3A. Adequacy of Disclosure Requirements - Cross cutting standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR 2-GR 1 – General characteristics of the sustainability reporting of the undertaking

The undertaking shall give general information about (i) its sustainability report, and (ii) the structure of its sustainability statement.

The principle to be followed under this disclosure requirement is to give the necessary context of the sustainability reporting of the undertaking.

Q1: Please, rate to what extent do you think DR 2-GR 1 – General characteristics of the sustainability reporting of the undertaking

DR 2-GR 5 – Using approximations on the disclosure in relation to boundary and value chain

Following the principle on boundaries and value chain of ESRS 1 when the undertaking has used peer group information or sector data to approximate missing data due to impracticability, it shall disclose:

1. Its basis for preparation for the relevant disclosure and indicators, including the scope for which an approximation has been used; and
2. The planned actions to reduce missing data in the future.

DR 2-GR 6 – Disclosing on significant estimation uncertainty

Following the principle of estimating under conditions of uncertainty in ESRS 1, the undertaking shall:

1. identify metrics it has disclosed that have a significant estimation uncertainty, disclose the sources and nature of the estimation uncertainties and the factors affecting the uncertainties, and
2. identify and disclose the sources of significant uncertainty and the factors affecting these sources of uncertainty when explanations of possible effects of a sustainability factor relate to possible future events about which there is significant outcome uncertainty.

DR 2-GR 7 – Changes in preparation and presentation

Following the principle on changes in preparation or presentation of ESRS 1, the undertaking shall explain changes in preparation and presentation by disclosing:

1. the description of the methodology used for the restatement;
2. the difference between the amount reported in the previous period and the revised comparative amount in case of quantitative metrics;
3. the reasons for the change in reporting policy; and
4. if it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact and the reason why.

3A. Adequacy of Disclosure Requirements - Cross cutting standards (2/2)

DR 2-SBM 1 – Overview of strategy and business model

The undertaking shall provide a concise description of its strategy and business model as a context for its sustainability reporting.

The principle to be followed under this disclosure requirement is to provide relevant contextual information necessary to understanding the sustainability reporting of the undertaking. It is therefore a reference point for other disclosure requirements.

It is not ideal that governance-related disclosure requirements are spread over three standards, ESRS 2, ESRS G1 and G2. ESRS G1 in particular will be reduced in scope due to the changes that the EU co-legislators made to the CSRD proposal in trilogue. We suggest to collect them in one section of ESRS 2. This would make life easier for users of sustainability reports because they can find governance-related information in one place, but also for preparers. Moreover, it would make governance-related DRs non-rebuttable, which is reasonable since governance is a material sustainability matter for all companies that fall under CSRD. It could also contribute to reducing the total number of DRs in ESRS because some of them can be merged, for example DR 2 GOV-4 and DR G1-6 which both cover remuneration policies, albeit from different angles.

DR 2-GOV 2 – Information of administrative, management and supervisory bodies about sustainability matters

The undertaking shall describe how its governance bodies are informed about sustainability matters. The principle to be followed under this disclosure requirement is to provide an understanding of how governance bodies and management level senior executives are informed about sustainability-related facts, decisions and/or concerns that are within their responsibility so that they can effectively perform their duties in that respect.

DR 2-GOV 3 – Sustainability matters addressed by the undertaking’s administrative, management and supervisory bodies

The undertaking shall provide a description of the sustainability matters that were addressed by its administrative, management and supervisory bodies during the reporting period.

The principle to be followed under this disclosure requirement is to provide information on whether the administrative, management and supervisory bodies were adequately informed of the material sustainability-related impacts, risks and opportunities arising or developing during the reporting period. Equally what information and matters it actually spent time addressing, and whether it was able to fulfil its roles and responsibilities, as defined in its mandate and described under DR 2-GOV 1.

DR 2-IRO 2 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities as identified by reference to and in compliance with sector-agnostic and sector-specific level ESRS

The undertaking shall provide a description of the outcome of its assessment processes by reference to mandatory disclosures under ESRS.

