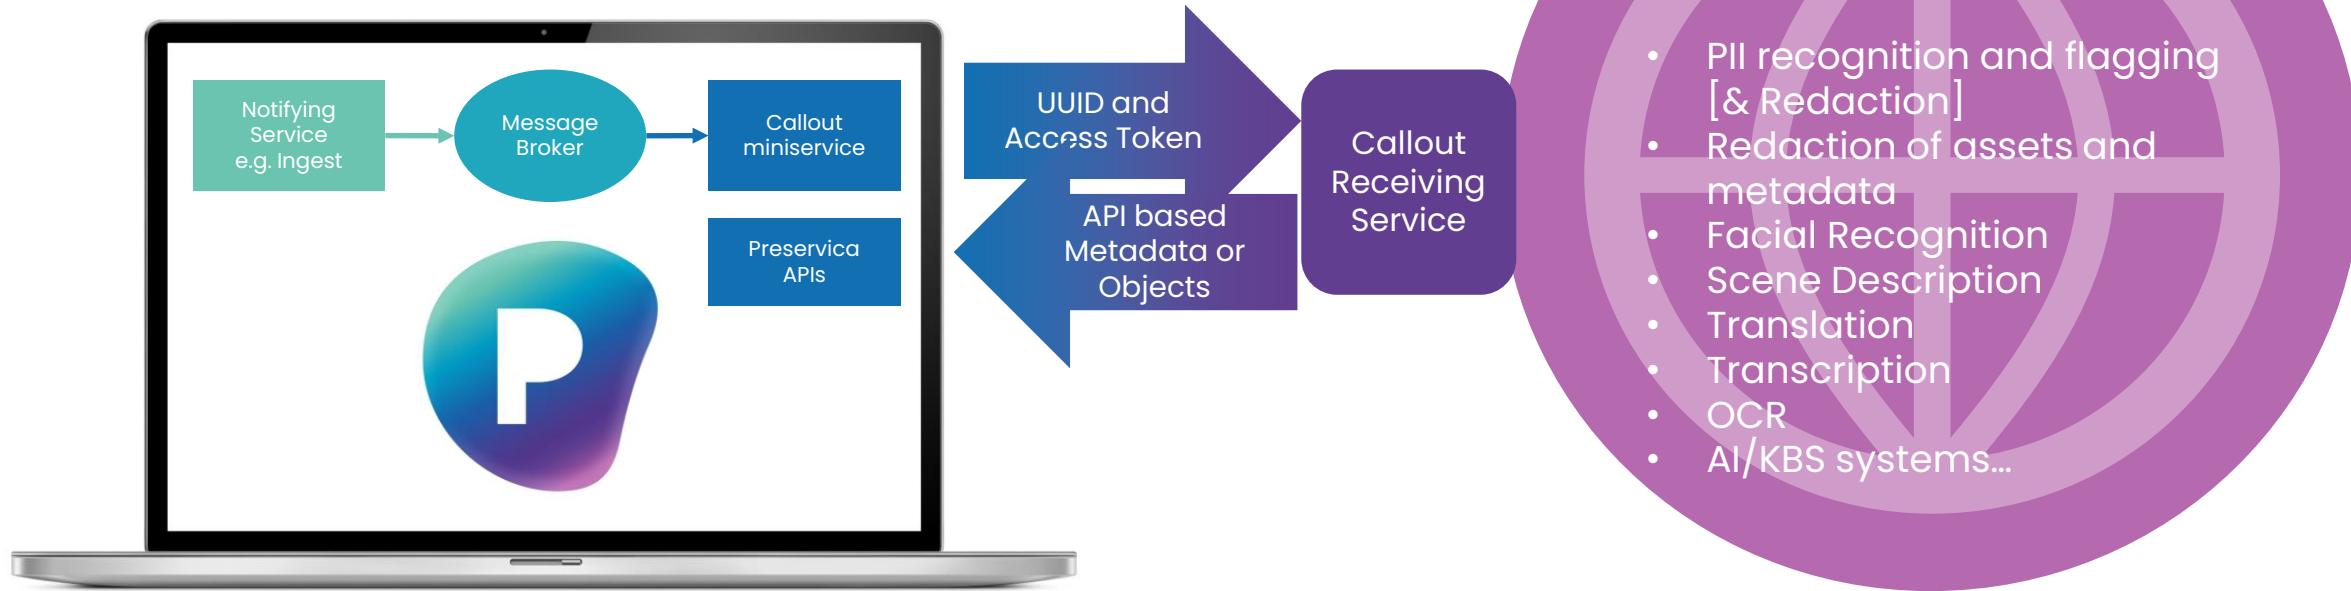

| Edition | Starter | Cloud | Enterprise |
|---------|---------|-------|------------|
| When    | –       | –     | PoC        |

# Concept in PoC: Calling Out from Preservica

**General case:** Ability to

- Enrich metadata
- Create new representations of Assets
- Create new Version of original (i.e. New Asset)
