

How to bring community history to life using Preservica Starter

An easy, quick way to preserve and provide access to historical assets

Select and digitize a historic personal account and make it accessible and searchable through a website

**Available in
Starter**

1

Review your box-level collections and select historical assets to digitize, preserve, and share online

2

Digitize any required files to PDF or an appropriate file format

3

Upload the files and ingest them into your Preservica Starter digital repository

4

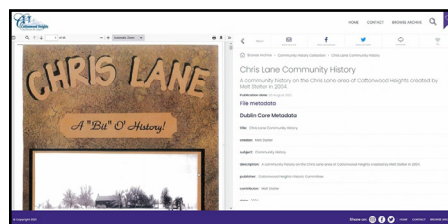

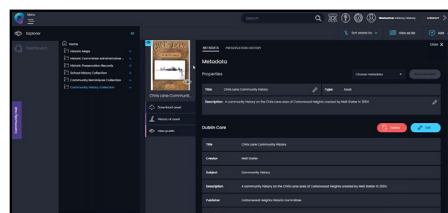

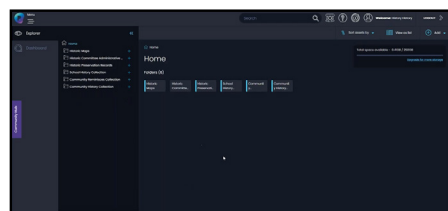

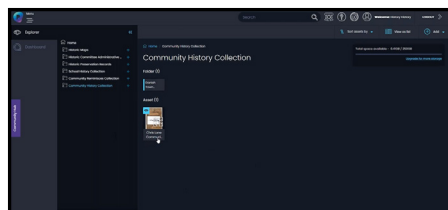

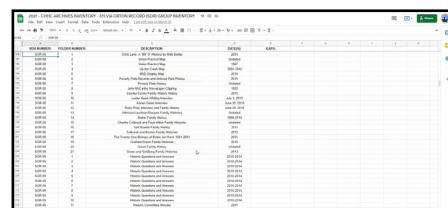

Create any collection subgroups or records groups

5

Add in metadata – Dublin Core or MODS – and identifier tags where relevant

6

Make your files public and view them on your public portal – ready to share!