The principle to be followed under this disclosure requirement is to give a clear statement of sustainability matters, as addressed by all ESRS, that are material for the undertaking, and to give relevant explanations on (i) how the undertaking related to the material impacts, risks and opportunities identified by its assessment, (ii) when the undertaking has or will put in place initiative to modify its strategy and business model, in order to reduce or eliminate the risk or to benefit from the opportunity and/or in order to prevent and mitigate negative material impacts and enhance positive material impacts (see DR 2-SBM3 and 4), why this was the case and (iii) if and why certain mandatory disclosures are not material under the undertaking’ specific facts and circumstances and therefore disclosed as such.

Q21: Please, rate to what extent do you think DR 2-IRO 2 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities as identified by reference to and in compliance with sector-agnostic and sector-specific level ESRS

DR 2-IRO 3 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities that are not covered by and ESRS (entity-specific level)

The undertaking shall provide a description of the outcome of its assessment process in relation to material impacts, risks and opportunities that are not addressed under mandatory disclosure and require entity-specific disclosure.

The principle to be followed under this disclosure requirement is to provide information (i) about all material impacts, risks and opportunities of the undertaking resulting from the undertaking’s specific facts and circumstances for which relevant disclosure requirements do not exist, and (ii) when the undertaking has or will put in place initiatives to modify its strategy and business model, in order to reduce or eliminate the risk or to benefit from the opportunity and/or in order to prevent and mitigate negative material impacts and enhance positive material impacts (see DR 2-SBM 3 and 4), about such impacts, risks and opportunities. For each sustainability matter in the scope of sustainability reporting, the undertaking shall assess which material impacts, risks and opportunities are not covered by ESRS and shall give rise to entity-specific disclosure.

3B. Adequacy of Disclosure Requirements – Environmental standards (1/5)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments;
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR E1-1 – Transition plan for climate change mitigation

The undertaking shall disclose its plans to ensure that its business model and strategy are compatible with the transition to a climate-neutral economy and with limiting global warming to 1.5 °C in line with the Paris Agreement.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the transition plan of the undertaking and its compatibility with limiting global warming to 1.5°C.

Clear requirements for climate transition plans will provide clarity to companies which will in turn help them to improve their plans and disclosures and avoid misallocation of resources. Furthermore, clear information will limit the current widespread greenwashing, and thus provide considerable benefits to investors who integrate ESG considerations into their strategies. The lack of reliable information on climate transition plans, including targets and performance measurement KPIs, undermines the ability of the European market to properly allocate the resources and achieve net-zero emissions, which would have catastrophic societal and economic costs in the long-term. A timing element could be added to the list of information requirements to avoid that not only information on long term plans is disclosed, but also more short term actions.

DR E1-2 – Policies implemented to manage climate change mitigation and adaptation

The undertaking shall disclose its policies related to climate change mitigation and its policies related to climate change adaptation.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking monitors and manages its GHG emissions, climate-related physical and transition risks and opportunities throughout the value chain.

DR E1-9 – Scope 3 GHG emissions

The undertaking shall disclose its gross indirect Scope 3 GHG emissions in metric tons of CO₂ equivalent. The principle to be followed under this Disclosure Requirement is to provide an understanding of the GHG emissions that occur in the undertaking's value chain beyond its Scope 1 and 2 GHG emissions. For many undertakings Scope 3 GHG emissions are the main component of the GHG inventory and an important driver of their transition risks.

DR E1-10 – Total GHG emissions

The undertaking shall disclose its total GHG emissions in metric tons of CO₂ equivalent.

The principle to be followed under this Disclosure Requirement is to provide an overall understanding of the undertaking's GHG emissions and whether they occur from its own operations or the value chain. The disclosure is a prerequisite for measuring progress towards reducing GHG emissions in accordance with the undertaking's climate-related targets and EU policy goals as well as for the assessment of the undertaking's transition risks.

(Optional) DR E1-14 – Avoided GHG emissions from products and services

The undertaking may disclose its estimated total avoided GHG emissions from its products and services in metric tons of CO₂ equivalent.

The principle to be followed under this optional Disclosure Requirement is to provide transparency on the methodologies used and assumptions made by the undertaking when estimating and communicating about the impacts of their products and services on climate change in comparison to other products and services, or in comparison to a situation where their products and services would not exist, considering that there is currently no generally accepted framework for accounting and reporting on such avoided emissions.

