

ANIMAL ROYALE

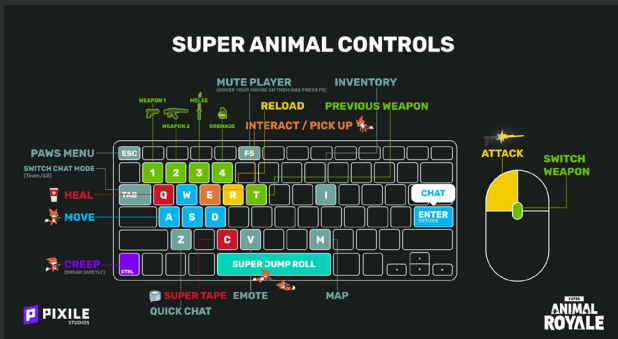

BEGINNER'S GAME GUIDE

ABOUT THE GAME

Super Animal Royale is a free-to-play top-down 2D battle royale developed by Pixile Studios and published by Modus Games. Players control an animal and battle it out in an up to 64 player lobby using various weapons to eliminate other players and claim victory.

Unlike many other games, there is no ranked system. There is only a leveling system. Collect hundreds of animal breeds through the DNA system. Customize them with thousands of cosmetic items, weapons, outfits, and even umbrellas! Additionally, there are events and updates filled with seasonal items and new content.

HOW TO PLAY

The core of the game includes weapons, armor, and items in 64 player online matches. You can make use of hamster balls and emus to explore the map or crush your enemies.

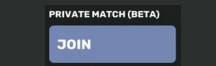

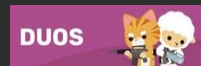

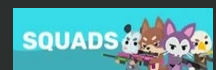

Note: The controls shown in the screenshot are default for PC. Click on the image to see controls for all platforms!

ANIMALS

At the Research Lab, players can use Animal DNA and Super Serum they've collected from playing games to create new Animals to play. Players can also use the Super DNA Magnets to earn DNA for a specific animal for the next 3 games they play.

GAME MODES

There is Solo, Duos, Squads, Rotating Game Mode, and Private Match.

COSMETICS

Cosmetics can be purchased in-game using in-game currency that is either free or paid for. Super Animal Royale introduces a seasonal Animal Pass to earn additional cosmetics. In The Archive, each seasonal Animal Pass becomes archived when the season is over. These can be continued to be unlocked alongside the current season's pass.
