

# River Guard

A semi flexible braided Nylon cover that is coated with a proprietary polyurethane elastomer for enhanced abrasion resistance.

## Description

This chafe sleeve can either be affixed to your line at particular wear points, or can be a sliding chafe sleeve, to be positioned on differing wear points.

SWOS has committed substantial research and development resources to designing a line of chafe protection products that maximize the service life of our ropes. The result is a family of products perfectly suited to combat cutting and abrasion encountered in offshore, mooring, and tug operations. Because each application has its own unique requirements, SWOS has developed a full range of options to protect your investment and ensure the longest service life for your working ropes.
