

SWOS BTU-Thimble

Designed primarily for use in inland applications, the SWOS BTU-Thimble offers 360 degrees of lightweight, abrasion resistant protection on facing lines, contact points and outer surfaces.

Description

Often, standard steel thimbles protect only the bearing surfaces of your line, leaving the back side of your eye exposed to wear, tear and abrasion. Utilizing our 603-blue urethane coating, the SWOS BTU-Thimble offers an all around protective cover to the contact and non contact points of your line, reducing cost associated with frequent replacement and servicing. The BTU-Thimble is often utilized within inland applications, protecting the synthetic surface that goes around the button on facing lines. Made to order and readily available, the BTU-Thimble offers a wide range of protection for the 5/8in. to 2in. rope diameter range.

Product Code: BTU	Fiber (Core/Cover): Nylon cover, coated with blue 603 Urethane
Splice: N/A	Manufacturer: SWOS, Inc.

Features

- Offers 360 degrees of all around protection
- Cover rope sizes ranging from 5/8 inch to 2 inch in diameter
- Highly protective against abrasion
- Light weight
- Ease of handling
- Positively buoyant
- High coefficient of friction
- Retains shape with use

Applications

- Tug and Barge, Mine, Towing
