Manager

Halley Grogan

Digital Archiving
Success Manager

Federico Caiazza

Technical Project
Manager

What is Accelerated Success?

- **Customized & personal** approach focused on your use case & objectives
- **Dedicated advice and best practice** guidance when you need it
- **Accelerate your projects** & protect your content sooner
- **Faster time to value** for your digital preservation projects

Where we have helped:

Customer

- Large scale projects
- Varied content sources
- Specific use cases
- Resource constraints

Preservica

- Expertise
- Product evolution
- Growing demand
- Successful customers

Accelerated Success Approach

Analyzing backlog

Analysis of the location and backlog structure. Defining the best method to ingest backlog into Preservica

Structuring your archive

Documenting an agreed archival structure & create an internal policy document with guidelines on content ingest & file plan structure

Managing metadata

Advice on introducing or customizing metadata schemas within Preservica, including ingesting, indexing and enriching metadata

Documenting access control

Define, configure and document an access control policy to the required access control roles and security tags

Uploading large volumes

Uploading and ingesting large volumes of content in a quick and efficient way to safeguard content sooner

Defining policies

Guidance defining preservation & storage policies, analyzing file formats currently present in the archives and optimizing storage to lower costs

What does this look like?

Discovery Workshops

- Screenshare
- You talk, we listen
- Show us your current set up
- That will inform...

Technical Workshops

- List of 17+ workshops
- Will customize based on your use case
- Slides/demos/walk throughs
- Lead you through the decision process

Bulk Ingest using OPEX

Large digitization project of routine planning documents

- Initial request for advice about creating a 1 TB SIP using SIP Creator
- Advised customer on OPEX & appropriate metadata
- Used *Guide to OPEX ingest & monitoring*

Mass metadata updates

- Two projects
- Complete replacements of metadata
 - Align all metadata into the same schema
 - Adjust schema having reviewed earlier decisions

Metadata migration & book ingests

US State Archive

- Ingest large backlog of digital content
 - Metadata was in PastPerfect
- Need continuity in metadata templates for new content
 - Manuscript digitization project

Custom Migration Pathway

- Updates via PAR API to Registry
 - Create new business rules or preservation actions
 - Add new file formats to an existing business rule
 - Create custom "recipe" for preservation action
- Reviewed by Innovation team
