

How to create and share a collection of historical exhibition materials

- ✓ An easy, quick way to manage historical collections in Preservica Starter
- ✓ Preserve exhibition materials and make them easily searchable online

Available in
Starter

1 Navigate the collection hierarchy to find historical assets (e.g. photographs)

2 Add a new folder and description using your naming convention

3 Drag and drop files from your initial storage location (e.g. shared drive) into Preservica Starter to automatically upload and preserve

4 Add or edit existing metadata - for example Dublin Core or MODS

5 Set the access view on your folder to public

6 View the asset on your public portal to check rendering and usability, and share with your community!
