## Q-12 Defender ${ }^{\text {rw }}$

Q-12 Defender is a 12-strand mooring line that incorporates Samson's patented DPX ${ }^{\text {Tm }}$ fiber technology and reduced-recoil technology.
(

## Description

DPX ${ }^{m m}$ fiber technology provides excellent coefficient of friction properties, while Dyneema ${ }^{\circ}$ provides high strength, superior abrasion resistance, and low elongation. Q-12 Defender is flexible, UV resistant, lightweight, and does not hockle.

Product Code:
862
Splice:
12 - Strand Class II

Fiber (Core/Cover): Specific Gravity: Dyneemå Poly - Nylon Blend 1.04

Manufacturer:
Samson Rope Technologies, Inc.

## Features

- Easy to inspect
- Easy to splice
- Excellent UV resistance
- High coefficient of friction, great for working off bitts and capstans
- Meets the requirements of the Canadian National Standard CGSB-40.20-2008
- Reduced recoil property, quantified per Cordage Institute Standard 1502

## Applications

- Primary Mooring Line /

Non-jacketed

- Secondary Mooring Line
- SVMS Component

## Q-12 Defender ${ }^{\text {rw }}$