This DR is important as it provides information on the benefits to the environment and human health, when preventing pollution. Here it is critical to have air pollutants as a concern for human health included, given that ambient air pollution accounts for an estimated 4.2 million deaths per year due to stroke, heart disease, lung cancer and chronic respiratory diseases. Around 91% of the world's population lives in places where air quality levels exceed recommended limits set by WHO. Exposure to air pollutants, such as particulate matter, ozone, nitrous oxides and sulphur dioxide, is quantitatively associated with poor health, both immediately (short-term increases in hospitalisations follow daily 'spikes' in air pollutants) and over time (long-term exposure contributes to increased risk of death and disease). Both ambient (outdoor) and indoor air pollution can be harmful for health. The World Bank has estimated that ambient outdoor air pollution costs the global economy as much as \$5.11 trillion each year. In the 15 highest-emitting countries, the health impacts of air pollution are estimated to cost more than 4% of gross domestic product (GDP).

DR E2-2 – Measurable targets for pollution

The undertaking shall describe the pollution-related targets it has adopted.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the targets the undertaking has adopted to support its pollution-related policies and address its material related impacts, risks and opportunities.

The overarching proposal about chemical reporting (points 39-41 in ESRS E2) is ambitious and well formulated. However, two improvements are critical:

1. Currently, the “substances of concern” (pages 15-16) are not aligned with the taxonomy criteria for chemical products, while they should be.

2. According to the current draft, companies should disclose information in an aggregated form. This will make it difficult to understand the scale of the use and production of various hazardous substances, how much they contribute to net turnover and the extent to which they are being phased out. The data would be significantly more meaningful if the amounts generated (net turnover, cost, etc.) is reported for every single chemical, according to the so-called “CAS number,” a well-known and globally used identifier for single chemicals.

DR E2-6 – Pollution-related incidents and deposit impacts and risks, and financial exposure to the undertaking

The undertaking shall disclose the impact of and its financial exposure to pollution-related incidents and deposits.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how principal pollution-related incidents and deposits may affect the environment and society and/or the undertaking’s development, performance and position over the short-, medium- and long-term.

DR E3-7 – Financial effects from water and marine resources related impacts, risks and opportunities

The undertaking shall disclose its financial effects of material risks and opportunities arising from water and marine resources-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of material risks and opportunities, related to the undertaking's water and marine resources-related impacts and dependencies, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

E4-9 – Biodiversity offsets

The undertaking may disclose the actions, development and financing of biodiversity and ecosystems mitigation projects (offsets) inside and outside its value chain.

The principle to be followed under this optional Disclosure Requirement is to provide an understanding of the extent and quality of the development; investment and implementation of projects or programmes inside or outside the undertaking's value chain that compensate for any residual, significant adverse impacts on biodiversity that cannot be avoided, reduced or removed, minimised, or restore biodiversity loss inside or outside the undertaking's value chain (also commonly referred to as biodiversity offsets).

DR E4-10 – Financial effects from biodiversity-related impacts, risks and opportunities

The undertaking shall disclose its financial effects of risks and opportunities arising from biodiversity-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of risks and opportunities, arising from the undertaking's biodiversity-related impacts and dependencies, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

DR E5-9 Financial effects from resource use and circular economy-related impacts, risks and opportunities

The undertaking shall disclose its financial effects of material risks and opportunities arising from resource use and circular economy-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of material risks and opportunities, related to the undertaking's resource use and circular economy-related impacts and dependencies, on the undertaking's development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

3C. Adequacy of Disclosure Requirements – Social standards (1/4)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR S1-1 – Policies relate to own workforce

The undertaking shall state its policies that address the management of its material impacts on own workforce, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on the undertaking's own workforce specifically, as well as policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the workers whose interests they address, are made aware of their existence and content.

DR S1-2 – Processes for engaging with own workers and workers' representatives about impacts

The undertaking shall explain its general processes for engaging with its own workers and workers' representatives about actual and potential material impacts on its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with its own workers and workers' representatives about material, actual and potential, positive and/or negative impacts that do, or may, affect its own workforce.

DR S1-3 – Channels for own workers and workers’ representatives to raise concerns

The undertaking shall describe:

- the channels it has in place for own workers and workers’ representatives to raise their concerns or needs directly with the undertaking, and / or
- the processes through which the undertaking supports the availability of such channels through the workplace of own workers, and
- how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which the undertaking’s own workers and workers’ representatives can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of their own workers and workers’ representatives, how follow up is done with these own workers and workers’ representatives regarding the issues raised, and the effectiveness of these channels.

