

Polyester Round Slings

Round slings are endless synthetic fiber slings made from a continuous loop of polyester core yarns covered by a color-coded double wall tubular jacket.

Features and Benefits

- Endless configuration allows wear points to be shifted, extending sling life
- Lightweight and flexible for easy rigging and storage
- Conforms to load and endless design allows sling to be spread, increasing load stability
- Provides a tight choke with an easy release
- Resists moisture absorption, rot, and mildew
- Reduces risk of back, shoulder, and hand injuries
- Double-wall cover helps protect load-carrying yarns from UV degradation
- Color-coded for easy identification
- Protected tag shields text, maintaining legibility
- Individually serialized for traceability

* All slings are made to WSTDA standards.

Specifications

Code	Color	Rated Capacity (lbs)			Minimum Length (ft)	Relaxed Body Dia. (in)	Sleeve Width (in)	Approximate Weight (lbs/ft)
		Vertical WILL	Choker WILL	Basket WILL				
ST-ENR-3000	Purple	3,000	2,400	6,000	3	5/8	1-1/2	0.3
