RightPick™ System

RightPick provides warehouse operators peace-of-mind with an end-to-end modular solution that combines hand, eye, coordination to pick pieces in a variety of workflows. Driven by **RightPick AI**, the system leverages machine learning across the fleet to continuously improve picking.

RightPick Fleet Management

RightPick Control Center integrates into any commercial warehouse management software utilizing **RightPick API** to monitor and manage your RightPick Fleet from anywhere. This integrated solution simplifies exception handling while leveraging existing processes.

RightCare Service

RightCare Service supports customers through the full life-cycle, from initial concept through implementation and into production. Working both directly and through integrators we create seamless solutions to meet your warehouse needs.

RightPick Product Platform
delivers Range Rate & Reliability

Hand . Eye . Coordination
RightHand Robotics

Use for distribution to stores, click-and-collect, or direct-to-consumer.

Pick items like...

Retail & Grocery

**Health & Beauty**

Pharmaceuticals

Rx

Apparel

Consumer Electronics

and more!
