

Enhance Your Software with Facial Comparison

Veridocs TrueCompare performs real-time facial comparison between an ID photo and the person presenting it. Our SDK lets you offer this powerful technology within your solution.

- ✓ Enable more secure, more complex self-service transactions
- ✓ Reduce staff errors in ID checks
- ✓ Protect against one of the most common forms of ID fraud

TrueCompare technology

- 1 Captures live image (using any standard computer camera or webcam attachment) of patron presenting photo ID
- 2 Performs real-time facial comparison with photo on the document and, if available, photo on chip
- 3 Allows for differences in age, hair style, and other typical variations
- 4 Delivers a "match" or "no match" result that is easily integrated into your application

Layer Security into Your Applications

- ✓ Authenticate ID documents
- ✓ Ensure a patron is a document's rightful holder
- ✓ Check patron against customer's specified lists

As fraud and ID theft continue to cause security issues and monetary losses for industries including retail, financial, hospitality, visitor management, and more, software companies are being challenged to provide their customers with integrated solutions for ID authentication and management.

Veridocs' industry-leading components help you meet your customers' demands for software that enhances security and improves service.

ID Authentication

Real-time authentication for government-issued domestic or international IDs

Facial Matching

Real-time facial comparison between an ID photo and the person presenting it

Watch List Management

Fast checking of blocklists and safelists