DR S1-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain any outcome-oriented targets it may have related to:

1. Reducing negative impacts on its own workforce; and/or
2. Advancing positive impacts on its own workforce; and/or
3. Managing material risks and opportunities related to its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing its negative impacts and/or advancing positive impacts on its own workforce, and/or in managing material risks and opportunities related to its own workforce.

2. Any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for its own workforce; and
3. How it assesses the effectiveness of these actions, programmes and processes in delivering outcomes or its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of processes, initiatives or engagements through which the undertaking:

1. Works to prevent, mitigate and remedy material impacts on its own workforce; or
2. Seeks to achieve positive impacts for its own workforce, recognizing that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

The disclosure requirement is lacking references to diversity, as companies are not required to disclose data about the ethnicity of its workforce. While this may be linked to jurisdiction-specific legal limitations on reporting this data, ethnicity data is essential when looking at equality. It is also an area of increasing interest for investors. The standards have the structural capacity to allow for discretionary disclosures (e.g., company 'may' report in the application guidance) and this should be utilised to ensure that where companies aren't prohibited from reporting this data, they can do so in a standardised way. So, in Disclosure Requirement S1-7, Characteristics of the Undertakings Employees; there can be an optional breakdown of employees by ethnicity in addition to the one on gender under AG90 and AG91.

DR S1-8 – Characteristics of non-employee workers in the undertaking's own workforce

The undertaking shall describe key characteristics of non-employee workers in its own workforce.

Disclosure Requirements S1-10 focuses heavily on safety and does not pay adequate attention to the matter of health. This needs to be more health focussed and capture availability and uptake of health programmes and sickness absence i.e. (para 62) needs to include access to sick pay, average number of sick days per employee and median length of sickness absence.

Moreover, Disclosure Requirements S1-10 and S1-11 (coverage and performance of the health and safety management system respectively) do not specifically mention workers' mental health. While long neglected, worker mental health is as important as physical health, and the standards need to make this explicit. For S1-10, workplaces could report on how job design and workplace conditions safeguard mental health and, for S-11, report on days lost due to mental health. The standards do mention mental health in S-12 (working hours), but the risks to mental health include many other aspects of work.

3C. Adequacy of Disclosure Requirements – Social standards (2/4)

DR S1-11 – Performance of the health and safety management system

The undertaking shall disclose the number of incidents associated with work-related injuries, ill health and fatalities of its own workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the quality and performance of the established health and safety management system to prevent work-related incidents. The undertaking shall provide the following information to comply with paragraph this Disclosure Requirement:

- the number of fatalities as a result of work-related injuries and work-related ill health;
- the number and rate^[1] of recordable work-related injuries;
- the number of cases of recordable work-related ill health; and
- the number of days lost to work-related injuries and fatalities from work-related accidents, work-related ill health and fatalities from ill health.

[1] This information supports the information needs of financial market participants subject to Regulation (EU) 2019/2088 as reflecting an additional indicator related to principal adverse impacts as set out by indicator #2 in Table 3 of Annex 1 of the related Delegated Regulation with regard to disclosure rules on sustainable investments ("Rate of accidents").

The language around fair wages is very loosely defined, lacks clarity and does not align with broader understandings and concepts around pay. The framing of 'fair wages' as "a wage that provides for the satisfaction of the needs of the worker and his / her family in the light of national economic and social conditions" refers to the payment of poverty wages, rather than fairness. Wage fairness can be an issue at any level of pay (e.g., unequal pay for equal work on the basis of someone's identity). Living wages is also a concept that companies and investors are familiar with, so using the term 'living wages' with the definition cited above would be both clearer and more accurate.

DR S1-15 – Social security eligibility coverage

The undertaking shall disclose the percentage of its own workers eligible for social security.

The principle to be followed under this Disclosure Requirement is to understand whether there are own workers of the undertaking that are not eligible for social security and, as a result, are especially vulnerable to major social risks.

On Disclosure Requirement S1-16 – Pay gap between women and men, there should be also an option to report on ethnicity pay gap. This is a key tool to assess whether there are racial inequality issues within a company's workforce, which should be reinforced with an action plan to address its findings to reduce the gap.

