

TCP's Solutions Integrate with Major ERP, HCM & Payroll Systems

TCP Direct Integrations

TCP Software provides seamless integrations with most major ERP and HCM solutions to combine best-of-breed time collection with the powerful systems already in place at your organization. TCP's wide array of time collection tools are highly configurable, which allows you to create a streamlined, customized employee experience that mitigates wasted time and outdated practices. The variety of options available—mobile apps, browser-based applications, touchless time clocks, biometrics and more—allows you to truly optimize your day-to-day. Furthermore, data from your ERP or HCM system is readily available for validation purposes directly from the time collection devices, making whichever device you're operating a valuable extension of your existing solution.

Payroll Integrations

For many organizations, the payroll process is a multi-day affair that drains time, money and valuable resources. With integrations into all major payroll systems, TCP's solutions will ensure your payroll process will go from days to hours, while eliminating costly errors and providing a smoother experience for your employees. Whether you're using ADP, QuickBooks, Paychex or any other major provider, automating your payroll process using our tools will allow you to swiftly transfer employee hours and data directly into the payroll software you're currently using.
