

Munis Integration

With TCP, Customization Is Key

TCP (TimeClock Plus) developed the Payroll Export Modules for Munis customers due to the time-consuming process of calculating employee information, entering that information into payroll, and the risk of manual error. We take the next step in the payroll automation process by allowing management to easily export employee hours directly to Munis through user-friendly payroll reports.

Munis for Your Organization

- Accurately populate the Gross Data template to import all wages earned into payroll.
- Accurately populate the Leave/Substitute Pay template to import all leave and substitute pay into payroll.
- Accurately assign federal program funds to pay professional leave substitutes.

Integration Capabilities

Preventing errors during your payroll process saves you valuable time and money. That is why we created a specialized Payroll Interface Modules (PIM) group that dedicates the development, testing, deployment and support of interfaces between TCP and payroll software like Munis. Create unique configurations including:

- **Jobs:** Accurately charge fund sources
- **Roles:** Fit every class of employee through a variety of methods
- **Dashboards:** Display attendance and overtime, among other settings
- **Reports:** Manager receive automatic updates on figures that affect day-to-day operations

Accuracy Is Everything

In payroll, accuracy is everything. Anything less can result in problems with upset employees, damaged credibility with HR, and even wage-and-labor noncompliance penalties. Accurate time and attendance demands technology that ensures compliance and captures every process, rule and exception. You need flexibility and personalization to account for your unique needs and you deserve a partner with not only the expertise but also a shared desire to make your entire payroll system work flawlessly—for you and your people.

“TCP has allowed our company to track hours worked more effectively and simplify our processes more than we would have been able to without it.”