DR S1-17 – Annual total compensation ratio

The undertaking shall disclose the ratio between the compensation of its highest paid individual and the median compensation for its employees.

DR S1-18 – Discrimination incidents related to equal opportunities

The undertaking shall disclose the number of work-related discrimination incidents, any corrective actions taken during the reporting period and any related material fines or sanctions.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the incidence of work-related discrimination, including sexual and non-sexual harassment, the corrective actions that the undertaking has taken for its own workforce, and any related material fines and sanctions.

There are some omissions in relation to important data on the contingent workforce, particularly regarding sick leave and holiday pay. These are some of the key areas where contingent workers are excluded from the protections and benefits available to other workers and are notable in their absence compared to other, more specific benefits. This is central to understanding the impacts companies are having on their workforce, while also being pertinent from a financial materiality perspective given the history of these benefits factoring into strikes and legal action.

This Disclosure Requirement should also include the differences in benefits provided to different types of employees with full-time permanent contracts i.e. between head office staff and front-line workers (para 94)

DR S1-21 – Grievances and complaints related to other work-related rights

The undertaking shall state the number of grievances and complaints received and resolved relating to workers' other work-related rights.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the undertaking's grievance mechanism or channel. This is the mechanism or channel through which those workers whose other work-related rights are impacted by the undertaking are able to lodge a concern or complaint, and that can provide access to remedy by resolving those complaints. Furthermore, it is to provide an understanding of the number of complaints raised and resolved at National Contact Points for OECD Multinationals.

Disclosure requirements do not address the extent of worker consultation on the design of policies and practices. For example, Disclosure Requirements S-21 and S-22 on grievance mechanisms and collective bargaining could include the extent of worker consultation to secure rights to freedom of association and collective bargaining and for the design of grievance mechanisms. This is important because worker voice is integral to the effective functioning of these processes.

ESRS S1 includes a previous DR (1-3) on "Channels for own workers and workers' representatives to raise concerns". It is important to ensure that companies read and consider these DRs hand in hand when reporting. There are limitations associated with reporting on the number of incidents raised, e.g. tick-the-box and unintended consequences in relation to counting numbers of incidents (are companies with no reported incidents performing better than other companies, or does it indicate a company culture where employees are afraid of raising concerns?). Ensuring that companies report according to ESRS S1 DR 1-3 will enable to address this limitation; by e.g. asking for disclosures on "the processes through which the undertaking supports the availability of such [grievance] channels", interested stakeholders can gain better understanding on the context surrounding such mechanisms.

DR S1-22 – Collective bargaining coverage

The undertaking shall disclose information on the extent to which the working conditions and terms of employment of its own workforce are determined or influenced by collective bargaining agreements. The principle to be followed under this Disclosure Requirement is to provide an understanding of the importance of collective bargaining agreements for its own workforce.

This indicator is intended to meet the needs of investors under the SFDR. This is a problematic indicator, which can lead to a tick-the-box exercise, and also unintended consequences (e.g. promoting practices that would lead companies to count fewer incidents than those truly occurring). The ESRS should provide clarity on what information financial market participants should look at in connection to the related SFDR indicator (i.e. identified cases and incidents), to ensure a more comprehensive picture of and better insight into a company's impacts and related management approach. ESRS S2, S3 and S4 provide good examples in the BfC of such explanations (please refer to paragraphs in the standards' BfC on similar indicators looking at "Number of identified cases of severe human rights issues and incidents")

Company should also disclose grievance mechanism policy, as it is closely linked to access to remedy, or at least a cross-reference to DR S1-21 should be present.

DR S2-1 - Policies related to value chain workers

The undertaking shall state its policies that address the management of its material impacts on value chain workers, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on value chain workers specifically, as well as policies that cover material risks or opportunities related to value chain workers, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the value chain workers whose interests they address, are made aware of their existence and content.

S2-1 could also ask companies to provide a description of the structure of its supply chain including its activities, the business model, the types of suppliers and tiers or levels of the supply chain, along with company efforts to map the supply chain and make it more transparent. This information provides a basis for companies to assess risk and also makes them more accountable to external stakeholders. Different companies operate on different business models which means they have very different levels of engagement with the supply chain workforce.

