

Mr. Carsten Egeriis  
Chief Executive Officer  
Danske bank A/S  
Holmens Kanal  
2-12 Kobenhavn  
1092 Denmark

**Thursday 8 December 2022**

Dear Mr. Egeriis,

I am writing to share ShareAction's 2022 banking survey '**In Debt to the Planet. An assessment of the 25 largest European banks' biodiversity and climate strategies.**'. We are extremely grateful for your contribution to our report and for all the positive engagement we have had this year with Danske bank.

With COP27 now behind us and little progress made, we need the financial sector to lead the way if we are to reach the Paris climate goal net-zero by 2050. Banks have the opportunity to play a critical role by reducing the financing of harmful activities and increasing the finance to low-carbon alternatives. The report assesses the themes critical to achieving net zero by 2050 and ranked banks based on the performance of their policies. We also highlight leading practice and call out banks whose policies are falling behind their peers.

Our research shows that Europe's largest banks are not yet doing enough to address the twin crises of climate change and biodiversity loss. This exposes banks to risks which pose a serious threat to future revenue and reputation, as well as posing material risks to our planet and everyone on it. While we recognise that the turbulent economic and political environment this year has created challenges, we urge banks to urgently strengthen their climate change and biodiversity policies.

Based on our analysis, your organisation ranked 23rd with an overall score of 33% which is equivalent to a C- grade. The climate change section of our questionnaire accounting for two-thirds of the marks. Danske bank scored 40% of the points in the climate section and 19% in the biodiversity section. We would like to commend Danske bank for progress on double materiality, identifying long-term climate risks, and including both on- and off-balance sheet items in your risk identification.

To support you with identifying priorities for 2023, we have outlined three key asks for climate change and one key ask for biodiversity for Danske bank which will be the focus of our engagement next year:

- Set a 2030 overarching target to reflect its fair share of absolute emissions reduction across all activities.
- Ensure that at least one board member has climate expertise, and another has biodiversity expertise.
- By the end of 2023 at the latest, publish its framework for assessing oil & gas companies' transition plans and expand its restriction beyond oil & gas E&P clients to cover all oil & gas clients. These

[shareaction.org](https://shareaction.org)

assessments must specify that exploration for and development of new oil & gas fields is prohibited if a company is to receive refinancing or new financial services.

Biodiversity loss poses material risks to banks and requires urgent action. We encourage Danske bank to prioritise taking action on biodiversity loss with the same urgency as climate change and publish a standalone biodiversity strategy ahead of its 2024 AGM.

We are committed to engaging with and supporting Danske bank in the development of its policies and targets, and hope that our constructive dialogue will continue throughout 2023. As a next step, the banking team would appreciate the opportunity to present our report to you in the new year. Leyla Arpacioğlu, Engagement Manager (Banks – Climate change and Biodiversity), will be in touch shortly to organise this with you.

I truly wish you and your team a wonderful Christmas break and I'm looking forward to building on our valuable relationship in 2023.

Warm regards,

A handwritten signature in black ink that reads "Catherine Howarth". The signature is written in a cursive style with a large initial 'C' and a long, sweeping tail on the 'H'.