Application guidance 9 suggests companies provide a description of the types of workers that are subject to material impacts. This could also include the number and/or proportion for each type of worker. This is relevant for companies to assess the magnitude of the risks in their supply chain (along with the types of risk).

DR S2-2 - Processes for engaging with value chain workers about impacts

The undertaking shall explain its general processes for engaging with value chain workers and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with value chain workers and related trade union and worker representatives about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of value chain workers are taken into account in the decision-making processes of the undertaking.

S2-2(c) (and following sections where relevant) should specifically mention human trafficking and modern slavery. These are very prominent human rights risks in global supply chains that naming them in the standards would encourage companies to give these risks greater consideration.

DR S2-3 – Channels for value chain workers to raise concerns

The undertaking shall describe:

1. the channels it has in place for value chain workers to raise their concerns or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of such channels through the workplace of value chain workers; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which value chain workers can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of value chain workers, how there is follow up with these workers regarding the issues raised and the effectiveness of these channels.

DR S2-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on value chain workers; and/or
2. advancing positive impacts on value chain workers; and/or
3. managing material risks and opportunities related to value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing negative impacts, and/or advancing positive impacts, on value chain workers, and/or in managing material risks and opportunities related to value chain workers.

DR S2-5 - Taking action on material impacts on value chain workers and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on value chain workers that are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for value chain workers; and
3. how it assesses the effectiveness of these actions, programmes and processes in delivering intended outcomes for value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking (a) works to prevent, mitigate and remedy material impacts on value chain workers, or (b) seeks to achieve positive impacts for value chain workers, recognising that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

DR S2-6 - Approaches to mitigating material risks and pursuing material opportunities related to value chain workers

The undertaking shall explain:

1. what action is planned or underway to mitigate material risks for the undertaking arising from its impacts and dependencies on value chain workers; and
2. what action is planned or underway to pursue material opportunities for the undertaking in relation to value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the ways in which the undertaking is addressing the material risks and pursuing the material opportunities related to workers in its value chain.

DR S3-1 – Policies related to affected communities

The undertaking shall state its policies that address the management of its material impacts on communities, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on local communities specifically, as well as policies that cover material risks or opportunities related to affected communities, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the local communities whose interests they address, are made aware of their existence and content.

DR S3-6 - Approaches to mitigating material risks and pursuing material opportunities related to affected communities

The undertaking shall explain:

1. what action is planned or underway to mitigate material risks for the undertaking arising from its impacts and dependencies on local communities; and
2. what action is planned or underway to pursue material opportunities for the undertaking in relation to local communities.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the ways in which the undertaking is addressing the material risks and pursuing the material opportunities related to affected communities.

DR S4-1 – Policies related to consumers and end-users

The undertaking shall state its policies that address the management of its material impacts of its products and/or services on consumers and end-users, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of impacts on consumers and end-users specifically, as well as policies that cover material risks or opportunities related to consumers and end-users, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the consumers and end-users whose interests they address, are made aware of their existence and content.

Disclosures should also include reporting on the impact of the company on its consumers (positive and / or negative) including health impacts. One such measure could be the percentage of company revenue from health-harmful products or services.

Moreover, para 13 should explicitly include health as well as human rights.

DR S4-2 – Processes for engaging with consumers and end-users about impacts

The undertaking shall explain its general processes for engaging with consumers and end-users and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages as part of its ongoing due diligence process with consumers and end-users about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of consumers and end-users are taken into account in the decision-making processes of the undertaking.

DR S4-3 – Channels for consumers and end-users to raise concerns

The undertaking shall describe:

1. the channels it has in place for consumers and end-users to raise their concerns/complaints or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of mechanisms by its business relationships; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which consumers and end-users can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of mechanisms by its business relationships, how there is follow up with these consumers and end-users regarding the issues raised, and the effectiveness of these channels.

DR S4-4 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on consumers and end-users; and/or
2. advancing positive impacts on consumers and end-users; and/or
3. managing material risks and opportunities.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure progress in addressing negative impacts, and/or advancing positive impacts, on consumers and end-users.

Q114: Please, rate to what extent do you think S4-4 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

Targets should be aligned with national or international standards and definitions, for example use of Government endorsed nutrient profiling models should be used by food companies.

DR S4-5 – Taking action on material impacts on consumers and end-users and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on consumers and end-users who are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of positively contributing to improved social outcomes for consumers and end-users; and
3. how it assesses the effectiveness of these actions, programmes and processes in contributing to intended outcomes for consumers and end-users.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking:

1. works to prevent, mitigate and remedy material impacts on consumers and end-users, and
2. seeks to achieve positive impacts for consumers and end-users, recognising that in both instances, the ultimate aim is to deliver improved outcomes for consumers' and end-users' lives.

3D. Adequacy of Disclosure Requirements – Governance standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR G1-1 – Governance structure and composition

The undertaking shall provide information on its governance structure and composition.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the structure and composition of the governance and the distribution of roles and responsibilities throughout the undertaking's organisation, from its administrative, management and supervisory bodies to its executive and operational levels.

For part G, please explain how you think further alignment could be reached

Please share any comment and suggestion for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment to

This disclosure requirement proves to be particularly important, also in light of the most recent introductions in the CSRD agreement reached by the Council and the European Parliament. In particular, the obligation to report about the existence of incentive schemes which are offered to the administrative, management and supervisory bodies which are linked to sustainability matters is of great relevance. Requiring companies to disclose their remuneration policy related to the achievement of sustainability matters will encourage companies to introduce such incentives and to eventually depart from the current short-term focus. Besides, we would like to also point out that ESRS G1-6 is missing disclosures on awarded remuneration (in SRD II referred to as remuneration report) which can vary from the remuneration policy. This is particularly relevant for understanding whether and how company directors' are incentivised to pursue sustainability-related objectives. Disclosing remuneration policy / incentive schemes only will not be sufficient to provide an understanding of how company directors' are incentivized to properly consider the company's sustainability matters. Also, it would be beneficial for investors if undertakings would be required to report on the proportion of variable compensation conditioned to sustainability KPIs in relation to the whole compensation paid or, in the absence of these variable parts, why it is not conditioned. G1-6 does not include a requirement to disclose how remuneration during the year under review has actually matched sustainability- or climate-related metrics (outcome information). Also, other (often regular) remuneration elements for executive board members, namely benefits in kind, remuneration from third parties, or payments agreed for post-contractual non-competition obligations are not mentioned in the draft, meaning that a full picture of the remuneration package may not be necessarily provided. Based on the disclosure foreseen by G1-6, even when read in conjunction with ESRS 2-GOV 4 para. 62-64, investors will therefore not be able to thoroughly assess the remuneration policy of board members from an impact or financial perspective. Moreover, DR G1-6 is not in line with the Shareholders Rights Directive which recognises companies must disclose not only remuneration policy but also the awarded remuneration of directors.

DR G1-7 – Risk management processes

The undertaking shall provide information on its risk management processes, with regards to risk arising for the undertaking and for the stakeholders.

The principle to be followed under this Disclosure Requirement is to inform about the undertaking's risk management processes. This includes an understanding of the supervision and monitoring of risk management by the undertaking's administrative, management and supervisory bodies.

Payment delays complicate the financial management of undertakings, especially SMEs[1], who rely on predictable flows of cash to operate. According to the relevant EU legislation (Directive 2011/7/EU) a payment is late when the creditor has not received the funds at the expiry of the period negotiated in the contract. And yet, even payments performed within the contractually negotiated period can hide unfair payment practices. Very often businesses accept payment terms longer than they are comfortable with[2], as such terms may reflect the one party's power compared to the other, such as by virtue of its size or brand.

[1] SMEs (Small and Medium-sized enterprises) are defined according to the Commission Recommendation 2003/361/EC https://ec.europa.eu/growth/smes/sme-definition_en

[2] According to the Intrum European payment Report 2021, on average 49% of businesses in the EU accepted payment terms longer than they are comfortable with out of fear of losing their customers or damaging business relations.

Q137: do you consider that the indicators in G2-10 (in isolation or jointly) capture the following sufficiently:

	Yes	No	No opinion
the extent to which accounts payable or creditors at period end have been outstanding	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
the fairness of the undertaking's payment practices	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

If not, please provide your rationale and indicate the sector(s) for which you deem add-ons necessary.

Q 138: what alternative indicators would you propose? Please specify whether your proposal(s) are of sector-agnostic or sector-specific nature.
